**Your reliable
partner for
intelligent
solutions.**

We are going digital. Come with us!

coviva-Smartbox
communicative and secure –
the coviva-Smartbox is the
communication link
between the app and the
end devices.

Everyone is talking about digitisation. We use it systematically to simplify your life.

Daniel Hager
Chairman of the Executive Board of the Hager Group

Dear friends and partners,

There is almost nothing that will remain unaffected by digitisation in the near future. For us that means: networked products, transparent processes and even more open exchange of experience with our customers and partners. Regardless of the developments that take place – we at Hager will be at your side with commitment and dedication.

The Internet of Things (IoT) is moving inexorably into private households. Intelligent objects from well-known manufacturers are bringing real benefits into your own four walls. Controlled by an app, they are replacing the functions of classical electrical installations one step at a time. Straightaway a risk that we need to confront with our new IoT Controller. By linking intelligent objects to the KNX-controlled house, we create real added value for the electrical trade, which will be part of this future trend, but also for builders, who gain a secure future with KNX and can control all building functions with only one app – the IoT app from Hager.

In turn, we help end customers who renovate with our smart home solution coviva enjoy a definite increase in convenience, since coviva does not require modifying the structure of the building thanks to wireless technology.

In functional buildings, the agardio.manager makes consumption transparent. It is based on plug-and-play installation and quickly provides comprehensive energy monitoring with a conventional browser. And these examples can be continued without end.

Cooperation with you – our partners in the trades and wholesaling – will also change. With apps and software, we will help you plan better and order more conveniently. We will shorten noticeably the path from customer request to perfect solution offering that required many twists and turns in the analogue world.

In other words: We at Hager will support you in the digital world and help you be successful in it. At the same time, you can continue to rely on the quality of the electrotechnical products and solutions that you have come to trust over more than 60 years. We are excited about our common and heady digital future that is just beginning.

We look forward to working with you.

Sincerely,

A handwritten signature in black ink, appearing to read 'Daniel Hager', with a horizontal line extending to the right.

One family

The world is changing, and we are changing with it. As a family company, we have grown steadily over the last sixty years to become a reliable partner to expert technicians and electrical wholesalers around the world. All while remaining true to ourselves and to our values. And so we continue today, with a number of well-known brands – each with their own distinctive strengths – working together under the Hager Group umbrella.

Hager Forum in Obernai, France, is a place where we can work with customers and partners to shape the future. That makes it a perfect symbol of the innovative power of Hager Group.

hagergroup

Your trust

As a partner and customer, you can choose from the entire range of products and services offered by every member of our brand family. Our new corporate image highlights our shared strengths even more clearly. From now on, each of our brands will be easily recognisable as a 'Member of Hager Group'. The new corporate image also involves some colour and design changes. Our core promise remains the same: we will always work with you to succeed together.

Our strengths

We have huge opportunities ahead. The upcoming modernisation of existing buildings, intelligent building technology, digital services, new energy sources and technologies – all of this opens up new, exciting potential for you and for us. At the same time, business requirements are becoming more and more complex. That's why it's so important for you to have Hager Group specialists supporting you with all of their expertise. Together, we are stronger. Together, we will overcome the complex challenges of our time with simple, impressive solutions – just as we have been doing for the last six decades.

E3

Global warming, a shortage of natural resources, social cohesion and the transition to renewable energy: there are many challenges facing businesses and society today. Hager Group is pursuing a variety of initiatives to promote sustainable development with its “E3” approach.

Environ

E for Environment

We work continuously to reduce our carbon footprint. Our priorities include optimising the transport of our products and cutting the amount of energy we use in production to further reduce our Carbon footprint.

Ethics

E for Ethics

We need skilled, motivated and healthy employees in order to offer our customers the best services and products. That's why we provide all our team members with a safe, healthy working environment, support their professional growth and offer them opportunities for further development. We also promote diversity and adherence to an Ethics Code throughout the company.

ment

Energy

E for Energy

Hager Group helps its customers to save energy intelligently. We also analyse and optimise our products' environmental performance throughout development and production. By providing a detailed environmental profile for most of our products, we can be fully transparent with our customers and ourselves.

Technology as a friend

Hager Design turns technical products into familiar friends.

Before we start designing a new product, we think about the people it is going to serve. Will it assist or entertain, observe or protect, save time or save energy? Ideally, whatever it does, users will feel it is a reliable 'friend'. We need to know how to connect with people on an emotional level, to ensure that in return they feel connected to our products.

Technology for people

Responsible design builds on an ethical foundation. At Hager, this foundation is all about respecting people and caring about their well-being. And it's not just about today – we want to inspire our customers for years to come. That's why we include them in every stage of the design process – from installer to planner, to end user.

An honest brand

Hager products are world-renowned for their quality, which is visibly and tangibly unveiled in their design. The unmistakable, explicit and clear brand image tells customers straight away that these products are part of 'the family'. This is our signature, the Hager DNA, which embodies two central principles.

Friendly, serene, balanced: an honest, authentic design that blends naturally into everyday life, without gadgets or cheap effects.

Erwin van Handenhoven
Hager Group Design Director

Ingeniously simple: our products are important, but never over-the-top. If it's not necessary, we leave it out. The essence remains. Straightforward in both form and function: simple to install, simple to use. Simply Hager!

Looking ahead to the future

Hager systems are not stagnant – they are expanding, gaining more and more visibility in our customer's homes. This has implications for our present design language. We call it 'New Start'. The aim of New Start is to meet our customers where they are, and carry them with us into the future: with innovative ideas, new designs and expressive materials. The new Hager catalogue is full of 'New Starters' – along with lots of 'old friends'. Come and explore!

Berker stands for exceptional design.

Little details that make a big difference

Why Berker socket outlets are simply good

It's often the small details that make a big difference. Berker's sockets are a perfect example of this: we have been producing them for over 90 years, and specialist craftspeople use them every day. And there are always product details which can be improved - and, when taken together, can make a major difference.

- Compact housing with sturdy, closed base
- Rugged supporting ring without sharp edges
- New supporting ring contour for easy alignment and screwing in
- Easy-to-connect conductor
- Open claw geometry prevents damage to the conductors during assembly
- No parasitic voltage thanks to electrical isolation
- Flexolift claw vanishes completely into the base
- Release or screwing-in in just 4 to 5 rotations

We have even optimised the packaging, and thus handling on the building site: in a 10-pack, the centre plates are separated from the inserts and can be mounted according to your normal installation methods. In addition, the centre plates are well-protected by film - a sensible detail to save time and money.

- **High-quality supporting ring** _____ sturdy, with no sharp edges, and additional screwing options for easy installation on soft surfaces
- **Optimal supporting ring contours** _____ marked for precise alignment at the place of installation
- **Test marks on the base** _____ for visibility in every mounting state
- **Easy-to-operate release buttons** _____ for rapid release of conductors during disassembly
- **Cross-head claw screws** _____ with optimised thread for 3x faster installation/disassembly
- **Labelling field on the supporting ring** _____ for clear labelling of the electric circuit
- **Cross-head screw in centre plate** _____ for perfect grip of tool during installation
- **Marking on base** _____ for precise stripping of conductors
- **Sturdy, enclosed base** _____ for safe, secure installation, installation depth 31.2 mm
- **Galvanic separation of the supporting ring** _____ for safe working with no parasitic voltage
- **Open claw geometry** _____ prevents damage to conductors during installation
- **Claws are accommodated in base** _____ when fully retracted, for easy insertion/positioning in the switch box and reduced risk of injury
- **Optimised terminal design** _____ for easier insertion of conductors
- **Screw-in lift terminals¹** _____ for rapid connection and secure positioning

¹ Only in socket outlets with screw-in lift terminals

Admittedly, we're still a bit proud. In the Modul system, we found a principle which has not lost any of its attraction. Using the Modul system, switches can still be replaced easily, even after years have passed, and, for example, be adapted to a new room design, without any need to replace the switch insert. For your customers, this means less building mess, more flexibility in room planning and increased general satisfaction with their electrical equipment. Our Modul system can also offer you many advantages, such as less storage and lower mounting costs. As well savings in terms of time and money. In addition, we have designed the switches and inserts to be completely uncomplicated in mounting and handling.

Flat appearance of the mounted switch and pleasant feel during operation through the very small switching angle of 3.5°

High level of operating comfort through precise rocker guidance

Flexolift claws ensure a tight fit and forced return when released

Cable protection around the claw screws prevents conductor damage

Laser engraving of the circuit diagram, circuit symbols, article number and conductor insulation length on the rear side of each switch

Easy-to-operate lever release catches to free the conductors

Installation of neon lamp units at a later date possible without dismantling

- **High-quality supporting ring** — sturdy, with no sharp edges, and additional screwing options for easy installation on soft surfaces
- **Optimal supporting ring design** — marked for precise alignment at place of installation
- **3.5° Switching angle** — for a flat profile and easy switching
- **Modular design** — with accomodation of all rocker types
- **Large clearance around the claw screw** — with combination cross-head screws for easy installation
- **Variable 4-pin mount** — for precise seating of rockers
- **Clip-in neon/glow lamp unit** — for exact positioning on the supporting ring, can be used as control or orientation light
- **Moulded lever release catches** — for easy release of conductors
- **Labelling on reverse of switch** — circuit diagram/graphical symbol, conductor stripping-guide, high contrast for good legibility
- **Article number** — > on front side
- **Voltage test from front side** — for a voltage test in installed state
- **Cable protection** — to prevent damage to the conductors by the claw screws
- **Flexolift claws®** — flush-fitting positioning of claws and automatic reset upon release
- **Minimal installation depth** (special designs) — for plenty of space for installation of an insert or hollow-wall mounting

This catalogue contains our solution offerings for switch ranges, electromechanical and electrotechnical installation applications as well as for building control systems. On the one hand, you can find the Berker brand switch ranges and KNX sensors.

In addition, the catalogue contains the Hager brand solutions in the area of KNX system units, Domovea, KNX actuators, KNX flush-mounted and surface-mounted devices, modular devices for light technology, smoke alarms as well as motion and presence detectors.

In this way, you have a comprehensive overview of our switch ranges and building control systems.

Light control

Our products and solutions for light control are perfectly coordinated with each other: you can easily modernise add to or replace elements from your setup at any time. This means that all rockers, covers and electronic application modules in our range are suitable for the flush-mounted inserts. What's more, our switches, dimmers and time switches can be combined with all the switch ranges. Brilliant design in conjunction with reliable and intelligent functionality.

Residual current circuit-breakers

IP20

Residual current circuit-breaker

Rated voltage	230 V~	– with plug-in terminals		
Rated current	16 A	– without spreader claws		
Frequency	50/60 Hz	– with push-button for switching on/off		
Measurement error current	30 mA	– to protect downstream loads		
Short-circuit resistance (with back-up fuse 16 AgL)	3 kA	– type A for alternating currents and pulsating direct currents		
Surge current resistance	3000 A (8/20) µs		Suitable for	Order no.
Operating temperature	-25 ... +40 °C		50 x 50 mm centre plate for RCD protection switch	1496 0 ..
Trigger time	≤ 30 ms at 5 times rated residual current		50 x 50 mm centre plate for RCD protection switch	1496 1 ..

▶ 893

Connection terminals according to IEC 60884-1
Tested according to IEC/EN61008-1

Electronics platform

Switch inserts

Relay insert

▶ 896

Operating voltage	230 V~	- low intrinsic energy requirement
Frequency	50/60 Hz	- with extension unit input for push-button (NO contact), single-surface operation and motion detector extension unit
230 V incandescent lamps and halogen lamps	2300 W	- also usable as push-button relay switch
230 V LED lamps	440 W	- no conductive connection between supporting ring and spreading claws
Dimmable energy-saving lamps	440 W	- with screw terminals
Dimmable conventional transformers	1500 VA	
Electronic transformers and dual-mode transformers	1500 W	
Fluorescent lamps:		
- uncompensated	1100 VA	
- parallel compensated	1000 W /130 µF	
- in Duo circuit	1000 W	
- with electrical ballast (EB)	1000 W	
Compact fluorescent lamps with electronic ballast	22 x 20 W	
Minimum contact load	≈ 15 W	
Number of substations	unlimited	
Operating temperature	-5 ... +45 °C	
Cable length, extensions	max. 50 m	
Load cable length	max. 100 m	
Screw terminals (max.)	2 x 1.5/1 x 2.5 mm ²	
Claw guidance installation depth	32 mm	

Not suitable for installation in surface-mounted housing.
Comprehensive transmission and reception functions, in conjunction with a KNX radio application module.

Design	Order no.	PU
Relay insert	8512 12 00	1

Switch insert 1gang

▶ 896

ε

Operating voltage	230 V~
Frequency	50/60 Hz
230 V incandescent lamps and halogen lamps	25 ... 400 W
Dimmable 230 V LED lamps	5 ... 70 W
Dimmable energy-saving lamps	13 ... 80 W
Dimmable conventional transformers	25 ... 400 VA
Electronic transformers and dual-mode transformers	25 ... 400 W
Number of substations	unlimited
Operating temperature	-5 ... +45 °C
Cable length, extensions	max. 50 m
Load cable length	max. 100 m
Screw terminals (max.)	2 x 1.5/1 x 2.5 mm ²
Installation depth	32 mm

- low intrinsic energy requirement
- optimisation of the dimming performance by fine adjustment of the load type and special adjustment mode
- automatic setting of load-dependent switching principle (autoDetect process)
- bulb-preserving soft startup
- short-circuit and overload proof (electronic fuse)
- with extension unit input for push-button (NO contact), single-surface operation and motion detector extension unit
- no conductive connection between supporting ring and spreading claws
- with screw terminals

Only suitable for operation with dimmable loads!

Caution!

Only connect **dimmable** 230 V ESL or LED lamps.
Do not connect inductive and capacitive loads jointly.
Comprehensive transmission and reception functions, in conjunction with a KNX radio application module.

Design	Order no.	PU
Switch insert 1gang	8512 11 00	1

DALI/DSI control devices

DALI/DSI control insert

Operating voltage	230 V~
Frequency	50/60 Hz
DALI voltage	16 V= (10.5 ... 22.5 V=)
Output current	max. 40 mA
Power consumption (standby)	< 0.4 W
Number of substations	unlimited
- passive operation (with external power supply)	max. 64
Quantity of DALI/DSI devices:	
- active operation	max. 20
Operating temperature	-5 ... +45 °C
Cable length, extensions	max. 100 m
DALI cable length at 1.5 mm ²	max. 300 m
Screw terminals (max.)	2 x 1.5/1 x 2.5 mm ²
Installation depth	32 mm

- low intrinsic energy requirement
- automatic detection of DALI/DSI devices
- remote control with KNX radio hand-held/wall-transmitters in combination with KNX radio buttons
- automatic selection of operating mode (active/passive)
- supplies the system voltage for additional DALI users when connected to mains voltage
- switch-on brightness level can be stored safe after power failure
- for switching and controlling of electronic ballasts and Tronic transformers with DALI/DSI interface
- with electronic short-circuit and overload protection
- with extension unit input for push-button (NO contact)
- control information is send centrally to all users in the DALI/DSI network (Broadcast)
- no conductive connection between supporting ring and spreading claws
- with screw terminals

Not suitable for combining with other DALI systems.
DALI Bus communication in Broadcast mode according to IEC 62386-102

Design	Order no.	PU
DALI/DSI control insert	8542 17 00	1

Control current	100 mA
230 V incandescent lamps and halogen lamps	20 ... 500 W
Dimmable 230 V LED lamps	typ. 3 ... 100 W
Compact fluorescent lamps	typ. 3 ... 100 W
Dimmable conventional transformers (R, L)	20 ... 500 VA
Number of built-in power boosters (R, L)	max. 10
Conductor cross-section	1 mm ² ... 2.5 mm ²
Axis dimension Ø	4 mm
Ambient temperature	+5 ... +45 °C
Dimmable conventional transformers with NV-LED	20 ... 100 VA

- phase cut-on
- basic brightness programmable
- with change-over pressure switch
- voltage test possible without dismantling
- short-circuit and overload proof (fine-wire fuse)
- with spare fuse
- with terminal for base load from mains isolator
- with plug-in terminals

Possible to change fuse without removing cover.

Design	Order no.	PU
Rotary dimmer (R, L, LED)	2873	1

Tronic rotary dimmer 525 W (R, C)

▶ 878

- soft locking

Operating voltage	230 V~
Frequency	50 Hz
230 V incandescent lamps and halogen lamps	20 ... 525 W
Electronic transformers	20 ... 525 W
Number of built-in Tronic power boosters (R, C)	max. 10
Number of universal power boosters, 500 W	max. 10
Axis dimension Ø	4 mm

- bulb-preserving soft startup
- phase cut-off
- very low noise
- with change-over pressure switch
- expandable with universal power boosters RMD Plus with load cable switched in parallel
- voltage test possible without dismantling
- short-circuit and overload proof (electronic fuse)
- with terminal for base load from mains isolator
- with plug-in terminals

Trouble-free operation will be obtained only with Berker Tronic transformers.

Design	Order no.	PU
Tronic rotary dimmer 525 W (R, C)	2874	1

Rotary dimmer (R, L, C)

- soft locking

Operating voltage	230 V~
Frequency	50/60 Hz
230 V incandescent lamps and halogen lamps	50 ... 420 W
Dimmable conventional transformers	50 ... 420 VA
Electronic transformers	50 ... 420 W
Number of built-in Tronics or power boosters (R, L) - with identical load type	max. 10
Number of universal power boosters, 420 W at phase control	max. 5
Number of universal power boosters, 500 W for phase cut-off	max. 10
Axis dimension Ø	4 mm

- with input for extension units insert for universal rotary dimmer
- with brightness memory
- bulb-preserving soft startup
- phase cut-on or cut-off according to load type, self-learning
- very low noise
- expandable with universal power boosters RMD Plus with load cable switched in parallel
- with incremental encoder
- voltage test possible without dismantling
- short-circuit and overload proof (electronic fuse)
- with plug-in terminals

Trouble-free operation will be obtained only with Berker Tronic transformers.

Do not connect conventional transformers together with electronic transformers.

Design	Order no.	PU
Rotary dimmer (R, L, C)	2861 10	1

Extension units insert for universal rotary dimmer

- soft locking

Operating voltage	230 V~
Frequency	50/60 Hz
Number of substations	max. 5
Axis dimension Ø	4 mm

- as extension unit for universal rotary dimmer
- voltage test possible without dismantling
- with incremental encoder
- with plug-in terminals

Design	Order no.	PU
Extension units insert for universal rotary dimmer	2862 10	1

Rotary potentiometers DALI

Rotary potentiometer DALI

- soft locking

DALI voltage	16 V= (9.5 ... 22.5 V=)
Current consumption	< 2 mA
Quantity of DALI devices	max. 64
DALI cable length at 1.5 mm ²	max. 200 m
Axis dimension Ø	4 mm

- for wiring in parallel (last potentiometer setting applicable)
- basic brightness programmable
- e.g. for fluorescent lamps and LV halogen lamps
- for switching and controlling electr. ballasts and Tronic transformer with DALI interface
- with on/off pressure switch
- control is effected by central telegram (broadcast)
- short-circuit and overload proof (fine-wire fuse)
- with spare fuse
- with screw terminals

Possible to change fuse without removing cover.

Not suitable for combining with other DALI sensors or central units.

DALI draft according to DIN IEC 60929

Power supply required to DALI specifications
DIN IEC 60929 required

Design	Order no.	PU
Rotary potentiometer DALI	2897	1

DALI rotary potentiometer with power supply

▶ 880

- soft locking

Rated voltage	230 V~
Frequency	50/60 Hz
DALI voltage	16 V=
Output current	max. 52 mA
Power consumption	≤ 2 W
Quantity of DALI devices with an active DALI potentiometer	26
Quantity of DALI devices with 4 active DALI potentiometers in parallel	104
DALI cable length at 1.5 mm ²	max. 200 m
Axis dimension Ø	4 mm

- supplies the necessary control current for additional DALI users in the active operation to mains vo
- without mains voltage in passive operation on DALI voltage the unit serves as an additional control
- parallel connection of max. 4 active DALI potentiometers possible
- switch-on brightness level can be stored safe after power failure
- basic brightness programmable
- e.g. for fluorescent lamps and LV halogen lamps
- for switching and controlling electr. ballasts and Tronic transformer with DALI interface
- with on/off pressure switch
- control is effected by central telegram (broadcast)
- with incremental encoder
- short-circuit and overload proof (electronic fuse)
- with screw terminals

Not suitable for combining with other DALI sensors or central units.

DALI draft according to DIN IEC 60929

Design	Order no.	PU
DALI rotary potentiometer with power supply	2898	1

1-10 V Rotary potentiometers

1-10 V rotary potentiometer

▶ 879

- soft locking

Operating voltage	230 V~
Frequency	50/60 Hz
Switching current	6 A
Control current	50 mA
Axis dimension Ø	4 mm

- basic brightness programmable
- e.g. for fluorescent lamps and LV halogen lamps
- for switching and controlling electronic ballasts and 1 - 10 V Tronic transformers, 105 W
- with on/off pressure switch
- short-circuit and overload proof (fine-wire fuse)
- with spare fuse
- with screw terminals

With excessive switch-on currents, use switching current limiters order no. 185.

To ensure same illumination, use only electronic ballasts and fluorescent lamps from the same manufacturers.

Possible to change fuse without removing cover.

When using LV halogen lamps, we recommend the 1 - 10 V Tronic transformer, 105 W, order no. 2977.

Interface according to DIN EN 61347-2-3

Design	Order no.	PU
1-10 V rotary potentiometer	2891 10	1

1 - 10 V push-button rotary potentiometer, NO contact

▶ 879

- soft locking

Operating voltage	230/240 V~	- e.g. for fluorescent lamps and LV halogen lamps
Frequency	50/60 Hz	- for activation of pulse relays
Momentary-contact current	max. 2 A	- with push-button, NO contact
Control current	50 mA	- for controlling electronic ballasts and Tronic transformers with 1 - 10 V interface, 105 W
Axis dimension Ø	4 mm	- short-circuit and overload proof (fine-wire fuse)

- e.g. for fluorescent lamps and LV halogen lamps
- for activation of pulse relays
- with push-button, NO contact
- for controlling electronic ballasts and Tronic transformers with 1 - 10 V interface, 105 W
- short-circuit and overload proof (fine-wire fuse)
- with spare fuse
- with screw terminals

With excessive switch-on currents, use switching current limiters order no. 185.

To ensure same illumination, use only electronic ballasts and fluorescent lamps from the same manufacturers.

Possible to change fuse without removing cover.

When using LV halogen lamps, we recommend the 1 - 10 V Tronic transformer, 105 W, order no. 2977. Interface according to DIN EN 61347-2-3

Design	Order no.	PU
1 - 10 V push-button rotary potentiometer, NO contact	2896 10	1

Covers for rotary dimmers/rotary potentiometers

Marked items are only suitable for splash-protected IP44 flush-mounted installation when used in conjunction with the corresponding sealing set.

Centre plate for rotary dimmer/rotary potentiometer

- setting knob

Electronic timers

Time relay insert

Operating voltage	230/240 V~	- electronic timer with on/off pressure switch
Frequency	50/60 Hz	- with extension unit input for push-button (NO contact)
230 V incandescent lamps	1500 W	- is switched off when actuated in the switched-on state
230 V halogen lamps	300 W	- with red control LED
Conventional transformers	1000 VA	- short-circuit and overload proof (fine-wire fuse)
Electronic transformers	1500 W	- with spare fuse
Fluorescent lamps:		- very low noise
- parallel compensated	150 VA	
- in Duo circuit	1000 VA	
- uncompensated	500 VA	
Delay time, adjustable	≈ 1 min ... 1 h	
Axis dimension Ø	4 mm	
Conventional transformers	1000 VA	

For electronic ballasts and energy-saving lamps with excessive switch-on currents, use switch-on current limiters order no. 185.

Not suitable for installation in surface-mounted housing.

Design	Order no.	PU
Time relay insert	2948 10	1

Centre plate for time relay insert

Suitable for degree of protection IP44

¹⁾ Only single lighting possible

Glow and neon lamp units

 Marked items are only suitable for splash-protected IP44 flush-mounted installation when used in conjunction with the corresponding sealing set.

Glow lamp unit with N-terminal

▶ 870

Not suitable for push-button and pullcord switches, rocker switches and rocker push-buttons from the years 1985 to 1995.

Refer to the overview for the matching flush-mounted inserts.

- for illumination and monitoring circuit
- for change-over/intermediate switch and on/off switch, 2-pole, 10 AX
- for rocker push-buttons and multiple rockers push-buttons, except order no. 503404, 503808
- for series switch illuminated

Design	Order no.	PU
brown, 6 V, 35 mA	1676	10
yellow, 12 V, 65 mA	1676 02	10
green, 24 V, 35 mA	1676 01	10
red, 48 V, 25 mA	1676 03	10

Neon lamp unit with N terminal

▶ 870

Not suitable for push-button and pullcord switches, rocker switches and rocker push-buttons from the years 1985 to 1995.

When several neon lamp units are used, the lamp current may result in malfunctioning of the relay/pulse relay. Remedy: Carry along a neutral conductor or connect a capacitor 230 V (1 µF per 10 mA neon lamp current) in parallel with the coil.

Refer to the overview for the matching flush-mounted inserts.

- for illumination and monitoring circuit
- for change-over/intermediate switch and on/off switch, 2-pole, 10 AX
- for rocker push-buttons and multiple rockers push-buttons, except order no. 503404, 503808
- for series switch illuminated

Design	Order no.	PU
grey, 230 V~, 1 mA	1675	10
orange, 230 V~, 0.4 mA	1675 04	10

Neon lamp unit with N terminal

▶ 870

Not suitable for water-protected installations with IP44 degree of protection.

Suitable for push-button and pullcord switches, rocker switches and rocker push-buttons for the years 1985 to 1995.

Not suitable for water-protected, flush-mounted installation IP44.

When several neon lamp units are used, the lamp current may result in malfunctioning of the relay/pulse relay. Remedy: Carry along a neutral conductor or connect a capacitor 230 V (1 µF per 10 mA neon lamp current) in parallel with the coil.

Refer to the overview for the matching flush-mounted inserts.

- for illumination and monitoring circuit
- for pullcord switch

Design	Order no.	PU
grey, 230 V~, 1 mA	1605 10	10
orange, 230 V~, 0.4 mA	1605 14	10

Neon lamp unit for switches/push-buttons

▶ 871

When several neon lamp units are used, the lamp current may result in malfunctioning of the relay/pulse relay. Remedy: Switch a capacitor 230 V (1 µF per 10 mA neon lamp current) in parallel with the coil.

Refer to the overview for the matching flush-mounted inserts.

- for illumination and monitoring circuit
- with neon lamp unit
- for on/off switch, 2-pole, 16 AX
- for rockers switches double change-over
- for rockers push-buttons double change-over

Design	Order no.	PU
grey, 230 V~, 0.9 mA	1600 02	10

Neon lamp unit for on/off switch 3pole

▶ 871

Refer to the overview for the matching flush-mounted inserts.

- for illumination and monitoring circuit

Design	Order no.	PU
clear, transparent, 400 V~, 0.5 mA	1600	10

LED units

- low storage and logistics costs by reduction to only three variants
- long service life of the LED

Marked items are only suitable for splash-protected IP44 flush-mounted installation when used in conjunction with the corresponding sealing set.

LED unit 230 V, for switches/push-buttons

Service life of the LED ≈ 100000 h

Not suitable for push-button and pullcord switches, rocker switches and rocker push-buttons from the years 1985 to 1995.

When several LED units are used, the LED current may result in malfunctioning of the relay/pulse relay. Remedy: Carry along a neutral conductor or connect a capacitor 230 V (1 μ F per 10 mA LED current) in parallel with the coil.

Refer to the overview for the matching flush-mounted inserts.

- also for waterproof installation of switches and push-buttons
- for illumination and monitoring circuit
- for change-over/intermediate switch and on/off switch, 2-pole, 10 AX
- for rocker push-buttons and multiple rockers push-buttons, except order no. 503404, 503808
- for series switch illuminated

Design	Order no.	PU
white, 230 V~, 1 mA	1686	10
black, 230 V~, 0.4 mA	1686 01	10

LED unit for switches/push-buttons

Service life of the LED ≈ 100000 h

Not suitable for push-button and pullcord switches, rocker switches and rocker push-buttons from the years 1985 to 1995.

Connection to direct voltage within the specified voltage range, ensuring the correct polarity.

Refer to the overview for the matching flush-mounted inserts.

- also for waterproof installation of switches and push-buttons
- for illumination and monitoring circuit
- for change-over/intermediate switch and on/off switch, 2-pole, 10 AX
- for rocker push-buttons and multiple rockers push-buttons, except order no. 503404, 503808
- for series switch illuminated

Design	Order no.	PU
blue, 12 ... 48 V AC/DC, 0.2 ... 0.9 mA	1687	10

LED unit with N terminal for series switch

Not suitable for installation in surface-mounted housing.

Not suitable for push-button and pullcord switches, rocker switches and rocker push-buttons from the years 1985 to 1995.

Refer to the overview for the matching flush-mounted inserts.

- for control circuit per series
- with screw terminal

Design	Order no.	PU
black, 230 V~, 0.9 mA each	1680	1

Lock cylinders

Lock cylinder

length 40 mm

In key switches, the key can be pulled out in the ON position in the appropriate bolt position.

With 5 tumblers to according to DIN 18252

- for switches/push-buttons for lock cylinders
- for change-over switches/push-buttons for lock cylinders
- with 3 keys

Suitable for	Order no.	Page
Change-over switch 2pole for lock cylinders	3826 10	33

Rockers for accessible construction

- for rockers with lenses, the IP44 degree of protection can only be achieved in conjunction with the appropriate neon, incandescent or LED lamp unit.
- for the matching contrast frame for visual highlighting, refer to the appropriate Design line.
- SCHUKO socket outlet with tactile symbol (see corresponding design line)

The following rockers are conformant with DIN 18024-2 and DIN 18025-1 and -2.

Marked items are only suitable for splash-protected IP44 flush-mounted installation when used in conjunction with the corresponding sealing set.

Rocker for barrier-free construction

- **guide for mouth rod** - for illumination and monitoring circuit
- **lens**

Lenses in clear with symbol for light, bell, door opener and neutral in clear and red transparent enclosed.

Push-buttons 42 V

42 V push-button, NO contact AP with cover plate flush-mounted

Rated voltage	42 V~	– with screw terminals		
Momentary-contact current	1 A			
Dimensions (L x W)	80 x 80 mm			
Only for Germany				
For the special installation conditions in the new federal states.				
		Suitable for 42 V frame with clamping ring surface-mounted	Order no. 9 1032 0 ..	Page 69

Design	Order no.	PU

Motion detectors

Forget fumbling in the dark for the light switch! A motion detector switches the light on automatically when motion is detected on the staircase or in front of the house door. This is not only convenient, but also deters unwanted visitors. Presence detectors can do even more: they respond to the presence or absence of a person as well as incidence of daylight, and control the lighting accordingly. In office buildings or even hotels, these can also help to save energy.

Inserts

Relay insert

▶ 896

Operating voltage	230 V~	– low intrinsic energy requirement
Frequency	50/60 Hz	– also usable as push-button relay switch
Minimum contact load	≈ 15 W	– with extension unit input for push-button (NO contact), single-surface operation and motion detector extension unit
230 V LED lamps	440 W	– no conductive connection between supporting ring and spreading claws
Dimmable energy-saving lamps	440 W	– with screw terminals
230 V incandescent lamps and halogen lamps	2300 W	
Fluorescent lamps:		
- uncompensated	1100 VA	
- parallel compensated	1000 W /130 µF	
- in Duo circuit	1000 W	
- with electronic ballast (EB)	1000 W	
Compact fluorescent lamps with electronic ballast	22 x 20 W	
Dimmable conventional transformers	1500 VA	
Electronic transformers and dual-mode transformers	1500 W	
Number of substations	unlimited	
Operating temperature	-5 ... +45 °C	
Cable length, extensions	max. 50 m	
Load cable length	max. 100 m	
Screw terminals (max.)	2 x 1.5/1 x 2.5 mm ²	
Claw guidance installation depth	32 mm	

Not suitable for installation in surface-mounted housing.
Comprehensive transmission and reception functions, in conjunction with a KNX radio application module.

Design	Order no.	PU
Relay insert	8512 12 00	1

Switch insert 1gang

▶ 896

Operating voltage	230 V~	– low intrinsic energy requirement
Frequency	50/60 Hz	– optimisation of the dimming performance by fine adjustment of the load type and special adjustment mode
Dimmable 230 V LED lamps	5 ... 70 W	– automatic setting of load-dependent switching principle (autoDetect process)
Dimmable energy-saving lamps	13 ... 80 W	– bulb-preserving soft startup
230 V incandescent lamps and halogen lamps	25 ... 400 W	– with extension unit input for push-button (NO contact), single-surface operation and motion detector extension unit
Dimmable conventional transformers	25 ... 400 VA	– short-circuit and overload proof (electronic fuse)
Electronic transformers and dual-mode transformers	25 ... 400 W	– no conductive connection between supporting ring and spreading claws
Number of substations	unlimited	– with screw terminals
Operating temperature	-5 ... +45 °C	
Cable length, extensions	max. 50 m	
Load cable length	max. 100 m	
Screw terminals (max.)	2 x 1.5/1 x 2.5 mm ²	
Installation depth	32 mm	

Only suitable for operation with dimmable loads!

Caution!
Only connect **dimmable** 230 V ESL or LED lamps.
Do not connect inductive and capacitive loads jointly.
Comprehensive transmission and reception functions, in conjunction with a KNX radio application module.

Design	Order no.	PU
Switch insert 1gang	8512 11 00	1

Touch dimmer (R, L)

▶ 896

Operating voltage	230 V~
Frequency	50/60 Hz
Power consumption (standby)	0.3 W
230 V incandescent lamps and halogen lamps	25 ... 400 W
Dimmable conventional transformers	25 ... 400 VA
Number of universal capacity enhancers	max. 2
Number of substations	unlimited
Operating temperature	-5 ... +45 °C
Cable length, extensions	max. 50 m
Load cable length	max. 100 m
Screw terminals (max.)	2 x 1.5/1 x 2.5 mm ²
Installation depth	32 mm

- low intrinsic energy requirement
- phase cut-on
- bulb-preserving soft startup
- switch-on brightness level can be stored safe after power failure
- with extension unit input for push-button (NO contact), single-surface operation and motion detector extension unit
- expandable with universal power boosters RMD Plus
- short-circuit and overload proof (electronic fuse)
- no conductive connection between supporting ring and spreading claws
- with screw terminals

Comprehensive transmission and reception functions, in conjunction with a KNX radio application module.

Design	Order no.	PU
Touch dimmer (R, L)	8542 11 00	1

Universal touch dimmer 1gang

▶ 896

Operating voltage	230 V~
Frequency	50/60 Hz
Power consumption (standby)	0.3 W
Dimmable 230 V LED lamps	5 ... 70 W
Dimmable energy-saving lamps	13 ... 80 W
230 V incandescent lamps and halogen lamps	25 ... 400 W
Dimmable conventional transformers	25 ... 400 VA
Electronic transformers and dual-mode transformers	25 ... 400 W
Number of substations	unlimited
Operating temperature	-5 ... +45 °C
Cable length, extensions	max. 50 m
Load cable length	max. 100 m
Screw terminals (max.)	2 x 1.5/1 x 2.5 mm ²
Installation depth	32 mm

- low intrinsic energy requirement
- optimisation of the dimming performance by fine adjustment of the load type and special adjustment mode
- automatic setting of load-dependent switching principle (autoDetect process)
- phase cut-on or cut-off according to load type, self-learning
- bulb-preserving soft startup
- with extension unit input for push-button (NO contact), single-surface operation and motion detector extension unit
- short-circuit and overload proof (electronic fuse)
- no conductive connection between supporting ring and spreading claws
- with screw terminals

Do not connect inductive and capacitive loads jointly.
Comprehensive transmission and reception functions, in conjunction with a KNX radio application module.

Universal touch dimmer 1gang	8542 12 00	1

Extension unit for motion detector

▶ 896

Operating voltage	230 V~
Frequency	50/60 Hz
Number of motion detector extension units	unlimited
Operating temperature	-5 ... +45 °C
Cable length, extensions	max. 50 m
Screw terminals (max.)	2 x 1.5/1 x 2.5 mm ²
Installation depth	32 mm

- low intrinsic energy requirement
- short-circuit and overload proof (electronic fuse)
- no conductive connection between supporting ring and spreading claws
- with screw terminals

Design	Order no.	PU
Extension unit for motion detector	8532 01 00	1

Motion detector covers

IR motion detector comfort 1.1 m

Nominal mounting height	1.1 m	– low intrinsic energy requirement
Detection field, rectangular shaped	≈ 12 x 16 m	– with button for on/off/automatic
Range, frontal	≈ 12 m	– LED application module/insert compatibility display
Range, side	each ≈ 8 m	– with operation and status LED, red/green/orange
Delay time, adjustable	≈ 10 s ... 30 min	– with memory function for presence simulation
Response brightness, adjustable	≈ 5 ... 1000 lx, ∞ lx (day)	– party function for switching on for 2 hours
Short time mode immunity time	200 ms ≈ 10 s	– teach function for response brightness via button
Operating temperature	-5 ... +45 °C	– with keylock
Assembling height	34 mm	– step operation with immunity time (e.g. for stair light/ impact current circuits)
		– μ-processor controlled mode of operation
		– with anti-dismantling protection

Continuous direct sunlight penetrating the upward-pointing detection level can result in failure of the motion detector.
Only suitable for indoor areas!

Presence detectors

IR presence detectors

IR presence detector

Operating voltage	230 V~	– operating modes: semiautomatic, automatic, teach-in, day, corridor, office, test mode
Frequency	50/60 Hz	– energy saving by means of presence and brightness-dependent ON and OFF switching of light
Power consumption (operation)	≈ 2.4 VA	– can only be used as a single unit
230 V LED lamps	20 x 20 W	– with potentiometers for setting the response brightness and delay time without dismantling
Energy-saving lamps	20 x 20 W	– with red and green acknowledge/receive LED
230 V incandescent lamps and halogen lamps	2300 W	– on push-button (NO), extension units can be switched on and off by retriggering
Conventional transformers	1500 VA	– with spring clips for ceiling installation
Electronic transformers	1500 W	– with screw terminals
Fluorescent lamps:		
- parallel compensated	1000 VA	
Recommended installation height	≈ 2.5 ... 3.5 m	
Detection angle	360°	
Detection field Ø, on floor	≈ 7 m	
Detection field Ø, at desk height	≈ 5 m	
Delay time, adjustable	≈ 1 min ... 1 h	
Operating temperature	-10 ... +60 °C	
Dimensions (Ø x H)	78 x 70 mm	
Installation opening Ø	60 ... 63 mm	
Installation wall thickness	10 ... 28 mm	

▶ 882

IP41

The purpose of the presence detector is to save energy by switching off lighting when unoccupied or when ambient light level is sufficient.
Application areas e.g. office buildings, schools, hotels and nursing homes.

IEC 60669-2-1

Connection terminals according to IEC 60669-1

 230 V incandescent lamps and halogen lamps 2300 W
 Recommended installation height ≈ 2.5 m
 Detection angle 220°
 Response brightness, adjustable ≈ 5 ... 1000 lx
 Delay time, adjustable 5 s ... 15 min
 Operating temperature -20 ... +55 °C

Switches on for the duration of the delay time when the minimum response brightness level is infringed and if people are detected.

Not suitable for installation in surface-mounted housing.

- can be used as a single unit, main device or extension unit
- energy saving by means of presence and brightness-dependent ON and OFF switching of light
- low intrinsic energy requirement
- with 2 operating modes: time- and light-dependent switch on or activation of a timer
- with potentiometers for setting the response brightness and delay time without dismantling
- with LED detection and mode indicator
- with crawl-under protection
- with cover elements to limit the detection field
- with potential-free NO contacts
- vertically slewing and horizontally rotating
- with cable entry
- with fitting material
- for wall and ceiling installation, corner installation with adapter
- with screw terminals

IP30

IR hand-held transmitter for motion detector comfort

▶ 882

Battery service life [years] ≈ 5
 Dimensions (L x W x H) 111 x 63 x 10 mm

For convenient configuration of supported presence detectors.

Required battery (CR 2032) is included in the scope of delivery.

- 3 configuration ranges for control, switch-off delay, brightness threshold
- setting of the brightness threshold manually, by default values or teach-in mode
- default settings can be selected for the brightness threshold daylight, office, corridor
- RC6 code
- additional acknowledgement LED for displaying the IR transmission

Blind control

Raising and lowering of blinds? A blind control can do even more than that! In addition to timer programming, you can also control blinds, roller shutters and awnings according to lighting conditions. This is made possible by brightness or twilight sensors. Precipitation and wind sensors retract the awning or close the windows if the weather changes. An anti-lockout device is also available, meaning that if the patio door is open, the blinds are prevented from lowering. This ensures more comfort and greater safety to boot.

Blind time switch

- display

Number of operation times for up/down	20
Running time	2 min
Astronomic time shift	± 2 h
Power reserve	≈ 24 h
Change-over time for change of direction	< 0.6 s
Minimum slat adjustment time	≈ 250 ms
Random number generator	± 15 min
Operating temperature	-5 ... +45 °C
Self-retaining for 2 min on button-press	> 0.5 s

Control using device buttons and programmed switching times.

Can be switched to orientation led by extension unit.

- party function, no execution of automatic, radio and extension unit commands (lock-out protection)
- with keylock
- reset function (to factory setting)
- LC display illuminated during operation
- LC display contrast is adjustable
- indication of the application module/insert compatibility in the display
- menu guidance available in German, English or French
- low intrinsic energy requirement
- with automatic summer-/winter time switching (can be switched off)
- with switchover manual/automatic mode
- astro programme for sunrise/sundown switching with city/country or co-ordinate input, individually adaptable
- holiday programme for random variation of the operation times in automatic operation
- 2 independent preset programme memories, individually adaptable
- with anti-dismantling protection

HVAC control

Whether with conventional thermostats or an electronic device, the advantages of targeted heating control are perfectly clear. The single-room temperature control is not only convenient – it also helps you to save energy. Sensors, temperature sensors and timer-programming capabilities also help to create your ideal indoor climate. To this end radiators and underfloor heating systems can also be integrated into the control network using valve drives for heating-valve bottom parts.

- time-controlled

Rated voltage	230 V~
Frequency	50 Hz
Switching current	10 mA ... 10 (4) A
Switching current at cos φ = 0.6	max. 4 A
Power consumption	≈ 1.2 W
Switching temperature difference	≈ 0.5 K
Room temperature setting range	5 ... 30 °C
Floor temperature setting range	10 ... 40 °C
Energy efficiency class	IV (2%)
Lithium cell power reserve [years]	≈ 10
Installation depth	25 mm

Not suitable for installation in surface-mounted housing.

- for underfloor heating control using room and/or floor temperature possible
- for heating or cooling mode
- for room and floor heaters
- with self-teaching heating curve
- temperature control range adjustable
- with integrated temperature sensor
- operating hours counter or energy consumption display adjustable
- with access protection
- with valve protection function
- with frost protection function
- timer for changing the temperature by the hour
- operating languages are adjustable: German, English, Dutch or French
- large, backlight display with text display
- type of actuator (currentless closed/open) adjustable
- PWM cycle time and hysteresis (for two-point control) settable
- control process PWM or 2-point (on/off) can be selected
- with switchover manual/automatic mode
- 3 blocks of days: Mon-Fri, Sat-Sun, Mon-Sun
- 3 preset time programmes, individually adjustable
- max. 9 switching times per weekday
- programmable with operating unit removed
- holiday programme with date activation
- with automatic summer-/winter time switching (can be switched off)
- with imprint
- without spreader claws
- with additional connection for external floor temperature sensor/remote sensor
- with screw terminals

Thermostat, NO contact, with centre plate

- time-controlled

Rated voltage	230 V~
Frequency	50 Hz
Switching current	max. 10 (2) A
Breaking capacity	2300 W
Hysteresis, settable	< 1 K for room thermostat
Room temperature setting range	5 ... 30 °C
Floor temperature setting range	10 ... 42 °C
Energy efficiency class	I (1%)
Power reserve	≈ 5 d
Ambient temperature	+0 ... +35 °C
Dimensions (W x H x D)	71 x 71 x 46 mm
Installation depth	28.5 mm

NOTE:

When integrating this product into the Serie 1930, the 1gang frame for centre plate Ø 58 mm, order no.: 1382 0... may only be used. Installation in multiple combinations of the Serie 1930 is not possible!

Not suitable for installation in surface-mounted housing.
EN 60730-2-7, 60730-2-9

- for time-dependent single-room or floor temperature control for electric and hot water heating systems
- Operating modes: automatic according to day programme, comfort, standby, off
- temperature value can be calibrated
- additional connection for external temperature sensor
- with integrated temperature sensor
- with party function
- with keylock
- with valve protection function
- with frost protection function
- Operation via 4 touch-sensitive control surfaces whose currently active function is indicated by an icon on the display
- operating languages are adjustable: German, English, French, Dutch, Polish, Czech or Russian
- large, backlight display with text and symbol display
- time and date display
- for thermoelectric valve drives 230 V, closed in de-energized state
- for continuous (PI) or switched (2-point) control
- hysteresis, settable
- simple programming of switching times through integrated copy function
- emergency programme with fault signal for sensor failure
- holiday programme individually adjustable
- with automatic summer-/winter time switching (can be switched off)
- with centre plate Ø 58 mm
- without spreader claws
- with additional connection for external floor temperature sensor/remote sensor
- with plug-in terminals

Suitable for Intermediate ring for central plate

Order no. Page

Switches for heating applications

Marked items are only suitable for splash-protected IP44 flush-mounted installation when used in conjunction with the corresponding sealing set.

1-pole inserts

- connection terminals according to IEC 60669-1

Change-over/intermediate switch

Rated voltage 250 V~
Switching current 10 AX
Installation depth 31 mm

A control change-over switch is shown here as an example. With 2-pole and 3-pole control on/off switches, other rocker switches and neon lamp units are required.

- for illumination and monitoring circuit
- with plug-in terminals

Suitable for optional	Order no.	Page
Neon lamp unit with N terminal	1675 ..	61
Glow lamp unit with N-terminal	1676 ..	61
LED unit 230 V, for switches/push-buttons	1686 ..	20
LED unit for switches/push-buttons	1687	62

Design	Order no.	Page
Change-over switch	3036	10
Change-over switch for installation in hollow walls ¹⁾	3036 50	10
Intermediate switch	3037	10
Change-over switch 16 AX	★ 3036 16	10
Intermediate switch 16 AX	★ 3037 16	10

¹⁾ low installation depth, without spreader claws

Push-button

Rated voltage 250 V~
Momentary-contact current 10 A
Contact spacing > 3 mm
Conductor cross-section (rigid) max. 2.5 mm²

- for illumination and monitoring circuit
- with plug-in terminals

Suitable for optional	Order no.	Page

Communication/ Multimedia Technology

Multimedia socket outlets for consumer electronics, USB charging sockets or an in-wall radio with touch display and external audio input for an MP3 player – there are numerous possibilities for integrating new communication technologies into the installation. With Berker, this is possible with all switch ranges. The communication and multimedia connection technology is the modern way of dealing with the issue of "cable spaghetti", which is avoided right from the beginning.

WLAN Access-Point UP

Rated voltage	230 V~
Frequency	50/60 Hz
Power consumption (operation)	max. 3 W
Transmission rate WLAN	max. 150 Mbit/s
Transmission rate Ethernet	max. 10/100 Mbit/s
Frequency band	2.4 GHz
Installation depth	≈ 40 mm

WLAN Standards IEEE 802.11 b/g/n

For fitting in standard connection boxes according to DIN 49073 and DIN EN 60670

- Operating modes in WLAN: Access-Point, Repeater/Bridge, Client (WDS), Client (relayed)
- ciphering method: WEP, WPA, WPA2
- WLAN range can be configured for adaptation to spatial conditions
- configuration of the integrated web server via web browser
- with integrated WLAN antenna
- with RJ45 jack on front
- LAN connection via 5pole screw terminal block
- with 2pole plug-in terminal for mains voltage

For the connection of digital devices for transmission of high-resolution audio and video signals, such as satellite receivers and DVD players, to LCD or LED screens.

Installation recommendation:

Kaiser: "Electronic box" for compliance with the permissible bending radii, Art. No. 1068-02 or 9062-74

Fränkische: "Multimedia tube" for laying pre-assembled connection cable, Art. no. 294.10.092

Comply with the instructions of the cable and device manufacturers as to the maximum HDMI cable length.

HDMI

High definition socket outlet with 90° plug connection

▶ 892

Frequency range (vertical) 50 ... 85 Hz
Resolution max. 1920 x 1080 px
Transmission rate max. 8.16 GBit/s

- gold-plated contacts
- with HDMI™ double jack type A, supports HDMI™ technology (V 1.3 with Deep Color)
- 19pole
- without spreader claws

For the connection of digital devices for transmission of high-resolution audio and video signals, such as satellite receivers and DVD players, to LCD or LED screens.

Installation recommendation:
Kaiser: "Electronic box" for compliance with the permissible bending radii, Art. No. 1068-02 or 9062-74

USB/3.5 mm audio socket outlet

▶ 892

Frequency range audio 20 ... 20000 Hz
USB transmission rate max. 5 GBit/s

- double jack gold-plated 3.5 mm, stereo
- USB, double socket type A, USB 3.0 compliant
- reverse-compatible to USB 2.0
- without spreader claws

NEW, available from September 2018!
With **USB 3.0** double jack.

For connecting mobile devices, such as smartphones or MP3 players (mini audio), digital cameras and computer peripherals (USB).

Installation recommendation:
Kaiser: "Electronic box" for compliance with the permissible bending radii, Art. No. 1068-02 or 9062-74
Fränkische: "Multimedia tube" for laying pre-assembled connection cable, Art. no. 294.10.092

For the special installation conditions in the new federal states.

Consumer electronics

Radios

Berker Radio Touch

- loudspeaker

Operating voltage	230 V~
Frequency	50/60 Hz
Frequency range (radio reception)	87.5 ... 108 MHz
For loudspeakers	per channel 4 ... 8 Ω
Conductor cross-section	max. 2.5 mm ²
Conductor cross-section (loudspeakers)	max. 1.5 mm ²
Dimensions of display (W x H)	35 x 28 mm
Installation depth	33 mm

- stereo FM radio with RDS display
- with one loudspeaker
- illuminated touch graphics display
- time and date display
- operation via sensor areas of the touch display
- manual and automatic station search
- 8 station memory, non-volatile
- switch-on with last station
- countdown
- volume control
- alarm clock with snooze alarm
- sleep timer
- external audio input, e.g. for MP3 player or docking station
- with 2 loudspeaker connections
- extension unit input for separate on/off switching
- single and combination installation
- with screw terminals

Suitable for optional Loudspeakers	Order no.	Page

Berker S.1 | B.3 | B.7 Inserts

The Berker S.1 is already a classic. Square, simple and timelessly elegant, the switch range has found its way into countless residential and office buildings. And with surfaces available in white, matt polar white and glossy polar white, the S.1 is always a subtle and modern addition to the room. The Berker B.3 revels in colour contrasts, e.g. with anthracite central inserts or its range of frames. In terms of shape, the range remains consistently rectangular, just like the B.7, which is also still available with aluminium central inserts.

SCHUKO socket outlet with LED orientation light

▶ 895

- enhanced contact protection
- screw-in lift terminals

Rated voltage	250 V~
Frequency	50/60 Hz
Rated current	16 A
Light intensity (white)	0.2 cd
Power consumption	0.25 W/0.35 VA
Switch-on brightness	ca. 2 lx
Switch-off brightness	ca. 4 lx
Conductor cross-section (rigid)	max. 2.5 mm ²

- additional benefit by combination of a socket outlet with an orientation light
- integrated brightness sensor that switches the orientation light on at twilight and off when there is sufficient brightness
- long service life of the LED
- white LED light
- through-wiring possible, therefore also ideal for retrofitting
- with screw-in lift terminals

Caution!
Items with special flush-mounted insert.
Centre plates with LED orientation lights are not compatible with the standard socket outlets.

Socket outlet with earthing pin and LED orientation light

- enhanced contact protection
- screw-in lift terminals

Rated voltage 250 V~
Frequency 50/60 Hz
Rated current 16 A
Light intensity (white) 0.2 cd
Power consumption 0.25 W/0.35 VA
Switch-on brightness ca. 2 lx
Switch-off brightness ca. 4 lx
Conductor cross-section (rigid) max. 2.5 mm²

- additional benefit by combination of a socket outlet with an orientation light
- integrated brightness sensor that switches the orientation light on at twilight and off when there is sufficient brightness
- long service life of the LED
- white LED light
- 2pole + earth
- through-wiring possible, therefore also ideal for retrofitting
- with screw-in lift terminals

▶ 895

Caution!
Items with special flush-mounted insert.
Centre plates with LED orientation lights are not compatible with the standard socket outlets.

NEMA-socket outlets

**Socket outlet with earthing contact USA/CANADA
NEMA 5-15 R**

▶ 895

- screw terminals

- 2pole + earth
- without spreader claws
- with screw terminals

Rated voltage	125 V~
Rated current	15 A
Conductor cross-section (rigid)	max. 2 x 4 mm ²
Installation depth	19 mm

Not UL-certified.
Standard NEMA 5-15 R

Design	Order no.	PU

Consumer electronics

Berker Radio Touch

- loudspeaker

Operating voltage	230 V~
Frequency	50/60 Hz
Frequency range (radio reception)	87.5 ... 108 MHz
Conductor cross-section	max. 2.5 mm ²
Conductor cross-section (loudspeakers)	max. 1.5 mm ²
Dimensions of display (W x H)	35 x 28 mm

- stereo FM radio with RDS display
- operation via sensor areas of the touch display
- extension unit input for separate on/off switching
- illuminated touch graphics display
- time and date display
- with 2 loudspeaker connections
- external audio input, e.g. for MP3 player or docking station
- with one loudspeaker

	Suitable for optional	Order no.	Page

Hotel applications

Relay switch with centre plate for hotel card

▶ 881

Rated voltage	230 V~ +10/-15 %	– with potentiometer for incremental adjustment of delay time
Frequency	50/60 Hz	– illuminated with blue LED if hotel card is not inserted
Switching current	10 A	– with potential-free contact
Power consumption	< 0.2 W	
230 V incandescent lamps and halogen lamps	1500 W	
Conventional transformers	1500 VA	
Inductive load at $\cos \phi = 0.6$	max. 6 A	
Delay time incrementally adjustable	0, 15, 30, 60 s	
Electronic transformers	1500 W	
Fluorescent lamps:		
- in Duo circuit	1500 W	
Compact fluorescent lamps	500 W	
Card width	max. 55 mm	
Card thickness	0.8 ... 1.2 mm	

Not suitable for installation in surface-mounted housing.

Accessible construction

The following rockers are conformant with DIN 18024-2 and DIN 18025-1 and -2.

SCHUKO socket outlets

SCHUKO socket outlet with hinged cover for barrier-free construction

▶ 895

- tactile symbol

- with hinged cover that falls back
- with plug-in terminals

Rated voltage 250 V~
Rated current 16 A
Conductor cross-section 1 mm² ... 2.5 mm²

Connection terminals according to IEC 60884-1

Design	Order no.	PU
polar white matt	4786 19 49	10

SCHUKO socket outlet with hinged cover for barrier-free construction

▶ 895

- tactile symbol
- enhanced contact protection
- installation position variable in 45° steps

- when opening hinged cover, it can be arrested in end position
- mounting orientation of insert selectable in 45° steps
- with plug-in terminals

Rated voltage 250 V~
Rated current 16 A

Specially suited for combining several socket outlets if right angle plugs are used.

Connection terminals according to IEC 60884-1

Design	Order no.	PU

Hospital installation

Emergency system

– for installation in standard wall boxes according to DIN 49073-1

	Emergency call set with frame Operating voltage 24 V= Operating temperature -5 ... +40 °C	– acoustic and visual signalling of an emergency call using pilot lamp after the pullcord push-button has been actuated – switch-off of emergency call using shut-off push-button at emergency location – power supply via power supply unit with 24 V DC – centre plates for plug-in fixing – with screw terminals – acoustic call tone switchable on pilot lamp – call tone can be set as continuous signal or as pulses – monitoring of devices triggering calls for wire break	Suitable for optional	Order no.	Page
	Set consisting of: - Pullcord push-button with frame, order no. 5202.. - Pilot lamp with frame, order no. 5203.. - Shut-off push-button with frame, order no. 5201.. - Power supply with frame, order no. 5204.. The emergency call set is used to call for help in public or disabled WCs, doctors' surgeries and old people's homes. It corresponds to the safety requirements according to DIN VDE 0834	Call button with frame 5206 .. 195 Cancellation/presence button with frame 5205 .. 196 Pullcord push-button with frame 5202 .. 196 Cancellation button with frame 5201 .. 196 Light signal with frame 5203 .. 196 Mains adapter with frame 5204 .. 197	Design white glossy polar white glossy polar white matt	Order no. 5200 89 82 5200 89 89 5200 99 09	PU 1 1 1

	Call button with frame Operating voltage 24 V= Operating temperature -5 ... +40 °C	– with quiet lamp – with red call button with lens – as expansion for the emergency call set – centre plate for plug-in fixing – with screw terminals	Suitable for Emergency call set with frame	Order no. 5200 ..	Page 195
	Additional call push-button to, for example, provide a control section in a second room or an additional location to trigger an emergency call.	Design white glossy polar white glossy polar white matt	Order no. 5206 89 82 5206 89 89 5206 99 09	PU 1 1 1	

Cancellation/presence button with frame

Operating voltage 24 V= – with yellow shut-off button
 Operating temperature -5 ... +40 °C – with green presence button
 Cable length to light signal max. 500 m – as expansion for the emergency call set
 – centre plate for plug-in fixing
 – with screw terminals
 – with visual and acoustic alarm encoder

Office unit, in order to, for example, indicate an emergency call in an office or a headquarters.

Design	Order no.	Page
white glossy	5205 89 82	1
polar white glossy	5205 89 89	1

Berker S.1 Frames

With the colours white and polar white, the S.1 maintains its simple line even for its frames. The white frames are made from glossy plastic, polar white is available as well in glossy as in matt appearance. In the interests of accessible construction and highlighting particular switches, however, frames are also available in anthracite and red. Multiple frames, frames with large cut-out as well as frames with labelling field complete the range.

* Note:

Our rockers, which are manufactured from thermosetting plastic, except for printed and painted areas and lenses, have an anti-bacterial action as documented by Test Report 4207318-01 from the Fresenius Institute. This has been verified and confirmed using tests similar to ISO22196 and JIS-Z-2801. The test report is available on request.

Berker B.3 Frames

A bold choice of colours – the B.3 and its selection of aluminium frames makes this possible. The polar-white or anthracite centre plates can be combined with frames in black, red, brown, gold or aluminium effect. From subtle to high-contrast, the spectrum of designs possible is vast, and building owners or renovators can create their own signature styles according to the residential or office fittings. The whole range of colours is also available for the frames with large cut-outs and multiple frames.

Surface-mounted housing

Surface-mounted housing

Installation depth

37 mm

- entry at top and bottom possible
- with cable and duct entry
- for mounting on combustible base surface

Flush-mounted devices can be used with the surface-mounted housings for surface-mounted installation.
For matching pipe lead-ins and replacement for cable and duct entries, refer to the chapter Dry surface-mounted installation.

Suitable for optional	Order no.	Page

Berker B.7 Frames

In terms of the frames' appearance, the B.7 is following an entirely different concept to the B.3 switch range. Whereas the B.3 offers several colours but just one material, the B.7 includes a wide variety of materials. Plastic, glass, aluminium and stainless steel can be used to add both visual and tactile flourishes. However, the colour palette of the plastic and glass frames – polar white, anthracite, black and aluminium – remains highly unobtrusive.

Berker B.7

Berker Q.1 | Q.3 | Q.7 Inserts

The features of the switch design lines Q.1 and Q.3 are best experienced hands-on. 'Plastic, silky' is the name of the material used – the velvety surface is truly unique. You can also experience the flat switching angles and the level profile, which is produced by the flush finish of the frame and centre plate, using your tactile senses. In terms of the feel and also the appearance, the Q.1 and the Q.3 provide a coherent picture which sets them far apart from other switch ranges.

SCHUKO socket outlet with LED orientation light

▶ 895

- enhanced contact protection
- screw-in lift terminals

Rated voltage	250 V~
Frequency	50/60 Hz
Rated current	16 A
Light intensity (white)	0.2 cd
Power consumption	0.25 W/0.35 VA
Switch-on brightness	ca. 2 lx
Switch-off brightness	ca. 4 lx
Conductor cross-section (rigid)	max. 2.5 mm ²

- additional benefit by combination of a socket outlet with an orientation light
- integrated brightness sensor that switches the orientation light on at twilight and off when there is sufficient brightness
- long service life of the LED
- white LED light
- through-wiring possible, therefore also ideal for retrofitting
- with screw-in lift terminals

Caution!
Items with special flush-mounted insert.
Centre plates with LED orientation lights are not compatible with the standard socket outlets.

Hotel applications

Relay switch with centre plate for hotel card

▶ 881

Rated voltage	230 V~ +10/-15 %	– with potentiometer for incremental adjustment of delay time
Frequency	50/60 Hz	– illuminated with blue LED if hotel card is not inserted
Switching current	10 A	– with potential-free contact
Delay time incrementally adjustable	0, 15, 30, 60 s	
Power consumption	< 0.2 W	
230 V incandescent lamps and halogen lamps	1500 W	
Conventional transformers	1500 VA	
Electronic transformers	1500 W	
Fluorescent lamps:		
- in Duo circuit	1500 W	
Compact fluorescent lamps	500 W	
Card width	max. 55 mm	
Card thickness	0.8 ... 1.2 mm	

Not suitable for installation in surface-mounted housing.

Hospital installation

Emergency system

– for installation in standard wall boxes according to DIN 49073-1

Emergency call set with frame

Operating voltage 24 V=
Operating temperature -5 ... +40 °C

Set consisting of:
- Pullcord push-button with frame, order no. 5202..
- Pilot lamp with frame, order no. 5203..
- Shut-off push-button with frame, order no. 5201..
- Power supply with frame, order no. 5204..

For installation in standard wall boxes according to DIN 49073-1

The emergency call set is used to call for help in public or disabled WCs, doctors' surgeries and old people's homes. It corresponds to the safety requirements according to DIN VDE 0834

- acoustic and visual signalling of an emergency call using pilot lamp after the pullcord push-button has been actuated
- switch-off of emergency call using shut-off push-button at emergency location
- power supply via power supply unit with 24 V DC
- centre plates for plug-in fixing
- with screw terminals
- acoustic call tone switchable on pilot lamp
- call tone can be set as continuous signal or as pulses
- monitoring of devices triggering calls for wire break

Suitable for optional	Order no.	Page
Call button with frame	5206 60 8 ..	270
Cancellation/presence button with frame	5205 60 8 ..	270
Pullcord push-button with frame	5202 60 8 ..	271
Switch-off push-button with frame	5201 60 8 ..	271
Light signal with frame	5203 60 8 ..	271
Mains adapter with frame	5204 60 8 ..	272

Berker Q.1 Frames

The frame makes all the difference. Q.1 and Q.3 are sister product ranges and the selection of centre plates is identical for both. However, they differ in terms of design and the visual look and feel of the frames. But with its rounded corners, Q.1 presents a gentler look and feel. – available in polar white, anthracite and red. With surface-mounted frames in same colours, flush-mounted devices can be used for surface-mounted installation - on request with self-extinguishing base plate.

Berker Q.1

Berker Q.3 Frames

Entirely different from its sister product range: whereas Q.1 has softer contours, Q.3 focuses on clear edges. With the right-angled borders, its frames harmonise excellently with the architecture of modern buildings. What's more, they are ideally suited for installation in sill-type bunking ducts. The frames of the Q.3 range are available in polar white or anthracite, as well as 1gang to 5gang models, and are also available with a large cut-out. A selection of polar white frames is also available with a labelling field.

Berker Q.7 Frames

The shape of the Berker Q.7 shows immediately that it belongs to the Q family. Above all, the dimensions and materials distinguish it from the Q.1 and Q.3: For instance, the frame measures 95 x 95 mm and compared to the centre piece is relatively large (58 x 58 mm). Exclusive surface materials such as slate, concrete, aluminium, stainless steel as well as black and polar white glass, in combination with the translucent carrier material, ensure that the colour of the background appears, for innovative visual accents. With over 250 variants, the Q.7 offers an outstanding depth of functionality.

LED modules

– the LED modules of Berker Q.7 listed below can be combined exclusively with 1gang frames for lighting, order no. 1011 61..

New

LED module for corona lighting

Operating voltage	230 V AC +/-10%	– for illumination and monitoring circuit
Frequency	50 Hz	– brightness can be adjusted in 2 steps in via slide switch
Rated current	3.5 ... 5 +/- 0.5 mA	– for connection to a 230 V AC module insert
Light colour	2750 ... 3250 K	– with Wago terminal for wiring
Service life of the LED	≈ 30000 h	– through-wiring possible, therefore also ideal for retro-fitting
Operating temperature	+0 ... +40 °C	
Line length	≈ 6 cm	
Light colour	2750 K	

Recommendation: use deep box.

Neutral conductor necessary!

Design	Order no.	Page
transparent	★ 1680 50	302

New

LED module for downlight lighting

Operating voltage	230 V AC +/-10%	– brightness can be adjusted in 2 steps in via slide switch
Frequency	50 Hz	– integrated brightness sensor that switches the Downlight on at twilight and off when there is sufficient ambient brightness
Rated current	1.5 ... 6 +/- 0.5 mA	– for connection to a 230 V AC module insert
Light colour	2750 ... 3250 K	– with Wago terminal for wiring
Service life of the LED	≈ 30000 h	– through-wiring possible, therefore also ideal for retro-fitting
Operating temperature	+0 ... +40 °C	
Line length	≈ 6 cm	
Light colour	2750 K	

Recommendation: use deep box.

Neutral conductor necessary!

Berker Q.9

The Berker Q.9 caters to our numerous customers who want to use the same design on their trunking as they do on their walls, as it matches the wall-mounted berker Q.3. To complement the look, it has been designed to be extra flat for installation in the tehalit dado trunking (80 mm wide). It can be used to cover all tehalit trunking sockets (2x and 3x) and Berker standard inserts (1x to 3x).

Berker Q.9

Berker K.1 | K.5 Inserts

Berker K.1 and its sister product range K.5 are impressive thanks to their linear design, which is perfectly suited to the characteristics of the materials used.

In the K.1 range, it is plastic which lends the frames and centre plates a functional and simple – yet high-quality – design; this material is available in glossy polar white or matt lacquered anthracite.

The K.5 is available in shimmering matt stainless steel or fully anodised aluminium. Both of these materials produce a clear and elegant appearance.

- with acoustic fault signal
- with imprint
- with screw terminals

SCHUKO socket outlet with residual current circuit-breaker

▶ 893

- enhanced contact protection

Rated voltage	250 V~
Frequency	50/60 Hz
Rated current	16 A
Measurement error current	30 mA
Trigger time	≤ 30 ms
Surge current resistance	250 A (8/20) μs
Short-circuit resistance (with back-up fuse 20 AgL)	3 kA

- type A for alternating currents and pulsating direct currents
- to protect connected and downstream loads
- with plug-in terminals
- with spreader claws

Through-wired socket outlets are also protected.
For use in old installations with provision made to safeguard existing standards without additional protective regulations
Connection terminals according to IEC 60884-1
Tested conform VDE 0664 (EN 61008)

Design	Order no.	PU

Socket outlet with earthing pin and LED orientation light

▶ 895

- enhanced contact protection
- screw-in lift terminals

Rated voltage	250 V~
Frequency	50/60 Hz
Rated current	16 A
Light intensity (white)	0.2 cd
Power consumption	0.25 W/0.35 VA
Switch-on brightness	ca. 2 lx
Switch-off brightness	ca. 4 lx
Conductor cross-section (rigid)	max. 2.5 mm ²

- additional benefit by combination of a socket outlet with an orientation light
- integrated brightness sensor that switches the orientation light on at twilight and off when there is sufficient brightness
- long service life of the LED
- white LED light
- 2pole + earth
- through-wiring possible, therefore also ideal for retro-fitting
- with screw-in lift terminals

Caution!
Items with special flush-mounted insert.
Centre plates with LED orientation lights are not compatible with the standard socket outlets.

Hospital installation

Emergency system

- for installation in standard wall boxes according to DIN 49073-1

Emergency call set with frame

Operating voltage 24 V=
Operating temperature -5 ... +40 °C

- Set consisting of:
- Pullcord push-button with frame, order no. 5202..
 - Pilot lamp with frame, order no. 5203..
 - Shut-off push-button with frame, order no. 5201..
 - Power supply with frame, order no. 5204..

The emergency call set is used to call for help in public or disabled WCs, doctors' surgeries and old people's homes. It corresponds to the safety requirements according to DIN VDE 0834

- acoustic and visual signalling of an emergency call using pilot lamp after the pullcord push-button has been actuated
- switch-off of emergency call using shut-off push-button at emergency location
- power supply via power supply unit with 24 V DC
- acoustic call tone switchable on pilot lamp
- call tone can be set as continuous signal or as pulses
- centre plates for plug-in fixing
- monitoring of devices triggering calls for wire break
- with screw terminals

Suitable for	Order no.	Page
optional		
Call button with frame	5206 70 09	349
Cancellation/presence button with frame	5205 70 09	349
Pullcord push-button with frame	5202 70 09	350
Cancellation button with frame	5201 70 09	350
Light signal with frame	5203 70 09	350
Mains adapter with frame	5204 70 09	350

Design	Order no.	PU
polar white glossy	5200 70 09	1

Call button with frame

Operating voltage 24 V=
Operating temperature -5 ... +40 °C

Additional call push-button to, for example, provide a control section in a second room or an additional location to trigger an emergency call.

- as expansion for the emergency call set
- with quiet lamp
- with red call button with lens
- centre plate for plug-in fixing
- with screw terminals

Suitable for	Order no.	Page
Emergency call set with frame	5200 70 09	349

Design	Order no.	PU
polar white glossy	5206 70 09	1

Cancellation/presence button with frame

Operating voltage 24 V=
Operating temperature -5 ... +40 °C
Cable length to light signal max. 500 m

Office unit, in order to, for example, indicate an emergency call in an office or a headquarters.

- as expansion for the emergency call set
- with yellow shut-off button
- with green presence button
- with visual and acoustic alarm encoder
- centre plate for plug-in fixing
- with screw terminals

Suitable for	Order no.	Page
Emergency call set with frame	5200 70 09	349

Design	Order no.	PU
polar white glossy	5205 70 09	1

Pullcord push-button with frame

Operating voltage 24 V=
Operating temperature -5 ... +40 °C

To trigger an emergency call in emergency situations.

- with quiet lamp
- centre plate for plug-in fixing
- for wall and ceiling mounting
- with pullcord and knob
- with screw terminals

Suitable for	Order no.	Page
Emergency call set with frame	5200 70 09	349
Design	Order no.	PU
polar white glossy	5202 70 09	1

Cancellation button with frame

Operating voltage 24 V=
Operating temperature -5 ... +40 °C

To switch off the alarm signal (pilot lamp) on arrival at the emergency location.

- with green shut-off button
- centre plate for plug-in fixing
- with screw terminals

Suitable for	Order no.	Page
Emergency call set with frame	5200 70 09	349
Design	Order no.	PU
polar white glossy	5201 70 09	1

Light signal with frame

Operating voltage 24 V=
Operating temperature -5 ... +40 °C

For visual and acoustic alarms in emergency situations.
Caution:
Always install the device in a clearly visible location.
Recommendation: Use deep wall box.

- with 4 red LEDs
- acoustic call tone switchable on pilot lamp
- call tone can be set as continuous signal or as pulses
- with potential-free relay contact for call tone forwarding, e.g. to telephone dialler
- call tone received on voltage failure and return
- centre plate for plug-in fixing
- with screw terminals

Suitable for	Order no.	Page
Emergency call set with frame	5200 70 09	349
Design	Order no.	PU
polar white glossy	5203 70 09	1

Mains adapter with frame

Operating voltage 24 V=
Frequency 50 ... 60 Hz
Input voltage 100 ... 240 V~
Input current max. 180 mA
Output voltage 24 V=
Output current max. 250 mA
Operating temperature -5 ... +40 °C

For the power supply of the emergency call system components with 24 V DC.
Recommendation: Use deep wall box.

- centre plate for plug-in fixing
- with screw terminals

Suitable for	Order no.	Page
Emergency call set with frame	5200 70 09	349

Berker K.1 Frames

Berker K.1 is impressive thanks to its linear design, which is perfectly suited to the characteristics of the materials used. In the K.1 range, it is plastic which lends the frames and centre plates a functional and simple – yet high-quality – design; this material is available in glossy polar white or matt lacquered anthracite.

Socket outlet with earthing pin and LED orientation light

▶ 895

- enhanced contact protection
- screw-in lift terminals

Rated voltage	250 V~
Frequency	50/60 Hz
Rated current	16 A
Power consumption	0.25 W/0.35 VA
Switch-on brightness	ca. 2 lx
Switch-off brightness	ca. 4 lx
Light intensity (white)	0.2 cd
Conductor cross-section (rigid)	max. 2.5 mm ²

- additional benefit by combination of a socket outlet with an orientation light
- integrated brightness sensor that switches the orientation light on at twilight and off when there is sufficient brightness
- long service life of the LED
- white LED light
- 2pole + earth
- through-wiring possible, therefore also ideal for retro-fitting
- with screw-in lift terminals

Caution!
Items with special flush-mounted insert.
Centre plates with LED orientation lights are not compatible with the standard socket outlets.

BLC - Berker Light Control

BLC switches

BLC triac insert (R, L)

Operating voltage 230 V~
Frequency 50/60 Hz
230 V incandescent lamps and halogen lamps 40 ... 400 W
Dimmable conventional transformers 40 ... 400 VA
Operating temperature -20 ... +45 °C

- when cover is detached, the switch status is retained (wallpaper function)
- bulb-preserving soft startup
- phase cut-on
- with extension unit input for BLC extension unit, BLC controller extension unit for motion detector and push-button, NO contact
- short-circuit and overload proof (fine-wire fuse)
- with spare fuse
- with screw terminals

Light scene function (On/Off) in conjunction with BLC radio button.

Possible to change fuse without removing cover.

Suitable for
BLC application modules

Order no.
Page
page 391

Design	Order no.	PU
BLC triac insert (R, L)	× 2905	1

BLC tronic insert (R, C)

Operating voltage 230 V~
Frequency 50/60 Hz
230 V incandescent lamps and halogen lamps 50 ... 420 W
Electronic transformers 50 ... 420 W
Operating temperature -20 ... +45 °C

- when cover is detached, the switch status is retained (wallpaper function)
- bulb-preserving soft startup
- phase cut-off
- with extension unit input for BLC extension unit, BLC controller extension unit for motion detector and push-button, NO contact
- short-circuit and overload proof (electronic fuse)
- with screw terminals

Light scene function (On/Off) in conjunction with BLC radio button.

For trouble-free operation, we recommend Berker Tronic transformers.

Suitable for
BLC application modules

Order no.

Design	Order no.	PU
BLC tronic insert (R, C)	× 2916	1

BLC relay insert

Operating voltage	230 V~	– when cover is detached, the switch status is retained (wallpaper function)
Frequency	50/60 Hz	
230 V incandescent lamps and halogen lamps	2300 W	– with extension unit input for BLC extension unit, BLC controller extension unit for motion detector and push-button, NO contact
Conventional transformers	1000 VA	– with screw terminals
Electronic transformers	1500 W	
Fluorescent lamps:		
- uncompensated	1200 VA	
- parallel compensated	920 VA	
- in Duo circuit	2300 VA	
Operating temperature	-20 ... +45 °C	
Installation depth	22 mm	

μ

For electronic ballasts and energy-saving lamps with excessive switch-on currents, use switch-on current limiters order no. 185.

Light scene function (On/Off) in conjunction with BLC radio button.

Not suitable for installation in surface-mounted housing.

Design	Order no.	PU
BLC relay insert	× 2906	1

Suitable for BLC application modules Order no. Page
page 391

BLC relay insert

- **potential-free contact**

		– when cover is detached, the switch status is retained (wallpaper function)
Operating voltage	230 V~	– with extension unit input for BLC extension unit, BLC controller extension unit for motion detector and push-button, NO contact
Frequency	50/60 Hz	– potential-free contact for function extra-low voltage FELV (only change-over voltage) suitable
Minimum load (at 12 V)	100 mA	– with screw terminals
230 V incandescent lamps	800 W	
230 V halogen lamps	750 W	
Operating temperature	+5 ... +35 °C	

For electronic ballasts and energy-saving lamps with excessive switch-on currents, use switch-on current limiters order no. 185.

Light scene function (On/Off) in conjunction with BLC radio button.

Not suitable for installation in surface-mounted housing.

Design	Order no.	PU
BLC relay insert	× 2906 10	1

Suitable for BLC application modules Order no. Page
page 391

BLC relay insert HVAC

Operating voltage	230 V~
Frequency	50/60 Hz
Motor switching current (HLK channel)	2.1 A
230 V incandescent lamps (HVAC-channel)	800 W
230 V halogen lamps (HVAC-channel)	750 W
230 V incandescent lamps and halogen lamps	1000 W
Conventional transformers	750 VA
Electronic transformers	750 W
Fluorescent lamps:	
- uncompensated	500 VA
- in Duo circuit	1000 VA
Switch on delay HVAC-channel	0/3 min
HVAC-channel adjustable	≈ 2/10/30/60/120 min

- when cover is detached, the switch status is retained (wallpaper function)
- switch on delay for HVAC channel can be activated/deactivated permanently with BLC button
- also usable as push-button relay switch
- with extension unit input for BLC extension unit, BLC controller extension unit for motion detector and push-button, NO contact
- potential-free HVAC contact suitable for function extra-low voltage FELV (only alternating voltage)
- with delay time HVAC relay contact for e.g. valve drive, thermostat, fan ...
- with screw terminals

Suitable for BLC application modules **Order no.** **Page** page 391

For electronic ballasts and energy-saving lamps with excessive switch-on currents, use switch-on current limiters order no. 185.

Light scene function (On/Off) in conjunction with BLC radio button.

Not suitable for installation in surface-mounted housing.

Design	Order no.	PU
BLC relay insert HVAC	× 2912	1

BLC dimmers

BLC touch dimmer (R, L)

Operating voltage	230 V~
Frequency	50/60 Hz
230 V incandescent lamps and halogen lamps	20 ... 500 W
Dimmable conventional transformers	20 ... 500 VA
Number of built-in power boosters (R, L)	max. 10
Operating temperature	-20 ... +45 °C

- when cover is detached, the switch status is retained (wallpaper function)
- switch-on brightness memory function
- bulb-preserving soft startup
- phase cut-on
- with extension unit input for BLC extension unit, BLC controller extension unit for motion detector and push-button, NO contact
- short-circuit and overload proof (fine-wire fuse)
- with spare fuse
- with screw terminals

Light scene function (On/Off, dimming value) in conjunction with BLC radio button.

Possible to change fuse without removing cover.

Suitable for BLC application modules **Order no.** **Page** page 391

Design	Order no.	PU
BLC touch dimmer (R, L)	× 2904	1

BLC universal touch dimmer (R, L, C)

Operating voltage	230 V~
Frequency	50/60 Hz
230 V incandescent lamps and halogen lamps	50 ... 420 W
Dimmable conventional transformers	50 ... 420 VA
Electronic transformers	50 ... 420 W
Number of universal power boosters, 420 W at phase control	max. 5
Number of universal power boosters, 500 W for phase cut-off	max. 10
Number of built-in Tronics or power boosters (R, L) - with identical load type	max. 10
Operating temperature	-20 ... +45 °C
Installation depth	22 mm

- when cover is detached, the switch status is retained (wallpaper function)
- switch-on brightness level can be stored safe after power failure
- bulb-preserving soft startup
- phase cut-on or cut-off according to load type, self-learning
- expandable with universal power boosters RMD Plus with load cable switched in parallel
- with extension unit input for BLC extension unit, BLC controller extension unit for motion detector and push-button, NO contact
- short-circuit and overload proof (electronic fuse)
- with screw terminals

Do not connect conventional transformers together with electronic transformers.

Suitable for BLC application modules **Order no.** **Page** page 391

Design	Order no.	PU
BLC universal touch dimmer (R, L, C)	× 2902	1

BLC 1 - 10 V touch control unit

Operating voltage	230 V~	– when cover is detached, the switch status is retained (wallpaper function)
Frequency	50/60 Hz	– e.g. for fluorescent lamps and LV halogen lamps
Switching current	3.04 A	– switch-on brightness level can be stored safe after power failure
Control current	50 mA	– basic brightness programmable
Operating temperature	+5 ... +35 °C	– for switching and controlling electronic ballasts and 1 - 10 V Tronic transformers, 105 W

Light scene function (On/Off, dimming value) in conjunction with BLC radio button.

In case of excessive switch-on currents use switch-on current limiters order no. 185.

μ

To ensure same illumination, use only electronic ballasts and fluorescent lamps from the same manufacturers.

When using LV halogen lamps, we recommend Berker 1 - 10 V Tronic transformers, 105 W, order no. 2977.

Not suitable for installation in surface-mounted housing. Interface according to DIN EN 61347-2-3

Suitable for
BLC application modules

BLC stairwell light system

BLC timer RMD for stairway light

Operating voltage	230 V~	– with switch-off advance warning, flashing at 30, 20 and 10 seconds before switching off
Frequency	50 Hz	– with slide switch for off/automatic/automatic with switch-off pre-warning/continuous on
230 V incandescent lamps and halogen lamps	2300 W	– NO contact
Conventional transformers	1000 VA	– with screw terminals
Electronic transformers	1500 W	
Fluorescent lamps:		
- uncompensated	1200 VA	
- parallel compensated	920 VA	
- in Duo circuit	2300 VA	
Electronic ballasts (EB)	700 W	
Delay time, adjustable	≈ 10 s ... 15 min	
Switch-on time (ED)	100 %	
Operating temperature	+5 ... +45 °C	
Conductor cross-section (rigid)	max. 4 mm ²	
Width of rail mounted device (RMD)	1 modules	

Suitable for	Order no.	Page
BLC insert for timer	2934 10	391

Not suitable for installation in surface-mounted housing.
For upgrading of stairway light and pulse circuits without additional wiring.

Design	Order no.	PU
light grey	× 163 01	1

BLC insert for timer

Operating voltage	230 V~	– with screw terminals
Frequency	50 Hz	
Operating temperature	+5 ... +35 °C	
Control cable length	max. 100 m	
Conductor cross-section (rigid)	max. 4 mm ²	
Installation depth	22 mm	

Suitable for	Order no.	Page
BLC application modules		page 391
BLC timer RMD for stairway light	163 01	391

Note:
Delay time setting, switch-off pre-warning and functions for off/automatic/continuous on are carried out on the BLC timer RMD for the stairway light.

For 3-conductor circuit with neutral conductor and for 4-conductor circuit with neutral conductor or phase.

Only suitable for BLC controller with imprint release issue "R3".

For upgrading of stairway light and pulse circuits without additional wiring.

Design	Order no.	PU
BLC insert for timer	× 2934 10	1

BLC application modules

BLC push-button

- with 2-push-buttons operation concept
- switch-on brightness for BLC dimmer insert mains-failure protection storable

BLC controller comfort 1.1 m

Time to dim down	30 s	– with adaptive sensitivity adjustment
Response brightness, adjustable	≈ 0 ... 80 lx, ∞ lx (day)	– with dimming function (soft-off) when using BLC dimmer inserts
Nominal mounting height	1.1 m	– glare-proof, e.g. against a torch
Detection angle	180°	– with teach function for response brightness
Range, frontal	≈ 10 m	– with slide switch for OFF/automatic/ON
Range, side	each ≈ 6 m	– step operation with immunity time (e.g. for bell)
Detection field, semi-oval shaped	≈ 10 x 12 m	– switch-on brightness in conjunction with BLC dimmer inserts can only be saved via BLC extension unit
Response brightness, adjustable	≈ 0 ... 80 lx	– μ-processor controlled operation (detection signal evaluation and interference signal suppression)
Response sensitivity, settable	≈ 20 ... 100 %	– no switch-on in case of inadvertent brief shadowing
Delay time, adjustable	≈ 10 s ... 30 min	– activation by push-button, NC contact in the line
immunity time	≈ 3 s	– with cover to limit detection angle to 90°
Short time mode	0.5 s	
Operating temperature	-20 ... +45 °C	
Dimensions assembling height	23.5 mm	

Suitable for	Order no.	Page
BLC switches		page 387
BLC dimmers		page 389
BLC insert for timer	2934 10	391
BLC extension unit for motion detector	2908	390

Continuous direct sunlight penetrating the upward-pointing detection level can result in failure of the motion detector.

Only suitable for indoor areas!

In conjunction with a BLC relay insert HVAC, the HVAC channel is also switched on for the duration of its delay time, independent of the response brightness.

Switches on for the duration of the controller delay time when the minimum response brightness level is infringed and if people are detected.

RolloTec time switches

RolloTec easy time switch

- display

- Number of operation times for up/down 2
- Self-retaining for 2 min on button-press > 1 s
- Power reserve (maintenance-free) ≈ 6 h

- large-area display
- with imprint
- with slide switch for manual/automatic
- 2 programme blocks Mon. - Fri. and Sat. - Sun.
- simple programming of operation times
- with quick programming mode
- programming possible for up to 6 h after removing insert
- with preset basic programme

No extension units and sensor signals or central commands will be processed.

For manual and time-programmed running of awnings, shutters and blinds.

Suitable for
RolloTec inserts

Physical sensors

IP65 μ

Precipitation sensor

- Operating voltage 230 V~
- Frequency 50/60 Hz
- Switching current at 30 V= (ohmic) max. 3 A
- Switching current at 250 V~ (ohmic) max. 6 A
- Switch-on current at 250 V (ohmic) max. 15 A
- Power consumption incl. additional heating max. 4.5 W
- Operating temperature -30 ... +70 °C
- Pre-assembled cables ≈ 2.9 m
- Dimensions, mounting bracket (W x H x D) 130 x 90 x 90 mm
- Dimensions sensor (L x W x H) 82 x 60 x 57.5 mm
- Mast Ø max. 62 mm

- with potential-free change-over contact
- heated
- pre-assembled, with cables
- with stainless steel mounting bracket approx. 70°
- with pipe clamp for mast fixing

Suitable for
RolloTec insert comfort

Order no.
2975

Page
396

Not suitable for installation in surface-mounted housing. When it begins to rain, snow etc. the contact is closed. To protect against mildew on awnings, roller shutters etc.

Design	Order no.	PU
grey	183 01	1

Wind sensor

Measuring range, wind speed 0.5 ... 40 m/s
 Measuring range, wind strengths 3 ... 10 Bft
 Pre-assembled cable ≈ 3 m

- reed contact (frequency measurement)
- with fitting material
- confectioned with cable LIYY 2 x 0.5 mm² and conductor sleeves

Berker arsys Frames

The frame and rocker of the arsys switch range are offered in glossy plastic with an especially scratch-resistant surface – in white, polar white and brown. Also available in stainless steel, aluminium painted light bronze or gold-anodised aluminium. The frame and special shape of the rockers give arsys a flat appearance. The frame ranges from 1-gang to 5-gang, with the vertical and horizontal frames differing because of the basic rectangular shape of arsys.

Metal, matt finish

aluminium light bronze lacquered
aluminium gold anodised
stainless steel
copper, metal alloy
Individual articles, which, for technical reasons cannot be coated are lacquered.

* Note:

Our rockers, which are manufactured from thermosetting plastic, except for printed and painted areas and lenses, have an anti-bacterial action as documented by Test Report 4207318-01 from the Fresenius Institute. This has been verified and confirmed using tests similar to ISO22196 and JIS-Z-2801. The test report is available on request.

Frames

 Marked items are only suitable for splash-protected IP44 flush-mounted installation when used in conjunction with the corresponding sealing set.

Berker R.1 | R.3 | R.8 Inserts

An all-round success: the switch ranges R.1, R.3 and R.8 make for a distinct and multiple award-winning design. As the only switch ranges on the German market, they consistently use round centre plates. The central inserts are made from glossy plastic in polar white or black and enable a wide variety of timelessly elegant designs in combination with the diversity of materials and colours used for the frames.

SCHUKO socket outlet with LED orientation light

▶ 895

- enhanced contact protection
- screw-in lift terminals

Rated voltage 250 V~
 Frequency 50/60 Hz
 Rated current 16 A
 Power consumption 0.25 W/0.35 VA
 Switch-on brightness ca. 2 lx
 Switch-off brightness ca. 4 lx
 Light intensity (white) 0.2 cd

- additional benefit by combination of a socket outlet with an orientation light
- integrated brightness sensor that switches the orientation light on at twilight and off when there is sufficient brightness
- long service life of the LED
- white LED light
- through-wiring possible, therefore also ideal for retrofitting
- with screw-in lift terminals

Caution!
 Items with special flush-mounted insert.
 Centre plates with LED orientation lights are not compatible with the standard socket outlets.

Hotel applications

Relay switch with centre plate for hotel card

▶ 881

Rated voltage	230 V~ +10/-15 %	– with potentiometer for incremental adjustment of delay time
Switching current	10 A	– illuminated with blue LED if hotel card is not inserted
Frequency	50/60 Hz	– with potential-free contact
Delay time incrementally adjustable	0, 15, 30, 60 s	
Power consumption	< 0.2 W	
230 V incandescent lamps and halogen lamps	1500 W	
Conventional transformers	1500 VA	
Electronic transformers	1500 W	
Fluorescent lamps:		
- in Duo circuit	1500 W	
Compact fluorescent lamps	500 W	
Card width	max. 55 mm	
Card thickness	0.8 ... 1.2 mm	

Not suitable for installation in surface-mounted housing.

Design	Order no.	PU
polar white glossy	1640 20 89	1
black glossy	1640 20 45	1

Signalisation of hotel room status

LED signal light, red/green lighting

▶ 875

Frequency	50/60 Hz	– switchable between red and green via separate switches
Rated voltage	230 V~	
Conductor cross-section	2.5 mm ²	– two coloured foils with imprinted symbols for Do not disturb/ Clean room and Please enter/ Please wait are supplied
Quantity LED lamps	4	
Ambient temperature	-5 ... +40 °C	– for signalling of e.g. access control

NOTE:
When integrating this product into the Serie 1930, the 1gang frame for centre plate Ø 58 mm, order no.: 1382 0... may only be used.
Installation in multiple combinations of the Serie 1930 is not possible!
For installation in standard wall boxes according to DIN 49073-1

Suitable for optional	Order no.	Page
Foil bi-colour for round LED signal light		page 65

Design	Order no.	PU
polar white glossy	2952 20 89	1

Accessible construction

The following rockers are conformant with DIN 18024-2 and DIN 18025-1 and -2.

SCHUKO socket outlets

SCHUKO socket outlet with hinged cover for barrier-free construction

▶ 895

- tactile symbol
- enhanced contact protection
- with self-closing hinged covers
- with plug-in terminals

Rated voltage	250 V~
Rated current	16 A

Connection terminals according to IEC 60884-1

Design	Order no.	PU
polar white glossy	4744 20 79	10

Rockers - accessible construction

Marked items are only suitable for splash-protected IP44 flush-mounted installation when used in conjunction with the sealing set, order no. 1010 77 00.

Rocker for barrier-free construction

- guide for mouth rod
- clear lens
- for illumination and monitoring circuit

The IP44 degree of protection can only be achieved in conjunction with the appropriate neon, incandescent or LED lamp unit, as well as a sealing set for switches/push-buttons.

Suitable for optional	Order no.	Page

Berker R.1 Frames

Pleasing from the first glance: the R.1 combines round centre plates with a soft frame contour and rounded corners. This affords products from the range a classic yet modern appearance. The choice of materials available for the frames is almost avant-garde. Black or polar white glass and plastic surfaces, natural anodised aluminium and dulled stainless steel are also available, such as slate, red or orange acrylic, concrete, oak or leather.

Berker R.1

Berker R.3 Frames

Square frames, round centre plates – R.3 focuses on contrasts. The consistently angular frames help make for an exceedingly striking appearance. This will not just delight lovers of exciting designs, but also make the R.3 the ideal switch range for use in sill-type bunking duct. The frame base supports consist of 7 mm thick plastic and are available with surfaces made from natural anodised aluminium, matt stainless steel or glass, or plastic in the colours black or polar white.

Berker R.8 Frames

The Berker R.8 is the next logical step in the evolution of the highly successful Berker R.3, which has won over 20 awards for its design around the world. The R.3 provides the perfect basis for the R.8 in function as well as form: It can be combined with any of the inserts in this range, enabling it to be used in any application. And since it protrudes just 3 mm from the wall, it's one of the shallowest frames on the market.

Assembly instructions for Berker R.8

When installing in masonry :
 Insert housing xgang flush-mounted in such way, that a thickness of plaster of min. 10 mm and max. 40 mm is ensured.

When using a 2gang, 3gang or 4gang wall box the supplied stabilising bars must be used.

Insert the adapter for height compensation, place the supporting rings of the inserts on the adapter and screw both to the wall box.

Frames

– for vertical and horizontal mounting

serie 1930 | glas | R.classic Inserts

The serie 1930 and serie glas switch ranges inspired by Bauhaus take classic design and push it in a modern direction. With rotary switches in round frames on the one hand and a wealth of modern functions such as USB charging sockets on the other: these are what makes both series excel. serie R.classic goes a step further, transporting the design of serie 1930 into the future. Round switches with simple rotary toggles which can even do without frames – easy-going and simply elegant.

SCHUKO socket outlet with LED orientation light

▶ 895

- enhanced contact protection
- screw-in lift terminals

Rated voltage	250 V~
Frequency	50/60 Hz
Rated current	16 A
Power consumption	0.25 W/0.35 VA
Switch-on brightness	ca. 2 lx
Switch-off brightness	ca. 4 lx
Light intensity (white)	0.2 cd

- additional benefit by combination of a socket outlet with an orientation light
- integrated brightness sensor that switches the orientation light on at twilight and off when there is sufficient brightness
- long service life of the LED
- white LED light
- through-wiring possible, therefore also ideal for retrofitting
- with screw-in lift terminals

Suitable for	Order no.	Page
Frame, 1gang, for centre plate Ø 58 mm	1382 0 ..	527

Caution!
Items with special flush-mounted insert.
Centre plates with LED orientation lights are not compatible with the standard socket outlets.

NOTE:
When integrating this product into the serie 1930, the 1gang frame for centre plate Ø 58 mm, order no.: 1382 0... may only be used.
Installation in multiple combinations of the serie 1930 is not possible!

Rotary dimmer

Universal rotary dimmer with centre plate (R, L, C)

▶ 879

- soft locking

Operating voltage	230 V~
Frequency	50/60 Hz
230 V incandescent lamps and halogen lamps	50 ... 420 W
Dimmable conventional transformers	50 ... 420 VA
Electronic transformers	50 ... 420 W
Number of built-in Tronics or power boosters (R, L) - with identical load type	max. 10
Number of universal power boosters, 420 W at phase control	max. 5
Number of universal power boosters, 500 W for phase cut-off	max. 10
Axis dimension Ø	4 mm

- bulb-preserving soft startup
- phase cut-on or cut-off according to load type, self-learning
- with brightness memory
- voltage test possible without dismantling
- expandable with universal power boosters RMD Plus with load cable switched in parallel
- with input for extension units insert for universal rotary dimmer
- with incremental encoder
- short-circuit and overload proof (electronic fuse)
- with plug-in terminals

Suitable for optional	Order no.	Page
Extension units insert for universal rotary dimmer	2835 ..	486

Do not connect conventional transformers together with electronic transformers.

Trouble-free operation will be obtained only with Berker Tronic transformers.

Electronics platform - light control

– for serie 1930, the conventional and KNX radio application modules listed below can be combined exclusively with 1gang frames for Ø 58 mm centre plates, order no. 13820...

Electronics platform - inserts

Relay insert

▶ 896

Operating voltage	230 V~	– low intrinsic energy requirement
Frequency	50/60 Hz	– with extension unit input for push-button (NO contact), single-surface operation and motion detector extension unit
Minimum contact load	≈ 15 W	
230 V LED lamps	440 W	– also usable as push-button relay switch
Dimmable energy-saving lamps	440 W	– no conductive connection between supporting ring and spreading claws
230 V incandescent lamps and halogen lamps	2300 W	– with screw terminals
Dimmable conventional transformers	1500 VA	
Electronic transformers and dual-mode transformers	1500 W	
Fluorescent lamps:		
- uncompensated	1100 VA	
- parallel compensated	1000 W	
- in Duo circuit	1000 W	
- with electronic ballast (EB)	1000 W	
Compact fluorescent lamps with electronic ballast	22 x 20 W	
Number of substations	unlimited	
Operating temperature	-5 ... +45 °C	
Screw terminals (max.)	2 x 1.5/1 x 2.5 mm ²	
Load cable length	max. 100 m	
Cable length, extensions	max. 50 m	
Claw guidance installation depth	32 mm	

Suitable for	Order no.	Page
Button 1gang		page 489
KNX radio button 1gang quicklink	8514 51 3 ..	490
KNX radio button 4gang quicklink	8564 81 3 ..	492

Comprehensive transmission and reception functions, in conjunction with a KNX radio application module.

Not suitable for installation in surface-mounted housing.

Design	Order no.	PU
Relay insert	8512 12 01	1

Switch insert 1gang

▶ 896

Operating voltage	230 V~	– low intrinsic energy requirement
Frequency	50/60 Hz	– bulb-preserving soft startup
Dimmable 230 V LED lamps	5 ... 70 W	– automatic setting of load-dependent switching principle (autoDetect process)
Dimmable energy-saving lamps	13 ... 80 W	– optimisation of the dimming performance by fine adjustment of the load type and special adjustment mode
230 V incandescent lamps and halogen lamps	25 ... 400 W	– with extension unit input for push-button (NO contact), single-surface operation and motion detector extension unit
Dimmable conventional transformers	25 ... 400 VA	– short-circuit and overload proof (electronic fuse)
Electronic transformers and dual-mode transformers	25 ... 400 W	– no conductive connection between supporting ring and spreading claws
Number of substations	unlimited	– with screw terminals
Operating temperature	-5 ... +45 °C	
Screw terminals (max.)	2 x 1.5/1 x 2.5 mm ²	
Load cable length	max. 100 m	
Cable length, extensions	max. 50 m	
Installation depth	32 mm	

Suitable for	Order no.	Page
Button 1gang		page 489

KNX radio button 1gang quicklink	8514 51 3 ..	490
KNX radio button 4gang quicklink	8564 81 3 ..	492

Comprehensive transmission and reception functions, in conjunction with a KNX radio application module.

Design	Order no.	PU
Touch dimmer (R, L)	8542 11 01	1

Universal touch dimmer 1gang

▶ 896

Operating voltage	230 V~
Frequency	50/60 Hz
Power consumption (standby)	0.3 W
Dimmable 230 V LED lamps	5 ... 70 W
Dimmable energy-saving lamps	13 ... 80 W
230 V incandescent lamps and halogen lamps	25 ... 400 W
Dimmable conventional transformers	25 ... 400 VA
Electronic transformers and dual-mode transformers	25 ... 400 W
Number of substations	unlimited
Operating temperature	-5 ... +45 °C
Screw terminals (max.)	2 x 1.5/1 x 2.5 mm ²
Load cable length	max. 100 m
Cable length, extensions	max. 50 m
Installation depth	32 mm

- low intrinsic energy requirement
- bulb-preserving soft startup
- automatic setting of load-dependent switching principle (autoDetect process)
- phase cut-on or cut-off according to load type, self-learning
- optimisation of the dimming performance by fine adjustment of the load type and special adjustment mode
- with extension unit input for push-button (NO contact), single-surface operation and motion detector extension unit
- short-circuit and overload proof (electronic fuse)
- no conductive connection between supporting ring and spreading claws
- with screw terminals

Comprehensive transmission and reception functions, in conjunction with a KNX radio application module.

Do not connect inductive and capacitive loads jointly.

KNX radio buttons for switches/dimmers

KNX radio button 1gang quicklink

Radio protocol KNX Radio
Transmitter duty cycle 1 %
Receiver category 2
Number of radio channels 2
Number of quicklink links max. 20 transmitter/receiver
Radio transmission/reception frequency 868.3 MHz
Radio transmission power < 10 mW
Radio transmission range (free field) max. 100 m
Radio transmission range (building) max. 30 m
Operating temperature -5 ... +45 °C

- configurable transmission and/or reception behaviour
- reset function (to factory setting)
- low intrinsic energy requirement
- quicklink functions: switching, dimming, blind, 2 scenes, switching time, push-button, NO contact
- ETS additional functions: +6 scenes, 1 button control up/down, operating mode on/off, dimming value, brightness display, push-button, status display, priority
- operating areas configurable as one or two-area operation
- scene saving lockable
- switch-on brightness level for each operating area on configuration with dimmer insert, power failure proof, storable
- LED application module/insert compatibility display
- with configuration and function LEDs
- with configuration and function button
- top and bottom operating area on 1gang switching/dimming inserts and network insert are freely configurable
- toolless quicklink configuration using buttons and LED display
- integration in the KNX TP system using KNX radio media coupler

▶ 896

For manual actuation or remote control via KNX radio.

Electronics platform - motion detectors

– for serie 1930, the conventional and KNX radio application modules listed below can be combined exclusively with 1gang frames for Ø 58 mm centre plates, order no. 13820...

Electronics platform - inserts

Relay insert

Operating voltage	230 V~	– low intrinsic energy requirement	
Frequency	50/60 Hz	– with extension unit input for push-button (NO contact), single-surface operation and motion detector extension unit	
Minimum contact load	≈ 15 W		
230 V LED lamps	440 W	– also usable as push-button relay switch	
Dimmable energy-saving lamps	440 W	– no conductive connection between supporting ring and spreading claws	
230 V incandescent lamps and halogen lamps	2300 W	– with screw terminals	
Dimmable conventional transformers	1500 VA		
Electronic transformers and dual-mode transformers	1500 W		
Fluorescent lamps:			
- uncompensated	1100 VA		
- parallel compensated	1000 W		
- in Duo circuit	1000 W		
- with electrical ballast (EB)	1000 W		
Compact fluorescent lamps with electronic ballast	22 x 20 W		
Number of substations	unlimited		
Operating temperature	-5 ... +45 °C		
Screw terminals (max.)	2 x 1.5/1 x 2.5 mm ²		
Load cable length	max. 100 m		
Cable length, extensions	max. 50 m		
Claw guidance installation depth	32 mm		

Suitable for
Motion detector covers
KNX radio motion detector covers

Order no.

Page

page 498

Comprehensive transmission and reception functions, in conjunction with a KNX radio application module.

Not suitable for installation in surface-mounted housing.

Design	Order no.	PU
Relay insert	8512 12 01	1

Switch insert 1gang

Operating voltage	230 V~	– low intrinsic energy requirement	
Frequency	50/60 Hz	– bulb-preserving soft startup	
Dimmable 230 V LED lamps	5 ... 70 W	– automatic setting of load-dependent switching principle (autoDetect process)	
Dimmable energy-saving lamps	13 ... 80 W	– optimisation of the dimming performance by fine adjustment of the load type and special adjustment mode	
230 V incandescent lamps and halogen lamps	25 ... 400 W	– with extension unit input for push-button (NO contact), single-surface operation and motion detector extension unit	
Dimmable conventional transformers	25 ... 400 VA	– short-circuit and overload proof (electronic fuse)	
Electronic transformers and dual-mode transformers	25 ... 400 W	– no conductive connection between supporting ring and spreading claws	
Number of substations	unlimited	– with screw terminals	
Operating temperature	-5 ... +45 °C		
Screw terminals (max.)	2 x 1.5/1 x 2.5 mm ²		
Load cable length	max. 100 m		
Cable length, extensions	max. 50 m		
Installation depth	32 mm		

Suitable for
Motion detector covers

Mains power supply for KNX radio application modules

Power supply for KNX radio application module

Operating voltage	230 V~
Frequency	50/60 Hz
Operating temperature	-5 ... +45 °C
Screw terminals (max.)	1 x 4/2 x 2.5 mm ²
Installation depth	22 mm

- low intrinsic energy requirement
- as supply for radio application modules
- no conductive connection between supporting ring and spreading claws
- with screw terminals

Motion detector application modules in conjunction with a network insert can only be used as a motion detector extension unit (slave).

For this purpose, a motion detector application module with a relay insert must be installed as a motion detector main unit (master) (order no.: 8512 12 00).

Suitable for	Order no.	Page

Radio protocol	KNX Radio
Transmitter duty cycle	1 %
Receiver category	2
Number of radio channels	1
Number of quicklink links	max. 20 transmitter/receiver
Radio transmission power	< 10 mW
Radio transmission frequency	868.3 MHz
Radio transmission range (free field)	max. 100 m
Radio transmission range (building)	max. 30 m
Nominal mounting height	1.1 m
Response sensitivity, settable	≈ 10 ... 100 %
Response brightness, adjustable	≈ 5 ... 1000 lx, ∞ lx (day)
Delay time, adjustable	≈ 1 s ... 3 h
Range, frontal	≈ 12 m
Range, side	each ≈ 8 m
Detection field, rectangular shaped	≈ 12 x 16 m
Operating temperature	-5 ... +45 °C
Assembling height	34 mm

- with memory function for presence simulation
- party function for switching on for 2 hours
- teach function for response brightness via button
- with keylock
- reset function (to factory setting)
- switch-off pre-warning on dimmer inserts
- low intrinsic energy requirement
- quicklink functions: switching, dimming, 2 scenes, switching time, NO contact push-button, priority, Master-Slave
- ETS additional functions: +6 scenes, operating mode on/off, push-button, status display, dimming value, brightness display, scene call-up upon motion/no motion
- remote control via quicklink transmitter
- scene opening via KNX radio appliances
- scene saving lockable
- µ-processor controlled mode of operation
- LED application module/insert compatibility display
- with operation and status LED, red/green/orange
- with configuration and function LEDs
- optional operation of extension units using installation push-button
- with configuration and function button
- with button for on/off/automatic/memory/party function
- integration in the KNX TP system using KNX radio media coupler

Continuous direct sunlight penetrating the upward-pointing detection level can result in failure of the motion detector.

Only suitable for indoor areas!

NOTE:

- housing out of tin diecasting
- for RJ11, RJ12 and RJ45 plugs
- with screen contacting 360° and strain relief
- with 45° oblique outlet
- flexible cable routing
- without spreader claws
- suitable for PoE+
- with IDC terminals

Cat.6_A iso\class E_A according to ISO/IEC 11801 A2
Protective screen according to DIN EN 55022, Class B
Design to according to DIN EN 60603-7-51
Colour code A and B according to TIA/EIA-568-B.2

Design	Order no.	PU
FCC socket outlet 8pole shielded, cat.6A iso	4586	10

WLAN Access-Point UP

Rated voltage	230 V~
Frequency	50/60 Hz
Power consumption (operation)	max. 3 W
Transmission rate WLAN	max. 150 Mbit/s
Transmission rate Ethernet	max. 10/100 Mbit/s
Frequency band	2.4 GHz
Operating temperature	-5 ... +45 °C
Installation depth	≈ 40 mm

- Operating modes in WLAN: Access-Point, Repeater/Bridge, Client (WDS), Client (relayed)
- ciphering method: WEP, WPA, WPA2
- WLAN range can be configured for adaptation to spatial conditions
- configuration of the integrated web server via web browser
- with integrated WLAN antenna
- with RJ45 jack on front
- LAN connection via 5pole screw terminal block
- with 2pole plug-in terminal for mains voltage

WLAN Standards IEEE 802.11 b/g/n
For fitting in standard connection boxes according to DIN 49073 and DIN EN 60670

Manufacturer product line
Reset magnet
Rutenbeck

Art. no.

Design	Order no.	PU
WLAN Access-Point UP	4582	1

WLAN Access-Point flush-mounted, PoE

Power over Ethernet (PoE)	48 V= (Class 0)	– Operating modes in WLAN: Access-Point, Repeater/Bridge, Client (WDS), Client (relayed)
Power output PoE	max. 6.49 W	– ciphering method: WEP, WPA, WPA2
Power consumption PoE	max. 3 W	– WLAN range can be configured for adaptation to spatial conditions
Transmission rate WLAN	max. 150 Mbit/s	– configuration of the integrated web server via web browser
Transmission rate Ethernet	max. 10/100 Mbit/s	– with integrated WLAN antenna
Frequency band	2.4 GHz	– power supply (PoE, class2) of further network devices possible via RJ45 jack on front
Operating temperature	-5 ... +45 °C	– LAN connection/PoE power supply via 9pole screw terminal block
Installation depth	≈ 40 mm	

WLAN Standards IEEE 802.11 b/g/n
For fitting in standard connection boxes according to DIN 49073 and DIN EN 60670

Power consumption, KNX ≈ 150 mW
Operating temperature $-5 \dots +45$ °C

Use only in conjunction with bus coupling unit flush-mounted (order no. : 8004 00 02) for serie 1930/R.classic!

NOTE:

When integrating this product into the serie 1930, the 1gang frame for centre plate Ø 58 mm, order no.: 1382 0... may only be used. Installation in multiple combinations of the serie 1930 is not possible!

- function for manual interruption of automatic functions already triggered
- Push-button functions: i. a. switching, dimming, roller shutter/blind, timer, operating mode changeover
- setting of 1 ... 8 scenes possible
- colour of status LED uniformly adjustable for complete device
- brightness value of the status LED for day/nighttime operation preset, change-over for day/nighttime operation possible
- integrated temperature sensor with output of the measured values
- ETS additional functions: alarm telegram after disconnection from bus coupling unit 1 bit or 1 byte; status LEDs can be adjusted individually in their brightness for button/push-button function; brightness value of status LEDs for day/nighttime operation adjustable via object or manually; control surfaces configurable as buttons (single-surface operation) and rockers (two-surface operation)
- ETS additional functions: value transmitter 1 and 2 bytes, 2-channel mode, level switch function
- with 2 RGB status LEDs per rocker
- with white operating LED, can be activated
- with anti-dismantling protection
- for bus coupling unit flush-mounted

Motion detector

KNX motion detector module 1.1 m

- internal temperature sensor
- integrated bus coupling unit

Operating voltage over bus	21 ... 32 V=
Current consumption KNX	max. 10 mA
Nominal mounting height	1.1 m
Response brightness, adjustable	≈ 5 ... 1000 lx, ∞ lx (day)
Delay time, adjustable	10 s ... 30 min
Detection angle, settable	each side ≈ 45 ... 90°
Detection field, rectangular shaped	≈ 12 x 16 m
Operating temperature	-5 ... +45 °C

Automatic triggering of bus functions for movement within the detection area or manual control via integrated button.

Continuous direct sunlight penetrating the upward-pointing detection level can result in failure of the motion detector.
Only suitable for indoor areas!

- with 3 operating modes: automatic/permanent ON/permanent OFF
- Master/Slave operation for covering large detection areas
- with test mode
- with button for automatic/permanent ON/permanent OFF
- operating mode display via status LED, red/green/orange
- setting of 1 ... 8 scenes possible
- motion detector functions: switching, dimming, roller shutter/blind, timer
- additional channel for independent of brightness detector mode
- ETS additional functions: two function channels for brightness independent functions; additional channel for brightness independent detector mode; output of brightness value via object possible
- with spreader claws
- with dismantling protection
- with integrated bus coupling unit
- bus connection via connecting terminal

Hotel applications

Relay switch with centre plate for hotel card

▶ 881

Rated voltage	230 V~ +10/-15 %	– with potentiometer for incremental adjustment of delay time
Frequency	50/60 Hz	– illuminated with blue LED if hotel card is not inserted
Switching current	10 A	– for illumination
Power consumption	< 0.2 W	– with potential-free contact
230 V incandescent lamps and halogen lamps	1500 W	– with centre plate Ø 58 mm
Conventional transformers	1500 VA	– with screw-in lift terminals
Inductive load at $\cos \phi = 0.6$	max. 6 A	
Electronic transformers	1500 W	
Fluorescent lamps:		
- in Duo circuit	1500 W	
Compact fluorescent lamps	500 W	
Delay time incrementally adjustable	0, 15, 30, 60 s	
Card width	max. 55 mm	
Card thickness	0.8 ... 1.2 mm	
Operating temperature	-5 ... +50 °C	
Screw terminals (max.)	2 x 2.5 mm ²	
Installation depth	32 mm	

Suitable for	Order no.	Page
Frame, 1gang, for centre plate Ø 58 mm	1382 0 ..	527

Not suitable for installation in surface-mounted housing.

serie 1930

Frames

Consistently inspired by classic switches: Berker serie 1930 features round frames. The shape and the glossy polar white or black plastic afford the switch range a traditional appearance inspired by Bauhaus. Those looking for retro design at its finest can opt for rotary switches made from white or black porcelain. Here it is not just the frames, but also the centre plates and rotary toggles that are “made by Rosenthal” – porcelain from a traditional manufacturer.

Frame, 1gang, for centre plate Ø 58 mm

▶ 947

Caution:
These frames are designed for integrating devices with a round, Ø 58 mm centre plate into the serie 1930.

Note:
If several devices are to be mounted one below the other or next to each other, always use the spacer gland - order number 1887 - when plastering the wall boxes. Each device must be installed separately into a frame 1gang for centre plate Ø 58 mm.

– for centre plate with Ø 58 mm cut-out

serie glas Frames

Round frames made from glass stand for tradition. For elegance. For simple yet compelling design which fits harmoniously into both older buildings and modern living spaces. In the serie glas range, the switch bases are made from real clear glass. An alternative is the clear-glass version which is painted polar white on the rear side. With polar-white and black central inserts or rotary toggles made from brass and chrome, an appearance is created which is the exact opposite of mundane.

serie R.classic Frames

Plastic? Glass? Aluminium? Stainless steel? Or maybe no frame at all? This is now possible with R.classic – the frameless rotary switches are an innovation. Fundamentally, though, the round frames are much too elegant to do without. The matt-finish stainless steel, the natural anodised aluminium and the polar-white or black glass/plastic frames underscore the unique character of the R.classic range: back to the future – the most forward-thinking traditional design can get!

Push-button Black Diamond

Rated voltage	24 V	– NO contact
Momentary-contact current	1.5 A	– brass, refined
Operating temperature	-20 ... +60 °C	– with SWAROVSKI ELEMENTS
Installation depth	13 mm	– with plug-in terminals

For connection via system interfaces to KNX radio or KNX installations.

Alternatively, can be used to control relay circuits.

Suitable for optional
Universal interfaces
Binary inputs

Supplementary products

Universal interfaces

- for the connection of switches, push-buttons, detectors, sensors, key switches and bolt switch contacts to KNX
- with programming button and red programming LED
- with integrated bus coupling unit
- bus connection via connecting terminal

Universal interface 2gang flush-mounted

Operating voltage over bus	21 ... 32 V=	– with 2 independent binary inputs for potential-free contacts
Input scanning voltage	per channel 5 V	– switching functions, dimming functions, blind control functions functions, forced control functions, scene functions, heating functions and timer functions
Operating temperature	+0 ... +45 °C	– ETS additional functions: value transmitter 1 and 2 bytes, 2-channel mode
Line length	max. 5 m	– for flush mounting and hollow-wall mounting
Dimensions (L x W x H)	38 x 35 x 12 mm	

For connection of potential-free contacts, e.g. switches, push-buttons, window contacts, detector contacts or thermostats, for communication into KNX bus system.

Suitable for
Berker TS Crystal
Push-button, NO contact
optional
KNX Configuration server easy link RMD

Order no. **Page**

Universal interface 4gang flush-mounted

Operating voltage over bus	21 ... 32 V=
Input scanning voltage	per channel 5 V
Operating temperature	+0 ... +45 °C
Line length	max. 5 m
Dimensions (L x W x H)	38 x 35 x 12 mm

For connection of potential-free contacts, e.g. switches, push-buttons, window contacts, detector contacts or thermostats, for communication into KNX bus system.

- with 4 independent binary inputs for potential-free contacts
- switching functions, dimming functions, blind control functions functions, forced control functions, scene functions, heating functions and timer functions
- ETS additional functions: value transmitter 1 and 2 bytes, 2-channel mode
- for flush mounting and hollow-wall mounting

Suitable for	Order no.	Page

Universal interface 8gang flush-mounted

Operating voltage over bus	21 ... 32 V=
Input scanning voltage	per channel 20 V
Output current per channel	max. 0.8 mA
Operating temperature	-5 ... +45 °C
Line length	max. 10 m
Dimensions (W x H x D)	44 x 48 x 32 mm

For connection of potential-free contacts, e.g. switches, push-buttons, window contacts, detector contacts or thermostats, for communication into KNX bus system.

- for switch, push-button, dimmer and shutter functions
- single and two push-button operation parameterisable
- one push-button operation for switching, pushing and dimming
- blind operating concepts short-long-short and long-short parameterisable
- second operating level by object or 3-button handle (only 8-input application)
- 8 binary inputs, 8 outputs or 4 binary inputs and 4 outputs parameterisable
- with 8 independent binary inputs for potential-free contacts
- extension unit for light scene push-button
- outputs for LEDs, e.g. as status LED
- objects: switching, forced guidance, feedback of respective output (only for application 4 inputs/4 outputs)
- dimming / position value transmitter 1 byte
- short-circuit and overload proof (electronic fuse)
- protected against polarity reversal
- with screw terminals

Suitable for	Order no.	Page

Binary inputs

KNX radio binary input 2gang flush-mounted

▶ 896

Input scanning voltage	per channel 12 V=	– quicklink functions: switching, dimming, blind, 2 scenes, switching time, NO contact push-button, priority, up/down push-button
Radio transmission/reception frequency	868.3 MHz	– reset function (to factory setting)
Radio transmission frequency	868.3 MHz	– toolless quicklink configuration using buttons and LED display
Number of radio channels	2	– low intrinsic energy requirement
Radio protocol	KNX Radio	– with manual operation on/off
Radio transmission power	< 10 mW	– with configuration button
Radio transmission range (free field)	max. 100 m	– with configuration LED
Radio transmission range (building)	max. 30 m	– activation, for example through switches, push-buttons, timers, blind timer switches, magnetic contact
Number of quicklink links	max. 20 transmitter/receiver	– easy additional functions: +6 scenes, on/off operating mode, 1 up/down button control
Pulse time	min. 50 ms	– ETS additional functions: +62 scenes, operating mode, 3 x alarm, priority, status display, automatic
Battery service life [years]	≈ 3	– integration in the KNX TP system using KNX radio media coupler
Operating temperature	-10 ... +50 °C	– with screw-in lift terminals
Binary cable length, extendable to	max. 10 m	– confectioned, with 4-core cable
Line length	11 cm	– for installation behind flush-mounted inserts
Output current per channel	max. 1 mA	
Transmitter duty cycle	1 %	
Receiver category	2	
Dimensions (W x H x D)	41 x 40 x 11 mm

KNX binary input 6gang RMD 24 ... 230 V AC/DC

Operating voltage over bus	21 ... 32 V=	– manual operation can be activated via selection switch
Signal voltage	potential-free, 24 ... 230 V~/=	– manual operation per channel via button with integrated status LED, thereby lockout of KNX function
Operating temperature	+0 ... +45 °C	– with programming button and red programming LED
Conductor cross-section (flexible)	0.75 ... 2.5 mm ²	– with 6 red status LEDs for display of input states
Conductor cross-section (rigid)	0.75 ... 2.5 mm ²	– suitable for different external conductors
Input cable length	max. 100 m	– with 6 independent binary inputs with separate neutral conductor
Dimensions (W x H x D)	105 x 90 x 65 mm	– switching functions, dimming functions, blind control functions, forced control functions, scene functions, heating functions and timer functions
Width of rail mounted device (RMD)	6 modules	– ETS additional functions: value transmitter 1 and 2 bytes, 2-channel mode
Current consumption KNX	max. 7 mA	– with integrated bus coupling unit
For connection of potential-free or 24 ... 230 V AC/DC power supplied contacts for communication into KNX bus system.		
– bus connection via connecting terminal		
– with QuickConnect plug-in terminals

B.IQ

Looking good, offering clarity and at the cutting edge of technology. The Berker B.IQ is a frameless push-button sensor with rockers. It is used to control the functions of the KNX intelligent building management system. Take advantage of the opportunity to control the most varied of building functions – lighting, heating and blinds, for example – from a single multi-function push-button sensor. As well as offering absolute clarity, the sensor also makes an architectural statement. With surface finishes in plastic, glass, aluminium or stainless steel, the Berker B.IQ is a perfect match for the frame varieties in the Berker B.7 range.

Dimensions

- W 88.5 x H 88.5 mm, 1gang
- W 88.5 x H 88.5 mm, 2gang
- W 88.5 x H 88.5 mm, 3gang
- W 88.5 x H 118.1 mm, 3gang + RTR
- W 88.5 x H 118.1 mm, 4gang
- W 88.5 x H 149.2 mm, 4gang + RTR
- W 88.5 x H 178.8 mm, 5gang + RTR

Surfaces

Plastic polar white
similar to RAL 9010

Glass glossy, printed on the back
polar white similar to RAL 9010
black similar to RAL 9005

Metal

Aluminium
Stainless steel

Push-buttons

- for switch, push-button, dimmer and shutter functions
- with 2 white status LEDs per rocker (labelling field illumination)
- with blue operation LED
- for installation in single standard wall boxes
- with dismantling protection
- for detailed information, in particular on the software functions, refer to the chapter "KNX operating systems"

Push-buttons comfort

B.IQ push-button comfort

▶ 946

- Operating temperature -5 ... +45 °C
- single and two push-button operation parameterisable
 - one push-button operation for switching, pushing, shutters and dimming
 - activation of second user level via object
 - extension unit for light scene push-button
 - for additional products to complement the installation in matching colours/materials, refer to the Design platform S.1 | B.x
 - for plastic frames in the same "style" for additional applications, see the Design line B.7

Push-buttons with thermostat

- for switch, push-button, dimmer, blind and thermostat functions
- single and two push-button operation parameterisable
- one push-button operation for switching, buttons, blinds and dimming
- extension unit for light scene push-button
- with 2 white status LEDs per rocker (labelling field illumination)
- with blue operation LED
- for individual single room temperature control
- for heating and/or cooling mode with/without auxiliary step
- operating modes: comfort, standby, night operation and frost/heat protection adjustable
- LC display with symbols and illumination, switchable via object
- with 2 additional function buttons for display control
- display of operating mode, controller lockout, room and outside temperature as well as time in connection with a clock
- temperature measurement via internal temperature sensor and/or external communication object (weighting ratio parameterisable)
- provision of the internal temperature value via communication object
- for installation in single standard wall boxes
- with dismantling protection
- for detailed information, in particular on the software functions, refer to the chapter "KNX operating systems"

IR push-buttons with thermostat

- for switch, push-button, dimmer, blind and thermostat functions
- single and two push-button operation parameterisable
- one push-button operation for switching, buttons, blinds and dimming
- extension unit for light scene push-button
- with 2 white status LEDs per rocker (labelling field illumination)
- with blue operation LED
- for individual single room temperature control
- for heating and/or cooling mode with/without auxiliary step
- operating modes: comfort, standby, night operation and frost/heat protection adjustable
- LC display with symbols and illumination, switchable via object
- with 2 additional function buttons for display control
- display of operating mode, controller lockout, room and outside temperature as well as time in connection with a clock
- temperature measurement via internal temperature sensor and/or external communication object (weighting ratio parameterisable)
- provision of the internal temperature value via communication object
- IR telegram with RC5 coding parameterisable per push-button
- for installation in single standard wall boxes
- with dismantling protection
- for detailed information, in particular on the software functions, refer to the chapter "KNX operating systems"

Manufaktur Switch ranges and building- automation

Yes, one-off items are still available. Unique items, manufactured individually by master craftsmen. The engraved gold light switch required by a sheik in the emirates. Or also a short run, manufactured specifically for and based on the idea of a customer for a wellness hotel: hay switches that are not only actually made from hay, but also have the scent of hay. They all have a home: the Manufaktur. Limits to phantasy are set only by the reality of technology. However extravagant and unique an item may be, it will meet our technical and quality standards fully and completely.

Beyond the standard: Manufaktur	568
Berker K.1	570
Berker Q.3	571
Berker R.1	573
Berker R.3	575
Berker Q.7	577
Berker TS Sensor	578
Berker B.IQ	579

Beyond the standard: Manufaktur

We have combined the ability, knowledge and experience of Hager, Berker and Elcom in the Manufaktur. This is where we manufacture and configure solutions to your very individual requirements. From custom-engineered trunking through one-of-a-kind switches to complete electrical solutions for residential and functional buildings. Everything comes from a single source.

01 Cable routing that makes its mark

There is hardly any customer request that we are unable to fulfil. After all, a wide range of colours, shapes and material choices is available. Even some that allow the wiring simply to disappear. In the wall, floor or ceiling.

02 Door communication – Details in decisive positions

This first thing a visitor see is the entryphone. Configure it exactly to meet your expectations. The modular system from Elcom makes it possible. Every element is manufactured with great care from high-quality materials. You see it and you sense it. As do your guests.

03 Preparatory work that simplifies your task

Wha's done, is done: When the time window on the construction site is tight, preparatory work that was already handled during manufacturing helps. Trunking cut to length, custom-assembled meter cabinets or media columns pre-wired to customer specifications: set up, connect, finished.

04 Design in an individual overall concept

Hager, Berker, Elcom – all three brands adhere to the same technical guidelines, purchase their raw materials together and follow the Design Guidelines of the Hager Group. With this as a basis, you can create entire installations that harmonise not only technically, but aesthetically as well.

Berker K.1

With its contoured, accentuated edged form, the Berker K.1 always sets its own accent. A central, modern classic in the Berker switch range that embodies quality and a sure sense of style.

The surprising variety of qualified paint types allows customisation of the Berker K.1 in terms of colour and feel. Both classic colour variants with the special "touch" and unexpected colour combinations fit perfectly into a timeless-classic interior.

Private apartment

titanium grey

sanodal red

black softtouch

pearl mouse grey

Berker Q.3

Robust, distinct contours and an exceptionally pleasant surface. Its functional benefits are also worth noting: the Berker Q.3 is ideally suited for installation in wall ducts.

Special finish
Anodised gold tone

champagne

yellow brown

Ameron Hotel, Hamburg
Architect / Interior: Geplan Design GmbH

An effect finish for the Berker Q.3 in anodised colours allows great freedom for surface design. Anodised colours are characterised by high suitability for daily use in terms of cleaning and scratch resistance.

Endemol Shine Group Germany GmbH, Cologne
Interior: Werner Aisslinger

Berker R.1

Along with the dot and straight line, the circle is one of the oldest elements of geometry. But it can still be used in surprising ways. For instance, in the design line Berker R.1, which can then be just as pure and elegant as it is intense and conspicuous.

rosé gold

black chrome

Copper

Burnished brass

Copper, brass, high-gloss chrome draw attention and become stylish eyecatchers in the four walls. Whether as chandelier hanging above a table, as candelabra on the sideboard or in the form of the Berker R.1 – the metallic trend is found everywhere.

Private apartment
Interior: Arzu Kartal

Berker R.3

Continuously cornered frame, round centre piece – the Berker R.3 the power of contrast. Just like the Berker R.1, its product range also comprises all the properties of a contemporary surface switch. This means also that thanks to a sturdy plastic base it is just as robust and break-proof.

Kerlite® ceramic

with patina

Corten steel

Resysta®

When exceptional designs such as the Berker R.3 are combined with high-quality innovative materials, aesthetically unique products results. With exclusive ceramics from Italy to high-grade materials that develop an interesting patina through use of a special process – creativity has no limits.

Private apartment

Berker Q.7

The Berker Q.7 creates accents not only through its form, function and workmanship. With its variety of frame materials, it also sets a new standard for architectural individuality. Exciting design contrast: The transparent support frame makes the switch appear to float on the wall.

Wildspitze

Coffee

There are many different ways to create accents with the Berker Q.7 in an interior space. Aromatic decorative coatings from Organoid® now bring nature indoors. They provide a new experience of natural materials with all senses, since the surface is untreated and thus retains its aroma characteristics.

Berker TS Sensor

Two products that complement each other perfectly: The Berker TS sensor is an extremely flat glass sensor that, thanks to screwless mounting, has a remarkably inconspicuous exterior. The Berker B.7 design line offers socket outlets with matching aesthetics.

TS sensor in green

The elegant-purist exterior of the Berker TS sensor becomes an eyecatcher through use of the unexpected variety of colour variants. In this way, the Berker TS sensor and the Berker B.7 enhance every interior.

pearl mouse grey

manufactory white

pearl gold

Berker B.IQ

Perfectly matched surfaces ensure that our programmes can be combined with one another. Combining the Berker B.IQ with socket outlets from the Berker B.7 switch range is possible as well.

B.IQ black chrome

Fine-brushed brass

Gold

Chrome

With their high-quality metallic appearance, these design lines bring glamour in your own four walls and provide a modern touch. Gold and brass are characterised by a warm lustre that imparts comforting accents in an interior setting. In contrast, metals such as chrome and stainless steel create a decidedly cool atmosphere.

Flush-mounted wet-room installation

There are several options to realise a water-protected, flush-mounted installation. The splash-protected, flush-mounted IP44 range developed by Berker offers a wide spectrum of functionality, timeless square design, frames in three different colours and IP44 protection thanks to the corresponding seals. In addition, certain rockers, centre plates and socket outlets from the Q.1/Q.3, K.1/K.5, arsys or R.1/R.5 switch ranges are suitable provided the correct sealing set is also used.

SCHUKO socket outlets with hinged cover	588

Installation instruction

Installation instructions for wg UP IP44

Installation instructions for Berker arsys IP44

Installation instructions for Q.1 | Q.3 and K.1 | K.5

Use
The degree of protection IP44 is reached by installing the sealing set

- in flush-mounted boxes according to DIN 49073, Part 1
- on smooth, even, vertical walls
- in flush-mounted boxes

Degree of protection IP 44 is not ensured in the case of floor mounting, ceiling mounting and mounting in hollow-wall boxes.

Assembly note
The degree of protection IP44 is reached only if all installed articles are IP44 suitable (check markings) and the installation instruction is observed!

Installation instructions for R.1 | R.3

Use

The degree of protection IP44 is reached by installing the sealing set

- in flush-mounted boxes according to DIN 49073, Part 1
- on smooth, even, vertical walls
- in flush-mounted boxes

Degree of protection IP 44 is not ensured in the case of floor mounting, ceiling mounting and mounting in hollow-wall boxes.

Surface-mounted wet-room installation

The Berker W.1 keeps tightly sealed. Housings, rockers and hinged covers of the surface-mounted wet-room range with IP55 degree of protection keep the moisture out. The W.1 is even immune from water jets. There is plenty of space for wiring in the housing and the system is quick and easy to install. One alternative is the extremely robust Isopanzers, some of which have even higher degrees of protection: the switches and socket outlets with high resistance to chemicals are also available with IP44 and IP66 protection.

SCHUKO socket outlets with hinged cover

- full-surface sealing under the housing floor to seal the rear side, the rear cable entry and to cover unevennesses on the wall
- with hinged cover that falls back, manual clip-in for reaching the degree of protection IP55
- easily accessible, funnel-shaped mounting holes in the housings
- one Wago 2-wire connection terminal for wiring enclosed
- two clip-in places for Wago 2-wire connection terminals in the housing floor
- much space for wiring under the base of the inserts
- easy installation of the insert in the housing by clicking into place
- secure fastening of the frame on the housing by means of 2 quick-release locks
- enhanced contact protection (child protection) in the socket outlets is according to IEC 60884-1
- connection terminals according to IEC 60884-1

Modular system

- Inserts will only reach the degree of protection IP55 if mounted with a housing surface mounted or frame for flush-mounted installation of the Berker W.1 product line

Socket outlet-inserts

- with hinged cover that falls back, manual clip-in for reaching the degree of protection IP55
- enhanced contact protection (child protection) in the socket outlets is according to IEC 60884-1
- connection terminals according to IEC 60884-1

SCHUKO socket outlet insert with hinged cover surface-mounted/flush-mounted

Rated voltage	250 V~	– for surface-mounted housings or frames for flush-mounted installation
Rated current	16 A	– with plug-in terminals
Operating temperature	-40 ... +30 °C	

Hinged cover springs made of stainless steel, pins of quick-release lock made of ZAMAK

Suitable for	Order no.	Page
Frame for flush-mounted installation		page 647
Housing surface-mounted		page 648

Design	Order no.	PU
grey matt	4706 35 25	10
polar white, matt, plastic	4706 35 22	1

SCHUKO socket outlet insert with hinged cover surface-mounted/flush-mounted

- enhanced contact protection

Rated voltage 250 V~
Rated current 16 A
Operating temperature -40 ... +30 °C

- for surface-mounted housings or frames for flush-mounted installation
- with plug-in terminals

Suitable for
Frame for flush-mounted installation
Housing surface-mounted

Order no. **Page**

grey matt	3048 35 15	10
polar white matt	3048 35 12	1

Surface-mounted wet-room installation

Series push-button insert, 2 NO contacts with rocker 2gang surface-mounted/flush-mounted common input terminal

Rated voltage 250 V~
Momentary-contact current 10 A
Operating temperature -40 ... +30 °C

- for surface-mounted housings or frames for flush-mounted installation
- with plug-in terminals

Suitable for	Order no.	Page
Frame for flush-mounted installation		page 647
Housing surface-mounted replacement		page 648
Rocker 2gang	3055 35 4 ..	641

Design	Order no.	PU
grey matt	5042 35 15	10
polar white matt	5042 35 12	1

Series push-button module up to 48 V AC/DC

Input voltage 24 ... 48 V=
Rated current max. 50 mA
Momentary-contact current 50 mA
Operating temperature -40 ... +30 °C

- 2 NO contacts, separate input terminals
- for surface-mounted housings or frames for flush-mounted installation
- for rigid and flexible conductors (without conductor sleeve)
- for connection of e.g. PLC controls
- with plug-in terminals

Note:
Remove conductors by gently pushing on the actuation push-pieces
Degree of protection IP55 by installation into W.1 surface-mounted/flush-mounted housings and mounted rocker

Suitable for	Order no.	Page
Frame for flush-mounted installation		page 647
Housing surface-mounted		page 648
Rocker 2gang	3055 35 4 ..	641
Rocker 2gang with imprinted arrow symbol	3065 35 6 ..	641

Design	Order no.	PU
grey/light grey glossy/matt	8014 16 00	1

Rocker 2gang

- with sealing membrane
- also for KNX applications: push-button module 2gang and group push-button 2gang - order no. 8014 1x 00
- for rockers switches
- for rockers push-buttons

Design	Order no.	PU
grey matt	3055 35 45	10
polar white matt	3055 35 42	10

Rocker 2gang with imprinted arrow symbol

- with sealing membrane
- also for KNX applications: push-button module, 2gang - order no. 8014 14 00
- for blind series switch/push-button

Design	Order no.	PU
grey matt	3065 35 65	10
polar white matt	3065 35 62	10

Timer-inserts

Insert for mechanical timer 15 min surface-mounted/flush-mounted

- **setting knob**

Rated voltage	250 V~	
Switching current	10 AX	
Teachable running time	25 s ... 15 min	
Operating temperature	-40 ... +30 °C	
Dimensions (W x H x D)	70.3 x 70.3 x 62 mm	

- for illumination
- with imprint
- NO contact
- with screw terminals

Suitable for
Frame for flush-mounted installation
Housing surface-mounted

Order no.	Page
	page 647
	page 648

Housing screws made of stainless steel.
Not suitable for 2- or 3gang combinations!

Design	Order no.	PU
grey matt	4227 35 25	1
polar white matt	4227 35 22	1

EMERGENCY STOP button inserts

SAFETY EMERGENCY push-button insert, NC contact + NO contact surface-mounted/flush-mounted

Rated voltage	240 V~/440 V~	
Switching current	10 AX	
Operating temperature	-40 ... +30 °C	

- for surface-mounted housings or frames for flush-mounted installation
- unlocking by 1/4 rotation
- with screw terminals

Suitable for
Frame for flush-mounted installation
Housing surface-mounted

Order no.	Page
	page 647
	page 648

Design	Order no.	PU
grey matt	4471 35 12	1

SAFETY EMERGENCY push-button insert, NC contact + NO contact surface-mounted/flush-mounted

- **lock - even closings**

Rated voltage	240 V~/440 V~	
Switching current	10 AX	
Operating temperature	-40 ... +30 °C	

- with 2 keys
- for surface-mounted housings or frames for flush-mounted installation
- unlocking by 1/4 rotation
- with screw terminals

Suitable for
Frame for flush-mounted installation
Housing surface-mounted

Order no.	Page
	page 647
	page 648

Design	Order no.	PU

LED signal light inserts

Insert of LED signal light, white lighting surface-mounted/flush-mounted

Rated voltage	230 V~	
Frequency	50/60 Hz	
Power consumption	at 230 V~, 50 Hz - max. 1 W	
Operating temperature	-40 ... +30 °C	

- for signalling of e.g. toilets, stairwells or lifts
- brightness continuously adjustable on insert via potentiometer
- for surface-mounted housings or frames for flush-mounted installation
- with cutting terminals

Suitable for
Frame for flush-mounted installation
Housing surface-mounted
optional
Foil for LED signal light insert

Order no.	Page
	page 647
	page 648
	page 643

Design	Order no.	PU
grey matt	5173 35 25	1

Insert of LED signal light, blue lighting surface-mounted/flush-mounted

Rated voltage	230 V~	– for signalling of e.g. toilets, stairwells or lifts
Frequency	50/60 Hz	– brightness continuously adjustable on insert via potentiometer
Operating temperature	-40 ... +30 °C	– for surface-mounted housings or frames for flush-mounted installation
		– with cutting terminals

Suitable for	Order no.	Page
Frame for flush-mounted installation		page 647
Housing surface-mounted		page 648
optional		
Foil for LED signal light insert		page 643

Design	Order no.	PU

polar white, matt, plastic	3075 35 32	1

Communication/multimedia technology-inserts

FCC socket outlet insert 8pole shielded with hinged cover surface-mounted/flush-mounted, cat.6

- labelling field

Transmission bandwidth max. 250 MHz
Operating temperature -40 ... +30 °C

- for surface-mounted housings or frames for flush-mounted installation
- for RJ11, RJ12 and RJ45 plugs
- suitable for PoE+
- with straight outlet
- with transparent hinged cover
- with self-closing dust protection cover before jack
- with screen contacting 360° and strain relief
- with cutting terminals

Hinged cover springs made of stainless steel, pins of quick-release lock made of ZAMAK
Colour code A and B according to TIA/EIA-568-B.2
Cat.6/class E according to ISO/IEC 11801, 2nd edition
Design to according to DIN EN 60603-7-5

Suitable for	Order no.	Page
Frame for flush-mounted installation		page 647
Housing surface-mounted		page 648

Design	Order no.	PU
grey matt	1409 35 15	1

SCHUKO socket outlets with hinged cover

– connection terminals according to IEC 60884-1

SCHUKO socket outlet with hinged cover surface-mounted

▶ 951

– screw terminals

- with cable entry at top and bottom
- with screw terminals

Rated voltage 250 V~
Rated current 16 A

IP44

Connecting terminals only suitable for wiring with massive conductors.

Design	Order no.	PU
dark grey/yellow	4280	1

Combination SCHUKO socket outlets with hinged cover

2gang SCHUKO socket outlet vertical with hinged cover surface-mounted

▶ 951

– screw terminals

- with cable entry at top and bottom
- inserts wired-through
- with screw terminals

Rated voltage 250 V~
Rated current 16 A
Conductor cross-section 1 mm² ... 2.5 mm²

IP44

Instead of socket outlets, any other devices from the ISO-reinforced IP44 and IP66 ranges with degree of protection IP44 can be used.

Housing screws, hinged cover springs and axles made of stainless steel.

Design	Order no.	PU
dark grey/yellow	4370	1

Surface-mounted double SCHUKO socket outlet with hinged cover

▶ 951

– screw terminals

- with one entry for 2 cables and one entry for cable and tube
- side knock out openings for entries
- for horizontal mounting
- inserts wired-through
- with screw terminals

Rated voltage 250 V~
Rated current 16 A

IP44

Not suitable for heating systems > 50 kW.

Design	Order no.	PU
dark grey/yellow	4322	1

3gang SCHUKO socket outlet surface-mounted with hinged cover

▶ 951

- screw terminals

- with cable entry at top and bottom
- side knock out openings for entries
- for horizontal mounting
- inserts wired-through
- with screw terminals

IP44

Rated voltage 250 V~
Rated current 16 A

As a result of the side cable entries specially suited for installation over workbenches.

Switches, push-buttons, pilot lamps and data connector housings can be used instead of socket outlets.

Housing screws, hinged cover springs and axles made of stainless steel.

Design	Order no.	PU
dark grey/yellow	4323	1

International socket outlet systems

NEMA-socket outlets

Socket outlet with earthing contact and hinged cover USA/CANADA NEMA 5-15 R surface-mounted

▶ 951

- screw terminals

- 2pole + earth
- with screw terminals

IP44

Rated voltage 125 V~

Surface-mounted dry-room installation

Uncomplicated and good: The Berker surface-mount programme for installation in dry rooms includes socket outlets, switches and push-buttons with convincing functionality and easy mounting. They are ideally suited for surface-mounted cable runs – e. g. through prepared openings for insertion of wires and cables located on the top and bottom of the housing. Various self-extinguishing base plates intended for use on a flammable underlying surface complement the programme.

Connecting systems and accessories

Special installation solutions are occasionally required outside of residential and office spaces – it goes without saying that you can find the appropriate products for such situations also at Berker. Electric range connections boxes are among these as are CEE connecting devices that are used primarily in industry. Solutions for separate earthing of medical devices or protective coverings for flush-mounted inserts on construction sites are also available.

Electric range connection boxes	680
CEE connecting devices	680
SCHUKO connecting devices	681
Frames design-neutral	681
Socket outlets for floating output	682
Supplementary products	683

Electric range connection boxes

Electric range connection box surface-mounted/flush-mounted

Conductor cross-section (rigid)	max. 2.5 mm ²	– with 5pole double terminal, locking
Dimensions (L x W x H)	86 x 86 x 28 mm	– additional pin cover possible
		– for screw and spread fixing in 60 and 70 box
		– with screw terminals

Design	Order no.	PU
light grey	4478 09	5

Electric range connection box flush-mounted

Conductor cross-section (rigid)	max. 2.5 mm ²	– with 5pole double terminal, locking
Dimensions (L x W x H)	86 x 86 x 12 mm	– flat design
Quick-mounting with a spreader claw bolt.		– for screw and spread fixing in 60 and 70 box
		– with screw terminals

Design	Order no.	PU
light grey	4477 09	5

CEE connecting devices

CEE connecting devices 5pole

CEE socket outlet 5pole with hinged cover EB 16 A

Rated voltage	400 V~	– suitable e.g. for switch cabinet door
Frequency	50/60 Hz	– built-on socket outlet
Rated current	16 A	– suitable for cable duct, type 74 flush-mounted and hollow-wall boxes
Protective contact position	6 h	– with screw terminals
5-pole	3 P + N + PE	

IP44

Design	Order no.	PU
polar white	5785 01	5

Supplementary products

CEE flush-mounted wall box

Bolt spacing	60 mm
Installation depth, flush-mounted boxes	64 mm

Design	Order no.	PU
CEE flush-mounted wall box	1830 01	5

SCHUKO connecting devices

SCHUKO right angle plug

Rated voltage	250 V~	- can be screwed
Rated current	16 A	- with screw terminals - duroplastic housing

Right angle plug for floating output	4605	1

Supplementary products

Extension claws

Extension claw for attaching

Extension by 15 mm
 Suitable for switch/button inserts and sockets from before 2011.
 Not for electronics inserts!

Design	Order no.	PU
Extension claw for attaching	1913	50

Replacement claw

Extension by 15 mm
 Suitable for the new socket outlet generation from approx. 2011.
 Not suitable for switch inserts.

Design	Order no.	PU
set with 20 claws	1914	1

Protective covers

Protective cover for SCHUKO socket outlets/switches

Sockets of the new generation of (from approx. 2011) and switches can be protected.
 Protective cover against dirt and damage of flush-mounted inserts without cover for interior fittings or renovation measures.

Design	Order no.	PU
grey	1849	10

Protective cover for SCHUKO socket outlet

Only sockets of the old generation of before 2011 can be protected.

Protective cover against dirt and damage of flush-mounted inserts without cover for interior fittings or renovation measures.

Electronics platform – Conventional installation KNX radio | quicklink

The wireless alternative for the intelligent building management system: wireless systems make it easy for you. You can forget the hassle of routing control lines: start-up is incredibly easy! For example, you can set up without the need for tools using quicklink (push-button mode) – a wireless solution based on the KNX radio standard. You can also get set up via media couplers with the KNX easy tool, which requires just a tablet computer. Integration into a KNX system programmed with the ETS can also be realised without any issues.

Light control

Switch inserts

Relay insert

Operating voltage	230 V~	
Frequency	50/60 Hz	
Minimum contact load	≈ 15 W	
230 V LED lamps	440 W	
Dimmable energy-saving lamps	440 W	
230 V incandescent lamps and halogen lamps	2300 W	
Dimmable conventional transformers	1500 VA	
Electronic transformers and dual-mode transformers	1500 W	
Fluorescent lamps:		
- uncompensated	1100 VA	
- parallel compensated	1000 W /130 µF	
- in Duo circuit	1000 W	
- with electrical ballast (EB)	1000 W	
Compact fluorescent lamps with electronic ballast	22 x 20 W	
Number of substations	unlimited	
Operating temperature	-5 ... +45 °C	
Cable length, extensions	max. 50 m	
Load cable length	max. 100 m	
Screw terminals (max.)	2 x 1.5/1 x 2.5 mm ²	
Claw guidance installation depth	32 mm	

- low intrinsic energy requirement
- with extension unit input for push-button (NO contact), single-surface operation and motion detector extension unit
- no conductive connection between supporting ring and spreading claws
- also usable as push-button relay switch
- with screw terminals

▶ 896

Not suitable for installation in surface-mounted housing.

Design	Order no.	PU
Relay insert	8512 12 00	1

Switch insert 1gang

Operating voltage	230 V~	
Frequency	50/60 Hz	
Dimmable 230 V LED lamps	5 ... 70 W	
Dimmable energy-saving lamps	13 ... 80 W	
230 V incandescent lamps and halogen lamps	25 ... 400 W	
Dimmable conventional transformers	25 ... 400 VA	
Electronic transformers and dual-mode transformers	25 ... 400 W	
Number of substations	unlimited	
Operating temperature	-5 ... +45 °C	
Cable length, extensions	max. 50 m	
Load cable length	max. 100 m	
Screw terminals (max.)	2 x 1.5/1 x 2.5 mm ²	
Installation depth	32 mm	

- low intrinsic energy requirement
- automatic setting of load-dependent switching principle (autoDetect process)
- optimisation of the dimming performance by fine adjustment of the load type and special adjustment mode
- bulb-preserving soft startup
- with extension unit input for push-button (NO contact), single-surface operation and motion detector extension unit
- no conductive connection between supporting ring and spreading claws
- short-circuit and overload proof (electronic fuse)
- with screw terminals

▶ 896

Only suitable for operation with dimmable loads!

Caution!

Only connect **dimmable** 230 V ESL or LED lamps.
Do not connect inductive and capacitive loads jointly.

Design	Order no.	PU
Switch insert 1gang	8512 11 00	1

Switch insert 2gang

▶ 896

Operating voltage	230 V~
Frequency	50/60 Hz
Dimmable 230 V LED lamps	per channel 12 ... 54 W
Dimmable energy-saving lamps	per channel 15 ... 54 W
230 V incandescent lamps and halogen lamps	per channel 35 ... 300 W
Dimmable conventional transformers	per channel 35 ... 300 VA
Electronic transformers and dual-mode transformers	per channel 35 ... 300 W
Number of substations	unlimited
Operating temperature	-5 ... +45 °C
Cable length, extensions	max. per channel 50 m
Load cable length	max. 100 m
Screw terminals (max.)	2 x 1.5/1 x 2.5 mm ²
Installation depth	32 mm

- low intrinsic energy requirement
- automatic setting of load-dependent switching principle (autoDetect process)
- optimisation of the dimming performance by fine adjustment of the load type and special adjustment mode
- bulb-preserving soft startup
- with 2 extension unit inputs for push-button (NO contact), single-surface operation
- no conductive connection between supporting ring and spreading claws
- short-circuit and overload proof (electronic fuse)
- with screw terminals

ε

Only suitable for operation with dimmable loads!

Caution!

Only connect **dimmable** 230 V ESL or LED lamps.
Do not connect inductive and capacitive loads jointly.

DALI/DSI control devices

DALI/DSI control insert

Operating voltage	230 V~
Frequency	50/60 Hz
DALI voltage	16 V= (10.5 ... 22.5 V=)
Output current	max. 40 mA
Power consumption (standby)	< 0.4 W
Number of substations	unlimited
Quantity of DALI/DSI devices:	
- active operation	max. 20
- passive operation (with external power supply)	max. 64
Operating temperature	-5 ... +45 °C
Cable length, extensions	max. 100 m
DALI cable length at 1.5 mm ²	max. 300 m
Screw terminals (max.)	2 x 1.5/1 x 2.5 mm ²
Installation depth	32 mm

- low intrinsic energy requirement
- automatic detection of DALI/DSI devices
- remote control with KNX radio hand-held/wall-transmitters in combination with KNX radio buttons
- switch-on brightness level can be stored safe after power failure
- automatic selection of operating mode (active/passive)
- supplies the system voltage for additional DALI users when connected to mains voltage
- with extension unit input for push-button (NO contact)
- no conductive connection between supporting ring and spreading claws
- for switching and controlling of electronic ballasts and Tronic transformers with DALI/DSI interface
- control information is send centrally to all users in the DALI/DSI network (Broadcast)
- with electronic short-circuit and overload protection
- with screw terminals

Not suitable for combining with other DALI systems.

DALI Bus communication in Broadcast mode according to IEC 62386-102

Motion detectors

Inserts

Relay insert

▶ 896

Operating voltage	230 V~	– low intrinsic energy requirement
Frequency	50/60 Hz	– with extension unit input for push-button (NO contact), single-surface operation and motion detector extension unit
Minimum contact load	≈ 15 W	
230 V LED lamps	440 W	– no conductive connection between supporting ring and spreading claws
Dimmable energy-saving lamps	440 W	– also usable as push-button relay switch
230 V incandescent lamps and halogen lamps	2300 W	– with screw terminals
Dimmable conventional transformers	1500 VA	
Electronic transformers and dual-mode transformers	1500 W	
Fluorescent lamps:		
- uncompensated	1100 VA	
- parallel compensated	1000 W / 130 µF	
- in Duo circuit	1000 W	
- with electronic ballast (EB)	1000 W	
Compact fluorescent lamps with electronic ballast	22 x 20 W	
Number of substations	unlimited	
Operating temperature	-5 ... +45 °C	
Cable length, extensions	max. 50 m	
Load cable length	max. 100 m	
Screw terminals (max.)	2 x 1.5/1 x 2.5 mm ²	
Claw guidance installation depth	32 mm	

Not suitable for installation in surface-mounted housing.

Design	Order no.	PU
Relay insert	8512 12 00	1

Switch insert 1gang

▶ 896

Operating voltage	230 V~
Frequency	50/60 Hz
Dimmable 230 V LED lamps	5 ... 70 W
Dimmable energy-saving lamps	13 ... 80 W
230 V incandescent lamps and halogen lamps	25 ... 400 W
Dimmable conventional transformers	25 ... 400 VA
Electronic transformers and dual-mode transformers	25 ... 400 W
Number of substations	unlimited
Operating temperature	-5 ... +45 °C
Cable length, extensions	max. 50 m
Load cable length	max. 100 m
Screw terminals (max.)	2 x 1.5/1 x 2.5 mm ²
Installation depth	32 mm

- low intrinsic energy requirement
- automatic setting of load-dependent switching principle (autoDetect process)
- optimisation of the dimming performance by fine adjustment of the load type and special adjustment mode
- bulb-preserving soft startup
- with extension unit input for push-button (NO contact), single-surface operation and motion detector extension unit
- no conductive connection between supporting ring and spreading claws
- short-circuit and overload proof (electronic fuse)
- with screw terminals

Only suitable for operation with dimmable loads!

Caution!

Only connect **dimmable** 230 V ESL or LED lamps.
Do not connect inductive and capacitive loads jointly.

Design	Order no.	PU
Switch insert 1gang	8512 11 00	1

Touch dimmer (R, L)

▶ 896

Operating voltage	230 V~
Frequency	50/60 Hz
Power consumption (standby)	0.3 W
230 V incandescent lamps and halogen lamps	25 ... 400 W
Dimmable conventional transformers	25 ... 400 VA
Number of substations	unlimited
Number of universal capacity enhancers	max. 2
Operating temperature	-5 ... +45 °C
Cable length, extensions	max. 50 m
Load cable length	max. 100 m
Screw terminals (max.)	2 x 1.5/1 x 2.5 mm ²
Installation depth	32 mm

- low intrinsic energy requirement
- phase cut-on
- bulb-preserving soft startup
- switch-on brightness level can be stored safe after power failure
- expandable with universal power boosters RMD Plus
- with extension unit input for push-button (NO contact), single-surface operation and motion detector extension unit
- no conductive connection between supporting ring and spreading claws
- short-circuit and overload proof (electronic fuse)
- with screw terminals

Design	Order no.	PU
Touch dimmer (R, L)	8542 11 00	1

Universal touch dimmer 1gang

▶ 896

Operating voltage	230 V~
Frequency	50/60 Hz
Power consumption (standby)	0.3 W
Dimmable 230 V LED lamps	5 ... 70 W
Dimmable energy-saving lamps	13 ... 80 W
230 V incandescent lamps and halogen lamps	25 ... 400 W
Dimmable conventional transformers	25 ... 400 VA
Electronic transformers and dual-mode transformers	25 ... 400 W
Number of substations	unlimited
Operating temperature	-5 ... +45 °C
Cable length, extensions	max. 50 m
Load cable length	max. 100 m
Screw terminals (max.)	2 x 1.5/1 x 2.5 mm ²
Installation depth	32 mm

- low intrinsic energy requirement
- automatic setting of load-dependent switching principle (autoDetect process)
- phase cut-on or cut-off according to load type, self-learning
- optimisation of the dimming performance by fine adjustment of the load type and special adjustment mode
- bulb-preserving soft startup
- with extension unit input for push-button (NO contact), single-surface operation and motion detector extension unit
- no conductive connection between supporting ring and spreading claws
- short-circuit and overload proof (electronic fuse)
- with screw terminals

Design	Order no.	PU
Universal touch dimmer 1gang	8542 12 00	1

Do not connect inductive and capacitive loads jointly.

Extension unit for motion detector

▶ 896

Operating voltage	230 V~	– low intrinsic energy requirement
Frequency	50/60 Hz	– no conductive connection between supporting ring and spreading claws
Operating temperature	-5 ... +45 °C	– short-circuit and overload proof (electronic fuse)
Cable length, extensions	max. 50 m	– with screw terminals
Number of motion detector extension units	unlimited	
Screw terminals (max.)	2 x 1.5/1 x 2.5 mm ²

Expandable with KNX as desired.

Some suppliers of smart home solutions offer systems which are proprietary; in other words, self-contained. Berker, on the other hand, consistently works with the established KNX standard. As a result, our systems speak the same 'language' and can be expanded as desired – and with the IoT Controller now also to devices from the 'Internet of Things'. This way you can guarantee a completely future-proof system for your customers.

quicklink

The solution for modernisations
Our wireless alternative for intelligent building control. Time-consuming installation of control lines eliminated and extremely simple commissioning, because no programming tool is needed.

easy

For new construction and extensive renovation. With easy you can configure a KNX system easily, quickly and intuitively. All you need is an easy configuration server, a tablet and the easy app. Every Easy configuration can be extended by means of quicklink wireless solutions.

ETS

ETS is the standardised software that is especially well-suited for larger building automation systems. Numerous advanced functions and logic systems available for high-and solutions for residential and functional buildings can be engineered with ETS.

Berker offers a compatible range of **KNX systems** for all kinds of applications:

IoT
(Internet of Things)

quicklink

easy

ETS

KNX Standard

coviva

Intelligent retrofit wireless technology. The smart home solution specifically for modernising and renovation contractors.

domovea

Intelligent visualisation, intuitive control – and simpler than ever before. domovea is the smart home solution offered for networked building control.

* coviva smartbox is compatible only with quicklink installations.

230 V incandescent lamps and halogen lamps	25 ... 400 W	
Dimmable conventional transformers	25 ... 400 VA	
Electronic transformers and dual-mode transformers	25 ... 400 W	
Number of substations	unlimited	
Operating temperature	-5 ... +45 °C	
Cable length, extensions	max. 50 m	
Load cable length	max. 100 m	
Screw terminals (max.)	2 x 1.5/1 x 2.5 mm ²	
Installation depth	32 mm	

- low intrinsic energy requirement
- automatic setting of load-dependent switching principle (autoDetect process)
- optimisation of the dimming performance by fine adjustment of the load type and special adjustment mode
- bulb-preserving soft startup
- with extension unit input for push-button (NO contact), single-surface operation and motion detector extension unit
- short-circuit and overload proof (electronic fuse)
- no conductive connection between supporting ring and spreading claws
- with screw terminals

Only suitable for operation with dimmable loads!

Caution!
Only connect **dimmable** 230 V ESL or LED lamps.
Do not connect inductive and capacitive loads jointly.
Comprehensive transmission and reception functions, in conjunction with a KNX radio application module.

Design	Order no.	PU
Switch insert 1gang	8512 11 00	1

Switch insert 2gang

DALI/DSI control devices

DALI/DSI control insert

Operating voltage	230 V~	- low intrinsic energy requirement
Frequency	50/60 Hz	- automatic detection of DALI/DSI devices
DALI voltage	16 V= (10.5 ... 22.5 V=)	- remote control with KNX radio hand-held/wall-transmitters in combination with KNX radio buttons
Output current	max. 40 mA	- switch-on brightness level can be stored safe after power failure
Power consumption (standby)	< 0.4 W	- automatic selection of operating mode (active/passive)
Number of substations	unlimited	- supplies the system voltage for additional DALI users when connected to mains voltage
Quantity of DALI/DSI devices:		- with extension unit input for push-button (NO contact)
- active operation	max. 20	- control information is send centrally to all users in the DALI/DSI network (Broadcast)
- passive operation (with external power supply)	max. 64	- with electronic short-circuit and overload protection
Operating temperature	-5 ... +45 °C	- for switching and controlling of electronic ballasts and Tronic transformers with DALI/DSI interface
Cable length, extensions	max. 100 m	- no conductive connection between supporting ring and spreading claws
DALI cable length at 1.5 mm ²	max. 300 m	- with screw terminals
Screw terminals (max.)	2 x 1.5/1 x 2.5 mm ²	
Installation depth	32 mm	

Not suitable for combining with other DALI systems.

DALI Bus communication in Broadcast mode according to IEC 62386-102

Design	Order no.	PU
DALI/DSI control insert	8542 17 00	1

KNX radio buttons for switches/dimmers

KNX radio button 1gang quicklink

▶ 896

Number of radio channels	2	- low intrinsic energy requirement
Radio transmission/reception frequency	868.3 MHz	- with configuration and function button
Radio transmission power	< 10 mW	- LED application module/insert compatibility display
Radio protocol	KNX Radio	- with configuration and function LEDs
Number of quicklink links	max. 20 transmitter/receiver	- operating areas configurable as one or two-area operation
Radio transmission range (building)	max. 30 m	- quicklink functions: switching, dimming, blind, 2 scenes, switching time, push-button, NO contact
Radio transmission range (free field)	max. 100 m	- easy additional functions: +6 scenes, on/off operating mode, 1 up/down button control
Transmitter duty cycle	1 %	- ETS additional functions: +6 scenes, 1 button control up/down, operating mode on/off, dimming value, brightness display, push-button, status display, priority
Receiver category	2	- configurable transmission and/or reception behaviour
Operating temperature	-5 ... +45 °C	- reset function (to factory setting)
For manual actuation or remote control via KNX radio.		- switch-on brightness level for each operating area on configuration with dimmer insert, power failure proof, storable
		- scene saving lockable
		- top and bottom operating area on 1gang switching/dimming inserts and network insert are freely configurable
		- toolless quicklink configuration using buttons and LED display
		- with anti-dismantling protection
		- integration in the KNX TP system using KNX radio media coupler

KNX radio time switches

Relay insert

▶ 896

Operating voltage	230 V~	- low intrinsic energy requirement
Frequency	50/60 Hz	- with extension unit input for push-button (NO contact), single-surface operation and motion detector extension unit
Minimum contact load	≈ 15 W	
230 V LED lamps	440 W	- also usable as push-button relay switch
Dimmable energy-saving lamps	440 W	- no conductive connection between supporting ring and spreading claws
230 V incandescent lamps and halogen lamps	2300 W	- with screw terminals
Dimmable conventional transformers	1500 VA	
Electronic transformers and dual-mode transformers	1500 W	
Fluorescent lamps:		
- uncompensated	1100 VA	
- parallel compensated	1000 W /130 μF	
- in Duo circuit	1000 W	
- with electronic ballast (EB)	1000 W	
Compact fluorescent lamps with electronic ballast	22 x 20 W	
Number of substations	unlimited	
Operating temperature	-5 ... +45 °C	
Cable length, extensions	max. 50 m	
Load cable length	max. 100 m	
Screw terminals (max.)	2 x 1.5/1 x 2.5 mm ²	
Claw guidance installation depth	32 mm	

Not suitable for installation in surface-mounted housing.
Comprehensive transmission and reception functions, in conjunction with a KNX radio application module.

Design	Order no.	PU
Relay insert	8512 12 00	1

KNX radio timer quicklink

- display

Number of radio channels	1
Radio transmission/reception frequency	868.3 MHz
Radio transmission power	< 10 mW
Radio protocol	KNX Radio
Number of quicklink links	max. 20 transmitter/receiver
Radio transmission range (building)	max. 30 m
Radio transmission range (free field)	max. 100 m
Number of switching times for on/off	20
Random number generator	± 15 min
Astronomic time shift	± 2 h
Running accuracy	± 3 min/year
Power reserve	≈ 24 h
Operating temperature	-5 ... +45 °C

Control using device buttons, radio transmitters and programmed switching times.

- low intrinsic energy requirement
- with switchover manual/automatic mode
- LC display illuminated during operation
- LC display contrast is adjustable
- indication of the application module/insert compatibility in the display
- menu guidance available in German, English or French
- astro programme for sunrise/sundown switching with city/country or co-ordinate input, individually adaptable
- holiday programme for random variation of the switching times in automatic operation
- standalone programme, radio and extension unit commands are not executed
- 2 independent preset programme memories, individually adaptable
- quicklink functions: switching, 2 scenes, time switching, NO contact push-button, forced control
- easy additional functions: +6 scenes, on/off operating mode, 1 up/down button control
- ETS additional functions: +6 scenes, operating mode on/off, scene loading, time dimming value, push-button, status display
- party function, no execution of automatic, radio and extension unit commands (switch protection)
- configurable transmission and/or reception behaviour
- with keylock
- reset function (to factory setting)
- with automatic summer-/winter time switching (can be switched off)
- with anti-dismantling protection
- integration in the KNX TP system using KNX radio media coupler

Transmitter duty cycle	1 %	– quicklink functions: switching, dimming, 2 scenes, switching time, NO contact push-button, priority, Master-Slave
Receiver category	2	– ETS additional functions: +6 scenes, operating mode on/off, push-button, status display, dimming value, brightness display, scene call-up upon motion/no motion
Nominal mounting height	1.1 m	– with memory function for presence simulation
Detection angle, settable	each side ≈ 45 ... 90°	– party function for switching on for 2 hours
Detection field, rectangular shaped	≈ 12 x 16 m	– teach function for response brightness via button
Range, frontal	≈ 12 m	– with keylock
Range, side	each ≈ 8 m	– reset function (to factory setting)
Delay time, adjustable	≈ 1 s ... 3 h	– switch-off pre-warning on dimmer inserts
Response brightness, adjustable	≈ 5 ... 1000 lx, ∞ lx (day)	– scene opening via KNX radio appliances
Response sensitivity, settable	≈ 10 ... 100 %	– scene saving lockable
Switch-off pre-warning to dimming value 50% for	30 s	– μ-processor controlled mode of operation
Operating temperature	-5 ... +45 °C	– optional operation of extension units using installation push-button
Assembling height	34 mm	– with anti-dismantling protection
		– integration in the KNX TP system using KNX radio media coupler

Continuous direct sunlight penetrating the upward-pointing detection level can result in failure of the motion detector.
Only suitable for indoor areas!

KNX radio blind button quicklink

▶ 896

Number of radio channels	1	– low intrinsic energy requirement
Radio transmission/reception frequency	868.3 MHz	– with configuration and function button
Radio transmission power	< 10 mW	– LED application module/insert compatibility display
Radio protocol	KNX Radio	– with configuration and function LEDs
Number of quicklink links	max. 20 transmitter/receiver	– with indicator LED for lock-out protection
Radio transmission range (building)	max. 30 m	– with status LED for memory and party function, red/orange
Radio transmission range (free field)	max. 100 m	– quicklink functions: blind, 2 scenes, forced control, up/down push-button
Venetian blind movement time	2 min	– easy additional functions: +6 scenes, 1 up/down operating mode
Change-over time for change of direction	< 0.6 s	– ETS additional functions: +6 scenes, operating mode, status display, 2 x alarm
Minimum slat adjustment time	≈ 250 ms	– memory function for automatic execution of learned up and down times with position
Lamella adjustment on signal duration	< 1 s	– party function, no execution of automatic, radio and extension unit commands (lock-out protection)
Lamella adjustment on button-press	< 0.4 s	– configurable transmission and/or reception behaviour
Operating temperature	-5 ... +45 °C	– reset function (to factory setting)
Can be switched to orientation led by extension unit.		– scene opening via KNX radio appliances
For manual actuation, automated memory execution or remote control via KNX radio.		– slat position storable for scene
		– toolless quicklink configuration using buttons and LED display
		– with anti-dismantling protection
		– sun protection and twilight-controlled lowering with radio brightness sensor
		– with imprinted symbol arrows
		– integration in the KNX TP system using KNX radio media coupler

Number of radio channels	1
Radio transmission/reception frequency	868.3 MHz
Radio transmission power	< 10 mW
Radio protocol	KNX Radio
Number of quicklink links	max. 20 transmitter/receiver
Radio transmission range (building)	max. 30 m
Radio transmission range (free field)	max. 100 m
Random number generator for holiday program	± 15 min
Number of operation times for up/down	20/day
Running time	2 min
Change-over time for change of direction	< 0.6 s
Minimum slat adjustment time	≈ 250 ms
Lamella adjustment on signal duration	< 1 s
Lamella adjustment on button-press	< 0.5 s
Astronomic time shift	± 2 h
Running accuracy	± 3 min/year
Power reserve	≈ 24 h
Operating temperature	-5 ... +45 °C

- low intrinsic energy requirement
- with switchover manual/automatic mode
- LC display illuminated during operation
- LC display contrast is adjustable
- indication of the application module/insert compatibility in the display
- menu guidance available in German, English or French
- astro programme for sunrise/sundown switching with city/country or co-ordinate input, individually adaptable
- holiday programme for random variation of the operation times in automatic operation
- standalone programme, radio and extension unit commands are not executed
- 2 independent preset programme memories, individually adaptable
- quicklink functions for integration into the individual, group and master control of blinds/shutters
- quicklink functions: blind, 2 scenes, forced control, up/down push-button
- easy additional functions: +6 scenes, 1 up/down operating mode
- ETS additional functions: +6 scenes, operating mode, status display, 2 x alarm
- party function, no execution of automatic, radio and extension unit commands (lock-out protection)
- configurable transmission and/or reception behaviour
- with keylock
- reset function (to factory setting)
- with automatic summer-/winter time switching (can be switched off)
- scene opening via KNX radio appliances
- slat position storable for scene
- with anti-dismantling protection
- sun protection and twilight-controlled lowering with radio brightness sensor
- integration in the KNX TP system using KNX radio media coupler

Can be switched to orientation led by extension unit.
Control using device buttons, radio transmitters and programmed switching times.

KNX radio wall-transmitter 1gang flat solar quicklink

▶ 896

Operating voltage	3 V=	– with configuration button
Number of radio channels	2	– with configuration LED
Radio transmission frequency	868.3 MHz	– with transmission status and battery status LED, red/green/orange
Radio transmission power	< 10 mW	– operating areas configurable as one or two-area operation
Radio protocol	KNX Radio	– quicklink functions: switching, dimming, blind, 2 scenes, switching time, push-button, NO contact
Number of quicklink links	max. 20 transmitter/receiver	– easy additional functions: +6 scenes, on/off operating mode, 1 up/down button control
Radio transmission range (building)	max. 30 m	– ETS additional functions: +6 scenes, operating mode on/off, push-button, status display, dimming value
Radio transmission range (free field)	max. 100 m	– reset function (to factory setting)
Transmitter duty cycle	1 %	– top and bottom operating area are freely configurable
Receiver category	2	– toolless quicklink configuration using buttons and LED display
Required Ø brightness	at least 300 lx 6 h/day	– power supply via solar cells
Operating temperature	-5 ... +45 °C	– with anti-dismantling protection
Assembling height	14 mm	– integration in the KNX TP system using KNX radio media coupler
		– for flat surface mounting and extension of combinations

For radio remote control of all assigned KNX radio receivers.

Switch actuators

KNX radio binary input for button circuits flush-mounted 230 V

Operating voltage	230 V~	- low intrinsic energy requirement
Frequency	50 Hz	- with configuration and function button
Switching current	16 mA	- with configuration and function LEDs
Current consumption (operation)	≈ 1 mA	- remote control via quicklink transmitter
Number of radio channels	1	- quicklink functions: pulse (200 ms)
Radio transmission/reception frequency	868.3 MHz	- easy additional functions: +6 scenes, on/off operating mode, 1 up/down button control
Radio transmission frequency	868.3 MHz	- ETS additional functions: +6 scenes, operating mode on/off, 1 up/down button control, push-button, 2 x alarm, status display
Radio transmission power	< 25 mW	- reset function (to factory setting)
Radio protocol	KNX Radio	- for activation of pulse relays, stair light timers
Number of quicklink links	max. 20 transmitter/receiver	- toolless quicklink configuration using buttons and LED display
Radio transmission range (building)	max. 30 m	- integration in the KNX TP system using KNX radio media coupler
Radio transmission range (free field)	max. 100 m	- Connection for illuminated or standard push-button
Transmitter duty cycle	0.1 %	- with screw-in lift terminals
Receiver category	2	- for installation behind flush-mounted inserts
Power consumption (standby)	150 W	
Pulse time	min. 200 ms	
Operating temperature	-15 ... +45 °C	
Conductor cross-section	0.5 ... 1.5 mm ²	
Dimensions (W x H x D)	40 x 40 x 18 mm	

Note:
When using illuminated push-buttons (monitoring circuit) the current consumption of the device must be taken into account!

Dim actuators

KNX radio dim actuator 1gang/binary input 2gang flush-mounted

▶ 896

Operating voltage	230 V~ +10/-15%	– low intrinsic energy requirement
Frequency	50 Hz	– with configuration and function button
Input scanning voltage	per channel 12 V=	– with configuration and function LEDs
Rated current	0.85 A	– with control LED for On/Off
Output current per channel	max. 1 mA	– with manual operation on/off, brighter/darker
Number of radio channels	2	– phase cut-on or cut-off according to load type, self-learning
Radio transmission/reception frequency	868.3 MHz	– quicklink functions: dimming, 2 scenes, time switching, NO contact push-button
Radio transmission power	< 10 mW	– easy additional functions: +6 scenes, repeater function, dimming value, 2 x alarm, priority, automatic, timer
Radio protocol	KNX Radio	– ETS additional functions: +62 scenes, operating mode on/off, dimming value, priority, status display, timer, repeater function
Number of quicklink links	max. 20 transmitter/receiver	– reset function (to factory setting)
Radio transmission range (building)	max. 30 m	– Activation, for example through switch, push-buttons, timer
Radio transmission range (free field)	max. 100 m	– can be activated via mobile or Web App via coviva smartbox
Transmitter duty cycle	1 %	– very low minimal dimming value
Receiver category	2	– bulb-preserving soft startup
Power consumption	0.1 W	– scene opening via KNX radio appliances
Dimmable 230 V LED lamps	3 ... 50 W	– scene saving lockable
Quantity LED lamps	max. 8	– with 2 independent, mains supplied, binary inputs for potential-free contacts
230 V incandescent lamps and halogen lamps	10 ... 200 W	– toolless quicklink configuration using buttons and LED display
Conventional transformers	10 ... 175 VA	– short-circuit and overload proof (electronic fuse)
Electronic transformers	10 ... 175 W	– integration in the KNX TP system using KNX radio media coupler
Operating temperature	-15 ... +45 °C	– with screw-in lift terminals
Binary cable length	20 cm	– for installation behind flush-mounted inserts
Binary cable length, extendable to	max. 10 m	
Conductor cross-section (rigid)	0.5 ... 1.5 mm ²	
Conductor cross-section (flexible)	0.5 ... 1.5 mm ²	
Dimensions (W x H x D)	40 x 40 x 18 mm	

Suitable for optional	Order no.	Page

Blind actuators

KNX radio blind actuator 1gang surface-mounted

▶ 896

Operating voltage	230 V~	– low intrinsic energy requirement
Frequency	50 Hz	– with configuration and function button
Switching current	10 A / 230 V AC1	– with configuration and function LEDs
Radio reception frequency	868.3 MHz	– with control LED (relay closed)
Radio protocol	KNX Radio	– with manual operation up/down
Number of quicklink links	max. 20 transmitter/receiver	– quicklink functions: blind, 2 scenes, forced control, up/down push-button
Radio transmission range (building)	max. 30 m	– easy additional functions: +6 scenes
Radio transmission range (free field)	max. 100 m	– ETS additional functions: +6 scenes, operating mode, status display, 2 x alarm
Transmitter duty cycle	1 %	– repeat function can be activated to increase the radio range
Receiver category	2	– reset function (to factory setting)
Change-over time for change of direction	< 0.6 s	– scene opening via KNX radio appliances
Lamella adjustment on signal duration	< 1 s	– scene saving lockable
Operating temperature	-10 ... +55 °C	– toolless quicklink configuration using buttons and LED display
Dimensions (L x W x H)	150 x 85 x 35 mm	– with 2 mechanically and electrically mutually-locked relay contacts
		– with mounting plates and strain reliefs
		– integration in the KNX TP system using KNX radio media coupler
		– with screw-in lift terminals

KNX radio blind actuator 1gang/binary input 2gang flush-mounted

Operating voltage	230 V~ +10/-15 %	- low intrinsic energy requirement
Frequency	50 Hz	- with configuration and function button
Input scanning voltage	per channel 12 V=	- with configuration and function LEDs
Switching current at $\cos \phi = 0.6$	max. 3 A	- with transmission status and control LED for On/Off
Number of radio channels	2	- with manual operation up/down
Radio transmission/reception frequency	868.3 MHz	- quicklink functions: blind, 2 scenes, forced control, up/down push-button
Radio transmission power	< 10 mW	- easy additional functions: +6 scenes, operating mode, 2 x alarm, priority, automatic
Radio protocol	KNX Radio	- ETS additional functions: +62 scenes, operating mode, 3 x alarm, priority, status display, automatic
Number of quicklink links	max. 20 transmitter/receiver	- repeat function can be activated to increase the radio range
Radio transmission range (building)	max. 30 m	- reset function (to factory setting)
Radio transmission range (free field)	max. 100 m	- Activation, for example through switch, push-button, timer, blind timer switch
Transmitter duty cycle	1 %	- can be activated via mobile or Web App via coviva smartbox
Receiver category	2	- scene opening via KNX radio appliances
Power consumption (standby)	150 mW	- scene saving lockable
Power consumption (operation)	450 mW	- with 2 independent, mains supplied, binary inputs for potential-free contacts
Breaking capacity	max. 690 W	- toolless quicklink configuration using buttons and LED display
Number of switching times for on/off	15 /min.	- with 2 mechanically and electrically mutually-locked relay contacts
Change-over time for change of direction	< 0.6 s	- confectioned, with 2-core cable
Operating temperature	-10 ... +50 °C	- integration in the KNX TP system using KNX radio media coupler
Binary cable length	20 cm	- with screw-in lift terminals
Binary cable length, extendable to	max. 10 m	- for installation behind flush-mounted inserts
Conductor cross-section (rigid)	0.5 ... 1.5 mm ²	Suitable for optional
Conductor cross-section (flexible)	0.5 ... 1.5 mm ²	Order no.

System components

Mains power supply for KNX radio application modules

Power supply for KNX radio application module

Operating voltage	230 V~
Frequency	50/60 Hz
Operating temperature	-5 ... +45 °C
Screw terminals (max.)	1 x 4/2 x 2.5 mm ²
Installation depth	22 mm

- low intrinsic energy requirement
- as supply for radio application modules
- no conductive connection between supporting ring and spreading claws
- with screw terminals

▶ 896

Motion detector application modules in conjunction with a network insert can only be used as a motion detector extension unit (slave).

For this purpose, a motion detector application module with a relay insert must be installed as a motion detector main unit (master) (order no.: 8512 12 00).

Comprehensive transmission and reception functions, in conjunction with a KNX radio application module.

Suitable for	Order no.	Page
KNX radio buttons for switches/dimmers		page 706
KNX radio motion detector covers		page 713
KNX radio blind covers		page 717
KNX radio timer quicklink	8574 52 ..	710

Power supply for KNX radio application module	8502 01 00	1

coviva smartbox

coviva Smartbox

Operating voltage	230 V~
WLAN standard	IEEE 802.11 b/g/n
Radio transmission/reception frequency	433.4/ 868.3 MHz
Radio transmission range (free field)	max. 300 m
Receiver category	2
Power consumption (operation)	≤ 3 W
Operating temperature	+0 ... +40 °C
Dimensions (W x H x D)	178.5 x 156 x 48.4 mm

- control and visualisation of radio and WLAN installations via App and browser
- easy to set scenes (covigrammes) via the app in order to trigger actions either when defined events occur or manually
- for switch, dimmer, blind and thermostat functions
- display of predefined messages after events
- comfortable remote maintenance via DynDNS service
- also suitable for offline mode
- management of 3 user profiles
- low intrinsic energy requirement
- can be updated
- with 2 USB socket for WLAN stick for coviva
- LAN connection or WLAN connection via optional USB stick for coviva smartbox
- for wall mounting or free-standing

Scope of delivery:

- RJ45 connecting cable cat.5e shielded
- power supply, order no. 9096 00 02

App for IOS version 7.1 and later and for Android version 4.1 and later can be downloaded free of charge from the corresponding app store.

Compatible with Netatmo weather station.

NEW!

Integration of further IoT applications:

- Amazon Alexa
- Google Home
- Netatmo IP security cameras for outdoor and indoor areas

Optimisation of operation and display of blind functions by differentiating the application by:

- blind
- roller shutter
- awning

KNX easy

easy – it's in the name! And this is exactly what lies at the core of the software. With easy you can configure a KNX system easily, quickly and intuitively. All you need is an easy configuration server, a tablet and the easy app. Every easy configuration can be extended by means of quicklink wireless solutions. What's more, every easy configuration can be imported completely into the ETS software, making the transition into a larger and even more powerful KNX system possible without any issues.

Operating systems	740
Sensors	757
Actuators	763
System units	774

Extend as desired with KNX

Some providers of smart home solutions offer proprietary, i.e. closed, systems. Berker, on the other hand, uses the established KNX standard. This means our systems speak the same “language”, and by allowing the IoT Controller to include other devices from the Internet of Things, you can guarantee your customers a system that will work well into the future.

quicklink

The renovation solution. Our wireless alternative for smart building control systems. There is no need to lay costly control lines, and system launch is easy because no programming tools are required.

easy

For new construction work and extensive renovation. With easy, a KNX system can be configured simply, quickly and intuitively. An easy configuration server, a tablet and the easy app are all you need. Each configuration can be expanded with quicklink wireless solutions.

ETS

ETS is the standardised software that is perfectly suited to large building automation systems. With ETS, users can install numerous expanded functions that are ideal for high-end solutions for residential, commercial and administrative buildings.

Berker offers a compatible range of **KNX systems** for a variety of applications.

IoT (Internet of Things)

KNX
easy

KNX[®] Standard

coviva*

Retrofit smart wireless technology. The ideal smart home solution for refurbishing and renovations.

domovea

Smart visualisation, intuitive control – now simpler than ever. domovea is the smart home solution for connected building control systems.

* coviva Smartbox is only compatible with quicklink installations.

Operating systems

Berker S.1 | B.3 | B.7, Q.1 | Q.3 | Q.7, K.1 | K.5 - Push-buttons

- with 2 RGB status LEDs per rocker
- colour of status LED uniformly adjustable for complete devices
- brightness value of the status LED for day/nighttime operation preset, change-over for day/nighttime operation possible
- with white operating LED, can be activated
- push-button functions: including switching, dimming, roller shutter/blind, timer, operating mode change-over
- setting of 1 ... 8 scenes possible
- integrated temperature sensor with output of the measured values
- function for manual interruption of automatic functions already triggered
- for bus coupling unit flush-mounted
- with anti-dismantling protection
- the configuration server (order no.: 8001 00 00) or the commissioning tool (order no.: TXA100) is required for easy commissioning via KNX easy.

Bus coupling unit flush-mounted

- external temperature sensor connection

Operating voltage over bus	21 ... 32 V=
Operating temperature	-5 ... +45 °C
Installation depth	32 mm

- additional connection for external temperature sensor
- with integrated buzzer for acoustic identification of the device within the system
- with programming button and red programming LED
- bus connection via connecting terminal
- with dust protection flap for user interface (AST)
- with spreader claws

Push-button module 2gang

- RGB LED
- internal temperature sensor
- integrated bus coupling unit

Operating voltage over bus
Operating temperature
Installation depth

21 ... 32 V=
-5 ... +45 °C
32 mm

- with two RGB status LEDs configurable in brightness and colour
- push-button functions: including switching, dimming, roller shutter/blind, operating mode changeover, scene
- setting of 1 ... 8 scenes possible
- colour of status LED uniformly adjustable for complete device
- brightness value of the status LED for day/nighttime operation preset, change-over for day/nighttime operation possible
- integrated temperature sensor with output of the measured values
- function for manual interruption of automatic functions already triggered
- with integrated buzzer for acoustic identification of the device within the system
- with programming button and red programming LED
- with integrated bus coupling unit
- bus connection via connecting terminal
- with anti-dismantling protection

Push-button modules IP55

- operating surfaces as buttons (single-surface operation) and rockers (two-surface operation)
- with programming button and red programming LED
- push-button functions: including switching, dimming, roller shutter/blind, scene, priority, value transmitter 2 byte, operating mode change-over
- setting of 1 ... 8 scenes possible
- function for manual interruption of automatic functions already triggered
- with integrated bus coupling unit
- bus connection via connecting terminal
- for catch fixing
- for surface-mounted housings or frames for flush-mounted
- the configuration server (order no.: 8001 00 00) or the commissioning tool (order no.: TXA100) is required for easy commissioning via KNX easy.
- Inserts will only reach the degree of protection IP55 if mounted with a housing surface mounted or frame for flush-mounted installation of the Berker W.1 product line

KNX thermostat

- TFT colour display with symbol display
- to display and initiate actions
- display of operating mode, controller lockout, room/outside temperature, time and date
- screensavers
- menu guidance in DE/EN/FR/NL/IT/ES/PT/PL/DK/SV/FI/NO/TR
- operation via sensitive Touch control surface
- for individual single room temperature control
- control parameter for heating / cooling unit preset
- additional connection for external temperature sensor
- temperature measurement via internal, external temperature sensor or via object and their mean value formation
- with integrated bus coupling unit
- bus connection via connecting terminal
- with spreader claws
- the configuration server (order no.: 8001 00 00) or the commissioning tool (order no.: TXA100) is required for easy commissioning via KNX easy.

KNX thermostat

- integrated bus coupling unit
- colour display
- external temperature sensor connection

Operating voltage over bus	21 ... 32 V=
Auxiliary voltage	24 V=
Current consumption KNX	max. 10 mA
Energy efficiency class	IV (2%)
TFT screen size	1.93"
Dimensions of display (W x H)	38.3 x 30.3 mm
Power reserve	≈ 4 h
Operating temperature	-5 ... +45 °C
Sensor cable length	10 m
Installation depth	32 mm

- operating mode heating, cooling or heating/cooling can be selected
- comfort, standby, night-time reduction, frost/heat protection operating mode switchable via scene
- switching PI-control (PWM) or switching 2-point control can be selected
- heating type warm water heating, warm water under-floor heating, electric heating, electric underfloor heating or split unit can be selected
- cooling type cooling ceiling, convector fan or split unit can be selected
- with keylock
- with holiday switching
- with frost protection function

Design	Order no.	Page

KNX room controller

- integrated bus coupling unit
- colour display
- external temperature sensor connection

Operating voltage over bus	21 ... 32 V=
Auxiliary voltage	24 V=
Current consumption KNX	max. 10 mA
Energy efficiency class	IV (2%)
TFT screen size	1.93"
Dimensions of display (W x H)	38.3 x 30.3 mm
Power reserve	≈ 4 h
Operating temperature	-5 ... +45 °C
Sensor cable length	10 m
Installation depth	32 mm

The KNX room controller in comparison with the thermostat also has push-button functions and can thus control all subsystems in a room.

- operating mode heating, cooling or heating/cooling can be selected
- comfort, standby, night-time reduction, frost/heat protection operating mode switchable via scene
- switching PI-control (PWM) or switching 2-point control can be selected
- heating type warm water heating, warm water under-floor heating, electric heating, electric underfloor heating or split unit can be selected
- cooling type cooling ceiling, convector fan or split unit can be selected
- push-button functions: including switching, dimming, roller shutter/blind, operating mode changeover, scene
- setting of 1 ... 8 scenes possible
- with keylock
- with holiday switching
- with frost protection function
- function for manual interruption of automatic functions already triggered

Touch Panel

- display illumination can be switched automatically using brightness sensor
- depending on the software visualisation one and two surface operation, stepless configuration based on sliding and page scrolling by swiping are supported
- with USB/Mini USB type A adapter cable
- with RJ45 connector kit from connector and patch cable

Touch Panel 7" Android

Power over Ethernet (PoE)	18 ... 48 V=	- signal and operating panel with touch-sensitive, capacitive TFT colour display in 16:9 format, with Multi touch operation
Auxiliary voltage	18 ... 48 V=	- for visualisation of domovea software and display of preconfigured functions, measured values and data
Power consumption	< 10 W	- suitable for vertical and horizontal domovea visualisation
TFT screen size	7"	- connection to KNX system via domovea server
Light intensity	300 cd/m ²	- operating system: OS Android 4.1
Transmission rate Ethernet	max. 10/100 Mbit/s	- applications (Apps) available in preinstalled Android launcher - without access to external apps
Processor	1 GHz	- integration of door communication functions in the domovea client or the Elcom VideoFON app for IP intercom systems
RAM	512 MB	- multi-touch function for the connection of multiple actions, e.g. to activate a function with simultaneous setting of a function value
Operating temperature	+5 ... +45 °C	- silent, long-lasting convection cooling without fan
Dimensions (W x H x D)	189.7 x 125.7 x 48.3 mm	- RJ45 Port for LAN connection
Assembling height	12 mm	- card slot with 8 GB SDHC card

PoE power supply according to IEEE 802.3af Class 3 possible without audio applications.

- microphone and loudspeaker with echo suppression
- Mini-USB 2.0 jack e.g. for external storage media or updates on the upper display edge is accessible without dismantling
- 2 USB 2.0 connections on the rear
- for flush mounting and hollow-wall mounting
- for vertical and horizontal mounting

Suitable for	Order no.	Page

Berker domovea

Berker domovea Server RMD

Operating voltage over bus	21 ... 32 V=
Auxiliary voltage	24 V=
Current consumption (operation)	≈ 150 mA
Power consumption (operation)	≈ 1.5 W
RAM	128 MB
Graphics memory	≈ 20 MB
Processor	400 MHz
Operating temperature	+0 ... +45 °C
Width of rail mounted device (RMD)	6 modules
Dimensions (W x H x D)	105 x 89.8 x 60 mm

Central operating and visualisation unit for KNX installations via client software.

Knowledge of the relevant network technology is required for commissioning.

System requirements: Windows XP | VISTA | 7 | 8 | 10, (32 or 64 bit).

- for control and visualisation of e.g. shutters, lights, heating, ventilation, alarm system, sensors
- creation of max. 50 sequences from different actions
- user interface can be configured individually for each room with special background images
- KNX server to supply up to 30 visualisation clients simultaneously with KNX data
- configuration tool for installation of IP settings and parameterisations
- with configuration and client software on USB stick
- with status LEDs for LAN status, operational stand-by and connection status to web portal
- creation of light scenes
- creation of measured value archives and energy consumption visualisation with KNX energy meters
- managing up to 30 users with different access rights
- software update via USB interface on the device
- integration of max. 10 network cameras
- RJ45 Port for LAN connection
- bus connection via connecting terminal
- with QuickConnect plug-in terminals
- selection switch for online/offline mode
- with integrated bus coupling unit

Sensors

KNX motion detector

- the configuration server (order no.: 8001 00 00) or the commissioning tool (order no.: TXA100) is required for easy commissioning via KNX easy.

KNX motion detector module 1.1 m

- internal temperature sensor
- integrated bus coupling unit

Operating voltage over bus 21 ... 32 V=
 Current consumption KNX max. 10 mA
 Nominal mounting height 1.1 m
 Delay time, adjustable 10 s ... 30 min
 Response brightness, adjustable ≈ 5 ... 1000 lx, ∞ lx (day)
 Detection angle, settable each side ≈ 45 ... 90°
 Detection field, rectangular shaped ≈ 12 x 16 m
 Operating temperature -5 ... +45 °C

- with button for automatic/permanent ON/permanent OFF
- operating mode display via status LED, red/green/orange
- setting of 1 ... 8 scenes possible
- motion detector functions: switching, dimming, roller shutter/blind, timer
- additional channel for independent of brightness detector mode
- with integrated bus coupling unit
- bus connection via connecting terminal
- with spreader claws
- with dismantling protection

Suitable for
optional

Order no.

KNX motion detector module 2.2 m

- internal temperature sensor
- integrated bus coupling unit

Operating voltage over bus	21 ... 32 V=
Current consumption KNX	max. 10 mA
Nominal mounting height	2.2 m
Delay time, adjustable	10 s ... 30 min
Response brightness, adjustable	≈ 5 ... 1000 lx, ∞ lx (day)
Detection angle, settable	each side ≈ 45 ... 90°
Detection field, rectangular shaped	≈ 8 x 12 m
Operating temperature	-5 ... +45 °C

- with button for automatic/permanent ON/permanent OFF
- operating mode display via status LED, red/green/orange
- setting of 1 ... 8 scenes possible
- motion detector functions: switching, dimming, roller shutter/blind, timer
- additional channel for independent of brightness detector mode
- with integrated bus coupling unit
- bus connection via connecting terminal
- with spreader claws
- with dismantling protection

Automatic triggering of bus functions for movement within the detection area or manual control via integrated button.

Only suitable for indoor areas!

IR presence detectors

– the configuration server (order no.: 8001 00 00) or the commissioning tool (order no.: TXA100) is required for easy commissioning via KNX easy.

KNX IR presence detector

Operating voltage over bus	21 ... 32 V=
Current consumption KNX	typ. 10 mA
Brightness measuring range	5 ... 1000 lx
Recommended installation height	≈ 2.5 ... 3.5 m
Delay time, adjustable	≈ 1 min ... 1 h
Detection angle	360°
Detection field Ø, on floor	≈ 7 m
Operating temperature	-10 ... +45 °C
Installation opening Ø	60 ... 63 mm
Installation wall thickness	10 ... 28 mm
Dimensions (Ø x H)	78 x 70 mm

- energy saving by presence and brightness-controlled lighting control
- linking several detectors in order to expand the detection range
- with integrated bus coupling unit
- with potentiometers for setting the response brightness and delay time without dismantling
- bus connection via connecting terminal
- with spring clips for ceiling installation

IR hand-held transmitter for presence detector

Battery service life [years]	≈ 3.5
Dimensions (L x W x H)	120 x 70 x 10 mm

- with 4 function buttons (calling up/saving light scene)
- with green "on" and red "off" button (on/off, dimmer function)
- additional acknowledgement LED for displaying the IR transmission
- RC6 code

For control for the lighting connected to the presence detector.

Scope of functions dependent on the controlled presence detector.

Required battery (CR 2032) is included in the scope of delivery.

Suitable for	Order no.	Page
KNX IR presence detector	7524 10 05	759

IR configuration hand-held transmitter for presence detector

Battery service life [years]	≈ 3.5
Dimensions (L x W x H)	111 x 63 x 10 mm

- 15 buttons with integrated status-LED
- additional acknowledgement LED for displaying the IR transmission
- 3 configuration ranges for control, switch-off delay, brightness threshold
- setting of the brightness threshold manually, by default values or teach-in mode
- default settings can be selected for the brightness threshold daylight, office, corridor
- RC6 code
- 2 configuration memories for identical configuration of several presence detectors

For convenient configuration of supported presence detectors.

Required battery (CR 2032) is included in the scope of delivery.

Physical sensors

– the configuration server (order no.: 8001 00 00) or the commissioning tool (order no.: TXA100) is required for easy commissioning via KNX easy.

IP44

KNX weather station with GPS surface-mounted

- integrated bus coupling unit

Operating voltage over bus	21 ... 32 V=
Auxiliary voltage	24 V~/=
Rated current (heating incl.)	81 mA
Brightness measuring range	0 ... 150000 lx
Temperature measuring range, linear	-30 ... +80 °C
Measuring range, wind speed	0 ... 35 m/s
Precipitation (Yes/No)	1 bit
Operating temperature	-30 ... +50 °C
Dimensions (W x H x D)	96 x 77 x 118 mm
Weight	≈ 170 g

For detection of wind, precipitation, temperature and brightness as well to process the signals.
Ensure correct orientation and free-standing installation.

- with wind, precipitation, twilight, temperature and brightness sensor
- 3 limit values can be set for wind alarm
- with simulation function for commissioning independently of weather conditions
- for control of shading systems for up to 4 facades
- with automatic summer/winter time change-over
- Reception of date, time and location data via GPS signal
- with heater element for winter operation
- with red programming LED
- with programming button
- cyclical transmission behaviour for temperature alarm, brightness, day/night mode, rain alarm and 3 wind alarm levels freely adjustable
- easy commissioning by means of predefined parameters
- predefined parameters when activating heat protection function or heat generation function
- with integrated bus coupling unit
- bus connection via connecting terminal
- with plug-in terminals for power supply
- for wall and mast assembly
- with pipe clamp for mast fixing

Suitable for optional	Order no.	Page

Temperature sensor

Characteristic resistance value at 25 °C	10 kΩ
Operating temperature	-40 ... +80 °C
Sensor cable length	4 m

- as replacement or function extension of KNX products with suitable connection, such as KNX thermostat/ room controller, KNX Touch Control, push-button modules or bus coupling unit (order no. 8014 00 x1 only)

Suitable for	Order no.	Page
KNX thermostat	8044 01 00	750
KNX room controller	8066 01 00	751
Bus coupling unit flush-mounted	8004 00 ..	740

Design	Order no.	PU
Temperature sensor	160	1

Universal interfaces

- for the connection of switches, push-buttons, detectors, sensors, key switches and bolt switch contacts to KNX
- with programming button and red programming LED
- the configuration server (order no.: 8001 00 00) or the commissioning tool (order no.: TXA100) is required for easy commissioning via KNX easy.
- with integrated bus coupling unit
- bus connection via connecting terminal

Universal interface 2gang flush-mounted

Operating voltage over bus 21 ... 32 V=
Input scanning voltage per channel 5 V
Operating temperature +0 ... +45 °C
Line length max. 5 m
Dimensions (L x W x H) 38 x 35 x 12 mm

For connection of potential-free contacts, e.g. switches, push-buttons, window contacts, detector contacts or thermostats, for communication into KNX bus system.

- switching functions, dimming functions, blind control functions functions, forced control functions, scene functions, heating functions and timer functions
- with 2 independent binary inputs for potential-free contacts
- for flush mounting and hollow-wall mounting

Suitable for	Order no.	Page
Berker TS Crystal		page 547

Binary inputs

- the configuration server (order no.: 8001 00 00) or the commissioning tool (order no.: TXA100) is required for easy commissioning via KNX easy.

Binary input 4gang RMD 230 V

Operating voltage over bus	21 ... 32 V=
Input voltage	230 V~
Signal frequency	50/60 Hz
Input cable length	max. 100 m
Conductor cross-section (rigid)	0.75 ... 2.5 mm ²
Conductor cross-section (flexible)	0.75 ... 2.5 mm ²
Dimensions (W x H x D)	70 x 90 x 65 mm
Width of rail mounted device (RMD)	4 modules
Current consumption KNX	max. 4 mA

For connection of 230 V AC power supplied contacts for communication into KNX bus system.

- with 4 red status LEDs for display of input states
- with programming button and red programming LED
- switching functions, dimming functions, blind control functions functions, forced control functions, scene functions, heating functions and timer functions
- manual operation can be activated via selection switch
- manual operation per channel via button with integrated status LED, thereby lockout of KNX function
- with integrated bus coupling unit
- bus connection via connecting terminal
- with 4 independent binary inputs with separate neutral conductor
- suitable for different external conductors
- with QuickConnect plug-in terminals

Suitable for	Order no.	Page
optional		
KNX Configuration server easy link RMD	8001 00 00	774
Design	Order no.	PU
light grey	7521 40 09	1

Binary input 10gang RMD 230 V

Operating voltage over bus	21 ... 32 V=
Input voltage	230 V~
Signal frequency	50/60 Hz
Input cable length	max. 100 m
Operating temperature	+0 ... +45 °C
Conductor cross-section (rigid)	0.75 ... 2.5 mm ²
Conductor cross-section (flexible)	0.75 ... 2.5 mm ²
Dimensions (W x H x D)	105 x 90 x 65 mm
Width of rail mounted device (RMD)	6 modules
Current consumption KNX	max. 15 mA

- with 10 red status LEDs for display of input states
- with programming button and red programming LED
- switching functions, dimming functions, blind control functions functions, forced control functions, scene functions, heating functions and timer functions
- manual operation can be activated via selection switch
- manual operation per channel via button with integrated status LED, thereby lockout of KNX function
- with integrated bus coupling unit
- bus connection via connecting terminal
- with 10 independent binary inputs with separate neutral conductor
- suitable for different external conductors
- with QuickConnect plug-in terminals

Suitable for	Order no.	Page
optional		
KNX Configuration server easy link RMD	8001 00 00	774
Design	Order no.	PU
light grey	7521 90 00	1

KNX binary input 6gang RMD 24 ... 230 V V AC/DC

Operating voltage over bus	21 ... 32 V=
Signal voltage	potential-free, 24 ... 230 V~/=
Input cable length	max. 100 m
Operating temperature	+0 ... +45 °C
Conductor cross-section (rigid)	0.75 ... 2.5 mm ²
Conductor cross-section (flexible)	0.75 ... 2.5 mm ²
Dimensions (W x H x D)	105 x 90 x 65 mm
Width of rail mounted device (RMD)	6 modules
Current consumption KNX	max. 7 mA

- with 6 red status LEDs for display of input states
- with programming button and red programming LED
- switching functions, dimming functions, blind control functions, forced control functions, scene functions, heating functions and timer functions
- manual operation can be activated via selection switch
- manual operation per channel via button with integrated status LED, thereby lockout of KNX function
- with integrated bus coupling unit
- bus connection via connecting terminal
- with 6 independent binary inputs with separate neutral conductor
- suitable for different external conductors
- with QuickConnect plug-in terminals

For connection of potential-free or 24 ... 230 V AC/DC power supplied contacts for communication into KNX bus system.

Actuators

Switch actuator/blind actuators easy RMD

- the configuration server (order no.: 8001 00 00) or the commissioning tool (order no.: TXA100) is required for easy commissioning via KNX easy.

Switch actuator/blind actuator RMD 10 A

Operating voltage over bus	21 ... 32 V=
Frequency	50/60 Hz
Switching current at cos φ = 0.8	max. 10 A
230 V LED lamps	per channel max. 12 x 23 W
Energy-saving lamps	per channel max. 12 x 23 W
230 V incandescent lamps	1200 W
230 V halogen lamps	1200 W
Conventional transformers	1200 VA
Electronic transformers	1000 W
Fluorescent lamps:	
- uncompensated	1000 W
- with electronical ballast (EB)	15 x 36 W
Operating temperature	-5 ... +45 °C
Conductor cross-section (flexible)	0.75 ... 2.5 mm ²
Conductor cross-section (rigid)	0.75 ... 2.5 mm ²

- for switching of an independent load per actuator channel or activation of a blind drive via two actuator channels each
- any combined operation from drive and switching functions possible
- manual operation can be activated via selection switch, thereby deactivation of the KNX function
- manual operation per channel using button (single-area operation)
- with illuminated programming button
- status LED integrated in manual operation button
- with positioning function for shutter and blade position
- with safety functions e.g. for wind, rain, alarm
- Switching time on change of direction is preset
- large labelling field
- suitable to switch different external conductors
- with integrated bus coupling unit
- bus connection via connecting terminal
- with QuickConnect plug-in terminals

Follow the motor manufacturers' instructions.
For switching of independent loads or activation of drives.

Suitable for optional	Order no.	Page

Conductor cross-section (flexible)	0.75 ... 2.5 mm ²
Conductor cross-section (rigid)	0.75 ... 2.5 mm ²

- for switching of an independent load per actuator channel or activation of a blind drive via two actuator channels each
- any combined operation from drive and switching functions possible
- manual operation can be activated via 2-level selection switch, thereby deactivation of the KNX function
- with illuminated programming button
- status LED integrated in manual operation button
- with positioning function for shutter and blade position
- with safety functions e.g. for wind, rain, alarm
- Switching time on change of direction is preset
- large labelling field
- suitable to switch different external conductors
- with integrated bus coupling unit
- bus connection via connecting terminal
- with QuickConnect plug-in terminals

Suitable for optional	Order no.	Page
KNX Configuration server easy link RMD	8001 00 00	774

Follow the motor manufacturers' instructions.
For switching of independent loads or activation of drives.

Dim actuators RMD easy

– the configuration server (order no.: 8001 00 00) or the commissioning tool (order no.: TXA100) is required for easy commissioning via KNX easy.

Universal dim actuator 1gang easy RMD 300 W

Operating voltage over bus	21 ... 32 V=
Auxiliary voltage	230 V~
Frequency	50/60 Hz
Dimmable 230 V LED lamps	60 W
Quantity of dimmable, 230 V LED lamps	max. 8
Dimmable energy-saving lamps	60 W
Quantity energy-saving lamps	max. 8
230 V incandescent lamps and halogen lamps	300 W
Dimmable conventional transformers	300 VA
Electronic transformers	300 W
Operating temperature	-5 ... +45 °C
Conductor cross-section (flexible)	0.75 ... 2.5 mm ²
Conductor cross-section (rigid)	0.75 ... 2.5 mm ²
Dimensions (W x H x D)	70 x 90 x 65 mm
Width of rail mounted device (RMD)	4 modules

- selection switch for manual/bus operation as well as load setting
- manual operation can be activated via selection switch, thereby deactivation of the KNX function
- manual operation also possible without bus e.g. on building site
- manual operation per channel using button (single-area operation)
- status LED integrated in manual operation button
- with illuminated programming button
- learning function for optimised operation of compact fluorescent lamps and LED luminaires can be activated via the bus
- specification of the load type per channel possible using button on the device
- phase cut-on or cut-off according to load type, self-learning
- minimum/maximum dimming values per channel settable on device
- bulb-preserving soft startup
- overheating protection, display using LEDs
- overload protection, display via LED
- large labelling field
- preset behaviour in the event of bus voltage failure/return
- very low noise
- short-circuit proof and overload proof (display per channel using LEDs)
- with integrated bus coupling unit
- bus connection via connecting terminal
- with QuickConnect plug-in terminals

Do not connect conventional transformers together with electronic transformers.

HVAC actuators RMD

– the configuration server (order no.: 8001 00 00) or the commissioning tool (order no.: TXA100) is required for easy commissioning via KNX easy.

New

KNX heating actuator, 6gang, Triac easy RMD, 24 V/230 V AC

Frequency	50/60 Hz	– for switching thermoelectric valve drives for heating systems or cooling ceilings
Operating voltage over bus	21 ... 32 V=	– with programming button and red programming LED
Auxiliary voltage	110 ... 230 V~	– with 6 red status LEDs and 3 red LEDs as manual actuation indication
Switching current	5 ... 160 mA	– blocking function can be activated per actuator output via manual operation buttons or bus
Power consumption, KNX	≈ 250 mW	– with valve protection function
Power consumption (operation)	1 W	– for individual single room temperature control
Power consumption (standby)	0.4 W	– control process PWM or 2-point (on/off) can be selected
Actuators per channel	max. 4	– type of actuator (currentless closed/open) adjustable
Actuators, 24 V	max. 2	– for valve drive 230 V or actuator drive 24 V
Operating temperature	-5 ... +45 °C	– 4 manual operation buttons for open/close per actuator channel as well as all open/close
Conductor cross-section (flexible), without wire end sleeve	0.5 ... 4 mm ²	– various setpoint presettings for forced control or emergency mode in the event of bus failure adjustable for summer and winter time
Conductor cross-section (rigid)	0.5 ... 4 mm ²	– feedback via bus, e.g. in the event of overload, power or sensor failure
Dimensions (W x H x D)	72 x 90 x 65 mm	– short-circuit proof and overload proof (display using LEDs)
Width of rail mounted device (RMD)	4 modules	– bus connection via connecting terminal
Valve drives of the same operating voltage must be connected to all actuator channels.		– with screw terminals

Suitable for optional	Order no.	Page

Flush-mounted actuators easy

– the configuration server (order no.: 8001 00 00) or the commissioning tool (order no.: TXA100) is required for easy commissioning via KNX easy.

Switch actuator 1gang easy flush-mounted 10 A

Operating voltage over bus	21 ... 32 V=
max. switching capacity at	230 V~
Frequency	50/60 Hz
Switching current at $\cos \phi = 0.8$	max. 10 A
Current consumption KNX	typ. 7 mA
230 V LED lamps	5 x 15 W
Energy-saving lamps	5 x 15 W
230 V incandescent lamps	600 W
230 V halogen lamps	600 W
Conventional transformers	600 VA
Electronic transformers	600 W
Fluorescent lamps:	
- with electronical ballast (EB)	6 x 58 W
Compact fluorescent lamps	600 W
Operating temperature	-5 ... +45 °C
Conductor cross-section (flexible)	0.75 ... 2.5 mm ²
Conductor cross-section (rigid)	0.75 ... 2.5 mm ²
Dimensions (W x H x D)	44 x 22.5 x 43 mm

- status LED integrated into the manual operation button
- with illuminated programming button/button for manual operation
- with potential-free normally-open contact
- pre-assembled, with cables
- installation in flush-mounted or splash-protected junction box
- with integrated bus coupling unit
- bus connection via pre-assembled cable with bus connection terminal
- with screw terminals

Suitable for optional	Order no.	Page

Operating voltage over bus	21 ... 32 V=	– configuration tool for commissioning of KNX installations in easy mode
Auxiliary voltage	24 V=	– selection switch for online/offline mode
Transmission rate Ethernet	max. 2 x 100/1000 Mbit/s	– with green and red status LED for LAN status, operational stand-by, KNX status and gateway connection
Operating temperature	+0 ... +45 °C	– power supply via PoE or 24 V DC
Conductor cross-section (flexible)	0.75 ... 2.5 mm ²	– 2 RJ45 Ports for LAN connection
Conductor cross-section (rigid)	0.75 ... 2.5 mm ²	– with 2 USB jacks type B, USB 2.0 compliant
Dimensions (W x H x D)	105 x 89.8 x 60 mm	– large labelling field
Width of rail mounted device (RMD)	6 modules	– with integrated bus coupling unit
		– bus connection via connecting terminal
		– with QuickConnect plug-in terminals

Network technology skills are required for commissioning.

System requirements: Windows 8.1, Android 4.4, iOS 8.

KNX ETS

ETS (Engineering Tool Software) designates the standardised software that is used to configure a KNX system for building automation. The bus system with its actuators and sensors permits a wide variety of applications – lighting and roller shutter/blind control, single-room temperature control and much more. Functions are managed and operated with a KNX control system. Extremely convenient: a visualisation solution with touch display and control via KNX radio or the Internet.

Operating systems	782
Sensors	826
Actuators	839
System units	861

Extend as desired with KNX

Some providers of smart home solutions offer proprietary, i.e. closed, systems. Berker, on the other hand, uses the established KNX standard. This means our systems speak the same “language”, and by allowing the IoT Controller to include other devices from the Internet of Things, you can guarantee your customers a system that will work well into the future.

quicklink

The renovation solution. Our wireless alternative for smart building control systems. There is no need to lay costly control lines, and system launch is easy because no programming tools are required.

easy

For new construction work and extensive renovation. With easy, a KNX system can be configured simply, quickly and intuitively. An easy configuration server, a tablet and the easy app are all you need. Each configuration can be expanded with quicklink wireless solutions.

ETS

ETS is the standardised software that is perfectly suited to large building automation systems. With ETS, users can install numerous expanded functions that are ideal for high-end solutions for residential, commercial and administrative buildings.

Berker offers a compatible range of **KNX systems** for a variety of applications.

KNX[®] Standard

KNX
ETS

coviva*

Retrofit smart wireless technology. The ideal smart home solution for refurbishing and renovations.

domovea

Smart visualisation, intuitive control – now simpler than ever. domovea is the smart home solution for connected building control systems.

* coviva Smartbox is only compatible with quicklink installations.

Operating systems

Berker S.1 | B.3 | B.7, Q.1 | Q.3 | Q.7, K.1 | K.5 - Push-buttons

- operating surfaces as buttons (single-surface operation) and rockers (two-surface operation)
- with 2 RGB status LEDs per rocker
- status LED configurable in its colour per button
- brightness value of status LEDs are individually adjustable for button/rocker function
- brightness value of the status LEDs for day/nighttime operation adjustable via object or manually
- with white operating LED, can be activated
- push-button/rocker functions for switching, dimming, roller shutter/blind, value transmitter 1/2 byte, room thermostat extension unit, priority, scene, 2-channel mode, automatic control deactivation
- additional push-button functions for timer and step switch
- setting of 1 ... 64 scenes possible
- 3-step switch, function for incremental selection of up to 7 stored values
- integrated temperature sensor with output of the measured values via object
- function for manual interruption of automatic functions already triggered
- parameter defineable lock function
- alarm telegram after disconnection from bus coupling unit 1 bit or 1 byte
- value transmitter for dimming, position, brightness and temperature values 1 and 2 byte
- for bus coupling unit flush-mounted
- with anti-dismantling protection

Bus coupling unit flush-mounted

- external temperature sensor connection

Operating voltage over bus

Push-button module 2gang

- RGB LED
- internal temperature sensor
- integrated bus coupling unit

Operating voltage over bus
Current consumption KNX
Operating temperature
Installation depth

21 ... 32 V=
typ. 10 mA
-5 ... +45 °C
32 mm

- with two RGB status LEDs configurable in brightness and colour
- brightness of status LEDs are individually adjustable for button/ rocker function
- brightness value of the status LEDs for day/nighttime operation adjustable via object or manually
- operating surfaces as buttons (single-surface operation) and rockers (two-surface operation)
- button/rocker functions for switching, dimming, roller shutter/blind, value transmitter 1/2 byte, room thermostat extension unit, priority, scene, automatic control deactivation
- value transmitter for dimming, position, brightness temperature values 1 and 2 byte
- function for manual interruption of automatic functions already triggered
- integrated temperature sensor with output of the measured values via object
- with integrated buzzer for acoustic identification of the device within the system
- with programming button and red programming LED
- with integrated bus coupling unit
- bus connection via connecting terminal
- with anti-dismantling protection

KNX thermostat

- TFT colour display with symbol display
- to display and initiate actions
- display of operating mode, controller lockout, room/outside temperature, time and date
- time and date display
- screensavers
- menu guidance in DE/EN/FR/NL/IT/ES/PT/PL/DK/SV/FI/NO/TR
- operation via sensitive Touch control surface
- for individual single room temperature control
- control parameter for heating / cooling unit preset
- additional connection for external temperature sensor
- temperature measurement via internal, external temperature sensor or via object and their mean value formation
- temperature adjustable for comfort, standby and night-time reduction
- with integrated bus coupling unit
- bus connection via connecting terminal
- with spreader claws

KNX thermostat

- **integrated bus coupling unit**
- **colour display**
- **external temperature sensor connection**

Operating voltage over bus	21 ... 32 V=
Auxiliary voltage	24 V=
Current consumption KNX	max. 10 mA
Energy efficiency class	IV (2%)
TFT screen size	1.93"
Dimensions of display (W x H)	38.3 x 30.3 mm
Power reserve	≈ 4 h
Operating temperature	-5 ... +45 °C
Sensor cable length	10 m
Installation depth	32 mm

- operating modes heating, cooling, heating/cooling or background heating and additional heating/cooling can be selected
- control modes switching PI-control (PWM), continuous PI control or switching 2-point control can be selected
- heating types warm water heating, warm water under-floor heating, electric heating, electric underfloor heating, split unit or adjustable via object
- with keylock
- with holiday switching
- with frost protection function

Suitable for	Order no.	Page

KNX thermostat	8044 01 00	1

KNX room controller

- integrated bus coupling unit
- colour display
- external temperature sensor connection

Operating voltage over bus	21 ... 32 V=
Auxiliary voltage	24 V=
Current consumption KNX	max. 10 mA
Energy efficiency class	IV (2%)
TFT screen size	1.93"
Dimensions of display (W x H)	38.3 x 30.3 mm
Power reserve	≈ 4 h
Operating temperature	-5 ... +45 °C
Sensor cable length	10 m
Installation depth	32 mm

The KNX room controller in comparison with the thermostat also has push-button functions and can thus control all subsystems in a room.

- operating modes heating, cooling, heating/cooling or background heating and additional heating/cooling can be selected
- control modes switching PI-control (PWM), continuous PI control or switching 2-point control can be selected
- heating types warm water heating, warm water under-floor heating, electric heating, electric underfloor heating, split unit or adjustable via object
- push-button functions for switching, dimming, roller shutter/blind, value transmitter 1 and 2 byte, thermostat, scene, priority
- with keylock
- with holiday switching
- with frost protection function
- function for manual interruption of automatic functions already triggered

black glossy	8016 18 65	1

Push-button 2gang

- RGB LED
- internal temperature sensor

Suitable for
Bus coupling unit flush-mounted

Order no. **Page**
page 798

Power consumption, KNX ≈ 150 mW
Operating temperature -5 ... +45 °C

Use only in conjunction with bus coupling unit flush-mounted
(order no. : 8004 00 x1)!

Design	Order no.	PU

polar white glossy	8016 28 69	1
black glossy	8016 28 65	1

Berker R.1 | R.3 - Touch sensors comfort

- with integrated bus coupling unit
- operation by gently touching the sensor surfaces on the white LEDs
- for switch, push-button, dimmer and shutter functions
- single and two push-button operation parameterisable
- one push-button operation for switching, buttons, blinds and dimming
- extension unit for light scene push-button
- retrieval, setting and storing of 8 light scenes
- temperature measurement via internal and/or external temperature sensor with mean value formation
- additional connection for external temperature sensor
- usable as thermostat extension unit
- provision of the internal temperature value via communication object
- blocking function for sensor surface e.g. for cleaning the glass surface
- value transmitter for dimming, position, brightness and temperature values 1 and 2 byte
- bus connection via connecting terminal
- for mounting on a double box, e.g. order no. 1809 (flush mounting) or 1824 (hollow wall mounting)
- for vertical mounting
- with dismantling protection via a screw on the fastening ring
- many options for labelling (text and/or symbols) are available via the **product/labelling configurator** at configurator.hager.com
- for individually labelled glass and touch sensors (configured variations), the product/labelling configurator generates a layout number, which must be additionally specified when placing the order.

Touch sensor 1gang comfort

Berker R.1 | R.3 - Touch sensors with thermostat

- with integrated bus coupling unit
- operation by gently touching the sensor surfaces on the white LEDs
- for switch, push-button, dimmer, blind and thermostat functions
- single and two push-button operation parameterisable
- one push-button operation for switching, buttons, blinds and dimming
- for individual single room temperature control
- for heating and/or cooling mode with/without auxiliary step
- operating modes: comfort, standby, night operation and frost/heat protection adjustable
- LED display with symbol display
- with 2 additional sensor surfaces for display control
- display of operating mode, controller lockout, room and outside temperature as well as time in connection with a clock
- integrated temperature sensor
- temperature measurement via internal and/or external temperature sensor with mean value formation
- additional connection for external temperature sensor
- provision of the internal temperature value via communication object
- temperature control via local measurement or measured value via object
- value transmitter for dimming, position, brightness and temperature values 1 and 2 byte
- separate auxiliary power supply needed
- operation with non-choked output of KNX voltage supply possible (pay attention to current consumption)
- bus connection via connecting terminal
- for mounting on a double box, e.g. order no. 1809 (flush mounting) or 1824 (hollow wall mounting)
- for vertical mounting
- with dismantling protection via a screw on the fastening ring
- many options for labelling (text and/or symbols) are available via the **product/labelling configurator** at configurator.hager.com
- for individually labelled glass and touch sensors (configured variations), the product/labelling configurator generates a layout number, which must be additionally specified when placing the order.

B.IQ - Push-buttons with thermostat

- for switch, push-button, dimmer, blind and thermostat functions
- single and two push-button operation parameterisable
- one push-button operation for switching, buttons, blinds and dimming
- extension unit for light scene push-button
- with 2 white status LEDs per rocker (labelling field illumination)
- with blue operation LED
- for individual single room temperature control
- for heating and/or cooling mode with/without auxiliary step
- controller operating modes: comfort, standby, night and frost/heat protection mode
- with 2 additional function buttons for display control
- display of operating mode, controller lockout, room and outside temperature as well as time in connection with a clock
- temperature measurement via internal temperature sensor and/or external communication object (weighting ratio parameterisable)
- provision of the internal temperature value via communication object
- with room temperature timer and 2-week timer functions
- button help function can be activated
- for installation in single standard wall boxes
- for continuous (PI) or switched (2-point) control of max. 2 control circuits
- with dismantling protection
- LC display with symbols and illumination switchable via object
- text display (ASCII-format)
- end customer display scope parameterisable
- presence button parameterisable to extend comfort
- separate object for window contact
- with button blocking function
- alarm telegram after disconnection from bus coupling unit 1 bit, 1 or 2 byte
- value transmitter for dimming, position, brightness and temperature values 1 and 2 byte
- programmable from ETS2, V1.2a
- for suitable frames in the same "style" for additional applications, see the Design line B.7
- for additional products to complement the installation in matching colours/materials, refer to the Design platform S.1 | B.x

Flush-mounted bus coupling unit for B.IQ with thermostat

Operating voltage over bus 21 ... 32 V=
 Operating temperature +5 ... +45 °C
 Installation depth 20 mm

B.IQ labelling field for push-buttons 5gang	7590 00 82	564
Hand-held transmitter for B.IQ IR push-button	2779	809

Design	Order no.	PU
polar white matt	7566 56 99	1
aluminium, aluminium anodised	7566 56 94	1
stainless steel, metal brushed	7566 56 93	1
glass polar white	7566 56 90	1
glass black	7566 56 92	1

Hand-held transmitter for B.IQ IR push-button

Operating voltage 6 V=
IR range ≈ 10 m
Number of IR channels 24
Battery service life [years] ≈ 3
Dimensions (L x W x H) 192 x 53 x 23 mm

- RC5 code
- with 3 channel group LEDs (also transmission and battery status LEDs)
- with 3 channel group buttons A, B, C
- with 8 channel buttons (on/off; dimmer)
- with child lock

The required batteries 4 x Micro, alkaline (LR 03) are not in scope of delivery.
For battery-operated IR remote control of all assigned IR receivers.

Berker TS sensor - Glass sensors comfort

- with integrated bus coupling unit
- operation by gently touching the sensor surfaces on the white LEDs
- for switch, push-button, dimmer and shutter functions
- single and two push-button operation parameterisable
- one push-button operation for switching, buttons, blinds and dimming
- extension unit for light scene push-button
- retrieval, setting and storing of 8 light scenes
- integrated temperature sensor
- temperature measurement via internal and/or external temperature sensor with mean value formation
- additional connection for external temperature sensor
- usable as thermostat extension unit
- provision of the internal temperature value via communication object
- blocking function for sensor surface e.g. for cleaning the glass surface
- value transmitter for dimming, position, brightness and temperature values 1 and 2 byte
- bus connection via connecting terminal
- for vertical mounting
- for mounting, always use the flat 2gang wall box, order no. 1871
- with adapter ring for dismantling protection, shadow jointing and special installation conditions
- with disassembly suction tool
- many options for labelling (text and/or symbols) are available via the **product/labelling configurator** at configurator.hager.com
- for individually labelled glass and touch sensors (configured variations), the product/labelling configurator generates a layout number, which must be additionally specified when placing the order.

Glass sensor 1gang comfort

▶ 946

- **integrated bus coupling unit**

Operating voltage 21 ... 32 V=
Current consumption KNX max. 12.5 mA
Operating temperature -5 ... +45 °C
Dimensions (W x H x D) 86 x 160 x 5.7 mm

- with blue operation LED and 2 white status LEDs
- for additional products to complement the installation in matching colours/materials, refer to the Design platform S.1 | B.x
- for glass frames in the same "style" for additional applications, see the Design line B.7

Berker TS sensor - Glass sensors with thermostat

- with integrated bus coupling unit
- operation by gently touching the sensor surfaces on the white LEDs
- for switch, push-button, dimmer and shutter functions
- single and two push-button operation parameterisable
- one push-button operation for switching, buttons, blinds and dimming
- extension unit for light scene push-button
- retrieval, setting and storing of 8 light scenes
- for heating and/or cooling mode with/without auxiliary step
- controller operating modes: comfort, standby, night and frost/heat protection mode
- LED display with symbol display
- with 2 additional sensor surfaces for display control
- display of operating mode, controller lockout, room and outside temperature as well as time in connection with a clock
- integrated temperature sensor
- temperature measurement via internal and/or external temperature sensor with mean value formation
- additional connection for external temperature sensor
- usable as thermostat extension unit
- temperature control via local measurement or measured value via object
- blocking function for sensor surface e.g. for cleaning the glass surface
- value transmitter for dimming, position, brightness and temperature values 1 and 2 byte
- separate auxiliary power supply needed
- operation with non-choked output of KNX voltage supply possible (pay attention to current consumption)
- bus connection via connecting terminal
- for vertical mounting
- for mounting, always use the flat 2gang wall box, order no. 1871
- with adapter ring for dismantling protection and shadow gap formation
- with disassembly suction tool
- many options for labelling (text and/or symbols) are available via the **product/labelling configurator** at configurator.hager.com
- for individually labelled glass and touch sensors (configured variations), the product/labelling configurator generates a layout number, which must be additionally specified when placing the order.

- **integrated bus coupling unit**

Operating voltage over bus	21 ... 32 V=
Auxiliary voltage	24 V=
Power consumption (standby)	0.6 W
Power consumption, KNX	≈ 1 W
Bus current consumption (data transfer)	≈ 10 mA
TFT screen size	3,5"
Resolution graphical display	320 x 240 px
Operating temperature	+0 ... +50 °C
Line length	max. 10 m
Conductor cross-section (flexible), with wire end sleeve	0.25 mm ²
Dimensions (W x H x D)	95 x 75 x 44 mm
Installation depth	25.5 mm
Energy efficiency class	IV (2%)

- high-resolution, touch-sensitive colour display
- for display/presentation of measured values, safety-relevant status, texts, graphics and photos
- integrated icon library with icons
- self-generated images/icons importable via micro SD card
- functions such as switching, dimming, blind control, up to 16 scenes, climate control, activation of alarm systems, date, time of day
- automatic function for control of lighting, blinds and roller shutters, air conditions and ventilation systems
- disabling function for cleaning the user interface
- 16 time switching functions and alarm clock
- logic modules: 4 x AND, 4 x OR with 4 inputs each
- with integrated bus coupling unit
- 4 analogue/digital inputs
- with programming button
- integrated brightness sensor for automatic adjustment of the display brightness
- internal proximity sensor for automatic activation of the display
- up to 10 freely configurable pages for operating elements and displays
- bus connection via connecting terminal
- connection for external temperature sensor and binary contacts

Touch Panel

- display illumination can be switched automatically using brightness sensor
- depending on the software visualisation one and two surface operation, stepless configuration based on sliding and page scrolling by swiping are supported
- with USB/Mini USB type A adapter cable
- with RJ45 connector kit from connector and patch cable

Touch Panel 7" Android

Power over Ethernet (PoE)	18 ... 48 V=	– signal and operating panel with touch-sensitive, capacitive TFT colour display in 16:9 format, with Multi touch operation
Auxiliary voltage	18 ... 48 V=	
Power consumption	< 10 W	– for visualisation of domovea software and display of preconfigured functions, measured values and data
TFT screen size	7"	– suitable for vertical and horizontal domovea visualisation
Resolution graphical display	800 x 480 px	– connection to KNX system via domovea server
Light intensity	300 cd/m ²	– operating system: OS Android 4.1
Transmission rate Ethernet	max. 10/100 Mbit/s	– applications (Apps) available in preinstalled Android launcher - without acces to external apps
Processor	1 GHz	– integration of door communication functions in the domovea client or the Elcom VideoFON app for IP intercom systems
RAM	512 MB	– multi-touch function for the connection of multiple actions, e.g. to activate a function with simultaneous setting of a function value
Operating temperature	+5 ... +45 °C	– silent, long-lasting convection cooling without fan
Conductor cross-section (flexible), with wire end sleeve	max. 0.75 mm ²	– RJ45 Port for LAN connection
Conductor cross-section (rigid)	max. 1.5 mm ²	– card slot with 8 GB SDHC card
Dimensions (W x H x D)	189.7 x 125.7 x 48.3 mm	– microphone and loudspeaker with echo suppression
Assembling height	12 mm	– Mini-USB 2.0 jack e.g. for external storage media or updates on the upper display edge is accessible without dismantling
PoE power supply according to IEEE 802.3af Class 3 possible without audio applications.		– 2 USB 2.0 connections on the rear
		– for flush mounting and hollow-wall mounting
		– for vertical and horizontal mounting

Flush-mounted housing for 7" Touch Panel, flush-to-wall, anthracite, lacquered ¹⁾	7590 02 07	1
Flush-mounted housing for 10" Touch Panel, flush-to-wall, anthracite, lacquered ²⁾	7590 02 10	1
Flush-mounted housing for 16" Touch Panel, flush-to-wall, anthracite, lacquered ³⁾	7590 02 16	1

¹⁾ Dimensions (W x H x D): 197.7 x 133.6 x 74 mm, cavity wall opening (W x H x D): 197.7 x 133.6 x 74 mm

²⁾ Dimensions (W x H x D): 269 x 186 x 74 mm, cavity wall opening (W x H x D): 269 x 186 x 74 mm

³⁾ Dimensions (W x H x D): 387 x 242 x 74 mm, cavity wall opening (W x H x D): 387 x 242 x 74 mm

Berker IP Control

IP Control RMD

Operating voltage	10 ... 30 V=
Power consumption	<= 5 VA
receiptable addresses	32766
RAM	256 MB
Operating temperature	+0 ... +35 °C
Dimensions (W x H x D)	144 x 90 x 64.5 mm
Width of rail mounted device (RMD)	8 modules
Assembling height as from DIN rail	58 mm

New Logic Editor:

- clear graphic display of all links
- graphic editor for automation features
- simple drag & drop configuration
- new, innovative job types
- individual options for grouping for a better overview
- numerous simulation options with leap in time/ timelapse function
- intelligent search, also for group addresses
- import/export of job groups web-based and platform-independent
- configuration possible, without disturbing the ongoing operation

Visualisation element:

CubeVision - visualisation of a building as an animated 3D cube with additional functions (RGB lamp, online weather data, audio streams, etc.)

Product variant for use-independent room control:

IP control (order no. 7571 00 36) including software, with which an assignment plan can be stored, for building services engineering control according to room/building use, e.g. in schools according to timetables or in public buildings according to visiting or working times.

Mobile end devices such as smartphones or tablet computers can access the IP-Control via the internet and can thus access the building control.

Knowledge of the relevant network technology is required for commissioning.

- integrated element library with standard operating elements
- freely configurable graphic operating surface for representation on the PC monitor
- up to 20 operating configurations for different applications
- integration of external control units with JAVA support (e.g. tablet PC) via WLAN
- central operating and visualisation unit for KNX via web browser
- for control and visualisation of e.g. shutters, lights, heating, ventilation, alarm system, sensors
- control of multimedia applications
- control of SONOS sound systems
- creation of light scenes with up to 28 telegrams each
- central functions/scenarios for heating, shutters, illumination, etc. can be configured by end user
- with status LED for operational stand-by, data processing, KNX communication, LAN status
- with week and year timer function
- time updating via Internet NTP server and sending on the KNX
- with event indicator for e.g. status/alarm messages via e-mail
- with S0 interface (electrical pulse counter, operating hours meter, etc.)
- access control: integration of ekey® fingerprint sensors possible
- KNX server to supply up to 15 visualisation clients with KNX data
- operation with non-choked output of KNX voltage supply possible (pay attention to current consumption)
- remote commissioning / maintenance of KNX systems possible via the Internet (VPN, KNXnet/IP)
- commissioning and programming without ETS, web based via IP Control starter software
- administration of 50 users for the control of access authorisation
- database connection to the memory of utilisation/consumption data of the KNX
- can also be used with Apple Mac OS X
- with integrated controller for logic functions (concatenations, threshold value processing)
- bus connection via connecting terminal
- integration of network cameras possible
- for LAN connection of individual KNX installations
- with USB interface for 1-wire devices (e.g. 1-wire sensors)
- with screw terminals
- RJ45 Port for LAN connection
- configuration tool for installation of IP settings and parameterisations
- support of common web browsers (IE, Chrome, Firefox etc.)
- with updatable Flash-Controller for subsequent function expansions

IP-Control for use-dependent room controllers RMD, light grey	7571 00 36	1

Info displays

Bus coupling unit flush-mounted

Operating voltage over bus	21 ... 32 V=	– with programming button and red programming LED
Power consumption, KNX	≈ 100 mW	– as interface between KNX user module and bus line
Operating temperature	-5 ... +45 °C	– bus connection via connecting terminal
Installation depth	23 mm	– without spreader claws

	Suitable for optional	Order no.	Page
Design	Blind plug for bus coupling unit	7594 02 ..	866
Bus coupling unit flush-mounted		7504 00 01	1

Info display

Operating temperature	-5 ... +45 °C	– to display and initiate actions
Commissioning possible only with ETS2 V1.2a and following versions.		– LC display with illumination
		– with anti-dismantling protection
		– visual/acoustic alarm message, acknowledgeable
		– for max. 48 signalling groups
		– programmable to 1, 2 or 4 lines
		– with piezo signal generator
		– 16 characters per line on max. 12 pages
		– German/English

Berker domovea

Berker domovea Server RMD

Operating voltage over bus	21 ... 32 V=
Auxiliary voltage	24 V=
Current consumption (operation)	≈ 150 mA
Power consumption (operation)	≈ 1.5 W
RAM	128 MB
Graphics memory	≈ 20 MB
Processor	400 MHz
Operating temperature	+0 ... +45 °C
Dimensions (W x H x D)	105 x 89.8 x 60 mm
Width of rail mounted device (RMD)	6 modules

Central operating and visualisation unit for KNX installations via client software.

Knowledge of the relevant network technology is required for commissioning.

System requirements: Windows XP | VISTA | 7 | 8 | 10, (32 or 64 bit).

- for control and visualisation of e.g. shutters, lights, heating, ventilation, alarm system, sensors
- creation of max. 50 sequences from different actions
- user interface can be configured individually for each room with special background images
- KNX server to supply up to 30 visualisation clients simultaneously with KNX data
- configuration tool for installation of IP settings and parameterisations
- with configuration and client software on USB stick
- with status LEDs for LAN status, operational stand-by and connection status to web portal
- selection switch for online/offline mode
- creation of light scenes
- creation of measured value archives and energy consumption visualisation with KNX energy meters
- managing up to 30 users with different access rights
- software update via USB interface on the device
- integration of max. 10 network cameras
- RJ45 Port for LAN connection
- with integrated bus coupling unit
- bus connection via connecting terminal
- with QuickConnect plug-in terminals

KNX EnOcean

EnOcean radio wall-transmitter module

Number of radio channels	2
Radio transmission/reception frequency	868.3 MHz
Radio transmission range (free field)	max. 300 m
Radio transmission range (building)	max. 30 m
Ambient temperature	-25 ... +65 °C
Relative humidity (without condensation)	0 ... 95 %

IEC14543-3-10

- single-surface operation in conjunction with suitable radio receivers
- for the transmission of switching, dimming or blind commands to the radio receiver of the EnOcean system
- each channel can be assigned to any number of radio receivers
- provision of transmission energy through conversion of the mechanical energy on button actuation
- batteryless, maintenance-free device without external power supply
- with fitting material
- mounting with frames on even surface, e.g. also for extension of combinations
- for screw or adhesive fixing

Suitable for optional	Order no.	Page

KNX EnOcean Gateway surface-mounted				
	Operating voltage over bus	21 ... 32 V=	– each channel can be configured with different functions	
	Radio transmission/reception frequency	868.3 MHz (ASK)	– EnOcean receiver functions for conversion into KNX telegrams: including switching, dimming, blind, light scene, window contacts, temperature values, brightness values, presence simulation, room control devices	
	Number of function channels	32	– EnOcean transmission functions for the conversion of KNX telegrams: switching, dimming, blind, valve drives	
	Ambient temperature	-5 ... +45 °C	– logic and control functions	
Relative humidity (without condensation)	5 ... 93 %	– teaching-in of the radio components using the buttons and display		
Dimensions (W x H x D)	81 x 81 x 25 mm	– LC display for commissioning and system diagnostics		
Bi-directional gateway for transmission of EnOcean radio signals to the KNX bus or of KNX telegrams into the EnOcean system.		– with programming button and red programming LED		
		– with integrated repeater for EnOcean transmission commands		
		– bus connection via connecting terminal		
		– installation possible on flush-mounted box		
		Suitable for	Order no.	Page

Sensors

Accessories - time switches

Time transmitter RMD

Operating voltage over bus	21 ... 32 V=	– suitable for shade systems with sun level calculation
Lithium cell power reserve [years]	≈ 10	– automatic summer-/winter time change-over (can be switched off)
Dimensions (W x H x D)	36 x 90 x 66 mm	– transmits time and date to the bus
Width of rail mounted device (RMD)	2 modules	– time zone and summer/winter time change-over configurable flexibly
Assembling height as from DIN rail	60 mm	– either Quartz operation or radio synchronisation by DCF77 time signal
		– with red status LED for DCF77 reception

Design	Order no.	PU
light grey	× 7591 00 02	1

KNX motion detector

KNX motion detector module 1.1 m

- internal temperature sensor
- integrated bus coupling unit

Operating voltage over bus	21 ... 32 V=
Current consumption KNX	max. 10 mA
Nominal mounting height	1.1 m
Delay time, adjustable	10 s ... 30 min
Response brightness, adjustable	≈ 5 ... 1000 lx, ∞ lx (day)
Detection field, rectangular shaped	≈ 12 x 16 m
Operating temperature	-5 ... +45 °C

Automatic triggering of bus functions for movement within the detection area or manual control via integrated button.

Continuous direct sunlight penetrating the upward-pointing detection level can result in failure of the motion detector.

Only suitable for indoor areas!

- with button for automatic/permanent ON/permanent OFF
- with 3 operating modes: automatic/permanent ON/permanent OFF
- Master/Slave operation for covering large detection areas
- with test mode
- operating mode display via status LED, red/green/orange
- specification of the controller operating mode
- integrated temperature sensor with output of the measured values via object
- integrated button for manual control of bus functions can be configured
- push-button functions for switching, dimming, blind, value transmitter, scene, priority
- setting of 1 ... 64 scenes possible
- two function channels for brightness-dependent functions
- additional channel for independent of brightness detector mode
- output of the brightness value via object possible
- with integrated bus coupling unit
- bus connection via connecting terminal
- with spreader claws
- with dismantling protection

Design	Order no.	PU

KNX IR presence detector comfort
- integrated switch actuator channel

Operating voltage over bus	21 ... 32 V=
Current consumption	12 mA
Current consumption KNX	typ. 12 mA
230 V LED lamps	20 x 20 W
Energy-saving lamps	20 x 20 W
230 V incandescent lamps and halogen lamps	2300 W
Conventional transformers	1500 VA
Electronic transformers	1500 W
Fluorescent lamps:	
- parallel compensated	1000 W
- with electronical ballast (EB)	1000 W
Recommended installation height	≈ 2.5 ... 3.5 m
Detection angle	360°
Detection field Ø, on floor	≈ 7 m
Detection field Ø, at desk height	≈ 5 m
Delay time, adjustable	≈ 1 min ... 1 h
Brightness measuring range	5 ... 1000 lx
Operating temperature	-10 ... +45 °C
Installation opening Ø	60 ... 63 mm
Installation wall thickness	10 ... 28 mm
Dimensions (Ø x H)	78 x 70 mm

- linking several detectors in order to expand the detection range
- operating modes: automatic, semiautomatic, test
- with red and green acknowledge/receive LED
- with programming button
- bus connection via connecting terminal
- switch output can be integrated for control via bus or direct connection of loads

Suitable for optional	Order no.	Page
IR hand-held transmitter for presence detector		page 830
IR configuration hand-held transmitter for presence detector		page 830
Surface-mounted housing for IR presence detector		page 829

IP41

The purpose of the presence detector is to save energy by switching off lighting when unoccupied or when ambient light level is sufficient.

Application areas e.g. office buildings, schools, hotels and nursing homes.

Connection terminals according to IEC 60669-1

Design	Order no.	PU
polar white matt	7524 10 03	1

KNX DALI IR presence detector comfort

Operating voltage over bus	21 ... 32 V=
Current consumption	12 mA
Current consumption KNX	typ. 12 mA
Power consumption, network	≈ 60 mW

IR hand-held transmitter for presence detector

▶ 830

Battery service life [years] ≈ 3.5
Dimensions (L x W x H) 120 x 70 x 10 mm

Scope of functions dependent on the controlled presence detector.

Required battery (CR 2032) is included in the scope of delivery.

For control for the lighting connected to the presence detector.

- RC6 code
- additional acknowledgement LED for displaying the IR transmission
- with 4 function buttons (calling up/saving light scene)
- with green "on" and red "off" button (on/off, dimmer function)

Suitable for	Order no.	Page
KNX IR presence detector		page 828

IP30

IR configuration hand-held transmitter for presence detector

▶

Dimensions (L x W x H) 111 x 63 x 10 mm
Battery service life [years] ≈ 3.5

Required battery (CR 2032) is included in the scope of delivery.

For convenient configuration of supported presence detectors.

- RC6 code
- additional acknowledgement LED for displaying the IR transmission
- 15 buttons with integrated status-LED
- 3 configuration ranges for control, switch-off delay, brightness threshold
- setting of the brightness threshold manually, by default values or teach-in mode
- default settings can be selected for the brightness threshold daylight, office, corridor
- 2 configuration memories for identical configuration of several presence detectors

Suitable for	Order no.	Page

KNX thermostat

- 4 binary inputs or 2-3 binary inputs and 1-2 outputs parameterisable
- with 4 independent binary inputs for potential-free contacts e.g. window magnetic contact
- valve protection can be defined
- behaviour can be defined for bus voltage return
- binary inputs / outputs with screw terminals
- for individual single room temperature control
- for heating and/or cooling mode
- heating or cooling possible in 2 stages
- bus connection via connecting terminal
- for continuous (PI) or switched (2-point) control
- with dismantling protection

KNX thermostat

- **setting knob**
- **integrated bus coupling unit**

Operating voltage over bus	21 ... 32 V=
Output current per channel	max. 0.8 mA
Current consumption KNX	max. 10 mA
Set value control by setting knob	± 0 ... 5 K
Energy efficiency class	IV (2%)
Operating temperature	-5 ... +45 °C
Conductor cross-section (rigid)	1.5 mm ²
Conductor cross-section (flexible)	0.3 ... 1 mm ²
Cable length, inputs/outputs	max. 5 m
Sensor cable length	50 m

- operating modes: comfort, standby, night lowering, frost/heat protection, dewpoint displayed with LED
- with status LEDs: red for heating, blue for cooling and yellow for activation
- with presence button for switching between comfort and standby mode
- with programming button and red programming LED
- presence button and setting knob can be programmed to have no functions
- without spreader claws

Suitable for optional	Order no.	Page
Temperature sensor (33 kΩ)		page 834

Binary input 4 parameter defineable for temperature sensor, order no. 161.

KNX CO₂ sensor with humidity and temperature regulation

- integrated bus coupling unit

Operating voltage over bus	21 ... 32 V=
Current consumption KNX	typ. 12.5 mA
Recommended installation height	≈ 1.5 m
Temperature measuring range, linear	-5 ... +45 °C
Measuring range, humidity	10 ... 95 %
CO ₂ measuring range	0 ... 2000 ppm
Operating temperature	-5 ... +45 °C

Recommendation: Use deep wall box.

For controlling e.g. fans or window drives via KNX telegram.

- binary input functions: Switching, dimming, blind, value transmitter, light scene extension unit
- binary inputs can be blocked in operation
- for measuring and monitoring CO₂ concentration, air humidity and air temperature
- operating modes: comfort, standby, night lowering, frost/heat protected
- an alarm is signalled when the dewpoint is reached in order to prevent the formation of mould e.g. on cooling ceilings or in winter gardens
- up to 4 CO₂-limit values can be set
- compares measured temperature with the set temperature
- up to 2 humid limit values can be set
- with programming button and LED
- without spreader claws

Physical sensors

IP54

Brightness and temperature sensor surface-mounted

- integrated bus coupling unit

Operating voltage over bus	21 ... 32 V=
Brightness measuring range, linear	1 lx ... 100 klx
Temperature measuring range, linear	-25 ... +55 °C
Operating temperature	-25 ... +55 °C
Dimensions (W x H x D)	72 x 110 x 54 mm

- 4 independent channels with individual limit values for processing brightness and/or temperature
- logic AND operation of the limit values can be set for each channel
- additional sun protection channel with objects for Venetian blind control
- with integrated bus coupling unit
- bus connection via connecting terminal
- teach object for brightness limit value for each channel

Weather stations

KNX weather station with GPS surface-mounted

- integrated bus coupling unit

Operating voltage over bus	21 ... 32 V=
Auxiliary voltage	24 V~/=
Rated current (heating incl.)	81 mA
Temperature measuring range, linear	-30 ... +80 °C
Brightness measuring range	0 ... 150000 lx
Measuring range, wind speed	0 ... 35 m/s
Precipitation (Yes/No)	1 bit
Operating temperature	-30 ... +50 °C
Dimensions (W x H x D)	96 x 77 x 118 mm
Weight	≈ 170 g

- with wind, precipitation, twilight, temperature and brightness sensor
- 3 limit values can be set for wind alarm
- for control of shading systems for up to 4 facades
- with automatic summer/winter time change-over
- Reception of date, time and location data via GPS signal
- with heater element for winter operation
- with red programming LED
- with programming button
- with simulation function for commissioning independently of weather conditions
- cyclical transmission behaviour for temperature alarm, brightness, day/night mode, rain alarm and 3 wind alarm levels freely adjustable
- easy commissioning by means of predefined parameters
- predefined parameters when activating heat protection function or heat generation function
- with integrated bus coupling unit
- bus connection via connecting terminal
- with plug-in terminals for power supply
- for wall and mast assembly
- with pipe clamp for mast fixing

Ensure correct orientation and free-standing installation. For detection of wind, precipitation, temperature and brightness as well to process the signals.

KNX Wetterstation Komfort mit GPS AP

- integrated bus coupling unit

Operating voltage	12...40 V~/=
Operating voltage over bus	21 ... 32 V=
Current consumption	81 mA
Temperature measuring range, linear	-30 ... +80 °C
Brightness measuring range	0 ... 150000 lx
Measuring range, wind speed	0 ... 35 m/s
Precipitation (Yes/No)	1 bit
Operating temperature	-30 ... +50 °C
Dimensions (W x H x D)	96 x 77 x 118 mm
Weight	≈ 170 g

Ensure correct orientation and free-standing installation. For detection of wind, precipitation, temperature and brightness as well to process the signals.

- with wind, precipitation, twilight, temperature and brightness sensor
- parameters for rain, night, temperature, wind, brightness, twilight and shading individually adjustable
- with calendar and week timer functions
- for control of shading systems for up to 6 facades
- with automatic summer/winter time change-over
- Reception of date, time and location data via GPS signal
- with heater element for winter operation
- with red programming LED
- with programming button
- delay times and hysteresis adjustable
- Measuring of precipitation, temperature, wind data, brightness
- with 8 logical AND- and OR-logic functions
- with logic gates for linking the limiting value results
- with blocking modules for filtering input objects depending on blocking objects
- with integrated bus coupling unit
- bus connection via connecting terminal
- with plug-in terminals for power supply
- for wall and mast assembly
- with pipe clamp for mast fixing

Analogue inputs

Analogue input 4gang RMD

Auxiliary voltage	24 V~
Frequency	50/60 Hz
Operating voltage over bus	21 ... 32 V=
Voltage, inputs	0-1; 0-10 V
Inputs, current	0-20; 4-20 mA
Sensor output voltage	24 V=
Sensor output current	max. 100 mA
Current consumption	170 mA
Limit values	per channel 2
Input impedance, voltage	18 kΩ
Input impedance, current	100 Ω
Operating temperature	-5 ... +45 °C
Dimensions (W x H x D)	72 x 90 x 70 mm
Width of rail mounted device (RMD)	4 modules
Assembling height as from DIN rail	63 mm

- for active sensors
- for wind, precipitation, brightness, temperature, twilight as well as humidity and temperature sensor, surface-mounted
- inputs parameterisable can be set individually
- input 4-20 mA will be controlled for wire break
- cyclic transmission or transmission at absolute input modification settable
- with programming button
- extendable with an analogue input module 4gang
- with screw terminals
- with operation and status LED, red/green/orange
- with red programming LED
- bus connection via connecting terminal
- with system interface for analogue input module

Suitable for	Order no.	Page
Power supply 24 V AC RMD	7591 00 01	836
optional		
Analogue input module 4gang	7542 40 04	836

The analogue input is for the registration and treatment of independent analogue sensor signals. Depending on the input signal, limiting value messages can be transmitted via KNX.

Separate 24 V DC auxiliary power supply needed!

Input signals according to DIN IEC 381-1, -2

Universal interfaces

- for the connection of switches, push-buttons, detectors, sensors, key switches and bolt switch contacts to KNX
- with programming button and red programming LED
- with integrated bus coupling unit
- bus connection via connecting terminal

Universal interface 2gang flush-mounted

Operating voltage over bus 21 ... 32 V=
 Input scanning voltage per channel 5 V
 Operating temperature +0 ... +45 °C
 Line length max. 5 m
 Dimensions (L x W x H) 38 x 35 x 12 mm

For connection of potential-free contacts, e.g. switches, push-buttons, window contacts, detector contacts or thermostats, for communication into KNX bus system.

- switching functions, dimming functions, blind control functions functions, forced control functions, scene functions, heating functions and timer functions
- ETS additional functions: value transmitter 1 and 2 bytes, 2-channel mode
- with 2 independent binary inputs for potential-free contacts

Operating temperature	-5 ... +45 °C
Dimensions (W x H x D)	72 x 90 x 70 mm
Width of rail mounted device (RMD)	4 modules
Assembling height as from DIN rail	63 mm

- any combined operation from drive and switching functions possible
- for individual single room temperature control
- for continuous (PI) or switched (2-point) control
- manual operation also possible without bus e.g. on building site
- 4 manual operation buttons for channel/device for on/off (up/down) and bus function On/Off
- with 6 red status LEDs and 3 red LEDs as manual actuation indication
- with programming button and red programming LED
- suitable to switch different external conductors
- with 4 potential-free NO contacts as well as normally-closed contact can be parameterised
- 2 additional electronic outputs (Triac) for connecting thermoelectric valve drives 230 V
- 4 outputs for switching from independent loads or activation of 2 drives
- with emergency programme, e.g. for sensor or bus failure
- bus connection via connecting terminal
- with screw terminals

Follow the motor manufacturers' instructions.

Optimised for commissioning with ETS3 from version D, patch A.

light grey, 4gang easy, 4 x 300 W	8031 41 24	1

Universal dim actuator 4gang pro RMD 600 W

Operating voltage over bus	21 ... 32 V=
Auxiliary voltage	230 V~
Frequency	50/60 Hz
Dimmable 230 V LED lamps	per channel 120 W
Quantity of dimmable, 230 V LED lamps	max. 10
Dimmable energy-saving lamps	per channel 120 W
Quantity energy-saving lamps	max. 8
230 V incandescent lamps and halogen lamps	per channel 600 W
Dimmable conventional transformers	per channel 600 VA
Electronic transformers	per channel 600 W
Operating temperature	-5 ... +45 °C
Conductor cross-section (rigid)	0.75 ... 2.5 mm ²
Conductor cross-section (flexible)	0.75 ... 2.5 mm ²
Dimensions (W x H x D)	175 x 90 x 65 mm
Width of rail mounted device (RMD)	10 modules

Do not connect conventional transformers together with electronic transformers.

- learning function for optimised operation of compact fluorescent lamps and LED luminaires can be activated via the bus
- manual operation can be activated via selection switch, thereby deactivation of the KNX function
- manual operation also possible without bus e.g. on building site
- manual operation per channel using button (single-area operation)
- specification of the load type per channel possible using button on the device
- phase cut-on or cut-off according to load type, self-learning
- minimum/maximum dimming values per channel settable on device
- bulb-preserving soft startup
- load coupling of 2, 3 or 4 channels to increase output power using parallel connection of the outputs
- status LED integrated in manual operation button
- overheating protection, display using LEDs
- overload protection, display via LED
- with illuminated programming button
- selection switch for manual/bus operation as well as load setting
- suitable to switch different external conductors
- large labelling field
- with integrated bus coupling unit
- for connection of higher loads outputs can be connected in parallel
- bus connection via connecting terminal
- with QuickConnect plug-in terminals

1 - 10 V/DALI interfaces

1 - 10 V control unit 3gang RMD

Operating voltage over bus	21 ... 32 V=	– for switching and controlling electronic ballasts and 1 - 10 V Tronic transformers, 105 W
Switching current	16 A	– with red programming LED and red status LED
Control current	per channel 100 mA	– with manual selection switch per channel for on/off and status indication
Capacitive load	1000 W, 140 µF	– with programming button
OSRAM EB:		– manual operation also possible without bus e.g. on building site
- QT-FH 1 x 28 W	17	– suitable to switch different external conductors
- QT-FH 2 x 28 W	17	– with potential-free NO contacts
- QT-FQ 2 x 80 W	11	– bus connection via connecting terminal
Operating temperature	-5 ... +45 °C	– with screw terminals
Input cable length	max. 500 m with 0.5 mm ²	
Dimensions (W x H x D)	72 x 90 x 65 mm	
Assembling height as from DIN rail	58 mm	
Width of rail mounted device (RMD)	4 modules	

Interface according to DIN EN 61347-2-3

Design	Order no.	PU
light grey	7531 30 05	1

KNX DALI gateway RMD

Operating voltage	110/240 V~	– for switching and controlling electr. ballasts and Tronic transformer with DALI interface
Operating voltage over bus	21 ... 32 V=	– setting of 16 effects with up to 16 steps for dynamic lighting control
Frequency	50/60 Hz	– integration of the device into DALI emergency lighting systems conforming to IEC 62386-101 with settings and monitoring of emergency mode
DALI voltage	16 V=	– a maximum of 64 DALI devices/individually addressable channels in a maximum of 32 groups and a maximum of 16 light scenes
Conductor cross-section (rigid)	max. 0.75...2.5 mm ²	– as DALI master and power supply for DALI devices
Conductor cross-section (flexible)	max. 0.75 ... 2.5 mm ²	– master control of all connected DALI components possible (Broadcast)
Operating temperature	+5 ... +45 °C	– 2 digit red LED display for group indication in manual operation
Dimensions (W x H x D)	72 x 90 x 70 mm	– 4 manual operation buttons for on/off (brighter/darker) and bus function on/off per channel / device
Assembling height as from DIN rail	63 mm	– with programming button and red programming LED
Width of rail mounted device (RMD)	4 modules	– manual operation also possible without bus e.g. on building site
Groups 1 to 16 can be implemented with up to 64 devices; groups 17-32 with up to 2 devices.		– with integrated bus coupling unit
		– bus connection via connecting terminal
		– with screw terminals

New

KNX DALI Gateway Tunable White RMD

Operating voltage	110/240 V~
Operating voltage over bus	21 ... 32 V=
Frequency	50/60 Hz
DALI voltage	16 V=
Conductor cross-section (rigid)	max. 0.75...2.5 mm ²
Conductor cross-section (flexible)	max. 0.75 ... 2.5 mm ²
Operating temperature	+5 ... +45 °C
Dimensions (W x H x D)	72 x 90 x 70 mm
Assembling height as from DIN rail	63 mm
Width of rail mounted device (RMD)	4 modules

Groups 1 to 16 can be implemented with up to 64 devices; groups 17-32 with up to 2 devices.

Available from September 2018!

- for switching and controlling electr. ballasts and Tronic transformer with DALI interface
- setting of 16 effects with up to 16 steps for dynamic lighting control
- Colour temperature setting for DALI device type 8 luminaires for tunable white according to IEC 62386-209
- integration of the device into DALI emergency lighting systems conforming to IEC 62386-101 with settings and monitoring of emergency mode
- a maximum of 64 DALI devices/individually addressable channels in a maximum of 32 groups and a maximum of 16 light scenes
- as DALI master and power supply for DALI devices
- master control of all connected DALI components possible (Broadcast)
- 2 digit red LED display for group indication in manual operation
- 4 manual operation buttons for on/off (brighter/darker) and bus function on/off per channel / device
- with programming button and red programming LED
- manual operation also possible without bus e.g. on building site
- with integrated bus coupling unit
- bus connection via connecting terminal

Blind actuator 4gang RMD 24 V DC

Operating voltage over bus 21 ... 32 V=
Switching current at 24 V= max. 6 A
Operating temperature -5 ... +45 °C
Width of rail mounted device (RMD) 4 modules

Follow the motor manufacturers' instructions.

- for activation of max. 4 independent DC drives
- status LED integrated in manual operation button
- with illuminated programming button
- manual operation can be activated via selection switch, thereby deactivation of the KNX function
- manual operation per channel using button (single-area operation)
- large labelling field
- switching time on change of direction programmable
- bus connection via connecting terminal
- with QuickConnect plug-in terminals
- with positioning function for shutter and blade position
- with safety functions e.g. for wind, rain, alarm
- 4 manual operation buttons for up/down per channel/device
- operating mode can be set for roller shutter/awning
- for activation of a DC drive per actuator channel
- with sun shade function
- with integrated bus coupling unit

Suitable for optional	Order no.	Page

Fan coil actuator 2gang RMD

Operating voltage over bus	21 ... 32 V=
Auxiliary voltage	230 V~
230 V incandescent lamps	2300 W
230 V halogen lamps	2300 W
Conventional transformers	1200 VA
Electronic transformers	1500 W
Fluorescent lamps:	
- uncompensated	1000 W
Operating temperature	-5 ... +45 °C
Assembling height as from DIN rail	63 mm
Dimensions (W x H x D)	72 x 90 x 70 mm
Width of rail mounted device (RMD)	4 modules

- for the electric activation of fan convectors
- activation of 1 or 2 fan channels with 6 or 3 fan stages
- for converting RTR control variables into valve positions, fan stages
- manual activation of blow fans using push-buttons or the operating panel
- 4 manual operation buttons for controlling fan stages and bus function on/off
- operating modes heating, cooling or heating and cooling
- with programming button and red programming LED
- manual operation also possible without bus e.g. on building site
- with 8 red status LEDs and 3 red LEDs as manual actuation indication
- use of free channels to control switching loads
- bus connection via connecting terminal
- with screw terminals

Comply with the fan convector manufacturer's instructions.
Optimised for commissioning with ETS3 from version D, patch A.

Switch actuator/blind actuator 2/1gang flush-mounted

Operating voltage over bus	21 ... 32 V=	- with positioning function for shutter and blade position
Bus current consumption (data transfer)	≈ 7 mA	- with safety functions e.g. for wind, rain, alarm
Switching current at cos φ = 0.8	max. 6 A	- with sun shade function
max. switching capacity at 230 V LED lamps	230 V~ 5 x 13 W	- manual operation in test mode via programming button (single-area operation)
Energy-saving lamps	5 x 13 W	- test mode/building site mode can be activated via programming button
230 V incandescent lamps	500 W	- for activation of a drive for alternating current
230 V halogen lamps	500 W	- switching time on change of direction programmable
Conventional transformers	500 VA	- with illuminated programming button
Electronic transformers	500 W	- for switching e.g. 2 independent loads or activation of a drive
Fluorescent lamps:		- with potential-free NO contact as well as NC contact parameterisable
- uncompensated	500 VA	- installation in flush-mounted or splash-protected junction box
- with electronical ballast (EB)	6 x 48 W	- with integrated bus coupling unit
Operating temperature	-5 ... +45 °C	- bus connection via connecting terminal
Conductor cross-section (rigid)	0.75 ... 2.5 mm ²	- with screw terminals
Conductor cross-section (flexible)	0.75 ... 2.5 mm ²	
Dimensions (W x H x D)	44 x 43 x 22.5 mm	

Follow the motor manufacturers' instructions.

Optimised for commissioning with ETS3 from version D, patch A.

Design	Order no.	PU
2 switch actuator channels/1 blind actuator channel for AC drive		
light grey, 2-/1gang pro	7534 20 12	1
light grey, 2/1gang easy	8034 20 12	1

Switch actuator/blind actuator 2/1gang pro + binary input 2gang flush-mounted 6 A

Operating voltage over bus	21 ... 32 V=	- with positioning function for shutter and blade position
Input scanning voltage	per channel 12 V=	- with safety functions e.g. for wind, rain, alarm
Bus current consumption (data transfer)	≈ 7 mA	- with sun shade function
Switching current at cos φ = 0.8	max. 6 A	- binary input functions: Switching, dimming, blind, value transmitter, scene, forced control, timer operation, subplate, 2-channel mode
max. switching capacity at 230 V LED lamps	230 V~ 5 x 13 W	- manual operation in test mode via programming button (single-area operation)
Energy-saving lamps	5 x 13 W	- test mode/building site mode can be activated via programming button
230 V incandescent lamps	500 W	- for activation of a drive for alternating current
230 V halogen lamps	500 W	- switching time on change of direction programmable
Conventional transformers	500 VA	- with 2 independent binary inputs for potential-free contacts
Electronic transformers	500 W	- with illuminated programming button
- uncompensated	500 VA	- for switching e.g. 2 independent loads or activation of a drive
- with electronical ballast (EB)	6 x 48 W	- with potential-free NO contact as well as NC contact parameterisable
Operating temperature	-5 ... +45 °C	- installation in flush-mounted or splash-protected junction box
Conductor cross-section (rigid)	0.75 ... 2.5 mm ²	- with integrated bus coupling unit
Conductor cross-section (flexible)	0.75 ... 2.5 mm ²	- bus connection via connecting terminal
Input cable length	max. 9.9 m	- with screw terminals
Dimensions (W x H x D)	44 x 43 x 22.5 mm	

Follow the motor manufacturers' instructions.

Optimised for commissioning with ETS3 from version D, patch A.

KNX/IP interfaces and gateways

IP router RMD

Operating voltage	24 V~/=
Current consumption KNX	typ. 10 mA
Operating temperature	-5 ... +45 °C
Dimensions (W x H x D)	36 x 90 x 58 mm
Width of rail mounted device (RMD)	2 modules
Assembling height as from DIN rail	55 mm

Separate 24 V DC auxiliary power supply needed!

- can be used as line/area coupler
- with green operation LED and yellow data traffic LED
- with green, yellow and red LEDs for indicating the IP communication
- with programming button and red programming LED
- operating voltage connection via connecting terminal
- line connection via connecting terminal
- with RJ45 connection for Ethernet/IP networks
- for reporting bus voltage failure via data networks
- as interface to PCs and data processing devices
- EIBnet/IP according to Konnex specifications: Core, Routing, Tunnelling, Device Management
- internet protocols supported: ARP, ICMP, IGMP, UDP/IP, DHCP
- quick communication of lines/areas and systems via data networks (Internet protocols)

Data interfaces

KNX data interface USB flush-mounted

Operating voltage over bus	21 ... 32 V=
Data transmission rate	max. 9.6 kBd
Operating temperature	-5 ... +45 °C
USB cable length	max. 5 m

For connection of a PC for addressing, programming and diagnosis of KNX components and for visualisation.

- programmable from ETS3, V1.0
- for addressing, programming and diagnosis of KNX components
- with B-type USB socket for data traffic (voltage supply via PC)
- compatible with USB 1.1/2.0 transmission protocols
- system requirements: Windows 2000 or later
- without spreader claws
- with flash-controller technology

Installation instructions

Tool size for processing BERKER products

The products have combination screws that can be processed with cross-head as well as flat-blade screwdrivers.

Tool sizes for contact screws:

- Cross-head bits: Pozi-Drive, size 2
- Cross-head screwdrivers: Pozi-Drive size 2
- Slot screwdrivers - Blade thickness 1 mm

Tool sizes for fixing screws:

- Cross-head bits - Pozi-Drive, size 1
- Cross-head screwdrivers - Pozi-Drive size 1
- Slot screwdrivers - Blade thickness 0.8 mm

i When using cordless screwdrivers a maximum torque of 0.5 Nm should be used.

Lighting of switches and push-buttons

The Work Place Regulation (ArbStättV) stipulates that light switches must be easily accessible and luminous. The switches and buttons of BERKER can be fitted with neon or incandescent lamp units (in the case of splash-protected surface-mounted devices, the lighting can not always be retrofitted).

Neon lamp unit with N terminal [Order no. 1675..]

The neon lamp unit (without removing the switch) can be inserted or replaced from the front. Depending on the application, the contact reed (s. figure on the right) must be removed

Applications

Figure 1: Constantly illuminated, switch-off with change-over switch (remove contact reed on the neon lamp unit)

Figure 2: Illuminates when OFF, switch-off with change-over switch

Figure 3: Illuminates when ON, switch-off with change-over switch (remove contact reed on the neon lamp unit)

i LED neon lamp units and neon lamps connected in parallel to the switching contact cause the contact opening to be fallen short of.

LED unit with N terminal for series switch [Order no. 1680]

The LED unit with N terminal is available for lighting series switches in the standard and surface ranges from Berker. As a control switch, it displays the switched on loads per series.

Series control switch [Order no. 3035/303550 + 1680]

Figure 4: The LED unit has contact springs (s. figure in the middle), which ensure simple snapping-on from behind

Figure 5: Series monitoring circuit (unit lights up per series when "On", N terminal (s. figure on the right))

Switches

A When connecting energy-saving lamps and electronic upstream devices (EB), the high switch-on currents must be observed. Check the suitability of the devices before use. Use making current limiters if necessary.

Lighting of switches and push-buttons

The switches and push-buttons with lens or labelling field of berker W.1 are supplied with an LED unit 230 V. The devices can also be converted for other functions with another LED unit variant if the wiring is adapted appropriately (see table 1).

LED unit 230 V, for switch/push-button [Order no. 16xx 35 00]

The LED unit (without removing the switch/push-button) can be inserted or replaced from the front. Depending on the application, the spring contact pins of the LED unit must be inserted from above in correct position to contact them with the plug-in terminals of the in-
sert.

LED signal light

The LED signal light is used for signalling e.g. notices, information, messages or warnings. The operation is performed via a separate push-button or switch. Installation is possible in switch combinations or individual.

LED signal light, RGB [Order no. 2951 ..]

The colour is switchable via an external push-button. Foils with imprinted symbols must be inserted depending on the application and define its specific function. Light colours cold white, warm white, blue, orange, red, green, purple (magenta) and colour sequence can be adjusted via a push-button. With each press of the push-button, the colour sequence is switched by one colour state. The colour sequence can be stopped at any position via the push-button. The brightness can be adjusted via a potentiometer.

LED signal light, red/green lighting [Order no. 2952 ..]

Two-coloured signal light, e.g. for access control. Switchable between red and green via separate switches. The supplied foil bi-colour with imprinted symbols for Do not disturb / Make up room and Enter/ Wait are positioned under the cover.

i Instead of the series switch (5) that should switch both colours separately, a change-over switch that merely enables a change-over of both colours can also be used

Figure 3: Connection example of LED signal light, red/green lighting

Push-button/pilot lamp E10 [Order no. 5101..]

Applications

Figure 1: Pilot lamp E10 push-button illuminated, when using neon lamps only a limited number of push-buttons are to be switched in parallel

Figure 2: Control push-button Push-button with separate signalling contacts, e.g. for connecting an indicator lamp

Operating conditions for electronic switches, dimmers and speed controllers

Specification of the rated load capacity when installing as a single device at:

- Ambient temperature up to 25° C
- Wall box in solid stone wall

i When connecting transformers, the nominal load of the transformer is always assumed not just the nominal load of the connected lamps.

i The maximum connected load must be reduced according to the installation conditions (see table).

Varying conditions:

minus 10 %	- per 5° C above 25° C
	- external devices in multiple combinations
minus 15 %	in wood or plasterboard wall
minus 20 %	internal devices in multiple combinations

Figure 1: Reduction of the rated load capacity under varying installation conditions

Energy saving by dimming

Controlling the brightness levels of lights not only provides a pleasant ambience, it also prolongs the lives of the bulbs. Controlling the brightness levels of lights not only provides a pleasant ambience, it also prolongs the lives of the bulbs.

Bulb life depending on operating voltage

5 % lower voltage corresponds to 200 % service life

Identification

⊗ Identifiers for dimmers and electronic switches (with semiconductor switching element) to DIN EN 60669-1/A2 and VDE 0632 part 1/A2.

⊕ Identifiers for switchgear with relays with micro-contact opening width to DIN EN 60669-1/A2 and VDE 0632 part 1/A2

⚠ When using third-party transformers in conjunction with berker Tronic dimmers and universal dimmers, malfunctions may occur because the components are not optimally attuned to each other.

Universal dimmer

Universal dimmers detect the load type during commissioning and automatically set the correct dimming principle.

Dimmer selection table

Load type:	Dimmer type:	Standard phase cut-on dimmer	Low voltage phase cut-on dimmer	Phase cut-off dimmer	Universal-dimmer	Speed controller

Motors		Combination unsuitable	Combination unsuitable	Combination unsuitable	Combination unsuitable	M ✓

Dimming principles:

- Phase cut-on dimmer for brightness control of 230 V incandescent/halogen lamps and 12 V halogen lamps with conventional transformer

At the beginning of each half-wave the dimmer blocks the current flow to the lamp, it is non-conducting. Only at the end of the time set by the dimming does the dimmer cut in again, and current is re-applied to the connected lamps. At the next sine zero, the dimmer again blocks the current flow. This process is repeated with each sine half-wave - that is, 100 times per second (50 Hz). During the time in which the dimmer blocks the current, no power is drawn from the mains or metered.

- Phase cut-off dimmer for brightness control of 12 V halogen lamps with Tronic transformers, 230 V incandescent and halogen lamps

The Tronic dimmer is activated when the sine half-wave passes through zero and deactivated again after the time set by the dimming. At the next sine wave zero the Tronic dimmer releases the current flow again. This process is repeated with each sine half-wave - that is, 100 times per second (50 Hz). In the time during which the Tronic dimmer blocks the current, no power is drawn from the system, and none is metered.

Connecting terminals		Plug-in terminals for max. 2.5 mm ² or 2 x 1.5 mm ²

Tronic rotary dimmer (R, C)

Technical data		Tronic rotary dimmer (R, C) order no. 2874..
Rated voltage		230 V~, 50 Hz
Connected load		230 V incandescent lamps and halogen lamps 20 ... 525 W Tronic transformers 20-525 W
Universal-power boosters Plus RMD		max. 10 à 500 W
Tronic power boosters built-in		max. 10
Switching current mains decoupler		max. 100 mA

Technical data		Tronic rotary dimmer (R, C) order no. 2874..
Noise		very low noise
Short-circuit proof		Switch-off with autom. restart electronic fuse (maintenance-free)
Overload proof		by power reduction
Radio interference suppression		acc. to EN 55015
Operating temperature		5 ... 25 °C (observe operating conditions)
Connecting terminals		Plug-in terminals for max. 2.5 mm ² or 2 x 1.5 mm ²

Universal rotary dimmer (R, L, C), extension unit insert

- Connection diagrams and technical data apply for
- Universal rotary dimmer (R, L, C) 2861 10
 - Universal rotary dimmer with centre plate (R, L, C) 2834 ..
 - Extension unit insert for universal rotary dimmer 2862 10, 2835 ..

Applications

Figure 1: Off switching

Figure 2: Operation with extension unit(s)

1-10 V control units

In lighting engineering, electronic ballasts and Tronic transformers fitted with a 1-10 V interface are being deployed to operate lamps (such as fluorescent lamps, LV halogen lamps). If multiple devices are connected using a single control line with 1-10 V control inputs, the 1-10 V rotary potentiometer can be used to adjust the brightness from a remote location. In this way, extensive and complex light systems can be implemented. The 1-10 V control units (1-10 V rotary potentiometer, 1-10 V push-button rotary potentiometer, NO contact) are used to switch the electronic ballast mains voltage on and off as well as for problem-free adjustment of the control voltage at the 1-10 V interface of the devices. The 1-10 V rotary potentiometers are covered by a centre plate with setting knob and frame, in keeping with the familiar dimmer design.

Measurement of the control and load currents

The total of electronic ballast control currents with the 1-10 V rotary potentiometer may be max. 50 mA, and the sum total of electronic ballast load currents (consider making currents) may be max. 6 A. The electronic ballast and lighting manufacturers' specifications regarding the control and load currents (with making currents) must be observed.

Calculation example, type Osram electronic ballast 2 x 58 W:

- Control current IST = 0.6 mA
- Load current IL = 0.55 A per electronic ballast
- 83 electronic ballasts are to be connected
IST = 83 x 0.6 mA = approx. 50 mA, IL = 83 x 0.55 A = 45.7 A

Result: The control contact is fully loaded.

Since electronic ballasts have an electrolytic capacitor in their input circuit, high making currents are to be expected. If the permissible number of electronic ballasts is exceeded (see table below), a contactor must be used to switch them, or a making current limiter.

1 - 10 V rotary potentiometer - maximum number of electronic ballasts that can be switched without additional fittings:

- 5 two-lamp or 10 one-lamp Osram electronic ballasts 58 W;
- 15 two-lamp or 30 one-lamp Insta electronic ballasts 42 W;
- 13 berker Tronic transformers 20-105 W

⚠ For a mixed load with inductive loads the proportion of the ohmic loads must not exceed 50 %!
Do not mix capacitive and inductive loads

Technical data - performances

Universal rotary dimmer (R, L, C)	Order no. 286110, 2834 ..
Rated voltage	230 V~, 50/60 Hz
Dimming principle	Phase cut-on or -cut-off depending on load type
Connected load	
- 230 V incandescent lamps and halogen lamps	ohmic: 50 .. 420 W capacitive: 50 .. 420 W
- Tronic transformers	(subject to min. 85 % of rated load) incl. transformer power dissipation,
- conv. transformers	inductive: 50 .. 420 VA
- Mixed loads	
Power consumption	approx. 0.5 Watt
Switch-on	bulb-preserving soft startup
Number of extension units	max. 5 extension unit inserts
Extension unit cable length	max. 100 m
Short-circuit protection	Switch off with autom. restart electron. fuse (maintenance free)
Overload protection	by power reduction
Radio interference suppression	acc. to EN 55015
Operating temperature	5 to 25 °C
Connecting terminals	Plug-in terminals for max. 2.5 mm ² or 2 x 1.5 mm ²

1 - 10 V rotary potentiometer [2891 10]

⚠ Max. 5 two-lamp electronic ballasts or 10 lamp electronic ballasts can be switched with no additional relay/ contactor or making current limiter.

DALI Protocol

DALI (**D**igital-**A**ddressable **L**ighting **I**nterface) is a protocol for controlling light technology operating devices, e.g. electronic transformers, electronic upstream devices etc.

Broadcast

Control information is sent in broadcast operation centrally to all users in the DALI network.

Typical broadcast commands

DALI command	Broadcast command
Light level (DAP)	Light value is called up
OFF	Switch off
STEP UP	Brighter dimming
STEP DOWN	Darker dimming
ON AND STEP UP	Switching on and darker dimming
STEP DOWN AND OFF	Darker dimming and switching off

Rotary potentiometer DALI

- Not suitable for combining with other DALI systems.
- The control line and load line can be laid in a common cable.
- The brightness of the lighting in the absence of DALI telegrams (PowerON-Level) and in the event of failure of the DALI system voltage (SystemFailure-Level) is stored in the EB and cannot be changed using the DALI rotary potentiometer.

DALI rotary potentiometer with soft-lock [Order no. 2897]

The DALI rotary potentiometer can control up to 64 DALI devices in broadcast operation. In parallel operation the lighting applies the brightness value of the respective DALI rotary potentiometer actuated. This can cause a brightness jump.

Figure 1: Connection of DALI rotary potentiometers as equally entitled control section

- 1 Power supply (according to DIN IEC 60929)
- 2 EB or Tronic transformer with DALI interface
- 3 Connection of additional devices with DALI interface
- 4 Connection of additional DALI potentiometers Order no. 2897

Rotary potentiometer DALI	Order no. 2897
DALI system voltage according to IEC 60929	16 V= (9.5 ... 22.5 V=)
Current consumption	< 2 mA
DALI devices	max. 64
DALI control line length	
at 0.5 mm ²	max. 100 m
at 0.75 mm ²	max. 100 ... 150 m
at 1.5 mm ²	max. 150 ... 200 m
Fine-wire fuse	F 0A 25 H 250
Operating temperature	5 ... 35°C
Connecting terminals	Screw terminals for max. 2 x 2.5 mm ² or 1 x 4 mm ²

DALI rotary potentiometer with power supply [Order no. 2898]

The DALI rotary potentiometer with an integrated power supply, when connected to the mains voltage (active operation), supplies the control current for the connected DALI devices. If the device is not connected to the mains voltage (passive operation), the power supply is supplied via the DALI voltage: the DALI rotary potentiometer works as an additional operating section (broadcast operation).

Figure 2: Connection of DALI rotary potentiometers as equally entitled control section

- 5 DALI potentiometer with power supply (active operation)
- 6 DALI potentiometer with power supply (passive operation)
- 7 EB or Tronic transformer with DALI interface
- 8 Connection of additional DALI potentiometers with power supply Order no. 2898 as well as additional devices with DALI interface

i A maximum of 4 active DALI rotary potentiometers can be used within the DALI network.

DALI rotary potentiometer with power supply	Order no. 2898
Rated voltage	230 V~
Frequency	50/60 Hz
Output current	max. 52 mA
DALI system voltage according to IEC 60929	16 V= (9.5 ... 22.5 V=)
Power consumption	max. 2 W
Quantity of DALI devices with 1 active DALI potentiometer	max. 26
Quantity of DALI devices with 4 active DALI potentiometers in parallel	max. 104
DALI control line length	
at 0.5 mm ²	max. 100 m
at 0.75 mm ²	max. 100 ... 150 m
at 1.5 mm ²	max. 150 ... 200 m
Operating temperature	5 ... 35°C
Connecting terminals	Screw terminals for max. 2 x 2.5 mm ² or 1 x 4 mm ²

Push-button for hotel card/ relay switch for hotel card

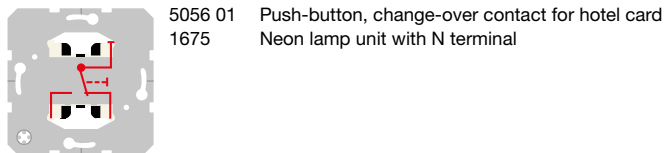

The push-button and relay switch for hotel card allow the central switching of electrical loads and additionally provide a storage possibility for the hotel card.

The operation is performed by inserting and removing the hotel card. The lighting of the operating section makes safe operation possible even in darkness.

Energy efficiency measures can be achieved by an additional feedback to the reception or by connection to the building automation e.g. for lowering the room temperature or for switching off ventilation/air conditioning systems.

Push-button, change-over contact for hotel card [Order no. 5056 01]

When the hotel card is inserted, the loads connected via a load contactor are switched on. After removing the hotel card, all electrical loads that are still active but no longer needed, such as lighting (possibly with time delay relay), socket outlet circuits (e.g. for television) are disconnected from the mains.

5056 01 Push-button, change-over contact for hotel card
1675 Neon lamp unit with N terminal

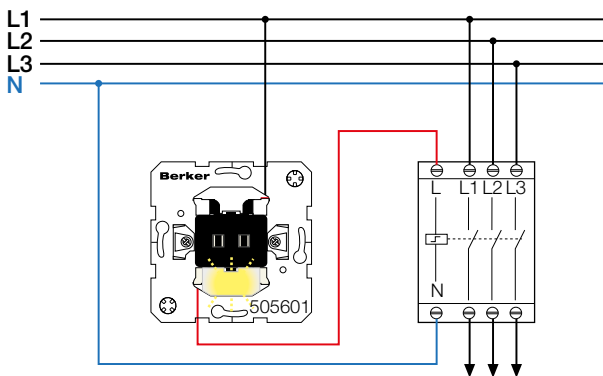

Figure 1: Push-button, change-over contact for hotel card: Neon lamp unit lights up only when the hotel card is not inserted.

Figure 2: Orientation lighting for hotel card applications

Function if hotel card is inserted

- Contact closed
- Orientation light off

Function if hotel card is not inserted

- Contact open
- Orientation light on

Relay switch for hotel card [Order no. 1640 .., 1641 ..]

Loads are connected directly via the internal relay or via a downstream load contactor.

When the hotel card is inserted, the load is switched on and switched off again when removed.

Thanks to the adjustable delay time of the internal relay, the lighting still stays on for the duration of the delay time after removing the hotel card so you can leave the room safely.

Figure 3: Relay switch for hotel card: Front view (A) without design cover, hotel card mounting device, fixing element and rear view (B)

- 1 LED as orientation light

IR presence detectors

Function elements and operating elements

Figure 1: Device overview

Installation modes

Figure 2: Installation in suspended ceiling / in wall-mounted housing EEK005

Installation location and detection area

- The detector in offices must be installed directly above the workplace so that small movements can be detected precisely.
- Sources of interference (heat sources, partition walls, green plants, ventilation outlets etc.) in the detection area of the presence detector that can impede the motion detection must be avoided.

Figure 3: Dependence of detection area on the mounting height

Device settings

The adjustment potentiometer (3) is used to configure the device.

Potentiometer Lux: Setting of the response brightness.

Position	Brightness approx. [lux]	Application
auto test	-	Testing the adjusted brightness value and detection area Configuration via hand-held transmitter EE807
1	200	Stairs/hallways Setpoint to control the lighting in stairwells in accordance with DIN EN12464-1, 2003-3: min. 150 lux
2	400	Offices
on	1000	

Potentiometer : setting of delay time.

Remote control

Two IR hand-held transmitters are available for remote control.

EE807	EE808
Settings/commissioning by electricians	Operation by user
<ul style="list-style-type: none"> - Setting response brightness - Setting switch on delay - Selecting operating mode - Resetting to factory setting - 2 Configuration memory for convenient multiple startups 	<ul style="list-style-type: none"> - Switching controlled lighting - Only with EE 816 (DALI/DSI) - Dimming controlled lighting - Saving and opening 4 different brightness levels.

IR presence detector [EE815]

The presence detector has an integrated switching contact for direct connection of the lights to be controlled. A push-button NO contact can be connected to the extension unit connection, which can be used to switch the lighting ON/OFF regardless of motion.

Figure 4: Connection of the IR presence detector

DALI IR presence detector [EE816]

The presence detector has an integrated DALI/DSI output for controlling the lighting with appropriate operating devices. The protocol setting (DALI or DSI) takes place automatically. A push-button NO contact can be connected to the extension unit connection, which can be used to switch the lighting ON/OFF (short press) or to dim the lighting (long press) regardless of motion.

Figure 5: Connection of the DALI presence detector

Presence detector surface-mounted/flush-mounted

Installation modes

Applications switch/push-button for blinds

Figure 2: Rotary switch for blinds 1pole and 2pole [Order no. 3841, 3842]; switch for blinds 1pole and 2pole for centre plate with lock [Order no. 3851, 3852] / switch/push-button for blinds 1pole and 2pole for lock cylinder [Order no. 382, 383..]

Connection

Figure 2: Direct connection of a light / control of a stair light time switch

Presence detector with constant light controller via 1-10 V interface surface-mounted/flush-mounted [EE812]

Connection

⚠ When connecting push-buttons for manual switching/dimming and in master-slave mode, use the same phase for all devices!

Figure 3: Connection to electronic ballast with 1-10 V interface/ connection in master-slave mode with EE810

Applications key switch

Figure 3: Change-over switch 1pole and 2pole for lock cylinder [Order no. 3826 10, 3836 20]

Figure 4: Lock cylinder [Order no. 1818, 1818 01]

The lock bit setting of the lock cylinder can be changed by pushing the bolt in 45°-steps.

- In lock bit setting 315°, the cover with the lock cylinder is removable without a key. The key is only removable in zero position (unswitched).
- The cover is secured against removal in the lock bit settings 90°, 135°, 225°. After activation, the key is turned back to the original position and can be removed with switches in any switching state.

Thermostats

The thermostat controls the temperature in enclosed spaces, such as homes, schools, workplaces etc.

Mounting

i Extraneous heat affects the control accuracy.

- An inside wall opposite the heating source is the preferred installation location. Installation height approx. 1.5 m above the floor.
- Avoid installation on outside walls or draught from windows or doors.
- Do not install the controller within shelving units or behind curtains and similar coverings (except with remote sensor).
- Avoid direct sunlight and do not install near televisions, radios and heating appliances, lamps, chimneys and heating pipes.
- When installing in a 3, 4 or 5gang frame, the distance between the thermostat and a dimmer should be as big as possible. In the case of an arrangement one above the other, the controller should be below the dimmer.

Electrical connection

Connect all the cables according to the corresponding circuit diagram. Connect the neutral conductor N to the N terminal. If this does not take place, then extreme temperature fluctuations will occur, as the controller does not work without thermal recirculation. The function is only dependent on the bimetal. No protective conductor is required, as the device is insulated.

Brief description in the circuit diagram

- L Outer conductor
- N Neutral conductor
- ⊥ Protective earth conductor
- NTC connection for temperature sensor
- RF Resistor for thermal re-circulation
- TA Resistor for night / temperature lowering
- ⌚ external time switch or (switch) for night / lowering temperature
- ↑ Load connection
- 🔥 Heating
- ❄️ Cooling
- T> Bimetal contact (temperature evaluation)

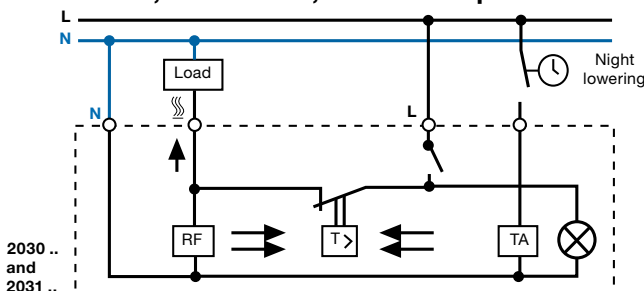

Thermostat, change-over contact with centre plate

2026.. **Thermostat, change-over contact, with centre plate Order no. 2026..**

Temperature range	5 ... 30 °C
Rated voltage	250 V~, 50/60 Hz
Rated current heating	10 A, 4 A cos φ = 0.6
Rated current cooling	5 A, 2 A cos φ = 0.6
Switching capacity heating	2.2 kW
Switching capacity cooling	1.1 kW
Power consumption	0.15 W
Switching temperature difference	approx. 0.5 °C

Thermostat, NC contact, with centre plate

2030.. and 2031..

Technical data Thermostat, NC contact, with centre plate, rocker switch Order no. 2030..

Temperature range	5 ... 30 °C
Rated voltage	250 V~, 50/60 Hz
Rated current	10 A, 4 A cos φ = 0.6
Switching capacity	2.2 kW
Power consumption	0.15 W, with night lowering 0.3 W
Switching temperature difference	approx. 0.5 °C
Temperature lowering	approx. 4 °C

The scaling on the thermostats at correct installation location corresponds to approx.:

- * = approx. 5 °C
- = approx. 20 °C
- 2 = approx. 10 °C
- 5 = approx. 25 °C
- 3 = approx. 15 °C
- 6 = approx. 30 °C

Thermostat, NO contact, with centre plate, for underfloor heating

The required floor temperature is set using the adjusting knob. If the set floor temperature is not reached, the control device then requests heat and shows this through a red LED. The heating is switched on or off using the mains switch. Night lowering can be activated using an additional connection by means of an upstream timer or control switch. This is displayed by the green LED on the setting knob lighting up. The temperature is reduced by approx. 5 °C. For temperature measurement, install the sensor in the floor in a protective pipe. The sensor cable can, if necessary, be extended using a 2-wire cable of 1.5 mm² cross section without influencing the precision of the controller. When laying the cable ducts or when close to high current conductors, a shielded cable should be used.

Sensor [Order no. 161]

Characteristic sensor values: Measuring device internal resistor Ri > 1 MOhm

5 °C	85.279 kOhm	25 °C	33.000 kOhm	45 °C	13.846 kOhm
10 °C	66.785 kOhm	30 °C	26.281 kOhm	50 °C	11.277 kOhm
15 °C	52.330 kOhm	35 °C	21.137 kOhm		
20 °C	41.272 kOhm	40 °C	17.085 kOhm		

Resistance values can only be measured when the sensor is disconnected

Install the temperature sensor in the ductwork in the floor, so that it is located between 2 heating conductors.

Thermostat, NO contact, with centre plate, for underfloor heating

2034..

i The terminal TA (temperature reduction) is activated via the neutral conductor N.

Technical data Thermostat, NO contact, with centre plate, for underfloor heating Order no. 2034..

Temperature range	10 ... 50 °C
Rated voltage	230 V~, 50/60 Hz; 230 V=
Switching current	10 A cos φ = 1 ohmic load
Switching capacity	2.3 kW
Power consumption	0.14 W, with night lowering 0.28 W
Switch/one-pole	On/Off
Display LED	Heating on "red" / Night lowering on "green"
Contacts (relay)	1 NO contact (for heating) not potential-free
Temperature lowering	approx. 5 °C
Switching temperature difference	approx. 1 °C
Sensor lead	PVC 2 x 0.75 mm2
Cable length	4 m
Degree of protection	IP67 acc. to EN 60529

Thermostat; NO contact, with centre plate, time-controlled order no. 2044 ..

The time-controlled thermostat enables weekday and time-dependent control of the room temperature in automatic mode. The current temperature value is determined via the internal sensor and compared with the setpoint value. When the temperature falls below the setpoint value, the heating system is activated.

i An external sensor for measuring the floor and room temperature can also be connected.

- 1 Button **Menu/↔**
- 2 Button **-**
- 3 Button **+**
- 4 Button **Info/OK**
- 5 Indication current time/help text
- 6 Indication of heating mode
- 7 Display of the day of the week
- 8 Indication of room or floor temperature
- 9 Indication of function/ settings

Figure 1: Overview of the operation and display elements

Product features

- can be used as room thermostat, floor thermostat or room thermostat with limiter
- type of actuator (currentless closed/open) adjustable
- control method: PWM (Pulse Width Modulation) or 2 point (On/Off)
- PWM cycle time and hysteresis (for two-point control) adjustable
- 3 preset time/temperature programmes, individually adjustable.
- max of 9 events per weekday adjustable
- frost and valve protection function
- self-learning heating curve, can be switched off
- timer for changing the temperature by the hour
- automatic summer-/winter time switching (can be switched off)
- programmable with operating unit removed
- operating hours meter or energy consumption display adjustable

Time/temperature diagrams

Figure 2: Day profile programme 1

Figure 3: Day profile programme 2

Figure 4: Day profile programme 3

i The last temperature setback always takes place at 22:00 h in all preset day profiles.

Function Optimum Start

The device detects automatically when the heating cycle must start so that the set temperature is reached at the set time (self-learning heating curve).

Figure 5: Self-learning heating curve based on the example of the weekday profile of programme 1

Installation and electrical connection

i Extraneous heat affects the control accuracy.

- An inside wall opposite the heating source is the preferred installation location. Installation height approx. 1.5 m above the floor.
- Avoid installation on outside walls or draught from windows or doors.
- Do not install the controller within shelving units or behind curtains and similar coverings (except with remote sensor).
- Avoid direct sunlight and do not install near televisions, radios and heating appliances, lamps, chimneys and heating pipes.
- When installing in a 3, 4 or 5gang frame, the distance between thermostat time-controlled and a dimmer should be as big as possible. In the case of an arrangement one above the other, the controller should be below the dimmer.

Figure 6: Connection diagram for thermostat, NO contact, with centre plate, time-controlled

Installation temperature sensor [order no. 161]

- The temperature sensor for floor heating systems must be installed in a ductwork between two heating conductors. If a floor temperature sensor is connected, the temperature measured there is displayed (for sensor values see floor temperature controller, NO contact, with centre plate on page **i820**).
- For controlling a room separated from the thermostat the floor temperature sensor can be installed with a sensor insert order no. 7594 10 01 at an appropriate installation location.

Technical data	Thermostat, NO contact, with centre plate, time-controlled Order no. 2044 ..
Operating voltage, rated frequency	AC 230 V~, 50 Hz
Output	Relay NO contact, non-isolated
Switching current	10 mA ... 10 (4) A
Power consumption	approx. 1.2 W
Operating temperature	0 ... 40 °C (without condensation)
Storage temperature	-20 ... 70 °C (without condensation)
Degree of protection	IP30
Protection class	II
Room thermostat (with limiter)	5 ... 30 °C
Floor thermostat	10 ... 40 °C
Output signal	Pulse width modulation (PWM) or Two-point control (On/Off)
Minimum event	10 min
Time deviation	< 4 min per year
Power reserve via lithium battery (permanently installed)	approx. 10 years

Multimedia technology

VGA module [1994]

The VGA module is used to connect display devices on a graphic card. Depending on the quality, VGA cables can be susceptible to interference at lengths of under 5m, or they can still transmit a good signal at lengths in excess of 30 m. Cables suited for high frequency with a coaxial structure for the colour channels are advantageous.

Figure 1: VGA module

PIN	Transmission signal	wire
1	Red	Coaxial wire
2	Green	Coaxial wire
3	Blue	Coaxial wire
4*	Monitor ID Bit 2	Twisted pair wire (optional connection)
5	Ground	Twisted pair wire
6	Red ground	Coaxial shielding
7	Green ground	Coaxial shielding
8	Blue ground	Coaxial shielding
9	Unassigned	Not contacted
10*	Synchronous ground	Twisted pair wire
11"	Monitor ID bit 0 or digital ground	Twisted pair wire (optional connection)
12	Monitor ID bit 1	Twisted pair wire (optional connection)
13	Horizontal synchronisation	Wire 1
14	Vertical synchronisation	Wire 2
15	Monitor ID bit 3	Not contacted
SHL	Housing shielding	External shielding

* are connected together on one terminal.

S-Video module [1993]

The S-Video (also known as Separate Video, Y/C) module is used for separate transmission of brightness (luminance) and colour (chrominance) information. Cable length should not exceed 10 m.

Figure 2: S-Video module

PIN	Transmission signal
1	Luminance (Y) earth
2	Chrominance (C) earth
3	Intensity (luminance) Y
4*	Colour (chrominance) C

Cinch module [1992]

Cinch (RCA) is the designation of standardised connectors for transmitting electrical signals, primarily via coaxial cables. Use of other cable types is not widespread, however it is possible.

Figure 3: Cinch module

Telecommunications

Arrangement in cable in star 4 configuration

Figure 1: Star 4 configuration- marking with rings

Figure 2: Star 4 configuration- marking with colours

wire	Current colour code	Previous colour code
1a	rd = red	ye = yellow
1b	bl = black	rd = red
2a	ws = white	gn = green
2b	ye = yellow	bl = blue

Notes to cat. 5 and 6 cables

⚠ The twisted pair wires (twisted) must not be drilled more than 13 mm, as otherwise the transmission properties will change. In the case of shielded cables, apply the shield.

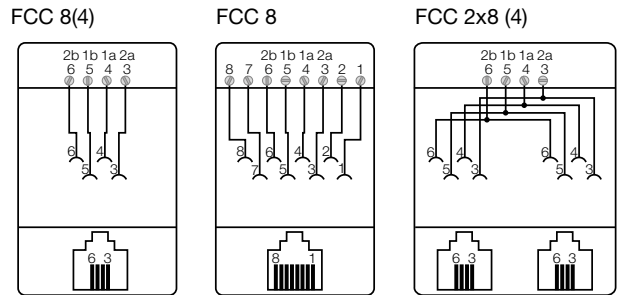

⚠ The bend radius " r " of the cable must not be less than 4 x the cable diameter " d " ($r > 4 \times d$).

Contact assignment FCC RJ45

Pin assignment of FCC connector boxes

* Bridging can be plugged in

Aerial systems terms

ADR (Astra Digital Radio): digital audio radio programmes on a sub-carrier analogue TV transponder.

Azimuth: Azimuth means the alignment of the south-facing satellite aerial (horizontal angle).

SAT-band: (SAT-IF, Input-IF) intermediate frequency bands used by satellite receivers:

- 950 ... 2050 MHz (standard band)
- 950 ... 2400 MHz (extended band)

High-Band: frequency range 11.7 ... 12.75 GHz of a satellite. Here mostly only digital programmes are broadcast.

Low-Band: frequency range 10.7 ... 11.7 GHz of a satellite. Systems with older LNBs cannot receive the whole range of the band (typically only 10.950 to ... 11.7 GHz analogue).

BK bands

- Reverse channel, frequency 5 ... 47 MHz
- Band I (VHF I), channel 2 - 4, frequency 47 ... 85 MHz
- Band II (UKW, VHF II), frequency 87.5 ... 108 MHz
- USB Band, Lower Special Channel Range (VHF), channel S2 - S10, frequency 108 ... 174 MHz
- Band III (VHF III), channel 5 - 12, frequency 174 ... 230 MHz
- OSB Band: Upper Special Channel Range (VHF), channel S11 - S20, frequency 230 ... 300 MHz
- Hyperband expanded special channel area (VHF), channels S21 - S38
- Band V (UHF), channel 21 - 37, frequency 470 ... 606 MHz
- Band V (UHF), channel 38 - 69, frequency 606 ... 862 MHz
- Sat-ZF (UHF), frequency 950 ... 2400 MHz

BER (Bit error rate): denotes the quality of a data signal after it has been received and demodulated. The lower the rate, the better the signal.

Conditional Access (CA) System: controls the access by users to services and programmes which are encrypted for copyright or commercial reasons.

Common Interface (CI): uniform interface for digital set-top boxes for PCMCIA modules with card readers for smart-card by practically all pay TV companies.

Attenuation types

<p>Transmission loss: Attenuation for throughpass sockets between trunk input and trunk output</p>	
<p>Attenuation: for throughpass and single sockets. Attenuation between trunk input and the output sockets</p>	
<p>Decoupling internal: Attenuation between plug output and socket output.</p>	
<p>Directional attenuation: Attenuation between trunk output out and the output sockets.</p>	
<p>Decoupling: Attenuation between two aerial sockets.</p>	

DiSEqCTM (Digital Satellite Equipment Control): switching signal generated by the satellite receiver, for controlling and switching LNB and multi-switches. This allows several satellite positions for rotary and multi-feed systems to be controlled. DiSEqC is a trade mark of the European Satellite Organization (EUTELSAT) and arose out of cooperation between EUTELSAT and Phillips.

Elevation: elevation is understood to mean the vertical angle (inclination) of the aerial.

EPG (Electronic Programme Guide): electronic programme guide.

Free-to-Air: free-to-air receivers receive exclusively free (non-encrypted) programmes.

LNB (Low Noise Block Converter): a feed system also known as LNC. Reception unit at the focus of the parabolic mirror, which converts the high-frequency satellite downlink into a 1.Sat intermediate frequency suitable for the receiver.

Multi-feed: a technique that allows reception of multiple satellites using just one single fixed aerial.

Multi-switch (Multi-switch): electronic slide switch that enables each subscriber to switch between different reception levels, frequency ranges and satellites. When receiving from 2 or more satellites the DiSEqC switch is required, which controls multi-switches and also receivers.

Parabolic mirror: the most commonly used design for satellite (reception) aerials. Concentrates the electromagnetic waves in the feed system (LNB).

Signal Level Adjuster: for reducing levels that are too high (cable equalisation).

Polarisation: plane of the electrical components of an electromagnetic wave (direction of oscillation). For satellite transmission two different planes are used: the horizontal and the vertical (linear polarisation), the better to exploit the frequency spectrum. The system is based the bands for two adjacent channels being positioned so they partially overlap each other. The interference that could result is prevented by polarising the two channels in different planes.

QAM (Quadrature Amplitude Modulation): digital modulation process with phase shift keying, used for transmission in cable networks.

QPSK (Quadrature Phase Shift Keying): digital modulation process used for satellite transmission.

Set Top Box: standardised designation for a digitally suitable satellite or cable receiver.

SR (Symbol Rate): parameter that must be entered to allow manual searching of the receiver. (e.g. 22000, 27500).

Tone-Burst (also Simple DiSEqC): a type of Mini-DiSEqC has been defined as an economical way of extending old systems to a wider circuit configuration (in addition to 14/18 Volt and 22 kHz). This merely modulates a sequence of bits "0" (satellite A) or "1" (satellite B) to the 22 kHz signal. The Tone-Burst signal was developed to permit simple changing over between two LNBs and is suitable for controlling relays (two inputs at one output) and for the new Monoblock LNB. For SAT position A the 22 kHz signal is sent continuously, for SAT position B it is pulsed. A Tone-Burst signal lasts for about 12.5 ms.

Transponder: frequency containing multiple channels. In analogue systems a TV programme and multiple sound channels can be transmitted for each transponder. In digital systems (QPSK) the transmission capacity is 6-10 TV programmes with sound channels.

Wiring structures (also see Planning recommendations):

Figure 1: Wiring structures

Connection/transmission losses

Aerial socket 2-hole single socket [Order no. 4502 10]

Connection	Frequency range	Attenuation

		254 ... 862 MHz	2 dB
IEC (female)	IN 1	87.5 ... 230 MHz	1.5 dB
F socket 1	IN 1	950 ... 2150 MHz	2 dB
F socket 2	IN 2	5 ... 2150 MHz	2 dB

Planning recommendations

Between the aerial sockets the decoupling attenuation must be a minimum of 40 dB. Terminal boxes have no decoupling, and are always branched with splitters. The connection at a branch is also called a spur, and only here a terminal box can be connected. At the through passage of a splitter, on the other hand, only through-sockets or other splitters may be connected. Only throughpass sockets can be connected to distributors (too little decoupling) only, because only in this manner the decoupling will be sufficient. The last throughpass socket must be terminated with a 75 ohm terminating resistor.

Signal-to-noise ratio and noise figure

The signal-to-noise ratio SNR is the ratio, expressed in decibels, of the signal power to the noise power. The noise figure NF is the logarithmic ratio [dB] between the signal-to-noise ratio SNR_{in} at the input of an active module (e.g. amplifier) and the signal-to-noise ratio SNR_{out} at the output.

Signal-to-noise ratio	Noise	Picture quality
> 46 dB	not visible	very good
37 dB	visible, but not annoying	good
30 dB	clearly visible, annoying	unsatisfactory
< 26 dB	outweighs	unsatisfactory

Level recommendation at the aerial sockets based on EN 50083-7:

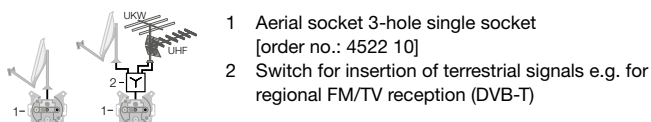

Frequency (measuring device setting)	Level in dBµV (unsensitive)		Slope max.	Noise factor/quality bit error rate
	min.	max.		
UKW 87.5 ... 108 MHz (FM)	50	70	15	C/N: 38 dB Mono C/N: 48 dB Stereo
Terrestrial digital 47 ... 862 MHz (COFDM)	45	70	12	C/N: 25 dB; BER: < 2.0 E-4 (before Viterbi FEC 3/4) MER: 24 dB
CATV digital 47 ... 862 MHz (64-QAM)	47	67	12	BER: 2.0 E-7 MER: 30 dB

- LED, LCD and plasma televisions need larger signal-to-noise ratios for a visually less noisy picture (50 dB). The level should not exceed 74 dB.
- Execute the system as a star structure if possible
- Install splitters and distributors in accessible spaces
- Install coaxial cables in ductwork systems
- Observe bending radii of the coaxial cables
- Install amplifiers in dry spaces with their own power supply
- Provide a ductwork connection to basement storage
- Connect building distribution network to building equipotential bonding
- Frequency range broadband cable network BC: 47 ... 862 MHz
- Frequency range SAT-ZF: 950 ... 2400 MHz
- Dimension aerial sockets for broadband
- Shielding value building distribution network min. 75 dB better 90 dB according to Class A
- Use return path compatible components for connection to the backbone

Aerial system terrestrial and/or broadband cable BK in tree structure:

SAT aerial system with single universal LNB for digital reception of a satellite.

Aerial system terrestrial and/or broadband cable BK in radial structure:

- 1 Multiband amplifier
- 2 Branch
- 3 Aerial socket 2-hole single socket [order no.: 4502 10]
- 4 Terminating resistor 75 Ohm]

! If only 1 aerial socket is available in a broadband cable system, a throughpass socket with terminating resistor must be used.

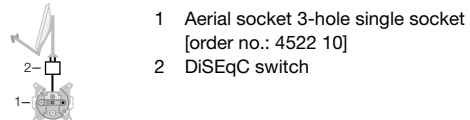

Aerial system terrestrial and/or broadband cable BK in tree structure/radial structure

SAT aerial system with twin universal LNB for 2 receivers or twin receiver for viewing one channel and recording another, e.g. 2 x Astra:

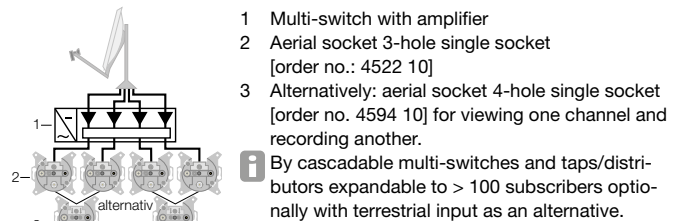

SAT aerial system with 2 squinting single universal LNBs for reception of two satellites e.g. Astra and Hotbird (Eutelsat):

SAT aerial system with Quad switch LNB, e.g. for 4 receivers, e.g. 4 x Astra:

SAT aerial system with Quattro LNB and multi-switch with amplifier

Notes on coaxial cables

Figure 1: Bending radii and stripping lengths

Definition of terms

Resolution: Measure of the size of a picture, measured by the number of pixels (pixel density) or in the number of rows and columns (width and height).

HDCP (High Bandwidth Digital Content Protection): Copy protection for high bandwidth digital programme contents in conjunction with DVI and HDMI.

MPEG (Moving Picture Expert Group): Reduction method for image and sound data. In contrast to analogue methods (here, 25 complete images with all the relevant information are transmitted per second), the MPEG method uses only actual image changes and calculates the full image to be displayed.

DVB (Digital Video Broadcasting): Standardised method to transmit compressed (MPEG-2, H.264) digital content (TV, radio, multi-channel sound, spatial sound, interactive services). DVB-S stands for satellite transmission, DVB-T for terrestrial and DVB-C for cable.

Interface standard

USB (Universal Serial Bus): [USB/3.5 mm audio socket, order no. 33 1539 ..] Serial bus system to connect computer systems and display devices to external devices or storage media. Connection is possible during operation. The properties of connected devices are detected automatically. (Plug&Play). For home cinemas, storage media such as USB sticks and hard drives help to expand the recording devices for connection to pure playback devices.

HDMI (High Definition Multimedia Interface): [High Definition socket, order no. 33 1542 ..] Interface for fully-digital transmission of audio and video data. HDMI video data are reverse-compatible to DVI-D.

DVI (Digital Video Interface): Standard interface for transmitting image data. This interface can be used to connect display devices such as LCD displays, projects, TFT monitors, plasma displays or video cameras to the graphics card of a computer.

Video transmission signals:

- DVI-I: analogue und digital
- DVI-D: digital
- DVI-A: analogue

Audio standards

Dolby® Digital (also termed 5.1 sound) Digital multi-channel audio system for cinemas and home cinemas. Successor system to Dolby Surround (or Dolby 2.0 with activated Dolby Surround-Flag). Dolby® Digital supports up to 6 discrete channels (5 loudspeakers, 1 subwoofer) and uses imperfect data compression.

Dolby® TrueHD Loss-free audio codec, specially developed for use on disc media such as HD-DVD and Blu-ray.

Video standards

HD ready Technical specification for a device to play back high-definition television (HDTV):

- analogue component input (YPbPr / YUV)
- digital, copy-protection-capable (HDCP) input (DVI-D/-I or HDMI)
- Support of the HD video formats 720p and 1080i (for 50/60 Hz image repeat rate)

Full HD Ability of a HDTV-compatible device (receiver, TV, DVD player, video camera, games console, etc.), to output or record HD resolutions. Due to different manufacturer designs (1080p full images, 1080i half images), this is not an indication of the image quality, image dimension or the display output of the device.

HDTV (High Definition Television) Global digital recording, production and transmission standard for television with a usable image resolution of up to 1920 x 1080 pixels in a 16:9 format.

	PAL	HDTV	
		HD ready (720p)	Full HD (1080i/1080p)*
Vertical resolution (image lines)	576	720	1080
Horizontal resolution (image columns)	720	1280	1920
Pixels (max.)	414720	921600	> 2 million
Format	4:3	16:9	16:9
Frequency	50 Hz	50 ... 60 Hz	50 ... 60 Hz

Figure 1: TV standards and data

- * *1080i (interlaced, half image method)
Advantage: Half transmission rate
Disadvantage: Half images must be recombined through a converter in the TV device
- * *1080p (Progressive, full image method)
Advantage: No subsequent combination of the images requires, as all 1080 are shown simultaneously with full pixel accuracy within a frame
Disadvantage: Very high transmission rate

Digital video formats	
VCD	352 x 288 pixels
SVCD	576 x 480 pixels
DVD	max. 720 x 576 Pixel
Blu-ray Disc	max. 1920 x 1080 Pixel

Figure 2: Resolution of current PAL video formats

Video images with a low resolution of a 4:3 side ratio (SD, standard definition) must be scaled up for playback on HDTV devices. Detail losses lead to a poorer image quality.

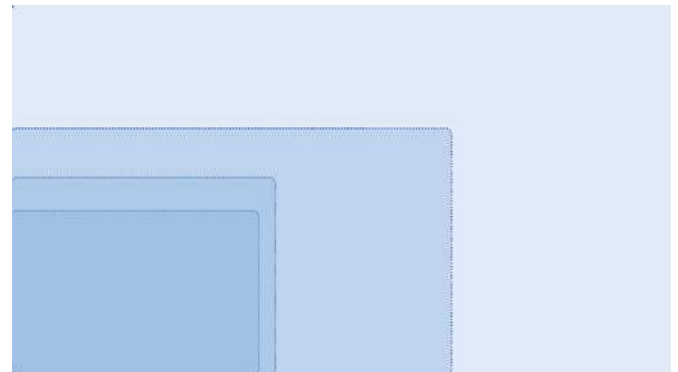

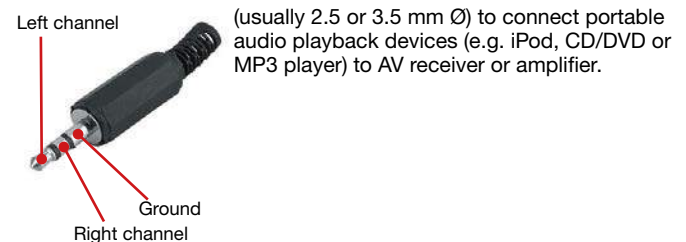

Figure 3: Format comparison

Residual current safety devices

The use of residual current safety devices is regulated by the VDE 0100-410 (Germany). According to DIN VDE 0100-410: 2007-06, alternating current systems must be provided with additional protection by means of residual-current safety devices ≥ 30 mA. This applies to socket outlets with a rated current not greater than 20 A that are intended for use by non-experts and for general use. Exceptions are regulated in section 411.3.3. DIN VDE 0100-410: 2007-6.

The devices described here are used primarily when modifying and expanding existing systems if no higher-level residual current protection is present.

The test button "T" can be used to test the electrical and mechanical functioning. The integrated switch lever can be used to switch on the SCHUKO socket outlet with residual current circuit-breaker and the residual current circuit-breaker again after triggering (when testing or after eliminating the fault).

Installation instructions

A Connection in TN-C network only permissible in systems with existing inventory protection.

i All devices connected to the outgoing conductors are protected.

Permissible earthing resistance for 30 mA residual current circuit-breaker for a highest permissible electric shock of:

- 25 V : 833 Ω
- 50 V : 1666 Ω

SCHUKO socket outlet with residual current circuit-breaker [4708 ..]

Technical data

Residual current safety devices	
Rated voltage	230 V~, 50/60 Hz
Rated current	16 A
Residual-current protected outgoing feeders	L, N
Rated fault current	30 mA alternating currents and pulsating direct currents
Trigger time	≤ 30 ms
Mounting orientation	any
Wall box	according to DIN 49073 part 1: 1990-02
Fastening	Claws and screw fastening
Operating temperature	-25 ... 40°C
Connecting terminals	Plug-in terminals for max. 2.5 mm ² or 2 x 1.5 mm ²
Installation depth	32 mm
SCHUKO socket outlet with residual current circuit-breaker	
Surge resistance	250 A (8/20) μ s (DIN VDE 0432 T2)
Rated short circuit capacity	3 kA with back-up fuse 20 A filament lamp
Rated switching capacity I_m	500 A
I^2t proof	≥ 2.5 kA ² s
Dynamic surge capacity I_p	≥ 1.7 kA
Definition	EN 61008 part 1 and 2-1: 1994
Degree of protection	IP20
Residual current circuit-breaker	
Surge resistance	3000 A (8/20) μ s (DIN VDE 0432 T2)
Short-circuit withstand strength	3 kA with back-up fuse 16 A gG
Definition	IEC/EN 61008-1, IEC/EN 60884-1
Degree of protection	IP20, IP44 (vertical installation)

Overvoltage protection

Overvoltages are extremely high voltages that impair or even destroy the insulation of electrical and electronic devices as well as their functions. The main causes for overvoltages are lightning discharges, switching operations (inductive loads), electronic discharges or faulty switching.

Overvoltage protectors are divided into three categories/types (Table 1).

Classification		Insert
old	VDE IEC 0675	37A
Coarse protection	B surge arrester	Class I Protection against lightning (power supply, main distributor, ...)
Medium-level protection	C surge arrester	Class II Protection of the fixed installation (power distribution unit, ...)
Fine protection	D surge arrester	Class III Protection of devices (house electronics, ...)

Figure 1: Classification of overvoltage protection devices

Sensible overvoltage protection consists of coarse, medium and fine protection.

The arrangement of the overvoltage protection devices in the electrical installation is illustrated in Figure 2 for the different types/classes.

Figure 2: Arrangement of the overvoltage protection devices in the electrical installation

SCHUKO socket outlet with overvoltage protection [4108 .., 4152 ..]

The SCHUKO socket outlet with overvoltage protection is used for protecting power supply units e.g. for:

- Computer systems
- Medical devices
- Measuring, controlling and regulating devices
- TV, video and audio devices

The basic circuitry consists of a combination of varistors and gas-filled surge arresters (Figure 2). Varistors can be overloaded as a result of too high or too frequent overvoltage demand. The result is an increased leakage current through the components. This causes heat to build up. A thermal cut-off device monitors the varistors and disconnects these from the mains before they heat up too much. The mains voltage is still present.

If the cut-off triggers, the red indicator lamp lights up red regardless of whether or not a plug is connected to the socket outlet. If a device is plugged in, an acoustic fault signal (buzzer) sounds and falls silent again as soon as the connector plug is pulled out.

Active indicator lamps on the device indicate:

- **Green:** Mains voltage is present
- **Red (+ acoustic signal):** Thermal cut-off device has responded, there is no protection against overvoltages anymore. The SCHUKO socket outlet with overvoltage protection must be replaced.

Installation instructions:

- Overvoltage protection according to EN 61643-11 and VDE 0675 Section 6-11 surge arrester type 3, One Port
- Requirement class for D surge arrester
- Installation in wall box according to DIN 49 073 Section 1
- Lay lines as short as possible between the load and socket outlet with overvoltage protection. Do not provide more than 4 m including leads of wired-through socket outlets (Figure 4).
- Do not lay protected cables parallel to unprotected cables (over-voltage coupling).

Figure 3: Installation in combination with SCHUKO socket outlets

Discharge of overvoltages against ground by means of overvoltage protection can cause the triggering of residual current circuit-breakers. Use a surge resistant residual current circuit-breaker if necessary.

During insulation measurements, all overvoltage protection units must always be disconnected since the protection components limit the test voltage (erroneous measurements).

Technical data - performances

SCHUKO socket outlet with overvoltage protection	Order no. 4108 .., 4152 ..
Rated voltage	230 V~, 50/60 Hz
Rated current I_N	16 A
Operating current I_C at U_r	< 2.3 mA
Surge arrester rated voltage U_r	255 V~
Discharge current according to PE at U_r	< 1 μ A
Rated discharge current of surge protection I_{sn} (8/20) μ s: sym./asym.	1.5 kA (100x)
Discharge current i_s max (8/20) μ s: sym./asym.	4.5 kA (1x)
Protection level: L/N (L/PE; N/PE)	< 1.2 kV (1.5 kV)
Response time t_a : sym./asym.	25 ns/100 ns
Screw terminals for rigid conductors	2.5 mm ²
Temperature range	-5 ... 40°C

The System Concept

Networking in the system environments

The electronic flush-mounted inserts can be used equally for non-networked as well as for radio networkable modules. They are connected to the loads to be controlled by cable and form a functional unit with the cover.

With the conventional electronic modules the directly connected loads (lighting or shading) can be controlled with a wide range of functions. This takes place on the application module by means of local operation (buttons) or triggered/preset automatic functions (motion detectors, time switches) as well as by wired extension units.

The extension units are particularly suitable for implementing several control sections for a load to be controlled.

KNX radio application modules are available for cable connected solutions or for retrofitting/extending existing installations. They communicate with each other as transmitters and receivers via radio sig-

nals. The easiest way of teaching transmitters and receivers is via the quicklink principle whereby the devices are switched to the programming mode by pressing a button and the transmitters are also taught by pressing function buttons for the receivers. The modules with the combinations of plug-in KNX radio modules can work bidirectionally as receivers of radio signals for the directly connected load and can equally serve as transmitters that can control other receivers with additional connected loads.

Teaching by means of quicklink has been conceived for smaller applications so that a maximum of 20 devices should be assigned to each other in these systems.

In the configuration of the KNX radio solutions with ETS software, operation can be transferred even to a wired KNX installation and vice versa by means of a gateway, furthermore other functions are available.

The solution offer is supplemented by KNX radio standalone devices that can also be linked as transmitters (hand-held transmitters, wall-transmitters, motion detectors or physical sensors) or as receivers (surface-mounted or flush-mounted actuators) to the KNX modules on the flush-mounted inserts by quicklink or by ETS commissioning.

Figure 1: Universal system compatibility for almost all types of loads

Electronics inserts

Switch inserts	Technical data - performances
Operating voltage	230 V~, + 10 %/- 15 %
Frequency	50/60 Hz
Number of substations:	unlimited
Cable length, extension units	max. 50 m
Load cable length	max. 100 m
Relative humidity	0 ... 65 % (no condensation)
Operating temperature	- 5 ... + 45 °C
	observe operating conditions
Screw terminals	max. 1 x 2.5 / 2 x 1.5 mm ²

- ❗ Illuminated mechanical push-buttons must be connected to a neutral conductor.
- ❗ Operation of extension units is only possible if a module is attached to the main unit.
- ❗ Conventional transformers should be operated with at least 25 % nominal load. Nonetheless, 75 % is recommended because in individual cases, depending on the transformer, unstable switching performance may occur.
- ❗ During operation with conventional transformers, fuse each transformer on the primary side according to manufacturer's data. Use safety transformers that comply with EN 61558-2-6 (VDE 0570 Part 2-6) only.
- ❗ No mixed load operation of capacitive and inductive loads at the output.

Switch inserts

Switch insert 1gang [order no. 8512 11 00]

Suitable modules: Button 1gang, motion detector, IR motion detector Comfort, KNX radio button 1gang and 4gang as well as KNX radio motion detector

- i** Extension units for motion detectors can only be used if the switch insert is operated with a motion detector module.
- i** Only connect dimmable lamps, their transformers or operating devices. Observe manufacturer's data.
- i** The switching performance for the connection of different loads or energy-saving lamps and 230 V LED lamps can only be optimized by means of a load setting mode.
- i** Install a circuit breaker of max. 16 A as device protection.

Figure 1: Switch insert with push-button (NO contact), and motion detector extension unit

Technical data - performances

Switch insert 1gang	Order no. 8512 11 00
230 V incandescent lamps and halogen lamps	25 ... 400 W
Dimmable 230 V retrofit LED lamps	5 ... 70 W
Dimmable energy-saving lamps	13 ... 80 W
Dimmable conventional transformers	25 ... 400 VA
Electronic transformers and dual-mode transformers	25 ... 400 W
Installation depth	32 mm

Relay insert [order no. 8512 12 00]

Suitable application modules: Button 1gang, motion detector, IR motion detector Comfort, KNX radio timer, KNX radio button 1gang and 4gang as well as KNX radio motion detector

- i** Extension units for motion detectors can only be used if the switch insert is operated with a motion detector module.
- i** Install a miniature circuit breaker of max. 10 A as device protection.

Figure 2: Relay insert with push-button (NO contact), and extension unit for motion detector

Technical data - performances

Relay insert	Order no. 8512 12 00
230 V incandescent lamps and halogen lamps	2300 W
230 V retrofit LED lamps	440 W
Dimmable energy-saving lamps	440 W
Dimmable conventional transformers	1500 VA
Electronic transformers and dual-mode transformers	1500 W
Fluorescent lamps:	
- uncompensated	1100 VA
- parallel compensated	1000 W / 130 µF
- in lead-lag circuit	1000 W
- with electronic ballast	1000 W
Minimum contact load	≈ 15 W
Housing installation depth	22 mm
Claw guidance installation depth	32 mm

Switch insert 2gang [Order number 8512 22 00]

Suitable application modules: Button 2gang and KNX radio button 2gang and 4gang

- i** Installation in deep wall box recommended.
- i** Only connect dimmable lamps, their transformers or operating devices. Observe manufacturer's data.
- i** The switching performance for the connection of different loads or energy-saving lamps and 230 V LED lamps can only be optimized by means of a load setting mode.
- i** Install a circuit breaker of max. 16 A as device protection.
- i** For power supply, a load must be connected to output 1 of the switch insert 2gang.
- i** Extension units for motion detectors are not suitable for the switch insert 2gang.
- i** Operating both outputs on a joint load will destroy the device.

Figure 3: Switch insert 2gang with extension unit push-button (NO contact)

Technical data - performances

Switch insert 2gang	Order no. 8512 22 00
230 V incandescent lamps and halogen lamps	per channel 35 ... 300 W
Dimmable 230 V retrofit LED lamps	per channel 12 ... 54 W
Dimmable energy-saving lamps	per channel 15 ... 54 W
Dimmable conventional transformers	per channel 35 ... 300 VA
Electronic transformers and dual-mode transformers	per channel 35 ... 300 W
Installation depth	32 mm

Dimmer inserts

- i** Only connect dimmable lamps, their transformers or operating devices. Observe manufacturer's data.
- i** Install a circuit breaker of max. 16 A as device protection.

Touch dimmer (R, L) [Order no. 8542 11 00]

Suitable modules: Button 1gang, motion detector, IR motion detector Comfort, KNX radio button 1gang and 4gang as well as KNX radio motion detector

- i** Extension units for motion detectors can only be used when the touch dimmer is operated with a motion detector application module.

Figure 1: Touch dimmer (R, L) with push-button (NO contact) and extension unit for motion detector

Technical data - performances

Touch dimmer (R, L)	Order no. 8542 11 00
230 V incandescent lamps and halogen lamps	25 ... 400 W
Dimmable conventional transformers	25 ... 400 VA
Number of universal capacity enhancers	max. 2
Installation depth	32 mm

Universal touch dimmer 1gang [Best.-Nr. 8542 12 00]

Suitable modules: button 1gang, motion detector, IR motion detector Comfort, KNX radio button 1gang and 4gang as well as KNX radio motion detector

- i** Extension units for motion detectors can only be used when the touch dimmer is operated with a motion detector application module.
- i** When a load is connected, this is detected automatically and a suitable dimming performance is set. If different loads or energy-saving lamps and 230 V LED lamps are connected, the dimming performance can be further optimized by means of a load setting mode.

Figure 2: Universal touch dimmer 1gang with push-button (NO contact) and extension unit for motion detector

Technical data - performances

Universal touch dimmer 1gang	Order no. 8542 12 00
230 V incandescent lamps and halogen lamps	25 ... 400 W
Dimmable 230 V retrofit LED lamps	5 ... 70 W
Dimmable energy-saving lamps	13 ... 80 W
Dimmable conventional transformers	25 ... 400 VA
Electronic transformers and dual-mode transformers	25 ... 400 W
Installation depth	32 mm

Universal touch dimmer 2gang [Order no. 8542 21 00]

Suitable application modules: Button 2gang and KNX radio button 2gang and 4gang

- i** Installation in deep wall box recommended.
- i** Install a circuit breaker of max. 16 A as device protection.
- i** When a load is connected, this is detected automatically and a suitable dimming performance is set. If different loads or energy-saving lamps and 230 V LED lamps are connected, the dimming performance can be further optimized by means of a load setting mode.
- i** For power supply, a load must be connected to output 1 of the touch dimmer 2gang.
- i** Extension units for motion detectors are not suitable for the switch insert 2gang.
- i** Operating both outputs on a joint load will destroy the device.

Figure 3: Universal touch dimmer 2gang with extension unit push-button (NO contact)

Technical data - performances

Universal touch dimmer 2gang	Order no. 8542 21 00
Power consumption (standby)	< 0.3 W channel 1 < 0.7 W channel 2
230 V incandescent lamps and halogen lamps	per channel 35 ... 300 W
Dimmable 230 V retrofit LED lamps	per channel 12 ... 40 W
Dimmable energy-saving lamps	per channel 15 ... 54 W
Dimmable conventional transformers	per channel 35 ... 300 VA
Electronic transformers and dual-mode transformers	per channel 35 ... 300 W
Installation depth	32 mm

Blind insert comfort [Order no. 8522 11 00]

Suitable application modules shutter button, shutter timer, KNX radio shutter button and KNX radio timer

i Install a circuit breaker of max. 16 A as device protection.

Technical data - performances

Blind insert comfort	Order no. 8522 11 00
Operating voltage	230 V~, + 10 %/- 15 %
Frequency	50/60 Hz
Switching current (cos Φ 0.6)	3 A
Change-over time for change of direction	0.6 s
Number of substations:	unlimited
Cable length, extension units	max. 50 m
Load cable length	max. 100 m
Relative humidity	0 ... 65 % (no condensation)
Operating temperature	- 5 ... + 45 °C
Housing installation depth	22 mm
Claw guidance installation depth	32 mm
Screw terminals	max. 1 x 2.5 / 2 x 1.5 mm ²

Figure 1: Single control

Figure 2: Individual control with key push-button for blind series push-button

Figure 3: Individual control with extension unit push-button for blinds 1pole for lock cylinder

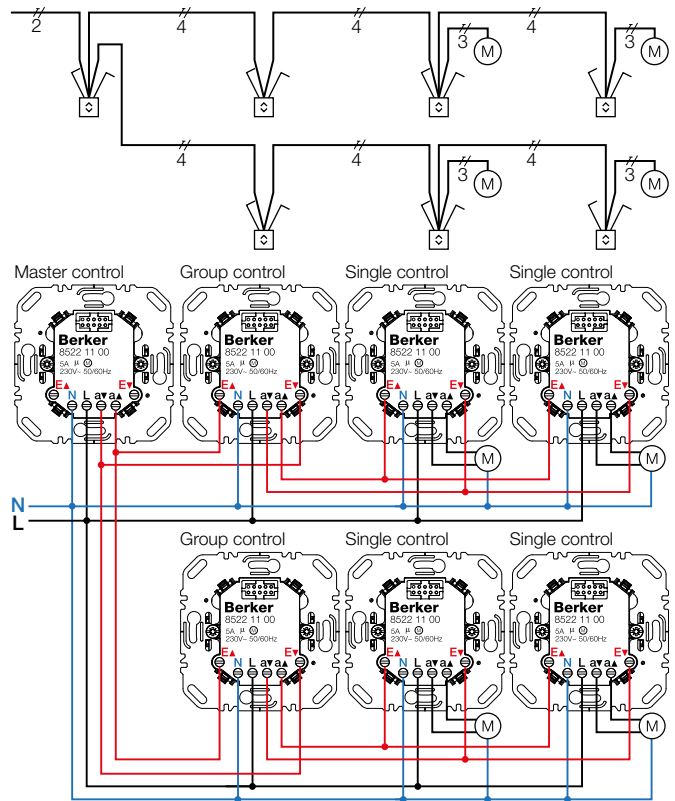

Figure 4: Master and group control

Figure 5: Operation with several residual current circuit-breakers

Sensors for extension unit connections

Connection of the sensors to the insert

- EA Input for extension unit UP
- EV Input for extension unit DOWN

Figure 1: Extension unit inputs on blind insert comfort

- Only covers with labelling symbol star next to QR code can be used for connected sensors. The operation of sensors without these labellings will lead to functional errors.
- The control command is present for the duration of the signal on the extension unit input.

Wind sensor [172 01], Interface surface-mounted for wind sensor [173]

Figure 2: Device overview

To protect awnings and outside blinds against damage from wind. The wind sensor detects the wind speed. If the set threshold value is exceeded for at least 15 seconds, the awning/blind is retracted.

- The wind alarm has top priority, i.e. the hanging is always raised and locked in the event of a wind alarm. The unlocking takes place automatically if the threshold value is not reached for at least 15 minutes.

Installation and electrical connection

Figure 3: Connection of the wind sensors to the blind insert comfort

The material of the wind sensor is UV-resistant and can be exposed to direct sunlight.

- Do not mount the wind sensor in wind shadow. The device must be mounted upright with the overhead wind turbine.
- Cable type recommendation: JY-St-Y 2 x 0.6 mm². Connect shield to "negative" to prevent interference. Lay the sensor cable at least 10 cm away from 230 V cables.

Precipitation sensor [183 01]

The purpose of the sensor, for example, is to protect awnings from rain. If the precipitation sensor detects precipitation, the awning/blind is retracted. The changeover relay remains on until the sensor is dry again, or for at least 10 minutes. The integrated heating accelerates the drying process of the sensor surface and also thaws snow and ice.

Installation and electrical connection

Figure 4: Connecting the precipitation sensor to the blind insert comfort

- The mounting should be slightly inclined. Use the enclosed mounting bracket.
- The change-over contact can be used for 230 V as well as for protective low voltage.

Room thermostat with change-over contact [2026 ..]

A room thermostat should be connected to the extension unit inputs for the temperature-dependant control of blinds and roller shutters in indoor areas, e.g. in winter gardens.

Electrical connection

Figure 5: Connecting a room thermostat change-over contact to the blind insert comfort

- Connect thermostat only to extension unit input 1 or 2 if necessary. The movement in the opposite direction is then done manually, time-controlled or centrally/group controlled.

Connection error on parallel switching of conventional tubular motors

Figure 1: Parallel-switched conventional tubular motors

Cutoff relay

Cutoff relays are mounted in water-protected junction boxes or in deep flush-mounted wall boxes, e.g. behind a blind plug or an electronic insert. Cutoff relays RMD are snapped onto the 35 mm DIN hat profile rail. The following variants are available, depending on the desired operating concept

- Cutoff relay surface-mounted/flush-mounted, order no. 2930 and cutoff relay RMD, order no. 2931 for simultaneous movement of two motors using one operating section.
- Cutoff relay surface-mounted/flush-mounted, order no. 2969 and cutoff relay RMD, order no. 2919: with extension unit outputs, for simultaneous movement of two motors using one operating section.

i Connect a maximum of 6-8 motors to one miniature circuit-breaker (note current consumption). Additional miniature circuit-breakers should be planned for extensions.

Figure 1: Installation plan for cutoff relay

Connection of motors with cutoff relay surface-mounted/flush-mounted [Order no. 2930, 2969]

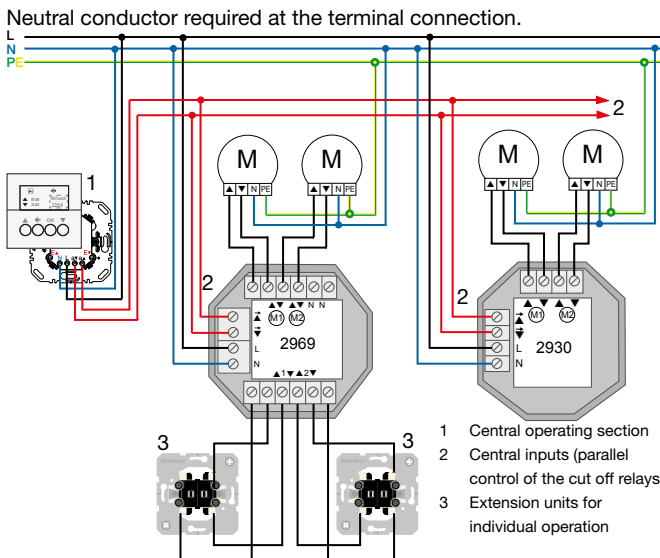

Figure 2: Connection diagram for cutoff relay surface-mounted/flush-mounted

When the switch is actuated, both drives are switched to the same direction of running. If drive 1 has reached the final position, the final position switch E2 opens. Drive 2 can still be functioning, however, and actuates drive 1 in the opposite running direction by means of a feedback voltage via its capacitor. Thus E2 is shut again after a short time. As a result, drive 1 runs in the original direction again until the contact L2 is reopened.

These switching operations can be seen as a pendulum motion of the hanging. Since the feedback voltage may be up to 1000 V and many switching position changes occur in a very short time, final position switch E2 is overloaded. This will inevitably cause the contacts to weld together. This deactivates the final switch-off in this running direction and the motors are destroyed.

i Overload of the final position switches through parallel connection of conventional tubular motors. Motors or hangings may be destroyed. For joint control, use cutoff relays or electronic tubular motors, such as those from Elero or Selve.

Connection of motors with cutoff relay RMD [Order no. 2931, 2919]

Figure 3: Connection diagram for cutoff relay RMD

Technical data - performances		Cutoff relay
Rated voltage		230 V~
Rated frequency		50/60 Hz
Control voltage		230 V~
Fuse		10 A
Circuit breaker		Characteristic A or B
Current consumption (operation)		approx. 10 mA
Switching current per output		
- ohmic		8 A
- inductive		3 A
Switch-on time (ED)		100 %
Change-over time for change of direction		at least 0.5 s
Operating temperature		0 ... 60°C
Degree of protection		IP20
Small screw terminal connections		
- single stranded		0.5 ... 2.5 mm ²
- finely stranded with conductor sleeves		0.5 ... 1.5 mm ²
Large screw terminal connections (mains and master input, only flush-mounted device with extension units)		
- single stranded		0.5 ... 4 mm ²
- finely stranded with conductor sleeves		0.5 ... 2.5 mm ²
Dimensions (W x H x D)		
- Order no. 2930		50 x 52 x 22 mm
- Order no. 2969		53 x 50 x 25 mm
- Order no. 2919, 2931 (RMD)		45 x 71 x 42 mm
Assembling height as from DIN rail		
- Order no. 2919		39 mm
- Order no. 2931		38 mm

Planning instructions for radio installations

Radio transmission and range

Radio waves can be subject to a number of different influences that weaken the signals and thus shorten their range especially within buildings. That is why all manufacturers of radio products generally indicate the free-field range, which refers to the uninterrupted propagation of the radio waves and optimally oriented antennas. For berker KNX radio products this range is generally 100 m. Unless a building is specially shielded by means of certain measures, this means that there will be no problem implementing radio links through three walls and two ceilings. Nevertheless, in any building there may be advantageous and disadvantageous locations for installing radio bus components.

i The free field is defined by damp, level ground. Transmitters and receivers are attached at a height of at least 2 m above the ground. The horizontal distance to interfering objects from each point of the transmitter - receiver connecting line is 20 m.

Figure 1: Distances to sources of interference in the free field

Reducing factors of the range of radio signal

- metallic or conductive surfaces such as anti-static floors, insulation with metal lamination, reinforced concrete, cable routes, metal grid ceilings, carbon fibre panels, hot water heating systems, electric underfloor heating systems etc.
- electronic devices exposed to high frequency signal emissions, such as computers, electronic transformers or microwave devices etc.
- Thermal insulation glazing with metalized glass that absorbs or reflects radio signals very strongly
- Moisture in plaster, masonry and screed
- Precipitation and fog outside

Material	Degree of material penetration
Wood, plaster, plasterboard, uncoated glass	approx. 90 %
Brick, press boards	approx. 70 %
Reinforced concrete, underfloor heating	approx. 30 %
Metal, metal grids, aluminium laminates, coated glass	approx. 10 %
Rain, snow	approx. 1 ... 40 %

Tab. 1: Material penetration

Selecting the installation location

The following installation instructions must be observed so that good radio transmission can be achieved:

- Do not position receivers in the radio shadow of metallic building elements if possible, do not install transmitters/receivers behind metallic surfaces or in metallic housings.

The areas behind metallic building elements such as piers, ceiling beams and fire doors constitute radio shadows (see Figure 2). Receivers installed in such shadows cannot receive signals over a direct pathway, and have to depend on reflected radio waves.

Figure 2: Radio shadow and distances from metallic objects

- Maintain a distance to large metal surfaces
 Metal surfaces act as a grounding surface, radio signals near the surface are diverted. Furthermore, metal surfaces strongly reflect radio waves, which can cause overlapping of the signals up to suppression.
- The connecting line between the radio transmitter and the radio receiver should be selected so that any path through masonry or other attenuating materials is as short as possible (see Figure 3). It is particularly important to avoid niches in walls, since they obstruct the propagation of radio waves.

Figure 3: Effective wall thickness for radio propagation

- Maintain a distance to devices that emit high-frequency signals. At least 50 cm are recommended. With increasing distance the interference decreases sharply.
- Maintain a distance between transmitters and receivers. At least 30 cm are recommended. If the signal strength is too great, the receiver is overdriven.
- Maintain a distance to other radio services. At least 3 m are recommended. other radio services such as DECT-phones, babyphones, radio headphones etc. can severely impair the signal.
- Transmitters or receivers that perform master functions throughout the building (e.g. ALL OFF or master blind control) should be positioned as centrally as possible. Disadvantageous transmission paths that run diagonally through the entire building are prone to interference and can impair the function.

i Reception interferences often occur due to sealing off, suppression or reflection of the radio signal, as in the case of car radios or mobile phones. In the case of irregular reception, it is often sufficient to move the transmitter or receiver by a few cm to improve the quality of reception.

Operating tips for radio installations

- Only repeat radio telegrams within one "radio band" by means of a signal amplifier or repeater, since otherwise telegram overlaps can occur.
- A high number of automatically triggering radio transmitters, such as radio motion detectors, can result in telegram overlaps and communication problems within a system.

Impairment due to changed ambient conditions

A functioning radio connection can still be impaired even during operation. This can be attributed to:

- Opening and closing doors and shutters consisting of insulating materials
- Adding and moving furniture, particularly furniture consisting of metal
- Additionally erecting walls consisting of problematic materials, such as metallic steamed glass, metal laminated insulating materials etc.
- Temporary influences on the transmission circuit, such as fog and precipitation outside, as well as damp plaster or wallpaper inside

KNX radio

KNX radio properties	Technical data
Radio transmission frequency	868.3 MHz
Transmitter duty cycle *	1 %
Receiver category	2
Radio transmission power	< 10 mW
Radio transmission range (free field)	max. 100 m
Radio transmission range (building)	max. 30 m
Number of quicklink links	max 20 transmitters/receivers

* Work cycle: Proportionally active transmission operations within a duration of one hour at any point in time.

KNX radio application modules

The flush-mounted inserts are complemented with a KNX radio application module and design cover as well as a frame. The electronic flush-mounted inserts can be used equally for the non-networked and radio networked application modules. For this purpose, the application module bottom part is attached together with the frame. Finally, the design covers are attached

Figure 1: Installation based on the example of the KNX radio buttons

- i** As soon as voltage is supplied to the application module (7) via the plug interface, the cfg-LED indicates whether the application module and insert are compatible with each other:
Green flashing - compatible
Orange flashing - application module was configured with another insert.
Red flashing - incompatible

Under the design covers on the application module bottom part (3) are the operation and display elements needed for setting and configuring the operating section. The exception to this are the devices with display that must be configured menu-driven.

Figure 2: KNX radio application module with setting elements, buttons and LED / display

- i** The application modules and flush-mounted inserts are only suitable for indoor areas.

KNX radio binary inputs flush-mounted

KNX radio binary inputs	Technical data
Number of radio channels	2
Number of quicklink links	max 20 transmitters/receivers
Pulse time	at least 50 ms
Operating temperature	- 5 ... + 45 °C
Binary cable length	≈ 20 cm
Input cable length extendable	max. 10 m

- i** Illuminated mechanical push-buttons must be connected to a neutral conductor.
- i** The binary inputs are only suitable for indoor areas.

KNX radio binary input 2gang flush-mounted [8587 62 10]

Binary input for potential-free contacts, e.g. of switches, buttons and magnetic contacts. Remote control of receivers via connected contacts.

Figure 3: Operation with push-buttons (NO contact)

KNX radio binary input 2gang flush-mounted	Order no. 8587 62 10
Operating voltage via battery CR 2430	3 V=
Binary cable length	≈ 11 cm
Input cable length extendable	max. 10 m
Service life battery	≈ 5 Years
Dimensions (L x W x H)	41 x 39.5 x 11 mm

KNX radio binary input 2gang flush-mounted 230 V [8587 62 00]

Binary input for potential-free contacts, e.g. for control by switches, push-buttons, precipitation sensors and wind sensors with wind sensor interface. For remote control of receivers by means of connected contacts.

- i** Install a circuit breaker of max. 16 A as device protection.

Figure 4: Operation with push-buttons (NO contact)

KNX radio binary input 2gang flush-mounted 230 V	Order no. 8587 62 00
Operating voltage, frequency	230 V~, 50/60 Hz
Input scanning voltage per channel	5 V
Screw-in lift terminals	max. 2.5 mm ² or 2 x 1.5 mm ²
Dimensions (Ø x H)	53 x 27 mm

KNX radio push-button actuator flush-mounted 230 V [8587 51 10]

Push-button actuator with electronic switching contact for activation of impulse switches. For remote control of the connected push-button switching, e. g. via wall-transmitter or radio motion detector.

Figure 1: Activation of an impulse switch (Eltako)

KNX radio push-button actuator flush-mounted 230 V	Order no. 8587 51 10
Switching current	max. 0.5 A / 230 V AC
Contact switching duration	200 ms
Operating temperature	0 ... + 45 °C
Screw-in lift terminals	max. 1.5 mm ²
Dimensions (L x W x H)	40 x 40 x 18 mm

i The radio push-button actuator flush-mounted is only suitable for indoor areas.

KNX radio switch actuators

KNX radio switch actuators	Technical data
Operating voltage	230 V~
Frequency	50/60 Hz

i Install a circuit breaker of max. 16 A as device protection.

KNX radio switch actuator 1gang surface-mounted [8516 51 00]

Switch actuator for switching of electrical loads 230 V~.

Figure 2: Switching a lamp

KNX radio switch actuator 1gang surface-mounted	Order no. 8516 51 00
Switching current	10 A / 230 V AC1
230 V incandescent lamps and halogen lamps	1500 W
Fluorescent lamps	
- uncompensated	600 VA
- with electronic ballast	6 x 58 W
Conventional transformers	600 VA

KNX radio switch actuator 1gang surface-mounted Order no. 8516 51 00

Electronic transformers	600 W
Operating temperature	- 10 ... + 55 °C
Screw-in lift terminals	max. 2.5 mm ² / 2 x 1.5 mm ²
Dimensions (L x W x H)	150 x 85 x 35 mm

KNX radio switch actuator 2gang surface-mounted [8516 61 00]

Switch actuator for separate switching of 2 electrical loads 230 V~.

Figure 3: Switching of 2 lamps

KNX radio switch actuator 2gang surface-mounted Order no. 8516 61 00

Switching current	2 x 10 A / 230 V AC1
230 V incandescent lamps and halogen lamps	per channel 1500 W
Fluorescent lamps	
- uncompensated	per channel 600 VA
- with electronic ballast	per channel 6 x 58 W
Conventional transformers	per channel 600 VA
Electronic transformers	per channel 600 W
Operating temperature	- 10 ... + 55 °C
Screw-in lift terminals	max. 2.5 mm ² / 2 x 1.5 mm ²
Dimensions (L x W x H)	150 x 85 x 35 mm

KNX radio switch actuator for plugs [8510 51 00]

Switch actuator for switching electrical loads 230 V~ on socket outlets SCHUKO.

KNX radio switch actuator for plugs Order no. 8510 51 00

230 V incandescent lamps and halogen lamps	2300 W
Fluorescent lamps	28 x 36 W / max. 120 µF
Conventional transformers	1600 VA
Electronic transformers and dual-mode transformers	1200 W
Operating temperature	0 ... + 45 °C
Screw-in lift terminals	max. 2.5 mm ² / 2 x 1.5 mm ²
Dimensions (L x W x H)	150 x 85 x 35 mm

KNX radio switch actuator 1gang/binary input 1gang surface-mounted [8586 51 00]

Switch actuator for switching of electrical loads 230 V~. Binary input for potential-free contacts, for activation e.g. by switch, push-buttons. For remote control of receivers by means of connected contact.

Figure 1: Switching a lamp, binary input with push-button

KNX radio switch actuator 1gang/binary input 1gang surface-mounted **Order no.8586 51 00**

Switching current	10 A / 230 V AC1
Input scanning voltage	5 V
230 V incandescent lamps and halogen lamps	1500 W
Fluorescent lamps	
- uncompensated	600 VA
- with electronic ballast	6 x 58 W
Compact fluorescent lamps	6 x 18 W
Conventional transformers	600 VA
Electronic transformers	600 W
Operating temperature	-10 ... + 55 °C
Screw-in lift terminals	max. 2.5 mm ² / 2 x 1.5 mm ²
Binary cable length	≈ 20 cm
Input cable length extendable	max. 10 m
Dimensions (L x W x H)	150 x 85 x 35 mm

Radio switch actuator 1gang flush-mounted [8587 52 00]

Switch actuator for switching of electrical loads 230 V~.

Figure 2: Switching a lamp

Radio switch actuator 1gang flush-mounted **Order no. 8587 52 00**

Switching current	16 A / 230 V AC1
Input scanning voltage	5 V
230 V incandescent lamps and halogen lamps	2300 W
Fluorescent lamps parallel compensated	250 W
Conventional transformers	1500 VA
Electronic transformers	1500 W
Operating temperature	0 ... + 45 °C
Screw-in lift terminals	max. 2.5 mm ² / 2 x 1.5 mm ²
Binary cable length	≈ 20 cm
Input cable length extendable	max. 10 m
Dimensions (Ø x H)	53 x 30 mm

The radio switch actuator 1gang is only suitable for indoor areas.

KNX radio switch actuator 1gang/binary input 2gang flush-mounted, 230 V, 4 A (2-wire) [8587 51 20]

Switch actuator with electronic switching contact without neutral conductor connection for switching of electrical loads 230 V~. Binary inputs for potential-free contacts, for activation e.g. by switch, push-buttons. For remote control of receivers by means of connected contacts.

Figure 3: Switching a lamp, binary input with push-buttons

KNX radio switch actuator 1gang/binary input 2gang flush-mounted 230 V, 4 A **Order no.8587 51 20**

Switching current	4 A / 230 V AC1
Input scanning voltage	5 V
230 V incandescent lamps and halogen lamps	10 ... 200 W
Conventional transformers	10 ... 200 VA
Electronic transformers	10 ... 200 W
Dimmable LED lamps	3 ... 50 W
Operating temperature	0 ... + 45 °C
Screw-in lift terminals	max. 2.5 mm ² / 2 x 1.5 mm ²
Binary cable length	≈ 20 cm
Input cable length extendable	max. 10 m
Dimensions (L x W x H)	40 x 40 x 18 mm

The radio switch actuator 1gang is only suitable for indoor areas.

KNX radio switch actuator 1gang/binary input 2gang flush-mounted, 230 V, 3 A (3-wire) [8587 51 21]

Switch actuator for switching of electrical loads 230 V~. Binary inputs for potential-free contacts, for activation e.g. by switch, push-buttons. For remote control of receivers by means of connected contacts.

Figure 1: Switching a lamp, binary input with push-buttons

KNX radio switch actuator 1gang/binary input 2gang flush-mounted 230 V, 4 A	Order no. 8587 51 21
Switching current	4 A / 230 V AC1
Input scanning voltage	5 V
230 V incandescent lamps and halogen lamps	500 W
Conventional transformers	250 VA
Electronic transformers	250 W
Fluorescent lamps with electronic ballast	150 W
LED and energy-saving lamps	150 W
inductive loads	3 A, $\cos \varphi 0.6$
Operating temperature	0 ... + 45 °C
Screw-in lift terminals	max. 2.5 mm ² / 2 x 1.5 mm ²
Binary cable length	≈ 20 cm
Input cable length extendable	max. 10 m
Dimensions (L x W x H)	40 x 40 x 18 mm

The radio switch actuator 1gang is only suitable for indoor areas.

KNX radio switch actuator 1gang, potential-free/binary input 2gang flush-mounted, 12...230 V AC, 12...24 V DC [587 51 22]

Switch actuator with potential-free relay contact for switching of electrical loads 12 .. 230 V. Binary inputs for potential-free contacts, for activation e.g. by switch, push-buttons. For remote control of receivers by means of connected contacts.

Suitable for switching of safety extra low voltage (SELV).

Factory setting: closing the contact with a pulse duration of 0.4 s upon actuation (e.g. for impulse switch (Eitako)).

Figure 2: Switching an impulse switch, a lamp, binary input with push-buttons

KNX radio switch actuator 1gang, potential-free/binary input 2gang flush-mounted	Order no. 587 51 22
Switching current AC 1	4 A/12-24 V~, 230 V~
Switching current DC	4 A/12 V ---, 2 A/24 V ---

KNX radio switch actuator 1gang, potential-free/binary input 2gang flush-mounted Order no. 587 51 22

Input scanning voltage	5 V
230 V incandescent lamps and halogen lamps	600 W
Conventional transformers	600 VA
Electronic transformers	600 W
LED and energy-saving lamps	40 W
Operating temperature	0 ... + 45 °C
Screw-in lift terminals	max. 2.5 mm ² / 2 x 1.5 mm ²
Binary cable length	≈ 20 cm
Input cable length extendable	max. 10 m
Dimensions (L x W x H)	40 x 40 x 20 mm

The radio switch actuator 1gang is only suitable for indoor areas.

KNX radio dim actuators

KNX radio universal dim actuator 1gang/binary input 2gang flush-mounted [8547 51 20]

Universal dim actuator for dimming lighting. Binary inputs for potential-free contacts, for activation e.g. by switch, push-buttons. For remote control of receivers by means of connected contacts.

Figure 3: Dimming a lamp, binary input with push-buttons

Technical data

KNX radio universal dim actuator 1gang flush-mounted	Technical data Order no. 8547 51 20
Operating voltage, frequency	230 V~, 50 Hz
230 V incandescent lamps and halogen lamps	10 ... 200 W
Conventional transformers	10 ... 200 VA
Electronic transformers	10 ... 200 W
Operating temperature	-15 ... + 45 °C
Screw-in lift terminals	max. 2.5 mm ² / 2 x 1.5 mm ²
Dimensions (L x W x H)	40 x 40 x 18 mm

The KNX radio universal dim actuator 1gang flush-mounted is only suitable for indoor areas.

KNX radio blind actuators

KNX radio blind actuators	Technical data
Operating voltage, frequency	230 V~, 50 Hz
Slat adjustment on signal duration	< 1 s
Change-over time for change of direction	< 0.6 s
Operating temperature	+5 ... +45 °C
Radio transmission/reception frequency	868.3 MHz
Radio protocol	KNX Radio
Transmitter duty cycle	1 %
Receiver category	2
Number of quicklink links	max 20 transmitters/receivers
Radio transmission power	< 10 mW
Radio transmission range (free field)	max. 100 m
Radio transmission range (building)	max. 30 m

Install a circuit breaker of max. 16 A as device protection.

KNX radio blind actuator 1gang surface-mounted [8526 51 00]

Blind actuator for controlling hangings.

Activation of a motor

KNX radio blind actuator 1gang surface-mounted	Order no. 8526 51 00
Switching current	10 A / 230 V AC1
Operating temperature	-10 ... +55°C
Dimensions (L x W x H)	150 x 85 x 35 mm

KNX radio blind actuator 1gang/binary input 2gang flush-mounted [8527 51 20]

Blind actuator for controlling hangings. Binary input for potential-free contacts, e.g. activation by switches, push-buttons. For remote control of receivers by means of connected contacts.

i Factory setting - Operation via binary inputs: ▲ when closing contact In1, ▼ when closing contact In2

Figure 1: Activation of a motor

Switching current at cos φ 0.6	3 A
Change-over time for change of direction	0.6 s
Operating temperature	-10 ... +50 °C
Dimensions (L x W x H)	40 x 40 x 20 mm
Screw-in lift terminals	max. 2.5 mm ²

i The KNX radio blind actuator 1gang/binary input 2gang flush-

mounted is only suitable for indoor areas.

KNX radio - Application example

Bi-directional radio technology makes it possible to control the connected load on the insert via radio signal by means of other transmitters. By contrast, the KNX radio application modules installed on this insert can also be configured as transmitters themselves in order to control other loads in the KNX radio system remotely. The following must therefore be configured:

- Functions executed on the directly connected load when radio commands are received (receiver)
- Radio commands for controlling other loads connected to the receivers (transmitters)
- Direct operation on the application module for the connected load on the insert (local operation)

i The functions for local operation are preset in the factory, but can be changed.

By way of example, the application example in Figure 15 shows the universally usable and fully flexible modifiable configuration of two KNX radio application modules (here: KNX radio push-buttons 1gang) with flush-mounted devices (here: dimmer inserts), on which one lamp each is connected. The respective lamp can be switched/dimmed locally using the push-button (grey symbol) and an additional load can also be remote-controlled (orange symbols) - lamp 2 using the bottom push-button operation area. Operating section 2 is configured in the same way, and in addition to its own connected lamp 2, can also activate lamp 1 using the bottom push-button operation area.

Both control sections thus control the wired loads and can also transmit radio signals as well as receive signals of other transmitters, such as hand-held transmitters. Both KNX radio buttons work as receivers and transmitters. Thus, all possible functions for lighting devices and blind controls can be configured and flexibly changed if required.

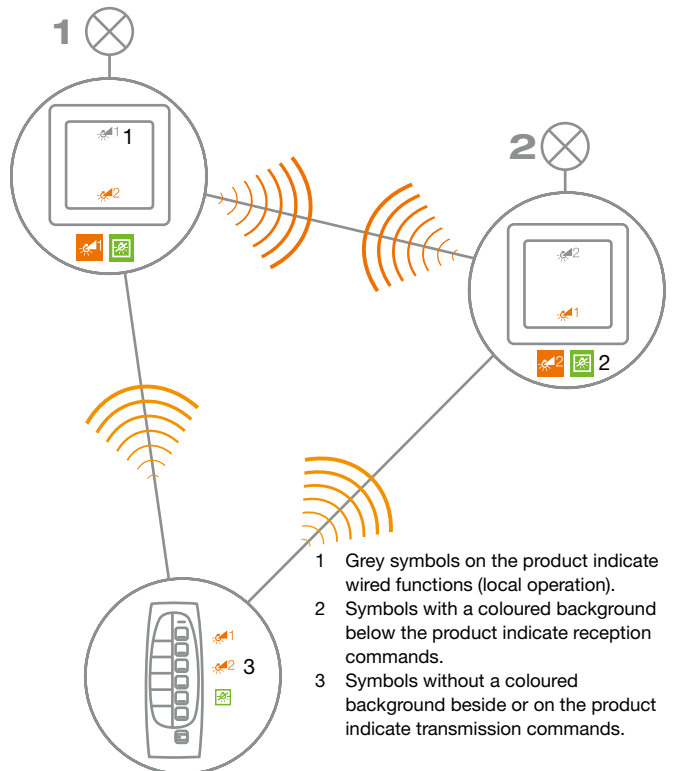

Figure 2: Application example transmitter/receiver configuration

TRANSMIT	RECEIVE	FUNCTIONAL DESCRIPTION
		Lamp 1: Switch ON/OFF and dim BRIGHTER/DARKER
		Lamp 2: Switch ON/OFF and dim BRIGHTER/DARKER
		Central function: Switch all lamps ON/OFF

Tab. 1: Configured transmitter/receiver functions

KNX radio - Commissioning concept

Configuration via quicklink

The KNX radio application modules follow a configuration concept whereby the function-related connection between a command giving transmitter and the function executing receivers is set by means of buttons and LED/displays without any further tools. Thus, wireless functions that are even more complex e.g. master, group, extension units, scenes and time controls can be implemented.

The insert wired to the load defines one set of configurable functions each (switching, dimming or control of the blind). The desired function is selected from this set and taught-in by means of quicklink.

Explanatory notes on the configurable functions following the configuration example.

The bottom part of application modules have a:

- Configuration button - **cfg** button
- Configuration LED - **cfg** LED
- Function button - **fct** button
- Function-LED - **fct**-LED

On application modules with display the configuration takes place menu-driven.

- For a new configuration, the KNX radio application module must first be reset to factory setting.
- All devices of a system configurable by quicklink can be operated together.

The simple configuration process is demonstrated below based on two examples.

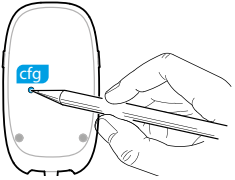

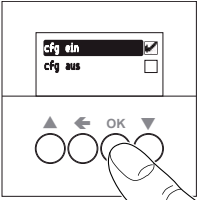

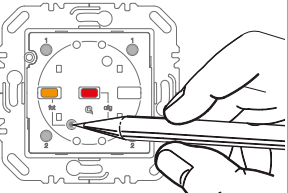

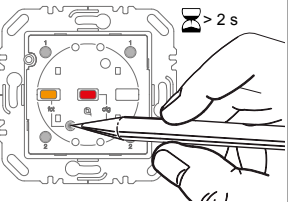

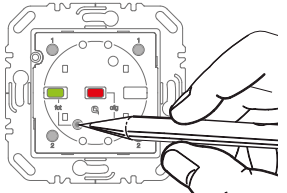

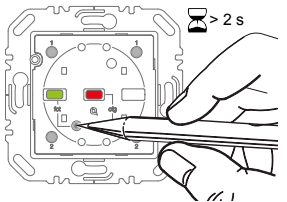

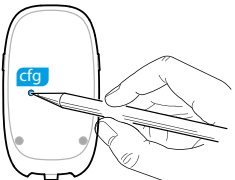

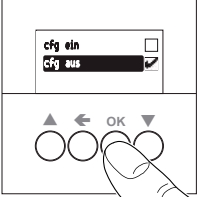

Configuration of a lighting function with buttons and LED display	Configuration of a blind function with display, menu-driven (transmitter) + buttons and LED display (receiver)
<i>1. Switch the transmitter and receiver to configuration mode</i>	<i>1. Switch the transmitter and receiver to configuration mode</i>
<ul style="list-style-type: none"> Activate the configuration with the cfg button of the transmitter. <p>The cfg LED of the transmitter and all receivers within range light up.</p>  <ul style="list-style-type: none"> On the transmitter, press the button/button area to which a function is to be assigned. <p>The cfg LED of the transmitter flashes. The transmitter and receiver are in configuration mode.</p> 	<ul style="list-style-type: none"> In the configuration menu of the transmitter, activate the configuration with display. <p>The cfg LED and configuration display of all receivers within range light up.</p>  <ul style="list-style-type: none"> Since the display devices only have one transmission channel, it is not necessary to select the transmission button.
<i>2. Set function of the receiver</i>	<i>2. Set function of the receiver</i>
<ul style="list-style-type: none"> Keep pressing the fct button on the receiver until the fct LED signals the desired function.  <p>Save the selected function by slowly pressing (> 2 s) the fct button of the receiver.</p> 	<ul style="list-style-type: none"> Keep pressing the fct button on the receiver until the fct LED signals the desired function.  <ul style="list-style-type: none"> Save the selected function by slowly pressing (> 2 s) the fct button of the receiver. 
<i>3. Finish configuration</i>	<i>3. Finish configuration</i>
<ul style="list-style-type: none"> End the configuration with the cfg button of the transmitter. <p>The cfg LEDs on the transmitter and on all receivers go out..</p> 	<ul style="list-style-type: none"> End the configuration in the configuration menu of the transmitter. <p>The cfg LED and configuration displays of all receivers in range go out.</p>

Light control

Change-over 
LED:  Display:

Change-over the operating state of the connected load on the receiver between ON and OFF per transmission command.

i When dimming, a long button-press > 0.4 s induces dimming. The dimming direction is reversed each time the button is pressed.

Switch on 
LED:  Display:

Switch ON the connected load on the receiver per transmission command.

i When dimming, a long button-press > 0.4 s induces BRIGHTER dimming.

On/off switch off 
LED:  Display:

Switch OFF the connected load on the switching per transmission command.

i When dimming, a long button-press > 0.4 s induces DARKER dimming.

Scene 1 
LED:  Display:

Call the load and blind states stored in scene 1 on the assigned receivers per transmission command.

Scene 2 
LED:  Display:

Call the load and blind states stored in scene 2 on the assigned receivers per transmission command.

i After a long button-press on the transmitter > 5 s the stored scene is overwritten with the currently set load states of the assigned receiver.

Switching time 
LED:  Display:

Switch ON the load for the settable switch-on time on the receiver gradually between 1 s and 3 h per transmission command.

ON / OFF (switch) 
LED:  Display:

Switch ON for the duration of the transmission command.

i To facilitate this, transmission commands (ON and OFF switch) of the KNX radio timer in the receiver are configured simultaneously in one operation.

Forced mode ON 
LED:  Display:

Switch ON the connected load and lock against local operation and other transmission commands for the duration of the forced mode transmission command.

Forced mode OFF 
LED:  Display:

Switch OFF the connected load and lock against local operation and other transmission commands for the duration of the forced mode transmission command.

Presence simulation 
LED:  Display: (function not available)

Activates/deactivates execution of presence simulation of the radio motion detector per transmission command. The recording frequency per hour is recorded over a 24 h period. In the 60 minutes with most recordings, the light will be switched on once for the duration of the delay time, even if no motion is detected.

i During the presence simulation presence detection, extension unit and radio commands will continue to be executed normally.

Master-Slave 
LED:  Display: (function not available)

A motion detector configured as a slave transmits a command to the master motion detector for evaluation during detection of a movement.

Delete 
LED: Display:

The assignment of the receiver to the transmitter is deleted.

Blind control

Move up 
LED:  Display:

Adjustment of the slat position / stop.

After a long button-press > 0.4 s, blind moves to top final position (self-retaining).

Move down 
LED:  Display:

Adjustment of the slat position / stop.

After a long button-press > 0.4 s, blind moves to bottom final position (self-retaining).

Scene 1 
LED:  Display:

Call the load and blind states stored in scene 1 on the assigned receivers per transmission command.

Scene 2 
LED:  Display:

Call the load and blind states stored in scene 2 on the assigned receivers per transmission command.

i After a long button-press on the transmitter > 5 s the stored scene is overwritten with the currently set load states of the assigned receiver.

Up / Down (switch) 
LED:  Display:

Move blind UP for the duration of the transmission command. After the end of the transmission command, the blind moves DOWN for 2 minutes.

i To facilitate this, transmission commands (move UP and DOWN) of the KNX radio shutter timer in the receiver are configured simultaneously in one operation.

Forced mode UP 
LED:  Display:

Move the connected blind UP to the top final position and lock against local operation and other transmission commands for the duration of the forced mode transmission command.

Forced mode DOWN 
LED:  Display:

Move the connected blind DOWN to the bottom final position and lock against local operation and other transmission commands for the duration of the forced mode transmission command.

Presence simulation 
LED:  Display: (function not available)

Activates/deactivates execution of presence simulation of the KNX radio shutter button by means of transmission command.

The UP and DOWN switching commands of the last 24 hours are saved and executed automatically for the presence simulation.

Delete 
LED: Display:

The assignment of the receiver to the transmitter is deleted.

Technical properties

Order no.	80440100 / 80660100
Screen diagonal	1.93"
Screen size	38.28 mm x 30.26 mm
KNX system voltage	30 V DC
Auxiliary voltage	24 V DC
Current consumption KNX	max. 10 mA
Current consumption for 24 V auxiliary voltage	25 mA
Operating temperature	-5 °C to +45 °C
Storage temperature	-20 °C to +70 °C
Humidity	max. 60 % < 45 °C, 90 % at 45 °C, no condensation
Bus line connection	TG008 plug-in terminals, 2-pole
Cable length for ext. temperature sensor	max. 10 m
Degree of protection	IP21
Impact protection	IK04
Protection class	III
Electric strength	4 kV
Standards	EN 60730-2-9, EN 50491-3, EN 50491-5-2

Assembly

Design and layout of the device

- (1) Touch-sensitive control surface
- (2) Display area
- (3) Connecting terminal for auxiliary voltage 24 V SELV
- (4) KNX bus connection terminal
- (5) Connecting terminal for external temperature sensor (not within scope of delivery, enclosed with the temperature sensor)

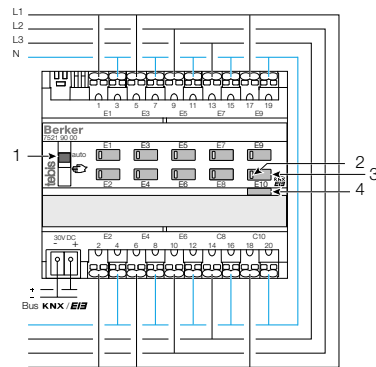

Input devices

DALI gateway specifications (only programmable with ETS)

Order no.	TYA670D
KNX system voltage	30 V DC
Power consumption, KNX	typ. 150 mW
Mains power supply	110 to 240 V AC
Mains frequency	50/60 Hz
Max. power dissipation	3 W
Number of DALI devices	max. 64 (current consumption 2 mA in each case)
DALI voltage	typ. 16 V
DALI transmission rate	1200 bit/s
DALI Protocol	DIN EN 62386 Appendix E4
Cable length for gateway devices with 1.5 mm ² cable cross-section	max. 300 m
with 1.0 mm ² cable cross-section	max. 238 m
with 0.75 mm ² cable cross-section	max. 174 m
with 0.5 mm ² cable cross-section	max. 116 m
Resistance of DALI cable	max. 4 Ohms for basic length (8 Ohms for feed and return cable)
KNX connection	Connecting terminal
DALI connection	screw terminal
single stranded	0.2 to 4 mm ²
finely stranded without conductor sleeve	or 2 x 0.2 to 2.5 mm ²
finely stranded with conductor sleeve	0.75 to 4 mm ²
Operating temperature	-5 °C to +45 °C
Storage temperature	-25 °C to +70 °C
Dimensions	4 SU

TYA670D connection

TYA670D Design and layout of the device

- ① Button panel for manual operation
- ② Programming button and LED
- ③ KNX connection
- ④ Display DALI group
- ⑤ Mains power supply connection
- ⑥ DALI output

TYA670D Operation (operating elements)

- ④ Display DALI channels (1...32)
4a DALI groups
4b Single devices
- ⑦ Button Manual operation
- ⑧ LED on: Permanent manual operation active
- ⑨ Button : Switch on or dim brighter
- ⑩ LED on: DALI single device or group switched on
Brightness 1 to 100%
- ⑪ Button : Ausschalten oder dunkler dimmen
- ⑫ LED on: DALI single device or group switched off

Dimmer and light control specifications

Order no.	TX211A
KNX system voltage	30 V DC
Supply voltage	230 V AC (+10 % / -15 %), 50 Hz / 60 Hz
Max. power dissipation	9 W
Max. bus load	2.3 mA
Dimensions	4 SU
Degree of protection	IP30
Standards	NF EN 60669-1 NF EN 60669-2-1 EN 60669-2-1
Connection quickconnect	Cage terminal Flexible, 1 to 6 mm ² Solid, 1.5 to 10 mm ²
Labelling	Large label window
Bus line connection	TG008 plug-in terminals, 2-pole
Operating temperature	0 °C to +45 °C
Storage temperature	- 20 °C to +70 °C

Load/switching capacity

	Load (at 45 °C in each case)
Load type	TX211A
230 V~ incandescent lamps	2300 W
230 V~ halogen lamps	2300 W
Conventional transformer 12 V~	1500 VA
24 V~	
Electronic transformer 12 V~	1500 VA
24 V~	
Fluorescent lamps with double switch	1000 VA
Fluorescent lamps with electronic ballast	1000 VA
1/10 V control voltage	max. 50 mA Control current Line length max. 50 m

Note the power dissipation of the transformers.

1 - 10 V control unit 3gang TX211A

Installation type	RMD	RMD	built-in
Un, rated voltage (V)	250/440 V AC	24 V DC	250 V AC:
In, rated current (A)	6 A AC1 (TYM632C 4 A)	6 A	4 A AC1
Number of outputs	4 / 4 / 8 / 8 / 12	4 / 4	1
Module width (SU)	4 / 4 / 6 / 6 / 10	4 / 4	53 x 29 mm
Manual operation with KNX bus voltage	yes		
Manual operation without KNX bus voltage	yes		
LED status display	yes		
Label window	yes	yes	No
KNX supply voltage	30 V DC SELV	30 V DC SELV	30 V DC SELV
Power dissipation	2 W (TYM632C 3 W)	2 W	225 mW
Typical own consumption on the KNX	5.2 / 5.2 / 15.8 / 15.8 mA (TYM632C 7 mA)	5.2 / 5.2 mA	5.9 mA
Own consumption in idle state on the KNX	4.5 / 4.5 / 8.8 / 8.8 mA (TYM632C 5 mA)	4.5 / 4.5 mA	4.7 mA
Maximum switching cycle rate at full load	20 cycles/minute (TYM632C 6 cycles/minute)		
Functions			
- Up/down, slat step/stop (blind function)	no/yes/no/yes/yes	no/yes	yes
- Up/down, stop (roller shutter function)	yes	yes	yes
- Moving to position in %	yes	yes	yes
- Rotating the slats (0 - 100 %)	no/yes/no/yes/yes	no/yes	yes
- Adjustable running time to the top and bottom final position	yes		
- Presets (with 1 or 2 objects)	yes		
Blocking functions (with 1 or 2 objects)	yes		
- Priority (2 bit)	yes		
- Configurable manual operation (lock/release/status)	yes		
- Lockable solar protection on a permanent/limited basis	yes		
Safety functions			
- Max. 3 alarms with defined priorities	yes		
- Behaviour during/after alarm	yes		
- Adjustable monitoring time	yes		
- Safety interlock	yes		
- Safety departure (moves as long as pressed)	yes		
Status messagees			
- Position in %	yes		
- Slat position in %	no/yes/no/yes/yes	no/yes	yes
- Top final position reached	yes		
- Bottom final position reached	yes		
- Lock-up	yes		
- Priority	yes		
- Alarm	yes		
- Sun protection	yes		
- Safety interlock	yes		
Scene function			
- Max. 64 scenes to select from per output	yes		
- Scenes can be stored with a long button press	yes		
- Store scene action can be adjusted	yes		
- Up/down/specific position/reactivate sun protection/lock sun protection scene functions	yes		
Logic function			
- 2 logic blocks per device	yes		
- Max. 4 inputs per logic block	yes		
- AND logic function	yes		
- OR logic function	yes		
special functions			
- "Reset to ETS parameters" object	yes		
- Switches off device LED display	yes		
- "Device diagnostics" object	yes		
- Action in the event of bus voltage failure/return	yes		
- Action after ETS download	yes		

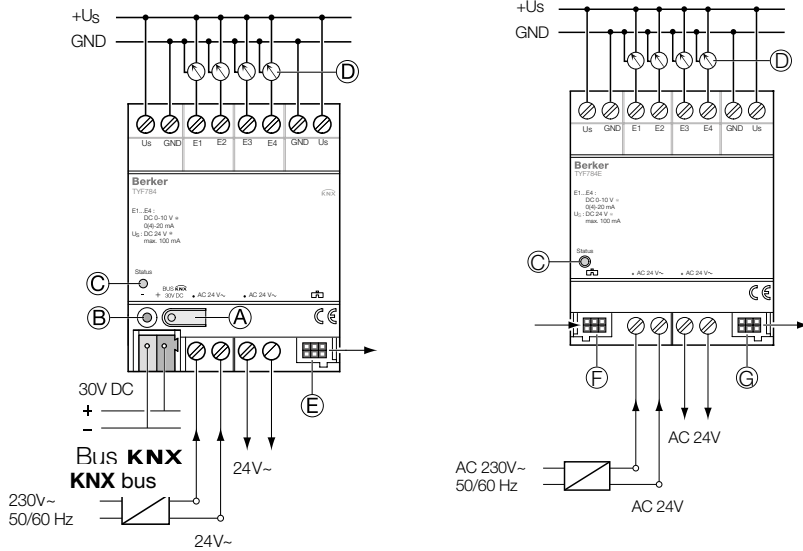

Analogue actuator specifications

TYF684 / TYF784 commissioning

After the initial switch-on, the analogue actuator performs a module scan (status LED: "Orange / on"). As a new device does not contain a project by default, the status LED then switches to "Red / flashing quickly". A connected analogue actuator module signals that it is ready for operation by switching its status LED to "Flashing quickly". Once a project has been loaded in the analogue actuator / analogue input, the status LED switches to "Green / on"; the module switches its status LED off.

TYF684 / TYF784 status LED

	TYF684	TYF784
Off	No power supply	
Orange / on	Module scan by analogue actuator	Module scan by analogue input
Orange / flashing quickly	Analogue actuator module scan	Analogue input module scan
Red / flashing slowly	Error: Undervoltage at module connection / short-circuit U _s	Error: Undervoltage at module connection / short-circuit U _s
Red / flashing quickly	Error: No project / error in parameterisation	
Green / flashing slowly	Address assignment, module scan complete, projecting OK	
Green / flashing quickly	Parameter download in module	
Green / on	Module scan complete, everything OK	

Flashing slowly = 1/sec.; flashing quickly = 2/sec.

TYF684E / TYF784E status LED

Device status (red)

	TYF684E	TYF784E
During module commissioning		
On	Module is ready for operation (self-test is OK)	
Flashing quickly	Module is currently being initialised	
Flashing slowly	Module not projected (in KNX device)	
Off	Module is initialised and commissioned. Prerequisite: The LED must have lit up first!	
In normal operation		
On	Module is not ready for operation (error)	
Off	Module is initialised and programmed. Prerequisite: The LED must have lit up first!	

Flashing slowly = 1/sec.; flashing quickly = 2/sec.

Fan coil actuator specifications

	TYF642F
Supply voltage	230 V AC 50/60 Hz
System voltage	30 V DC
Max. power dissipation	3 W
Power consumption, KNX	max. 125 mW
dimension	4 SU
Degree of protection	IP20
Connection	 1.5 mm ² to 4 mm ²  0.75 mm ² to 4 mm ² without conductor sleeves 0.5 mm ² to 2.5 mm ² with conductor sleeves
Contact type	Potential-free NO contacts, μ
Switching voltage AC	230/240 V~
Switching capacity AC1	10 A
Switching capacity AC3 (cos = 0.65)	10 A
Load per output	
Ohmic load	2300 W
Capacitive load	10 A max. 140 μ F
Motors	1380 VA
max. making current 200 μ s	800 A
max. making current 20 ms	165 A
Lamp loads	
Incandescent lamps	2300 W
230 V halogen lamps	2300 W
LV halogen lamps with Tronic transformers	1500 W
LV halogen lamps with inductive transformers	1200 W
T5/T8 fluorescent lamps	
uncompensated	1000 W
parallel compensated	1160 W / 140 μ F
Mercury vapour lamps	
uncompensated	1000 W
parallel compensated	1160 W / 140 μ F
Operating temperature	-5 °C to +45 °C
Storage temperature	-25 °C to +70 °C
Bus line connection	TG008 plug-in terminals, 2-pole

	Green, permanent	domovea server ready for operation	-

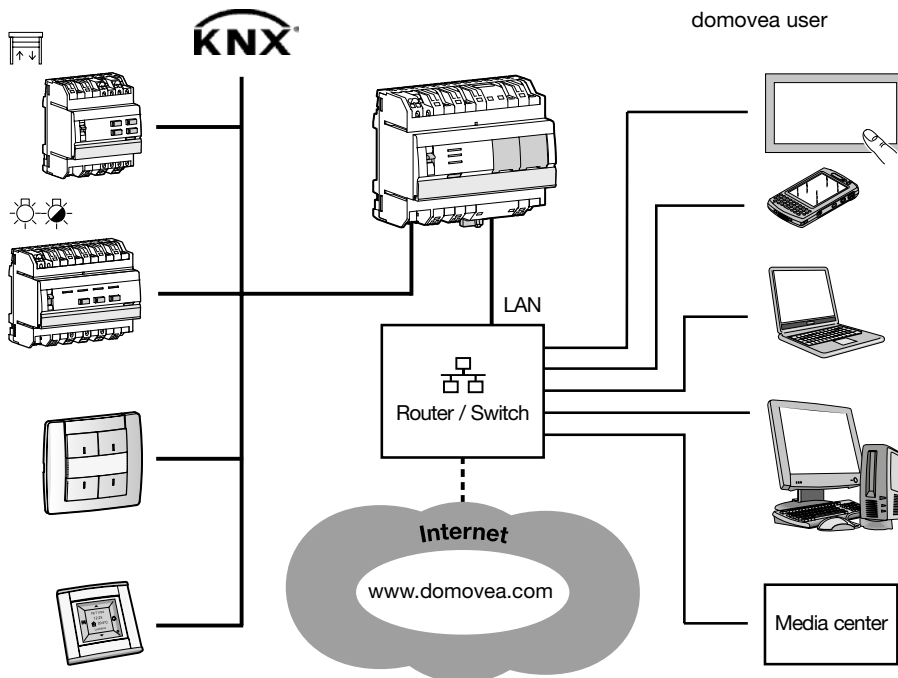

Technical data	7571 00 05
KNX connection	KNX bus 30 V DC
Auxiliary voltage	24 V DC (SELV)
Current consumption from the bus line	max. 10 mA, 30 V DC
Current consumption from the auxiliary voltage supply	max. 150 mA, 24 V DC
Ethernet network	100 BaseT (100 Mbit/s)
Bus connections	0.6 - 0.8 mm ²
Power supply connection	0.75 - 2.5 mm ²
Ethernet/IP network connection	RJ 45
Operating temperature	0 °C → +45 °C
Storage temperature	-20 °C → +70 °C
Degree of protection	IP20
Dimensions (1 module = 18 mm)	6 x 17.5 mm

PC system requirements:

- Microsoft® Windows® XP/Vista/Windows 7/ Windows Media Center
- Pentium processor with at least 600 MHz or comparable
- At least 128 MB RAM, recommended 256 MB or more
- VGA graphics card with at least 16-bit colour depth (high colour) and a resolution of 1024 x 768 pixels
- Free hard disk space of at least 500 MB
- Network adapter

Range of functions:

- 100 groups (parts of buildings, rooms, areas, etc.)
- 500 devices (e.g. for lighting, blinds and sensors, etc.)
- 10 IP cameras (to be selected from a set manufacturer list)
- 50 sequences
- 30 clients (profiles)
- Image memory for groups and devices, max. 20 MB
- 100 energy measurement archives

Technical properties

Bus 30 V DC

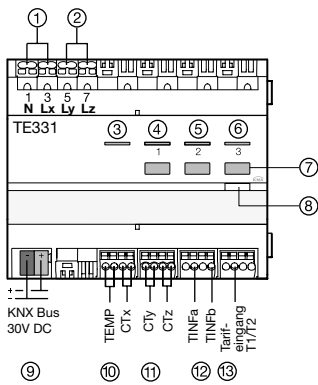

Bus 30 V DC

Specifications

		TE331
Dimensions		6 SU
Supply voltage		230 V AC +10/-15 % between N and Lx, 50 Hz
Double tariff		Tariff 1 = 0 V, Tariff 2 = 230 V
Inputs	- external sensor	EK088
Consumption data	- voltage inputs	Lx/N product power supply Lx/Ly/Lz same reference live conductor as measured live conductor for transformers CTx/CTy/CTz
	- inputs for summation current transformer	CTx, CTy and CTz not polarised, max. 90 A
	- connection	0.52 mm ² , max. length 1 m
	- working range	100 mA to 90 A
	- low value measurement	0.2 A (46 W)
	- measuring accuracy	5 %
Connection for screw-free connectors, quickconnect	- top terminals	0.75 to 2.5 mm ² , stripping length 10 mm, 2 cables/terminal
	- bottom terminals	0.2 to 1.5 mm ² , stripping length 8 mm, 1 cable/terminal
Degree of protection		IP20
Operating temperature		-5 °C to +45 °C
Storage temperature		-25 °C to +70 °C
Bus line connection		TG008 plug-in terminals, 2-pole

Connections

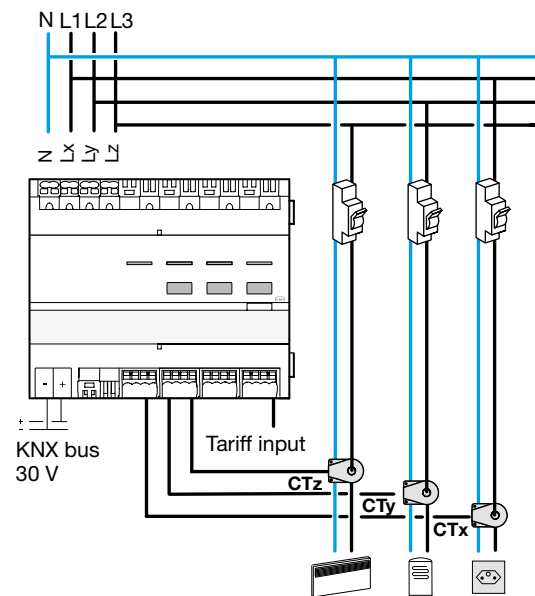

- ① Product power supply
- ② Connecting terminals of the reference phases for counter channels 2 and 3
- ③ Indicator lamp for remote communication
- ④ Indicator lamp for channel 1
- ⑤ Indicator lamp for channel 2
- ⑥ Indicator lamp for channel 3
- ⑦ Push-button for channel addressing
- ⑧ Illuminated push-button for physical addressing
- ⑨ KNX bus
- ⑩ Input for outside temperature sensor (EK088)
- ⑪ Counter inputs for the individual ring coils (channel 1: CTx, channel 2: CTy, channel 3: CTz)
- ⑫ Remote communication input (for France only)
- ⑬ 230 V tariff input

Order no.	TXE531	TG053A
Commissioning	easy / ETS	ETS
System voltage	30 V DC	
Supply voltage	12 to 40 V DC SELV / 12 to 24 V AC SELV	
Current consumption KNX	6 mA	
Dimensions (H x W x D)	77 x 96 x 118 mm	
Weight	approx. 170 g	
Protection class	IP44	
Precipitation sensor Precipitation measurement Heating	yes/no (1 bit) approx. 1.2 W	
Temperature sensor Measuring range Resolution Measuring accuracy	-30 °C to +80 °C 0.1 °C ± 0.5 °C at +10 °C to +50 °C ± 1 °C at -10 °C to +85 °C ± 1.5 °C at -25 °C to +150 °C	
Wind sensor Measuring range Resolution Measuring accuracy	0 to 35 m/s 0.1 m/s ± 15 % of the measured value with an incidental flow from 90° to 270°	
Brightness/twilight sensor Cardinal direction Measuring range Measuring accuracy	South 0 lx to 150 klx ± 20 % at 0 lx to 10 klx ± 15 % at 10 klx to 150 klx	
Standards	EN 50491-3 EN 50491- 5 -2: 2011 EN 60730 - 1: 2011	
Bus line connection	TG008 plug-in terminals, 2-pole	
Supply voltage connection	Spring clips, solid or flexible, max. 0.5 mm ²	
Operating temperature	-30 °C to +50 °C	
Storage temperature	-30 °C to +70 °C	

1. Spring clips for 12 to 40 V DC SELV / 12 to 24 V AC supply, for solid conductors up to 1.5 mm² cross-section or for flexible conductors. Polarity-independent clip assignment (+/- or -/+)
2. Connector for wiring the rain sensor, integrated in the housing cover
3. GPS antenna
4. GPS signal LED
5. KNX connector (+/-)
6. Button for physical addressing
7. LED for physical addressing

Preparing the weather station

Holder installation

The weather station must be mounted on a vertical wall (or a mast).

Fasten the holder vertically on the wall or mast.

For wall mounting:
Flat side facing the wall, crescent-shaped element facing up.

For mast mounting:
Curved side facing the mast, crescent-shaped element facing down.

Technical properties

Order no.	TJA665
KNX system voltage	30 V DC
External safety extra-low voltage	24 V DC supply (TGA200, TXA114 or via PoE)
Consumption on the bus cable	max. 10 mA - 30 V DC
Consumption on the auxiliary feed cable	max. 200 mA - 24 V DC
Typical own consumption on idle state on the KNX bus	8 mA
Typical own consumption in idle state on 24 V Ethernet connection, USB not connected	100 mA
Max. power dissipation	5 W
Consumption with PoE supply	50 mA
Ethernet network communication	2 x 100 / 1000 BaseT
Bus connections	0.6 - 0.8 mm ²
quickconnect power supply connections	0.75 - 2.5 mm ²
Ethernet network plug interface / IP	2 x RJ45
Operating temperature	0 °C to 45 °C
Storage temperature	-20 °C to +70 °C
Space requirements	6 SU
USB2 port	2
Installation type	DIN rail
Operating altitude	< 2000 m
Degree of contamination	2
Surge voltage	4 kV
Degree of protection	IP20
Impact resistance	IK04
Overvoltage class	III
Standards	EN 60950-1, EN 50491-3, EN 50491-5-2, IEE 802.3 at, USB 2.0, KNX Handbook 2.1
OS compatibility	Android: Version 4.4 or higher iOS: Version 8.0 or higher
Web browser compatibility	Safari: Version 8 or higher Chrome: All versions Firefox: All versions Internet Explorer: Version 11 or higher

Design and layout of the device

- ① Connection for external safety extra-low voltage

Slide switch		Behaviour of Ethernet ports			
SELV	COM	Ethernet port 1	Ethernet port 1	Hager gateway	KNX bus
Auto	online	<p>This is the normal operation mode for the TJA665 module when connected to an external router.</p> <p>The two ports are interchangeable and can be configured via DHCP server or with a fixed IP address.</p> <ul style="list-style-type: none"> - As a DHCP client (default, factory-set mode), the TJA665 module waits for an IP address which is assigned to it via a DHCP server (router) installed within the network. If no address has been assigned after 40 seconds, the TJA665 module automatically adopts the following replacement address: 192.168.0.253 - In the case of a fixed IP address, the TJA665 module immediately adopts the parameters stored in the "Internet server configuration" tab, "Setting the configurator" menu: <ul style="list-style-type: none"> - IP address of the interface - Subnet mask - Address of the default gateway <p>Please note: Even if there is an IP address conflict in the network (if another module is already using the hidden IP address), the module will not automatically switch to the replacement address.</p>		Connected	Connected
	offline	<p>This is a replacement operating mode in which the two ports are interchangeable. In this case, these are automatically configured as a DHCP client.</p> <ul style="list-style-type: none"> - If the DHCP server has not assigned an IP address after 40 seconds, the TJA665 module automatically adopts the replacement address 192.168.0.253. 		Disconnected	Disconnected
Routers	online	<p>To be used when a PC is directly connected to the TJA665 module.</p> <p>This mode activates the DHCP server integrated in the module.</p> <p>The two ports are interchangeable and are configured with the following parameters:</p> <ul style="list-style-type: none"> - IP address of the interface: 192.168.0.253 - Subnet mask: 255.255.255.0 - Address of the default gateway: 192.168.0.1 		Connected	Connected
	offline	<p>This is a replacement mode. The two ports are interchangeable and are configured in the DHCP client mode.</p> <ul style="list-style-type: none"> - If the DHCP server has not assigned an IP address after 40 seconds, the virtual interface of the TJA665 module automatically adopts the replacement address 192.168.0.253. 		Disconnected	Disconnected

Meaning of the LEDs

LED function	LED no.	red	Green	Description
In operation	③	Does not light up	Does not light up	Module has no power supply
		Does not light up	Flashing	Module start phase
		Does not light up	Lights up	Module is starting
		Flashing	Does not light up	Module is supplied via power reserve
		Lights up	Does not light up	Error when loading the operating system (OS)
KNX	④	Does not light up	Does not light up	Module is supplied via power reserve
		Does not light up	Flashing	Connected to KNX bus – bus communication traffic
		Does not light up	Lights up	Connected to KNX bus – no bus communication traffic
		Lights up	Does not light up	No connection to KNX bus
Ethernet ① and ②	⑤ and ⑥	Does not light up	Does not light up	No network connection (or operation via power reserve)
		Does not light up	Flashing	No DHCP server detected, operation on IP replacement address
		Does not light up	Lights up	Network detected and IP address assigned
		Lights up	Does not light up	IP address conflict
		Flashing	Does not light up	Waiting for IP address assignment
Gateway	⑦	Does not light up	Does not light up	No connection to Hager gateway
		Does not light up	Flashing	Attempting to connect to Hager gateway
		Does not light up	Lights up	Connection to Hager gateway established
		Lights up	Does not light up	No access to Hager gateway possible or permission denied
Bus voltage is present	⑨	Permanent	-	Check bus voltage by briefly pressing push-button 9. The red LED lights up to indicate that the KNX bus is present.

a) In rooms with dining areas, the number of connections and socket outlets should each be increased by 1.
 b) The socket outlets allocated to the bed areas and kitchen work areas, kitchenettes and house workrooms must be provided with double socket outlets at least. They only count as one socket outlet each in the table, though.
 c) As long as an individual ventilation system is provided for. In the case of windowless bathrooms or toilets, the switching must be provided with follow up via the general lighting.
 d) Unless the heating system/hot water supply takes place in another way.
 e) A socket outlet in combination with the washstand lighting is permissible.
 f) Only required once in each home.
 g) Switchable from two places at least.

Test marks and administrative marks

VDE test mark, all articles of the Berker range for which it is possible to issue the test mark, bear this mark.

Netherlands

Austria

Norway

France

Denmark

Italy

Sweden

Canada

Belgium

USA

Poland

Finland

Switzerland

ENEC stands for European Norms Electrical Certification. The number following the mark indicates the certifying body. Example: 10 stands for VDE

Verification of increased voltage resistance capability for connecting devices to DIN 49400 and 49441, installation equipment made of shock-proof impact material for greater mechanical stress conditioning.

SV Safety power supply (diesel unit VDE 0107: 1994-10), recognisable by the green centre plate

ZSV Additional safety power supply (battery supported VDE 0170: 1994-10), recognisable by the orange centre plate.

Furniture construction/installation. Devices can be mounted on surfaces with unknown flammability properties.

Flame retardant according to VDE 0606 T1:1984-11, meets the requirements of the Association of Property Insurers for mounting on wood.

CE All items in this catalogue which are subject to CE regulations bear the CE mark on their packaging.

RAL Determination of colour gradations of Deutsches Institut für Gütesicherung und Kennzeichnung e.V.

EDV Electronic data processing, designated for special circuits, designated by red centre plate.

Trademarks/brands

Registered trademark of the SCHUKO-Warenzeichenverband e.V (SCHUKO trademark association e.V.); identifies socket outlets according to DIN VDE 0620-1 and DIN 49440. The terminals are also suitable as connection terminals.

Registered trademark of Warenzeichen-Verbandes EDELSTAHL ROSTFREI (stainless steel trademark association).

Registered trademark of the KNX Association cvba, Brussels.

Registered trademark of PERILEX-Gemeinschaft e.V..

Protection classes/types

VDE radio suppression seal

Protective insulation protection class 2

IP (international protection) According to DIN 40050, IEC 60529, designates the degree of protection of a device against ingress of foreign bodies and moisture.

IP44 Protection against contact of live parts with wires or similar, larger than 1 mm diameter and splash water from all directions. (contact-protected from 1 mm, splash-protected)

IP55 Protection against harmful dust deposits and against water jets from a nozzle directed towards the housing from all directions (protected against dust and water jets.)

IP66 Protection against dust deposits and strong water jets from all directions. (dustproof, waterproof)

Protection class III

Explosion protection, zone 11

Suitable for IP44, degree of protection IP44 is only available with the appropriate sealing set.

Application designations/symbols

Material characteristics

Berker products do not contain any materials made of PVC or halogen, with the exception of the sealing membrane and the contact protection boxes of the installation system.

General notes

The technical specifications given here are not binding. The operating manual supplied with the products must be observed in all cases.

Illustrations are not binding, especially with regard to colour, size, equipment, performance of products and switch and connection diagrams.

We reserve the right to make technical and formal changes to our products in the interest of technical progress.

Switching symbols in unresolved display

To simplify the planning by means of switching symbols, we have additionally developed our own switching symbols based on the standard or we have used symbols already existing on the market. Some of the new underlying details:

- Electronic device
- Scanning arm NO contact
- Scanning arm NC contact
- Scanning arm change-over
- Scanning arms directed to each other or in each other corresponds to common input terminal
- Scanning arms directed away from each other corresponds to isolated input terminal
- Hinged covers
- KNX device
- Radio bidirectional
- Infrared IR
- Passive infrared motion detector
- Passive infrared presence detector
- USB connector
- Binary input
- Sensors

Socket outlets without earthing contact

- Socket outlet without earthing contact
- 2gang- / double socket outlet without earthing contact
- Socket outlet without earthing contact with enhanced contact protection
- USB charging socket

Socket outlets with earthing contact

- SCHUKO plugs
- SCHUKO socket outlet
- 2gang / double SCHUKO socket outlet
- 3gang SCHUKO socket outlet

- SCHUKO socket outlet with enhanced contact protection
- 2gang SCHUKO socket outlet with enhanced contact protection
- 3gang SCHUKO socket outlet with enhanced contact protection
- SCHUKO socket outlet with hinged cover
- 2gang SCHUKO socket outlet with hinged cover
- 3gang SCHUKO socket outlet with hinged cover
- SCHUKO socket outlet with hinged cover and enhanced contact protection
- SCHUKO socket outlet with hinged cover and lock
- 2gang SCHUKO socket outlet with hinged cover and lock
- Illuminated SCHUKO socket outlet
- Illuminated SCHUKO socket outlet with enhanced contact protection
- Illuminated SCHUKO socket outlet with hinged cover
- SCHUKO socket outlet that can be switched off with enhanced contact protection
- SCHUKO socket outlet with over-voltage protection
- SCHUKO socket outlet with residual current circuit-breaker (RCCB) and enhanced contact protection
- Three-phase plug 3P + N + PE
- Three-phase socket outlet with hinged cover 3P + N + PE

Switches

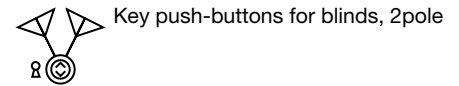

- On/off switch
- On/off switch, 2pole
- On/off switch 2pole illuminated/control switching
- On/off switch 3pole
- On/off switch 3pole illuminated/control switching
- Series switch
- Series switch 1 x illuminated or 1 x control switching
- Series switch 2 x control switching
- 3gang On/off switch
- Change-over switch
- Change-over switch illuminated/control switching
- Intermediate switch
- Intermediate switch illuminated
- Double change-over switch
- Double change-over switch illuminated
- Pullcord switch change-over
- Pullcord switch change-over illuminated/control switching
- Mechanical timer 2pole Off
- Key change-over switch
- Key change-over switch, 2pole
- Change-over switch and socket outlet without earthing contact combination
- SCHUKO change-over switch and socket outlet combination
- SCHUKO change-over switch and socket outlet with hinged cover combination
- SCHUKO change-over switch and socket outlet with hinged cover combination illuminated/control switching

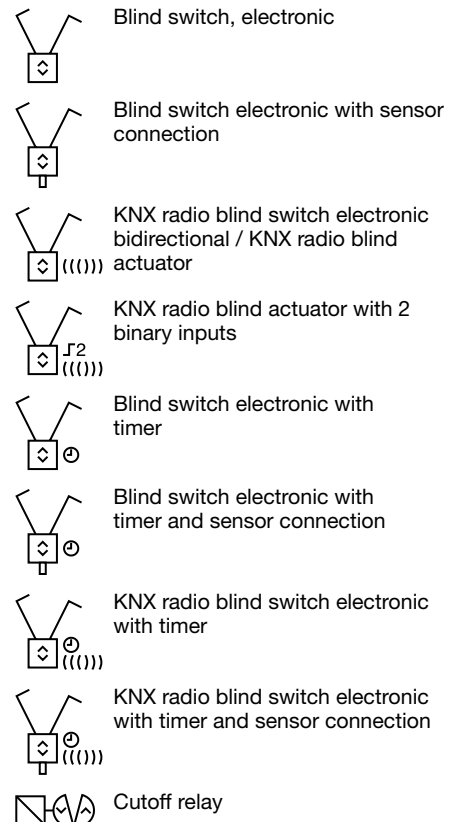

Push-button

Switch / push-button for blinds

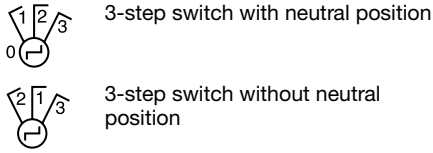

Switches for blinds electronic

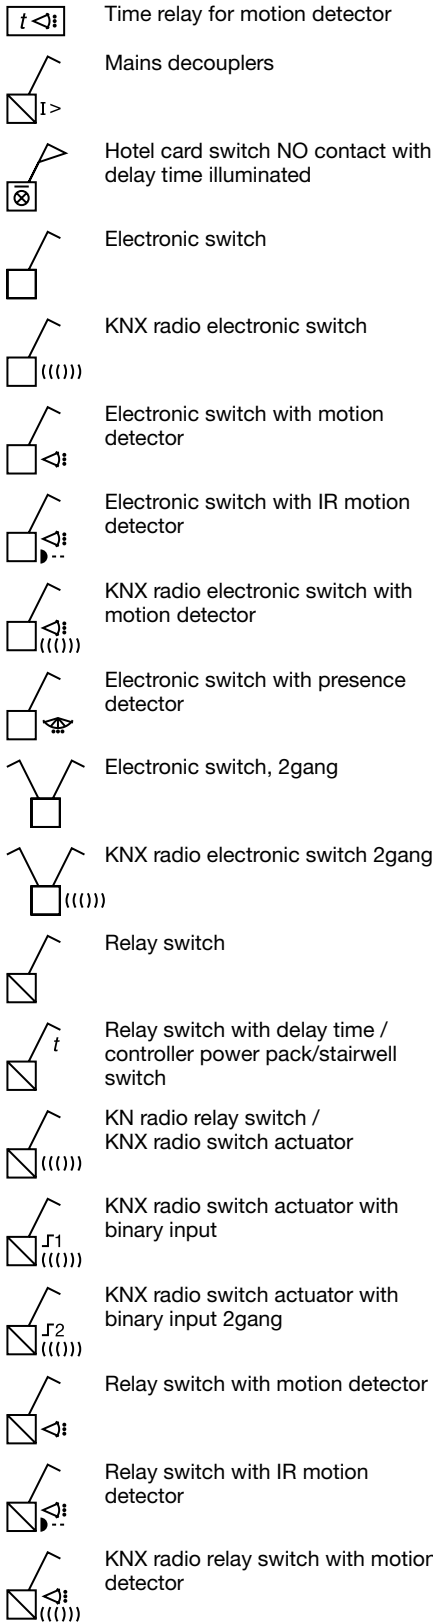

Special switch/push-button

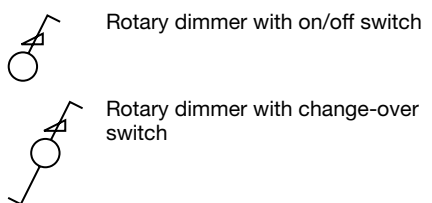

Electronic switches/components

Rotary dimmer rotary control units

Touch dimmer touch control units

KNX radio dim actuator dim 4gang

Dimmer power booster

General applications

- Blind plug
- Cable outlet
- Pilot lamp
- Pilot lamp 2gang

Wireless components

KNX radio hand-held transmitter 2-channel

KNX radio hand-held transmitter 4-channel

KNX radio hand-held transmitter 6-channel

KNX radio hand-held transmitter 18-channel

KNX radio wall-transmitter

KNX radio wall-transmitter, 2-gang

KNX radio motion detector

IR hand-held transmitter

KNX radio valve drive

coviva Smartbox

Data / Telecommunication

Loudspeaker socket outlet

Stereo loudspeaker socket outlet

TV aerial socket

TAE socket outlet

TDO socket outlet

FCC socket outlet

TAE/FCC socket outlet

HDMI socket outlet

VGA socket outlet

S-Video socket outlet

S-Video and Cinch socket outlet

USB and jack socket outlet

Security and safety systems

Key switches
Motion detectors general

Siren

Alarm siren with rotating light

Smoke detector

Radio smoke detector

Heat detector

Radio heat detector

Magnetic contact

KNX radio magnetic contact

alarm central unit

KNX alarm central unit

Strike plate contact

lock switch contact

Blocking element

Glass breakage detector

Alarm distribution terminal

Overvoltage protection module

Residual current circuit-breaker

Making current limiter

HVAC components

Electro-thermal valve drive

Thermostat NO contact with timer

Thermostat NO contact with sensor and timer

Thermostat NC contact with on/off switch and lamp

Thermostat NO contact with sensor on/off switch and lamp

Thermostat change-over contact

Thermostat, change-over contact with sensor

Temperature sensor

Consumer electronics door communication

VHF radio

Amplifier

Docking station

Loudspeaker

Antenna

Clinic installation

(Double pole) socket outlet for floating output

Sensors/inputs

Brightness sensor

Wind sensor

Precipitation sensor

KNX radio brightness sensor

KNX radio binary input 2gang

KNX radio binary input 2gang

Berker Instructions for cleaning care

For surfaces made of plastic, metal or glass:

Clean by wiping the surfaces with a moist, soft, lint-free cloth. Soap-based detergents are suitable for heavier dirt. Open-pored surfaces made from natural materials are sensitive to grease and dirt. They are to be cleaned with a dry, lint-free cloth only.

For surfaces of stainless steel:

Aggressive external ambient factors or direct treatment can damage the material. This can result in rust or discoloration. We recommend cleaning and impregnating stainless steel parts several times a year with special cleaning and care products intended for stainless steel products. Please observe the instructions for use of the cleaning material, as it may not be suitable for use with plastics or fine metallic surface finishes.

Applies to all surfaces:

Abrasives and polishes, acid-based (scale removing) detergents and detergents containing chlorine as well as alkaline-based detergents will generally damage all surfaces. Moreover, painted/lacquered surfaces must not come in contact with detergents that contain alcohol.

As supplement to the General Terms and Conditions of Delivery for Products and Services of the Electrical Industry e. V. (ZVEI)

1. Scope of conditions

For your safety and ours, our deliveries, services and offers are based solely on the following terms and conditions of business. In the interest of both parties, these apply also to all future business relationships, even if not expressly agreed upon again. You are deemed to have accepted the conditions at the latest on acceptance of the goods or service. Unfortunately, we can not accept counter-confirmations from the purchaser with reference to his business or purchasing conditions.

Deviations, additions or ancillary agreements as well as all agreements between us and the customer for the purpose of executing this contract shall only become effective after our written confirmation.

These terms and conditions do not apply to our products sold on the Internet (advertising media, etc.). Instead, special terms and conditions of delivery apply to our Internet sales; these can be found on the Internet at the associated link.

2. Offer and contract conclusion

Our offers are subject to change and non-binding. Please note that letters of acceptance and orders become legally valid only after our confirmation in writing or by telefax.

Please also keep in mind that drawings, illustrations, dimensions, weights and other performance data are to be considered only approximate; unless we identify them expressly as binding. We reserve all ownership and copyrights to our catalogues and printed materials, cost estimates, drawings and other documents. These documents are not to be disclosed to third parties without our express and written approval – this applies in particular to documents that we provide and identify as 'confidential'.

In the interest of both parties, we advise that our employees can not make any verbal ancillary agreements or provide verbal assurances beyond the written content of the contract.

3. Prices

Our prices are subject to change and ex works. Cost estimates for repairs are non-binding. All prices are net prices and subject to the currently applicable sales tax (value-added tax). Additional deliveries and services must be invoiced separately.

Please understand that we may need to adjust our prices, if the cost of labour, material or taxes increase between the time of order placement and order fulfillment.

In the event of an increase in stock exchange listings for non-ferrous metals, we reserve the right to calculate a surcharge for products containing copper, silver or brass based on the difference on the date of order entry.

For products containing non-ferrous metals, the list price as of January 2018 is based on the following:

Copper	450.– € per 100 kg
Silver	150.– € per kg
Brass	150.– € per 100 kg

Copper:

In the event of further changes in the stock exchange listings, we reserve the right to correct the base used for the list prices.

Silver, brass:

In the case of silver and brass, we reserve the right to calculate surcharges based on a percentage. The surcharge groups and associated surcharge matrix will be provided prior to their going into effect in such cases.

4. Packaging

Hager Vertriebsgesellschaft mbH & Co. KG is a customer of INTERSEROH Dienstleistungs GmbH.

5. Shipment

Starting at a net order value of 500 euros, we absorb the freight costs from the shipping location to the destination in the full amount. For express or rush shipments with a net order value of 500 euros or more, we credit the freight costs proportionally. Unfortunately, for special distributions and other special products ex works delivery charges apply. For small orders with a net value of less than 150 euros, a surcharge of 15 euros net applies.

6. Payment

We offer payment terms of net 30 days max. for our invoices. For deferred payment or payment after an agreed date, we reserve the right to charge interest in the amount of 8 percentage points above the base interest rate – unless greater damage can be proven as the result of the payment delay.

If after issuance of a reminder payment is not received from the ordering party within 10 days after the due date on the invoice, all outstanding amounts are due and payable immediately. In such cases, we reserve the right to withhold remaining deliveries until payment in full has been received. The ordering party has no right to file a claim for damages in such cases.

We reserve the right to apply payments by the ordering party to older unpaid amounts, even if the party is not in agreement herewith. We shall of course inform the ordering party immediately and in detail about application of the payment. If costs and interest have already accrued, we first apply incoming payments to the costs, then to the interest and lastly to the primary amount due.

Your payments are considered received as soon as we have access to the funds. Payments by cheque are considered received when deposited. We accept bills of exchange only after written agreement and for the purpose of fulfilling obligations. Please understand that first-time orders can only be delivered against payment in advance; in return, however, we offer a 2% discount. If after accepting an order we receive negative information about the credit-worthiness of the ordering party, we shall be forced to demand payment in advance or the provision of security. This applies in particular if cheques or bills of exchange become subject to protest or the ordering party stops payment. If the ordering party is unable to make payment in advance or furnish security, we must withdraw from the contract without any claims for damages by the ordering party.

7. Time for delivery and performance

Binding and non-binding delivery dates or deadlines are both required to be in writing.

Unfortunately, we are not responsible for delays in delivery and performance due to force majeure even in the case of binding dates and deliveries. This also includes events that not only temporarily delay delivery significantly or make delivery impossible – for instance, strikes, lock-outs, official orders from a government agency, etc., including when such events occur at our suppliers or their sub suppliers. Under such circumstances, we are forced to postpone the delivery or service, possibly by as long as the duration of the event plus an appropriate startup time. It may also be necessary for us to withdraw from the contract in part or entirely because of the unfulfilled amount.

If such a situation lasts longer than three months, you have the right – after an appropriate extension has been established – to withdraw from the contract for the unfulfilled amount. If the delivery time is extended or we are released from our obligation, the ordering party has no right to file a claim for damages. However, we can only invoke the above circumstances after we have first notified you in this regard without delay.

It goes without saying that we can fulfil our delivery and service obligations only if the ordering party fulfils its obligations promptly and properly.

8. Passing of risk

Risk passes to the ordering party as soon as the goods have left our shipping location. Please note also that the risk of accidental damage or accidental destruction also passes to the ordering party if acceptance of the goods at the receiving location is delayed. If shipment is delayed at the request of the ordering party, risk is transferred upon notification of readiness for shipment.

9. Retention of title

Until all payment claims to which we are entitled for legal reasons now or in the future have been settled by the ordering party – including all balance claims on current account – we claim the below-listed as security. We shall at our discretion release them upon request if their value exceeds the obligation by at least 20%:

The goods remain our property until payment in full is received for all obligations.

Processing or conversion of the goods always takes place for us as manufacturer, but without obligation on our part. If our (joint) title ceases to apply due to incorporation, it is already agreed that the (co-) ownership of the ordering party in the entire object passes to us in proportion to the invoice value. The ordering party shall keep our (joint) property safe for us free of charge.

As ordering party, you are entitled to process reserved goods in the normal course of business. In the event of late payment or the opening of insolvency proceedings, this authorization ends. Pledging or assignment as security is not allowed.

If the ordering party establishes claims for payment from resale of reserved goods, current account balances or other legal reasons such as insurance or unlawful acts, the ordering party already assigns such claims together with all ancillary right to us now by way of security. Specifically, in proportion to the extent that the goods have been processed, combined or mixed, and we have acquired co-ownership in the amount of the invoice value.

In this case, the cession entitles us to a portion of the purchase price amount corresponding to the ratio of the invoice value of the reserved goods to the invoice value of the object. In the event that the ordering party has sold the claim by way of non-recourse factoring, the ordering party assigns the claim taking its place against the factor to us. We accept this assignment. It is understood that we will not collect these claims as long as the ordering party fulfils its payment obligations to us completely and punctually. Furthermore, we authorise the ordering party to collect the claims assigned to us for his own account. However, we are entitled to revoke the collection authorisation, if the purchaser falls into default in payment. In this case, the ordering party authorises us to inform the debtors of the assignment, and we shall collect the claims ourselves. In our common interest, the ordering party is obliged to provide to us on request an exact list of the claims which we are owed. This includes name and address of the creditor, the amount of the individual claims, invoice date, etc. as well as all additional necessary information that we need to enforce the claims assigned to us. The ordering party shall furthermore allow us to check this information.

In the event third parties access reserved goods – especially in the case of attachment – the ordering party must state our ownership and notify us immediately. Please note: If the third party is unable to reimburse the legal or out-of-court expenses incurred in this matter, the ordering party shall bear such costs.

10. Warranty

We guarantee that our product are free of manufacturing and material defects. We grant a two-year warranty on all of our products, starting at the delivery date.

Please keep in mind that we do not guarantee descriptions and technical data in our product information as product characteristics.

Unless: We confirm such expressly in writing. We reserve the right to make design changes in the course of further development and improvement in our joint interest.

Please note further that we provide no warranty coverage in the case of failure to follow our operating and maintenance instructions, or if modifications to our products are made, parts are exchanged or consumables that do not meet our original specification are used. This limitation applies as long as the ordering party can not disprove that the defect has resulted from one of these circumstances.

If an ordering party places an order to manufacture products to his drawings or samples, the ordering party guarantees that this does not infringe the industrial property rights of third parties. If the ordering party specifies the manufacturing method or material, the ordering party assumes liability for the usefulness of the goods.

Please notify us of any deficiencies within 8 days of receipt of the goods. Please notify us in writing immediately upon detection of concealed damage that was not found within this time period despite careful inspection. Note: Unfortunately, we cannot honour any warranty claims if the specified times are not observed.

In your own interest, please note the following limitations of warranty claims: We shall provide replacements for defective goods at our cost; the right of the ordering party to subsequent remedy through correction of defects is, however, excluded. If the subsequent remedy does not occur by appropriate deadline, the ordering party can at their discretion either demand a reduction in the amount of payment or withdraw from the contract. Claims for damages are excluded unless it can be shown that the cause is attributable to intentional or gross negligence, or we have assured in writing certain characteristics of our products as mentioned in par. 2.

11. Liability

Do you have the right to pursue claims for damages from us and our employees due to breach of contractual secondary obligations and from inadmissible acts, if intentional or grossly negligent behaviour is involved. The liability is limited to such damage that could typically be expected under the circumstances known at the time the contract was concluded. Our liability according to the requirements of the German Product Liability Act and manufacturer's liability remain unaffected. Obviously, we ca not assume liability when persons other than the technical personnel of a licensed electrical company install or connect our products.

12. Return shipment

Please understand that we can not exchange or take back goods delivered in accordance with the contract. Should we, as a gesture of good will, deviate from the principle, the following applies: You will send the goods back only after having received a written agreement about return or exchange. Only then can you send back the goods to one of our warehouses at your own risk freight prepaid and free of all charges. Please ensure that the goods are delivered to us in perfect condition – used, previously installed, broken, defective or goods outdated in terms of design can not be accepted. For processing we will charge the ordering party, as cost compensation, 15% of the value of the exchanged or returned good, if no other amount was agreed separately and in writing.

13. Place of jurisdiction

The place of jurisdiction is Saarbrücken.

Copyright declaration

Individual reproduction

e.g. copies and printouts, may only be made for private and other personal use; i.e. individual reproductions of a work may be stored on any data carrier for personal use provided that they are used neither directly nor indirectly for commercial purposes (Section 53 UrhG). Making and distributing further reproductions is only admissible with the express permission of the copyright holder. The texts and illustrations published here are subject to copyright and may not be reproduced, processed, copied or distributed without our prior written approval! Only use of the prepared information for personal purposes and for further processing in the electrical trades is excluded! The users themselves are responsible for their compliance with legal provisions and can be held liable in the event of misuse! We will pursue every instance of copyright infringement!

Subject to printing errors, change and mistakes.

We,
Hager SE
Zum Gunterstal
66440 Blieskastel, Germany

declare under our sole responsibility that all products with the CE marking from the product offering segments

- Distribution boards and switch/protection devices
- Cable routing and room connection systems
- Switch ranges and building automation
- Door communication and security technology
- Energy distributions and switch/protection devices

meet the requirements of the following EU directives and regulations and their corresponding additions where applicable:

- Low-voltage directive 2014/35/EU
- Directive on electromagnetic compatibility 2014/30/EU
- Radio equipment directive 2014/53/EU
- Directive establishing a framework for the setting of ecodesign requirements for energy-related products 2009/125/EU
- Measuring instruments directive 2014/32/EU
- Construction Products Regulation (EU) No. 305/2011
- Directive on the restriction of hazardous substances 2011/65/EU

This declaration certifies that the products comply with the specified directives and regulations but does not guarantee their properties.

The electrical engineer is responsible for ensuring that our products are used as intended and for setting up the system so that it is ready to use in accordance with the relevant installation regulations.

The CE marking is displayed directly on the product, on the packaging or on the outer packaging.

Hager SE acts on behalf of all of its direct and indirect subsidiaries.

Berker's switches – Quality since 1919

B.
Berker

You will find Berker's switches in all the best houses.

Tradition

In 1919 the first rotary toggle left the "Special factory for electrotechnical installation units" owned by brothers Robert and Hugo Berker in Schalksmühle in the Sauerland. The black switch on its white surround was already as attractive and functional as Berker models are renowned for being today.

Standards

Since 2010, the traditional Berker brand has been part of Hager Group. Their shared technological expertise has further strengthened Berker. Today the brand combines established values with contemporary design and technology standards – and thereby continues to set standards again and again in form, function, operability and quality.

Cult

Berker's switches and systems can be found in the most beautiful and exciting buildings in the world. That is because our outstanding design has the same aspirations as good architecture: It is timeless, functional and durable. So architects will always be asking themselves not whether to choose Berker, but which Berker to choose.
